- 1.2 Legal Requirements**
- 1.3 Process for Updating the Housing Element**
- 1.4 Organization of the Housing Element**

1 Introduction

1.1 Purpose and Objectives

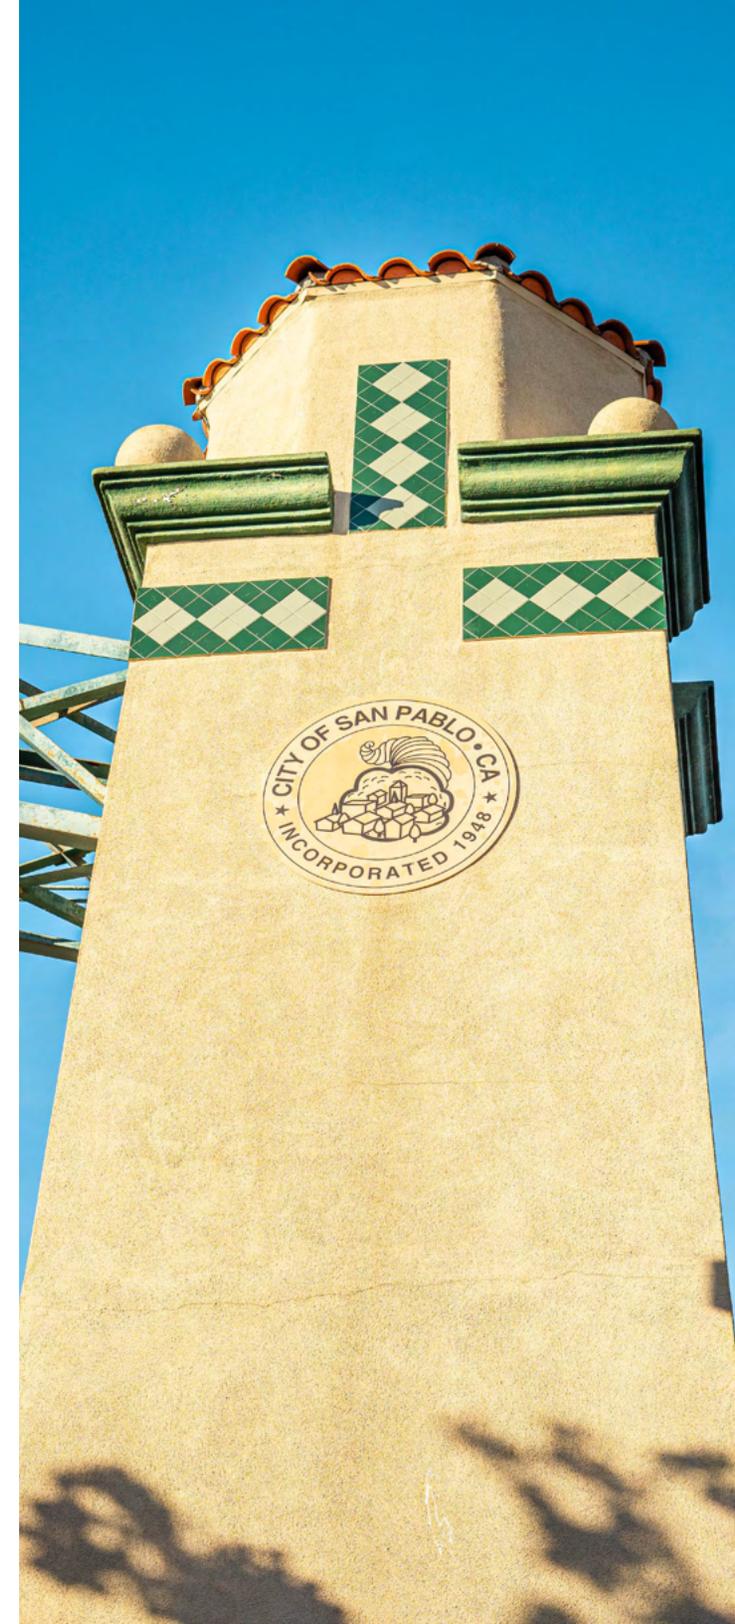

All California cities and counties are required to have a Housing Element included in their General Plan which establishes housing objectives, policies and programs in response to community housing conditions and needs. This Housing Element has been prepared to respond to current and near-term future housing needs in the City of San Pablo (City) and provide a framework for the community's longer-term approach to addressing its housing needs.

The Housing Element contains goals, updated information, and strategic directions (policies and implementing actions) that the City is committed to undertaking.

Housing affordability in Contra Costa County (County) and in the Bay Area as a whole is a critical issue. San Pablo's housing conditions are reflective of many area-wide and even nation-wide trends. Over the past thirty years, housing costs have skyrocketed out of

proportion to many people's ability to pay. Interest rates, construction costs, and high land costs have all increased significantly as well. This has a number of implications as it becomes more difficult for employers to fill vacant jobs, roadways are clogged with workers traveling longer distances into and out of San Pablo and surrounding areas, and many young people, families, longtime residents and people with specialized housing needs face relocation because they cannot find housing they can afford or that meets their needs otherwise (such as downsizing for seniors or rental housing for younger workers).

The Housing Element touches many aspects of community life. This Housing Element builds upon the goals, policies, and implementing programs contained in the City's 2015-2023 Housing Element and other City policies and practices to address housing needs in the community. The overall focus of the Housing Element is to enhance community life, character, and vitality through the provision of adequate housing opportunities for people at all income levels, while being sensitive to the small-town character of San Pablo that residents know and love.

The following are some of the specific purposes of the Housing Element update:

1 **Maintain Quality of Life.** Maintain the high quality of life, small town feel and village character of San Pablo, which make it distinctive and enjoyable to its residents.

2 **Assure Diversity of Population.** Assess housing needs and provide a vision for housing within the City to satisfy the needs of a diverse population.

3 **Provide a Variety of Housing Opportunities.** Provide a variety of housing opportunities proportionally by income to accommodate the needs of people who currently work or live in San Pablo such as teachers, young people just getting started and seniors who want to downsize, who either cannot find homes or cannot afford market rate housing in San Pablo.

4 **Address Regional Housing Needs Allocation (RHNA).** Ensure capacity for the development of new housing to meet the Regional Housing Needs Allocation at all income levels for the 2023-2031 planning period.

5 **Assure a Fit with the Look and Feel of the Community.** Ensure that housing developments at all income levels are sensitive to and fit with adjacent neighborhoods.

6 **Maintain Existing Housing.** Maintain the existing housing stock to assure high quality maintenance, safety, and habitability of existing housing resources.

7 **Address Affordable Housing Needs.** Continue existing and develop new programs and policies to meet the projected affordable housing need of extremely low-, very low-, low- and moderate-income households.

8 **Address the Housing Needs of Special Need Groups.** Continue existing and develop new programs and policies to meet the projected housing needs of persons living with disabilities, seniors, and other special needs households in the community.

9 **Remove Potential Constraints to Housing.** Evaluate potential constraints to housing development and encourage new housing in locations supported by existing or planned infrastructure, while maintaining existing neighborhood character. Develop design directions for multiple family housing to help eliminate barriers to the development of housing for all income levels.

10 **Provide for Special Needs Groups.** Provide for emergency shelter, transitional and supportive housing opportunities.

11 **Provide Adequate Housing Sites.** Identify appropriate housing sites, within specified areas proximate to transportation, shopping and schools, and the accompanying zoning required to accommodate housing development.

1.2 Legal Requirements

State law requires each city and county to adopt a General Plan containing at least seven elements, including a Housing Element. Regulations regarding Housing Elements are found in the California Government Code Sections 65580-65589. Although the Housing Element must follow State law, it is by its nature a local document. The focus of the San Pablo Housing Element is on the needs and desires of San Pablo residents as it relates to housing in the community. Within these parameters, the intent of the element is also to comply with State law requirements.

Unlike the other mandatory General Plan elements, the Housing Element requires periodic updating and is subject to detailed statutory requirements and mandatory review by the State of California Department of Housing and Community Development – HCD. According to State law, the Housing Element must:

- Provide goals, policies, quantified objectives, and scheduled programs to preserve, improve, and develop housing.
- Identify and analyze existing and projected housing needs for all economic segments of the community.
- Identify adequate sites that will be zoned and available within the Housing Element planning period – between 2023 and 2031 – to meet the City’s share of regional housing needs at all income levels.
- Be submitted to HCD to determine if HCD “certifies” the Housing Element is in compliance with state law.

State law establishes detailed content requirements for Housing Elements and establishes a regional “fair share” approach to distributing housing needs throughout all communities in the Bay Area. The law recognizes that in order for the private sector and non-profit housing sponsors to address housing needs and demand, local governments must adopt land use plans and implementing regulations that provide opportunities for, and do not unduly constrain, housing development.

REGIONAL HOUSING NEEDS ALLOCATION (RHNA)

San Pablo’s Housing Element was last updated in 2015 and covered the years 2015-2023. The current Housing Element update reflects the Regional Housing Needs Assessment (RHNA) as determined by the Association of Bay Area Governments (ABAG) for the Sixth Cycle Housing Element update, covering the years 2023-2031. The RHNA is a State-mandated process intended to ensure every city and county plans for enough housing production to accommodate future growth. The State of California Housing and Community Development Department (HCD) assigns each region of the state an overall RHNA allocation. For the nine-county Bay Area region, ABAG then

distributes a “fair share” portion of that allocation to each local jurisdiction. Each city and county must then identify adequate sites with a realistic capacity for development sufficient to meet this RHNA.

For the 2023-2031 period, San Pablo must identify sites sufficient to accommodate 746 new housing units between 2023 and 2031, with a specific number of units designated as affordable to each income category, as shown in **Table 1-1**.

A total of 173 units must be affordable to households making less than 50 percent of area median income (AMI), 100 units must be affordable to households making between 50 and 80 percent of AMI, 132 units must be affordable to households making between 80 and 120 percent of AMI, and 341 units must be affordable to households making over 120 percent of AMI. The RHNA does not specifically break down the need for extremely-low-income households. As provided by State law, the housing needs of extremely-low-income households, or those making less than 30 percent of area median income (AMI), is estimated as 50 percent of the very-low-income housing need. More detail on the RHNA allocation process is described in Chapter 3 as well as in Appendix C.

Table 1-1: San Pablo Regional Housing Needs Assessment, 2023-2031

INCOME LEVEL	AMI	NEEDED UNITS	PERCENT OF NEEDED UNITS
Very-Low-Income	0-50%	173	23.2%
Low-Income	51-80%	100	13.4%
Moderate-Income	81-120%	132	17.7%
Above-Moderate-Income	>120%	341	45.7%
Total		746	100.0%

HOUSING ELEMENT LAW: STATE CHANGES

Various amendments have been made to Housing Element law since adoption of the City's current Housing Element, especially since 2017. Some of the key changes for 6th cycle RHNA and Housing Element update include:

- Assembly Bill (AB) 72 (2017) provides additional authority to State HCD to scrutinize housing elements and enforce housing element noncompliance and other violations of state housing laws.
- AB 879 (2017) and AB 1397 (2017) require additional analysis and justification of sites listed on a local government's housing sites inventory, additional explanation of the realistic capacity of those listed sites, and further scrutiny of governmental and nongovernmental constraints that limit the production of housing.
- AB 686 (2018) requires local governments to Affirmatively Further Fair Housing (AFFH) by including in revised housing elements (1) an assessment of fair housing; (2) equitable distribution of housing to meet the needs of households at all income levels and dismantle segregated living patterns with integrated and balanced living patterns; (3) policies and programs that address fair housing barriers and promote fair housing patterns; and (4) a comprehensive, collaborative, accessible, inclusive, and equity-driven public engagement approach.
- AB 215 (2021) extends the housing element compliance review process by requiring local governments to make draft housing elements available for public review prior to submittal to State HCD rather than conducting concurrent review. The draft must be made publicly available for at least 30 days, and the local government

must consider and incorporate public comment for at least 10 business days, before sending the draft to State HCD. AB 215 also increased State HCD's review period of the first draft element submittal from 60 to 90 days and within 60 days of its receipt for a subsequent draft amendment or adoption. However, the January 31, 2023, statutory deadline remains the same, even as these new requirements have significantly added to the time a city needs to complete the overall housing element update process.

- AB 1398 (2021) revises the consequences for local governments that miss the deadline for housing element adoption. Local governments must complete rezoning no later than one year from the statutory deadline for adoption of the housing element if that jurisdiction fails to adopt a housing element that State HCD has found to be in substantial compliance with state law within 120 days of the statutory deadline. The City retains the three-year rezoning period if the housing element is adopted within 120 days of the statutory deadline.
- AB 1304 (2021) clarifies that a public agency has a mandatory duty to comply with existing Housing Element Affirmatively Furthering Fair Housing (AFFH) requirements. AB 1304 revises the items to be included in AFFH analysis and requires that analysis to be done in a specified manner. In addition, the housing inventory must analyze the relationship of the sites identified in the inventory to the city's duty to affirmatively further fair housing.

The contents of this Housing Element comply with these amendments and all other requirements of Housing Element law.

1.3 Process for Updating the Housing Element

The 2023-31 Housing Element is a comprehensive update to the Housing Element of the General Plan, undertaken to accommodate the City's share of the regional housing need and address new State law. To help maintain internal consistencies as required by State law, the Housing Element was prepared as part of a targeted update of the General Plan that also involves a "tune-up" of the Land Use, Safety, and Public Health Elements and preparation of a Corridor Plan for Rumrill Boulevard, designated as a Priority Development Area (PDA). Key project objectives include stimulating housing production, including higher density infill development, "missing middle" housing options, and accessory dwelling units (ADUs) in single-family areas, and addressing emerging trends and new State law. The effort builds on and incorporates the City's 2020 Affordable Housing Strategy, that identifies actions to increase new housing options, improve the quality of existing housing, and preserve long-term housing affordability in the community, particularly for lower income households in San Pablo.

AFFORDABLE HOUSING STRATEGY

The City of San Pablo prepared a citywide Affordable Housing Strategy (AHS) in 2020 to identify policies and strategies that will increase new housing options, improve the quality of housing, and preserve long term housing affordability, particularly for lower income households in San Pablo. The AHS is intended to serve as a high-level blueprint that sets policy priorities to guide the City of San Pablo's actions over the next 10 years. The Implementation Plan is organized around seven core goals, ranging from support of new and existing homeowners, support and protection of existing tenants, improving housing quality and safety, and preservation of existing affordable housing.

COMMUNITY INVOLVEMENT

Community involvement is an integral component of the Housing Element process. The City of San Pablo employed a range of public outreach and engagement strategies to solicit meaningful community input that has informed the 2023-2031 Housing Element. These strategies included community-wide surveys, virtual forums, focus group discussions, stakeholder interviews, and pop-up outreach at popular locations around town. A summary of these engagement activities is described below:

- **Community Planning Survey** - In order to gather community input to inform updates to the General Plan and Housing Element, a citywide survey was conducted from December 28, 2021 to February 21, 2022. The survey provided opportunities for residents, business owners, and people who work or go to school in San Pablo to help identify appropriate locations for housing as well as to provide input on key policy topics. The survey was also promoted via the City's website, email blasts to community members, an article in The Richmond Standard, and advertisements in the El Portal newsletter and on Facebook. Participants

were offered the chance to win one of three \$100 Visa gift cards for participating. In total, 262 people participated and respondents strongly supported adding new, higher density housing along the community's major arterial corridors, with 100 percent of respondents supporting new apartments and townhomes along the Rumrill Boulevard corridor in the southeastern part of the city. Housing affordability was identified as the most pressing concern across all respondents and many respondents underscored that all new housing that is developed must include units affordable to working class residents. Several respondents emphasized the need to provide services for the unhoused in the write-in comments.

- **Housing Focus Group** - A focus group discussion with affordable housing developers and service providers was conducted in January 2022 to learn more about opportunities and challenges from the developer perspective, get input on housing needs and constraints, and discuss what the City can do to facilitate the production of affordable housing. Participants included representatives from Novin Development Corporation, Habitat for Humanity East Bay Silicon Valley, Richmond Neighborhood Housing Service, Inc, and the San Pablo Economic Development Corporation. Participants identified several challenges for both market rate and affordable housing and suggested potential avenues for addressing them, which are reflected in the Housing Action Plan (Chapter 4). Key strategies among these include to incentivize small lot consolidation in view of the lack of larger vacant land and the prevalent pattern of small parcels in San Pablo; removal of overly restrictive and complex zoning standards, particularly along the 23rd Street Corridor; and strategies to support the financial feasibility of housing projects.

Trifold survey to gather community feedback.

- **Housing Survey** - An online survey in English and Spanish was distributed to the community online from June to mid-July 2020 to gather feedback on the community's key issues with housing and their priorities for future housing-related work. A total of 198 survey responses were collected, including 173 responses from the English version of the survey and 25 responses from the Spanish version of the survey. Participants noted interest in learning about assistance for first-time homebuyers and resources for homeowners for rehabilitation, repair, and maintenance. About half of participants expressed that their home is safe and in good condition, and 95 percent of participants noted homeowners/landlords keeping properties in good condition are very important to them.
- **Targeted Stakeholder Interviews** - Strategic Economics interviewed various public agencies, nonprofit organizations, and developers to gather information on affordable housing needs and resources in San Pablo/Contra Costa County, as well as opportunities and constraints to residential development in San Pablo/Contra Costa County. In total, nine stakeholder

interviews were held. Participants included representatives from Housing Authority of Contra Costa County (HACCC), Association of Bay Area Governments (ABAG), Bay Area Legal Aid, East Bay Housing Organizations (EBHO), Related, West Development, Community Housing Development Corporation (CHDC) of North Richmond, EAH Housing, and Resources for Community Development (RCD). Participants noted that though Contra Costa County has historically been a more “suburban” County, it still faces many “urban” problems such as a shortage of housing, affordability issues, and homelessness. There is opportunity for San Pablo to develop small-scale, missing middle infill development.

- **Affordable Housing Forums** - The City of San Pablo, in collaboration with Strategic Economics, the San Pablo Economic Development Corporation, the Housing Authority of Contra Costa County (HACCC), and Contra Costa County, hosted two virtual “Affordable Housing Forums” open to the San Pablo community, in both English and Spanish. The Affordable Housing Forums served to inform San Pablo residents about existing and upcoming resources/ programs available to them from the City, County, Housing Authority and State, as well as provide San Pablo residents the opportunity to ask questions about existing and upcoming programs and initiatives. Participants were curious about project based-vouchers, funding availability to build more subsidized units, Senate Bill 35, and homelessness.
- **Public Review Period** - The First Draft Housing Element was released for a 30-day public review period on August 19, 2022. Public hearings for review of the Draft Housing Element were held before the Planning Commission on August 30th and before the City Council on September 19th. During the public comment period, two comment letters were received – one from East Bay

Municipal Utilities District and one from YIMBY, which generally expressed support for the content of the Draft.

- **Decision-Maker Review** - Following review of the Draft by the California Department of Housing and Community Development (HCD), public hearings will be scheduled for review and adoption of the Housing Element.

1.4 Organization of the Housing Element

The Housing Element is an integrated part of the General Plan published under separate cover. It is an eight-year plan that is updated more frequently than other General Plan elements in order to ensure its relevancy and accuracy. The Housing Element consists of the following major components organized as described below:

- **Chapter 1 - Introduction:** Provides an introduction to the purpose of the document and the legal requirements for a Housing Element, together with an overview of the community and the community involvement process.
- **Chapter 2 - Community Profile:** Documents population characteristics, housing characteristics, and current development trends to inform the current housing state of San Pablo and to identify community needs.
- **Chapter 3 - Adequate Sites for Housing:** An inventory of adequate sites suitable for construction of new housing sufficient to meet needs at all economic levels.
- **Chapter 4 - Housing Action Plan:** Articulates housing goals, policies, and programs to address the City’s identified housing needs, including those of special needs groups and the findings of an analysis of fair housing issues in the community. This Housing Element identifies a foundational framework of five overarching goals

to comprehensively address the housing crisis and needs of San Pablo residents.

- **Appendix A - Sites Inventory:** Summarizes the City’s ability to accommodate the RHNA on available land, and the selection of sites in light of Affirmatively Furthering Fair Housing (AFFH) requirements.
- **Appendix B - Housing Needs Assessment:** Presents community demographic information, including both population and household data, to identify San Pablo’s housing needs.
- **Appendix C - Constraints Analysis:** Includes an analysis of constraints to housing production and maintenance in San Pablo. Constraints include potential market, governmental, and environmental limitations to meeting the City’s identified housing needs. In addition, an assessment of impediments to fair housing is included, with a fuller analysis of actions needed to affirmatively further fair housing included in a separate appendix.
- **Appendix D - Fair Housing Assessment:** Identifies fair housing issues and solutions to meet San Pablo’s AFFH mandate.
- **Appendix E - Accomplishments of the 2015-2023 San Pablo Housing Element:** Summarizes the City’s achievements in implementing goals, policies, and actions under the previous Housing Element.

2

Community Profile

- 2.1 Location and Context
- 2.2 Population Characteristics
- 2.3 Housing Market Characteristics
- 2.4 Recent Development Trends

2 Community Profile

With a compact area of approximately three-square miles and excellent access to the regional transportation network, San Pablo is a thriving community with a diverse population and relatively affordable housing costs compared to the wider Bay Area. However, as a largely built out city with established, small-lot single family neighborhoods, addressing local housing needs will require a focus on diversifying the range of housing options available in the community, facilitating redevelopment along older commercial corridors, and ensuring that people of all ages and incomes can grow up and grow old in San Pablo.

This community profile documents population characteristics, housing characteristics, and current development trends to identify community housing needs as well as issues and opportunities related to housing production.

2.1 Location and Context

LOCATION AND ACCESS

The City of San Pablo is situated within the western portion of Contra Costa County, inland from the eastern shore of San Pablo Bay. As shown on Map 2-1, the city is an enclave, surrounded by the City of Richmond. Interstate 80 passes through the eastern portion of the San Pablo in a north-south direction, and the city is conveniently located minutes driving distance away from the Bay Area cultural centers of Berkeley, Oakland, and San Francisco. Prominent geographic features in the area include ridges of the Wildcat Canyon Park, which forms a backdrop to the city to the east, and the waters of San Pablo Bay to the northwest.

San Pablo is served by six regional bus routes that provide connections to BART (Bay Area Rapid Transit) and Amtrak rail stations as well as to the Richmond Passenger Ferry Terminal. BART provides service to San Francisco as well as Contra Costa, Alameda, San Francisco, and San Mateo counties from the Richmond BART/Amtrak station. Amtrak offers service to cities across California, including San Jose, Santa Barbara, Los Angeles, and San Diego. Regional and local bus services in the City of San Pablo are provided by the Alameda-Contra Costa Transit District (AC Transit) and Western Contra Costa County Transit (WestCAT), while heavy and commuter rail services are provided by the BART and Amtrak via the Richmond station about 1.5 miles south of San Pablo. The Richmond Ferry also provides regional service between the Richmond Ferry Terminal and downtown San Francisco. AC Transit Route 74 connects the Richmond Ferry Terminal to several bus stops in San Pablo. Additionally, the City also has designated truck routes to reduce truck through traffic from impacting residential streets by restricting certain trucks to Routes of Regional Significance.

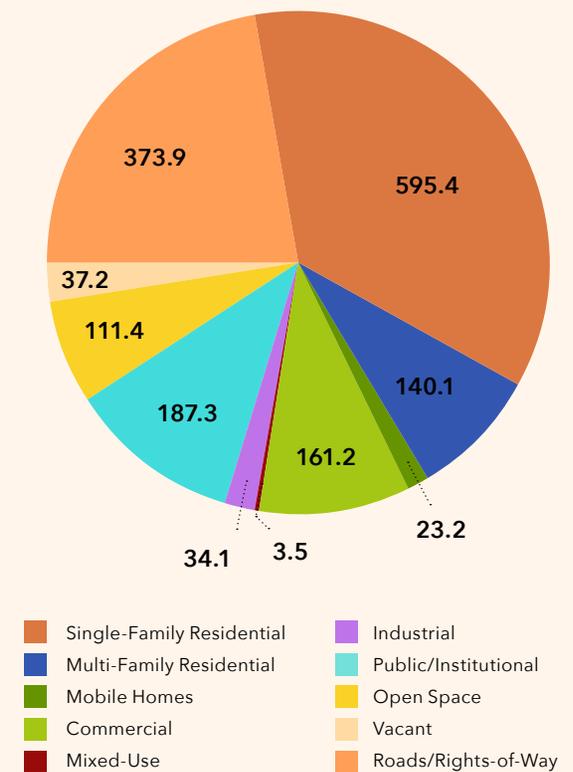

EXISTING LAND USE PATTERN AND USES

Like many Bay Area cities: San Pablo is nearly fully developed with little or no land separating City limits from adjacent urban development. Within the city limit there are 1,667.3 acres (2.6 square miles) of land, including residential, commercial, and industrial developments, as well as public facilities, including parks and schools. It is a largely built-out city with established, small-lot single-family neighborhoods.

The City of San Pablo is divided by Interstate 80 into two sections – a western, larger section and an eastern, smaller section. The two sections are linked only by San Pablo Dam Road. The city’s commercial and retail corridors are located in the center of the planning area, along San Pablo Avenue, 23rd Street,

and El Portal Drive. Surrounding these corridors are residential neighborhoods and schools. Industrial uses are located to the west of the city, between Giant Road and the railway tracks. This area is currently occupied by a mix of warehouses, salvage yards, and wholesalers. Due to the extent of urban development in the city, open space and parkland space remain scarce in San Pablo. The largest public park is Davis Park, but large recreation areas can also be found within the Contra Costa College campus. There is also open space located in the eastern portion of the city, east of San Pablo Dam Road, on the sloped hills of the Hasford Heights neighborhood.

 Urban and Regional Planners

Single-family residential is the most prominent existing land use. It occupies 35.7 percent (595.4 acres) of the incorporated land. In contrast, multi-family housing accounts for 8.4 percent (140.1 acres) of land within the city. In total, residential land accounts for almost half the incorporated land at 54.5 percent, or 758.7 acres. Another prominent land use in the city is land for public/government purposes, which accounts for 11.2 percent (187.3 acres), mostly constituted by land for schools, including Contra Costa College, which is the largest single land use in the city. Commercial land uses account for 9.7 percent of city land area and are generally confined to the city's major corridors, while open space accounts for 6.7 percent (111.4 acres) of land within the city, almost half of this is actually in the St. Joseph Cemetery. About 2.0 percent (34.1 acres) of land within the city limit is currently in industrial use, while mixed-use accounts for only 0.2 percent (3.5 acres) of city land. Only 2.2 percent (37.2 acres) of land within the city is vacant, and many of the larger vacant lots are found on the sloped hills of the Hasford Heights neighborhood, located in an Alquist-Priolo earthquake fault zone. Lastly, land designated to street rights-of-way constitutes 22.4 percent (373.9 acres) of land within the city.

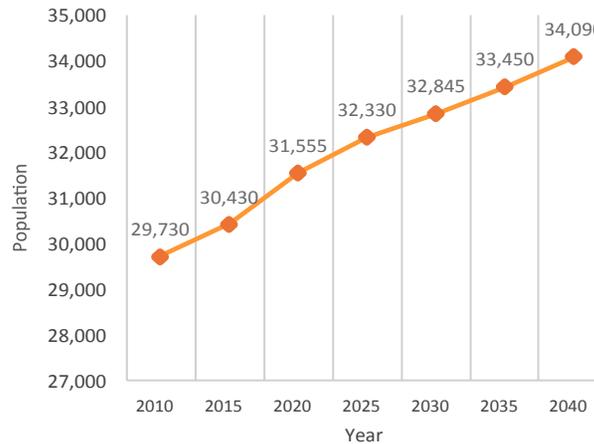

2.2 Population Characteristics

According to the California Department of Finance (DOF), the total population of the City of San Pablo in 2020 was 31,555, an increase of 7.8 percent since 2010 (29,730). The Association of Bay Area Governments (ABAG) projects that the population of San Pablo will increase approximately 10 percent to 34,090 by 2040, as shown on **Chart 2-2**.

ETHNICITY

Table 2-1 presents the racial and ethnic composition of the City of San Pablo's population in 2000, 2010, and 2019, as reported in the ABAG-MTC data sets, which are based on the U.S. Census (for 2000 and 2010) and on American Community Survey (ACS) five-year

Chart 2-2: San Pablo Projected Population (2010-2040)

Source: Association of Bay Area Governments, Projections 2040

estimates (for 2019). Since 2000, San Pablo has seen a large increase in its Hispanic or Latinx population from 46.3 percent to 60.1 percent, which remains the city's largest single racial or ethnic group. While both the non-Hispanic White and non-Hispanic Black or African American populations have decreased both in their

total numbers and in their share of the city's overall population. Nevertheless, compared to both the county and the region, the city still has a significantly higher share of Hispanic or Latinx residents. Overall, San Pablo has a much larger non-White population than compared to its surrounding areas.

AGE

Current and future housing needs are usually determined in part by the age characteristics of a community's residents. Each age group has distinct lifestyles, family type and size, incomes, and housing preferences. Evaluating the age characteristics of a community is important in determining its housing needs.

According to the 2019 ACS five-year estimates, the median age in San Pablo is 33.5, which is 6.2 years younger than in Contra Costa County where median age is 39.7. The difference in median age suggests that San Pablo still has a younger population than the overall population of Contra Costa County. Despite this, the older age groups in San Pablo are growing to hold a larger share of the overall population; 8.7 percent of the population was age 65 and over in 2000 compared to 10.1 percent in 2019, as shown in **Table 2-2**.

Table 2-1: Population by Race, City of San Pablo (2000-2019)

GENDER

As of 2021, there are 31,773 residents in San Pablo; of this, 50.9 percent are male and 49.1 percent are female. Female-headed households make up 20.8 percent of all households in San Pablo, nearly double the amount of county female-headed households (12.2 percent). Female-headed households tend to be renter-occupied, and those with children under the age of 18 are more likely to live below the poverty line. In San Pablo, female-headed households represent about 17.7 percent of owner-occupied households and 22.7 percent of renter-occupied households. Regardless of gender, the proportions of single-parent headed households is higher in the city than in the county or the region.

INCOME

Household income is one of the most significant factors affecting housing choice and opportunity. Income largely determines a household’s ability to purchase or rent housing. While higher-income households have more discretionary income to spend on housing, lower- and moderate-income households are limited in the range of housing they can afford. Typically, as household income decreases, cost burdens and overcrowding increase.

For the purpose of evaluating housing affordability, housing need, and eligibility for housing assistance, income levels are defined by guidelines adopted each

year by the California State Department of Housing and Community Development (HCD). For Contra Costa County, the applicable Area Median Income (AMI) for a family of four in 2021 is \$125,600. This is an increase of 34.3 percent from the 2014 median income of \$93,500. HUD has defined the following income categories for Contra Costa County, based on the median income for a household of four persons for 2021:

- Extremely low-income: 30 percent of AMI and below (\$0 to \$41,100)
- Very low-income: 31 to 50 percent of AMI (\$41,101 to \$68,500)
- Low-income: 51 to 80 percent of AMI (\$68,501 to \$109,600)
- Moderate-income: 81 to 120 percent of AMI (\$109,601 to \$150,700)
- Above moderate-income: 120 percent or more of AMI (\$150,701 or more)

The prevalence of extremely low-income households in San Pablo stands out. In the city, 28.5 percent of households make less than 30 percent of AMI, qualifying them as extremely low-income. This is compared to 13.5 percent of households in Contra Costa County and 14.7 percent in the Bay Area overall. Very low-income households also account for a substantial share of the population in San Pablo, representing 20.8 percent of all city households, compared to 11.3 percent in Contra Costa County and 10.9 percent in the Bay Area. Yet, from 2015-2020, no units affordable of very low-income households were permitted or constructed in San Pablo. The Housing Element will need to focus specifically on providing increased housing at the very low- and extremely low-income levels for the upcoming housing cycle.

EDUCATIONAL ATTAINMENT

Overall, San Pablo’s workforce has lower levels of educational attainment than Contra Costa County as a whole, shown in **Table 2-3**. In 2019, the share of the population age 25 and over who held a high school diploma or higher was 67.2 percent in San Pablo compared to 89.5 percent in Contra Costa County. Only 13.1 percent of the population in San Pablo holds a bachelor’s degree or higher, compared to 42.5 percent in Contra Costa County. Additionally, the share of the population with a bachelor’s degree or higher has grown much more slowly in San Pablo than in the county (17.1 percent growth compared to 28.1 percent growth). Over one fifth of the City of San Pablo’s population in 2019 (21.3 percent) had less than a ninth-grade education level. However, San Pablo also saw significant growth in the shares of its population both who had achieved some college education though lacked a degree (34.7 percent growth) and those who had earned an associate degree (32.3 percent), indicating progress towards increased educational attainment. In these categories, San Pablo grew faster than Contra Costa County.

Table 2-3: Educational Attainment Among Those Age 25 Years and Over, 2010 and 2019

	2000		2010		PERCENT CHANGE
	NUMBER	PERCENT	NUMBER	PERCENT

SPECIAL NEEDS GROUPS

Certain groups of the population encounter finding adequate, affordable housing more difficult due to special circumstances. These needs may be related to one’s employment and income, family characteristics, disability and household characteristics, or other factors. These households may require special accommodations when finding housing. The following list is based on a review of ACS 2019 five-year estimates for the purpose of identifying groups with particular housing needs.

- **Extremely-Low-Income Residents.** Non-Hispanic Black or African American households, which make up 10.7 percent of the city’s population, are disproportionately more likely to be extremely low-income or live below the poverty line than other racial/ethnic groups. Overall, San Pablo has a higher poverty rate (16.3 percent) than the county (8.7 percent).
- **Female-headed Households.** Female-headed families, including those with children, are identified as a special needs group, because they are more likely to be low-income and face difficulty in finding affordable housing. Female-headed households represented about 17.7 percent of owner-occupied households and 22.7 percent of renter-occupied households.
- **Elderly Residents.** Elderly residents have relatively lower incomes than the overall city population. Elderly renters are particularly vulnerable, as they tend to live on fixed incomes and nearly three-quarters of elderly renters are considered extremely low-income.
- **Persons with Disabilities.** In San Pablo, there is a similar proportion of persons with a disability to the county and region. Most residents with a developmental disability live in the home of a parent/family/guardian and are over 18 years old.

- **Large Families.** At 22.3 percent of all households, the city has a much higher proportion of large-family households than the county (12.4 percent) and the Bay Area region (10.8 percent). However, these households tend to be less cost-burdened and have relatively higher incomes than other San Pablo households.
- **Persons Experiencing Homelessness.** Recent point-in-time counts indicate a homeless population of 67 persons in San Pablo and 2,295 persons in the county. Since there are no shelters available in the city, all individuals experiencing homelessness in San Pablo are considered unsheltered. The city contains a higher proportion of unsheltered people than does the county.
- **Farmworkers.** A similar proportion of the labor force work in the “agriculture, forestry, fishing and hunting” industry in the city (0.9 percent), the county (0.5 percent), and the Bay Area (0.7 percent), although this is not exactly equivalent to “farmworkers.” While there are a number of students considered migrant workers in the Bay Area, there are none in the city or county.

2.3 Housing Market Characteristics

EXISTING TYPOLOGIES

Single-family residential is the most prominent existing land use within City limits. In contrast, land for multi-family housing accounts for 8.4 percent (140.1 acres) of land within the City, and land for mobile homes makes up another 1.4 percent (23.2 acres). “Missing middle” housing (multi-family housing types that are compatible in scale with single-family neighborhoods), accessory dwelling units (ADUs), and higher density infill development are opportunities to add small increments of housing in San Pablo’s single-family neighborhoods.

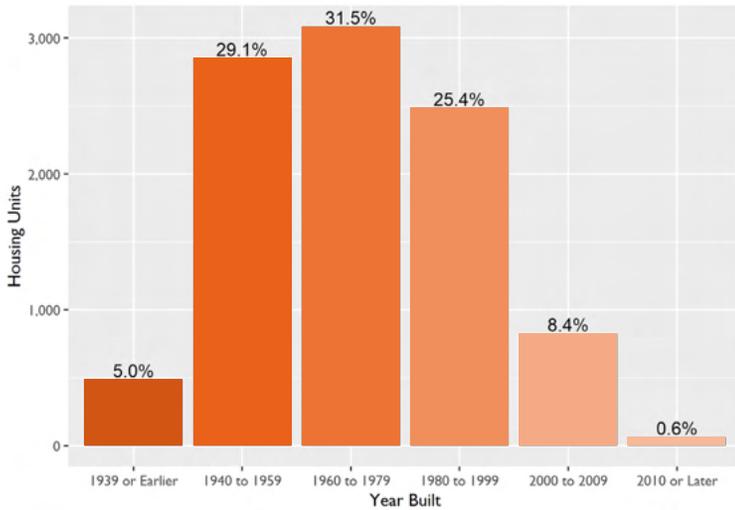

Table 2-4: Existing Typologies in San Pablo

GENERAL PLAN LAND USE CATEGORY	CITY OF SAN PABLO		SPHERE OF INFLUENCE		TOTAL PLANNING AREA	
	ACRES	PERCENT	ACRES	PERCENT	ACRES	PERCENT
Residential	758.7	45.5%	154.0	67.7%	912.7	48.2%
Single-Family Residential	595.4	35.7%	151.6	66.6%	747.0	39.4%
Multi-Family Residential	140.1	8.4%	2.4	1.0%	142.4	7.5%
Mobile Homes	23.2	1.4%	0	0.0%	23.2	1.2%

Chart 2-4: San Pablo Household Tenure, 2000 - 2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, Census 2000 SF1, Table H04; U.S. Census Bureau, Census 2010 SF1, Table H04; U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25003)

EXISTING HOUSING STOCK

The condition of the housing stock, including the age of buildings and the number that may be in substandard condition, is also an important consideration in a community’s housing needs. In San Pablo, about 65.6 percent of the housing stock was constructed prior to 1980 and is over 40 years old. About 9.0 percent of the housing stock has been constructed since 2000, with only 0.6 percent constructed since 2010. See **Chart 2-3** for the age of San Pablo’s housing stock as of 2019.

TENURE

Since 2000, the percentage of renter-occupied households in San Pablo has continued to rise. Although the proportion of renters and owners was nearly equivalent in 2000 (50.9 percent and 49.1 percent, respectively), approximately 61.9 percent of all households were occupied by renters in 2019, see **Chart 2-4**. In addition, households occupied by renters have increased in both proportional and absolute numbers while owner-occupied households have done the opposite. This may be due to the conversion of formerly owner-occupied units to rental units and the lack of development of additional owner-occupied housing. San Pablo’s household tenure differs from patterns seen in the county and larger Bay Area. While both Contra Costa County and the Bay Area see ownership rates exceeding 50 percent of the housing stock, this is not the case in San Pablo.

AFFORDABILITY

California State Department of Housing and Community Development (HCD) has estimated the 2021 Contra Costa County AMI (Area Median Income) to be \$125,600, which is about a 34.3 percent increase from the 2014 AMI estimate of \$93,500. Housing costs are relatively lower in the city than in the county and Bay Area, but there remains a significant affordability gap for lower-income households. Nearly half of all residents experience some level of cost burden,

Table 2-5: City of San Pablo Housing Affordability by Income Group

HOUSEHOLD SIZE	AMI LIMITS ¹	AFFORDABLE MONTHLY PAYMENT ²		HOUSING COSTS		MAXIMUM AFFORDABLE PRICE	
		RENTER	OWNER	UTILITIES ³	TAXES & INSURANCE ⁴	RENTER	OWNER ⁵
Extremely Low-Income (<30% AMI)

4 Person (3 Bedroom)	\$150,700	\$3,768	\$4,395	\$332	\$1,538	\$3,435	\$666,235
5 Person (4 Bedroom)	\$162,750	\$4,069	\$4,747	\$383	\$1,661	\$3,686	\$713,244

1. AMI limits based on 2021 HCD State Income Limits for Contra Costa County, other assumptions are derived from Zillow estimates (as of October 4, 2021) and the National Association of Realtors. The 2021 Contra Costa County AMI is \$125,600.
2. Affordable monthly payment for renters and owners is assumed to be one-twelfth of 30% of median income applicable for the number of bedrooms. The exception is moderate-income owners, whose affordable payment is assumed to be one-twelfth of 35% of median income applicable for the number of bedrooms as specified by HCD, pursuant to HSC 50052.5(b)(4).
3. Utilities are estimated according to the 2021 Contra Costa County Housing Authority Utility Allowance Schedule. Estimates are based on the combined average cost of gas and electric heating, cooking and water heating, as well as other electric, water, trash collection, sewer, air conditioning, refrigeration and range/microwave across all unit types [i.e., elevator/high-rise/apartment/walk-up (multi-family), detached house/single family dwelling, mobile/manufactured home, row house/townhouse & semi-detached/duplex]. Costs are assumed equivalent for owners and renters.
4. Taxes and insurance are assumed to be 35% of monthly affordable housing costs for owners.
5. Assumed 30-year amortization, 2.82% interest rate, 6.0% down payment and closing costs equal to 2% of the sale price.

Source: HCD State Income Limits, 2021; Contra Costa Housing Authority Utility Allowance Schedule, 2021; Zillow Mortgage Rates, October 2021; National Association of Realtors Research Group, Downpayment Expectations & Hurdles to Homeownership, April 2020; Dyett & Bhatia, 2021

although lower-income households and renters see higher than average rates. Given the prevailing rent and home sales prices in the city, lower-income households cannot afford to own a home at the appropriate size, while extremely low-income households cannot afford to rent without subsidy in the city. Further, several assisted (subsidized) housing units are at risk of conversion to market rate housing during the next 10 years, including 81 units at high risk as identified by the California Housing Partnership. Given that preservation costs are lower than replacement costs, the updated Housing Element should include programs aimed at facilitating preservation and rehabilitation to maintain affordability.

2.4 Recent Development Trends

During the 2010 to 2020 period, San Pablo saw very little housing development activity. As shown in **Table 2-6**, the number of single-family homes marginally increased during this period, although the number of multifamily housing units has increased more significantly. The number of total units decreased by 0.3 percent over the period, driven exclusively by the loss of mobile homes. The number of mobile homes decreased by 21.4 percent, representing a loss of 104 units.

Between 2015 and 2021, the City issued permits for 99 new housing units, including 12 low-income units, 45 moderate-income units, and 42 above moderate-income units. No permits were issued for very low-income units. For much of the Fifth Cycle, progress toward RHNA has lagged. Development activity has picked up more recently, however, and there is a robust pipeline of residential projects proposed or under review. In total, 395 new units are anticipated from projects that are pending or recently approved but not yet under construction. This includes 59 very low-income units, 154 low-income units, and 174 above moderate-income units.

Table 2-6: San Pablo Housing Type Trends, 2010 - 2020

BUILDING TYPE	2010		2020		PERCENT CHANGE (2010 - 2020)

3

Housing Resources

3.1 Land Resources

3.2 Administrative Resources

3.3 Financial Resources

3 Housing Resources

The Housing Element is a component of the General Plan which guides planning for housing to meet the current and projected needs of all households in the community. This section summarizes the various resources available for the preservation, improvement, and development of housing in San Pablo. The analysis includes an evaluation of the availability of land resources available to accommodate the City's share of the region's future housing needs, as well as the administrative resources available to assist in implementing the City's housing programs and policies, and the financial resources available to support housing activities.

3.1 Land Resources

Government Code (GC) Section 65583(a)(3) requires local governments to prepare an inventory of land suitable for residential development, including vacant sites and sites with the potential for redevelopment. The inventory must identify specific parcels that are available for residential development and be accompanied by an analysis of public facilities and services capacity to serve the identified sites.

Further, the inventory must have sufficient capacity to accommodate the jurisdiction's share of the regional housing need, as determined by applicable the metropolitan planning organization.

This section presents San Pablo's inventory, identifying sites available for residential development and their realistic capacity for housing. It identifies planned and recently approved residential projects in the city and it details the process for identifying suitable sites, the methodology for calculating capacity, and the availability of public facilities and services available to serve new housing

LEGAL REQUIREMENTS FOR INVENTORY AND SITES

State law requires that a community identify an adequate number of sites to accommodate and facilitate production of the City's regional share of housing. To determine whether the City has sufficient land to accommodate its share of regional housing needs for all income groups, the City must identify "adequate sites." Land considered suitable for residential development includes the following:

- Vacant sites zoned for residential use.
- Vacant sites zoned for nonresidential use that allow residential development.
- Residentially zoned sites that are capable of being developed at a higher density (non-vacant sites, including underutilized sites).
- Sites owned or leased by a city, county, or city and county
- Sites zoned for nonresidential use that can be redeveloped for residential use and a program is included in the Housing Element to rezone the site to permit residential use within three years of adoption.

Further, State law stipulates criteria for the adequacy of sites included on the inventory, including that they be zoned to accommodate housing, have appropriate development standards, and be served by public facilities as needed to facilitate the development of a variety of housing products suitable for all income levels. Vacant sites included on prior inventories in two or more consecutive planning periods and non-vacant sites included on the prior period inventory cannot be carried forward to the current planning period to satisfy the need for housing affordable to lower income households unless they are rezoned to allow residential use by right at the default density for the jurisdiction, which in San Pablo's case is 30 dwelling units per acre.

REGIONAL HOUSING NEEDS ALLOCATION

The Regional Housing Needs Allocation (RHNA) is the total number of new housing units that the City must plan to accommodate in the 2023-31 planning period. RHNA is split into four categories representing different levels of affordability, based on median income level in the county. RHNA is established through the following process: the California Department of Housing and Community Development (HCD) first determines the estimated need for new housing in each region of California for the planning period, based on population projections and other factors including rates of vacancy, overcrowding, and cost-burden. Each regional planning agency then allocates a target to each city or town within its jurisdiction, considering factors such as access to jobs, good schools, and healthy environmental

conditions. For the San Francisco Bay Area, the Bay Area Association of Governments (ABAG) developed and refined a methodology for 2023-31 RHNA allocations with input from local jurisdictions. The ABAG Regional Council adopted the 6th Cycle Final RHNA Allocation, Methodology, and Regional Housing Needs Determinations on December 16, 2021.

San Pablo’s Regional Housing Needs Assessment (RHNA) allocation for the 2023-31 planning period has been determined by ABAG to be 746 housing units, including 173 units for very low-income households, 100 units for low-income households, 132 units for moderate-income households, and 341 units for above moderate-income households (**Table 3-1**). AB 2634 mandates that localities calculate the subset of the very low-income regional need that constitutes the communities need for extremely low income housing.

As an alternative to calculating the subset, local jurisdictions may assume that 50 percent of the very low income category is represented by households of extremely low income (less than 30 percent of the Area Median Income or AMI).

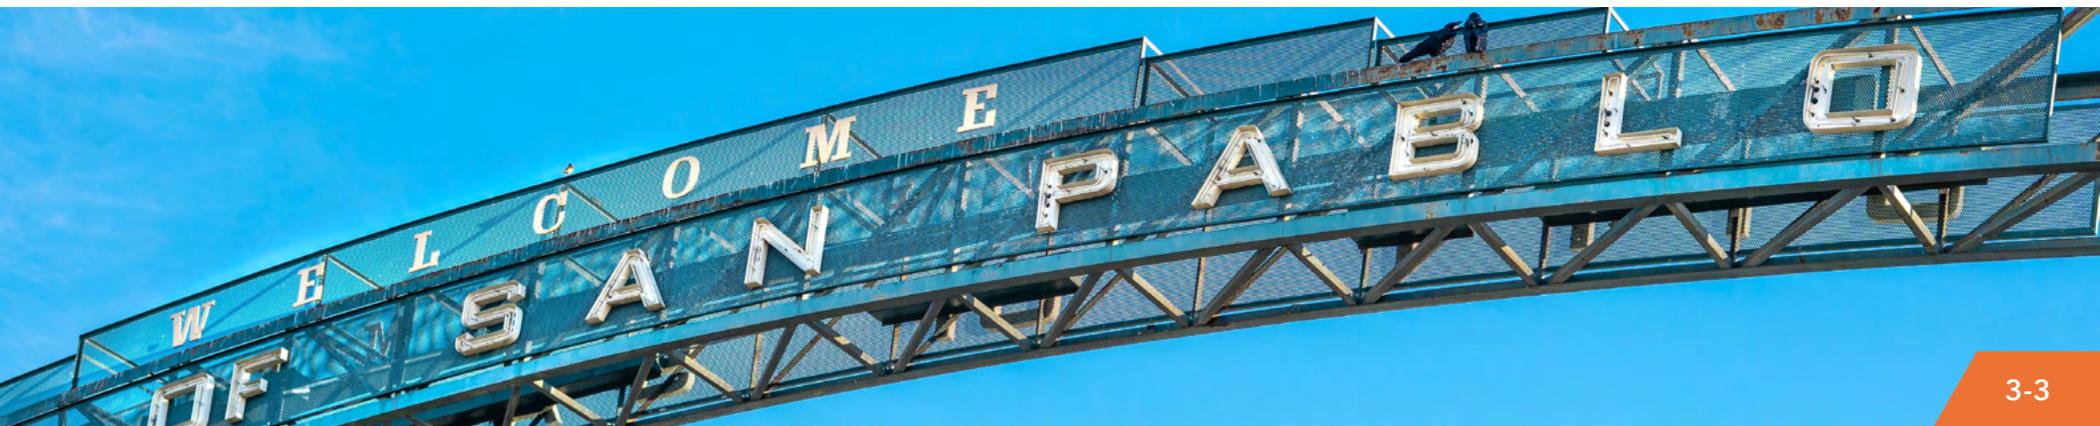

PIPELINE PROJECTS

According to HCD Guidance, projects that have been approved, permitted, or received a Certificate of Occupancy during the projection period (June 30, 2022 - January 15, 2031) can be counted toward the 2023-31 cycle RHNA. **Table 3-2** details these pipeline projects and they are also shown on **Map 3-1** and included in the housing sites inventory in Appendix A. In total there are 22 projects that involve construction of 395 units, including 213 lower income units, 8 moderate income units, and 174 above moderate income units.

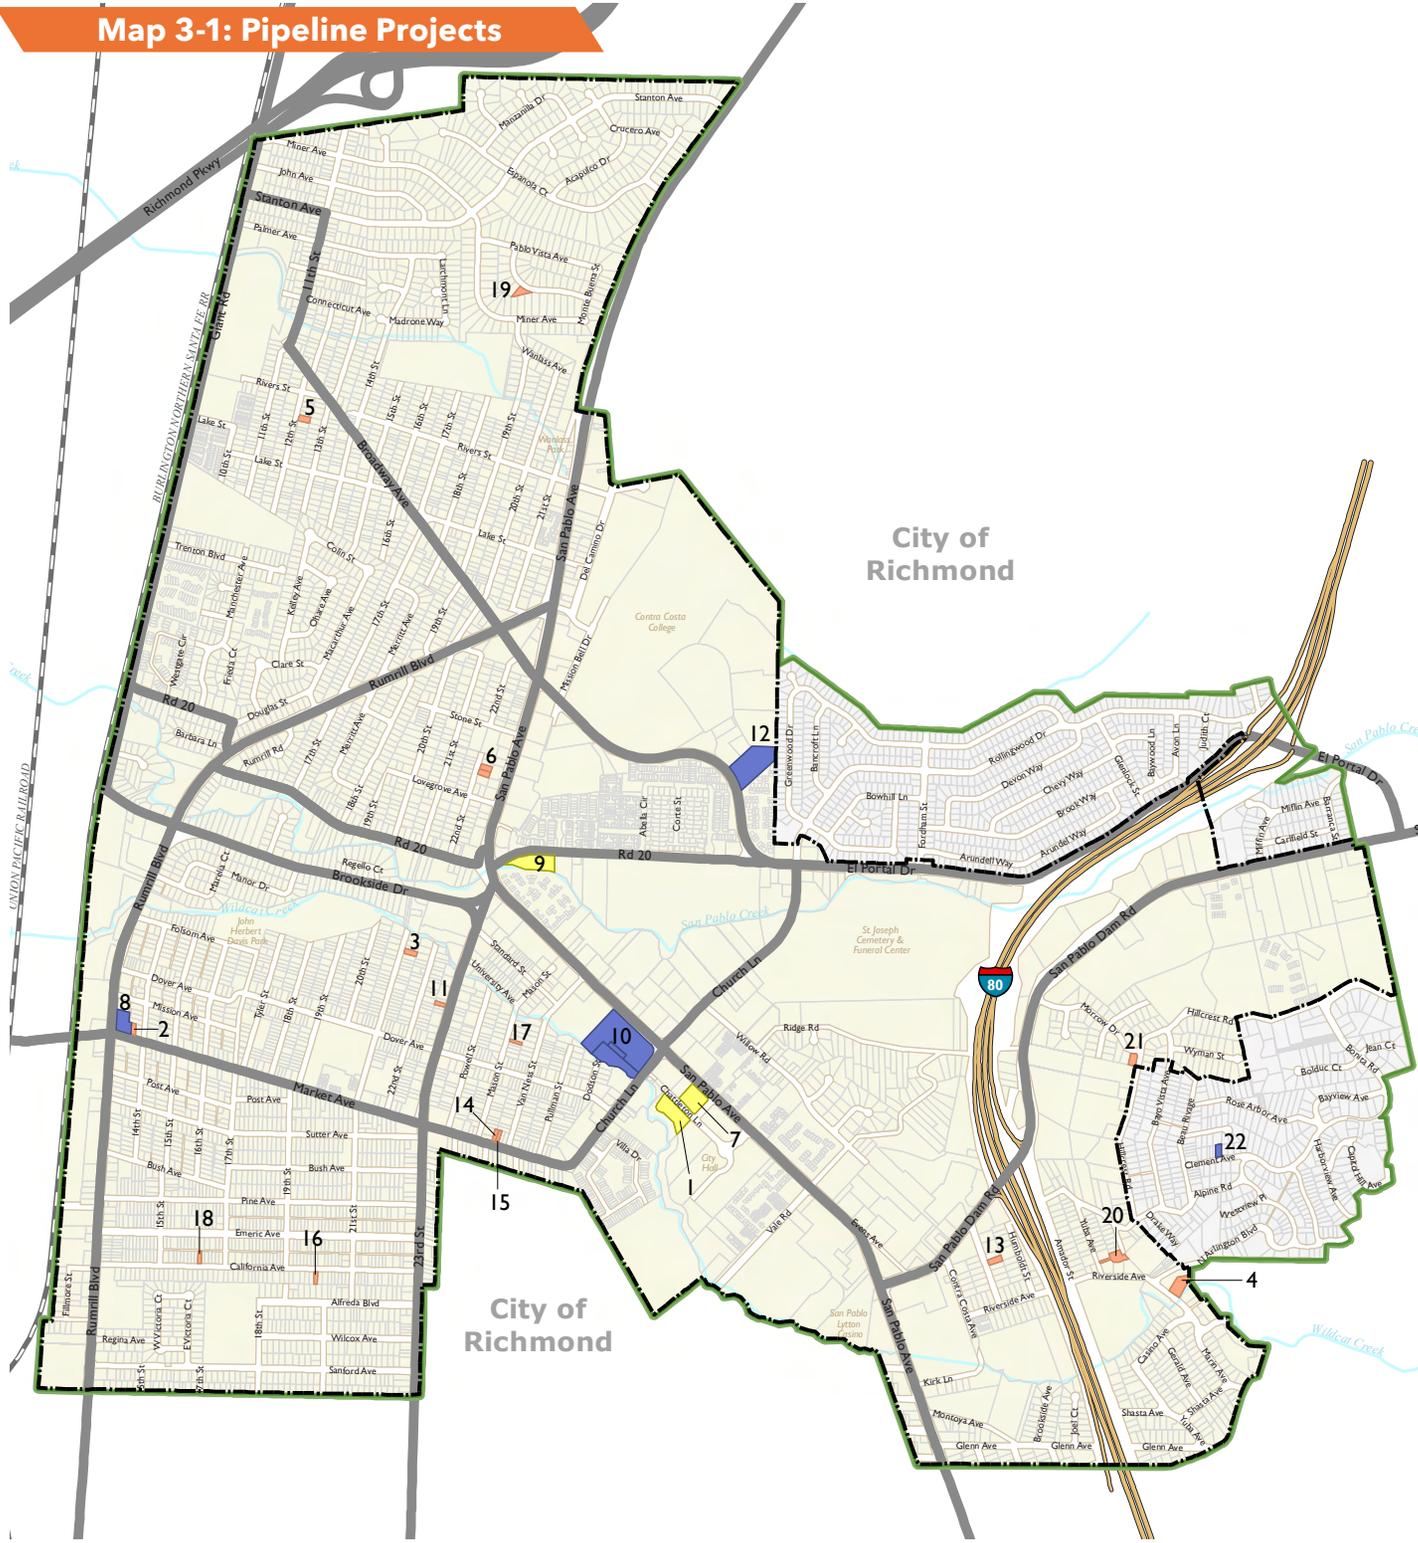

Table 3-1: San Pablo Regional Housing Needs Assessment, 2023-2031

INCOME LEVEL ¹	AMI	NEEDED UNITS	PERCENT OF NEEDED UNITS
Very-Low-Income	0-50%	173	23.2%
Low-Income	51-80%	100	13.4%
Moderate-Income	81-120%	132	17.7%
Above-Moderate-Income	>120%	341	45.7%
Total		746	100.00%

- Notes:
1. Contains 16 single-family homes, with one affordable to a lower-income household pursuant to the Disposition and Development Agreement with BV Builders, Inc.
 2. 13831 San Pablo Avenue, also known as Alvarado Gardens, is a mixed-use residential/retail development located at the former Civic Center site. Pursuant to the Affordable Housing Regulatory Agreement contained within the approved Disposition and Development Agreement, units must be made available for occupancy by "lower income households," as defined in Health and Safety Code Section 50079.5 (i.e., total household income is not greater than 80% of area median income). Affordability is further restricted pursuant to a TCAC 4% Credit award.

LAND INVENTORY

Land Available for Development

San Pablo is a largely built out city and there is relatively little vacant land available for new development. Only 2.2 percent of the total land area in the city was vacant in 2021, and as shown in **Map 3-2**, much of that land is in areas of environmental hazard. These hazards include the North Hayward Fault, which runs directly through the northern and eastern part of the city, as well as areas of flood risk and very high liquefaction risk located in proximity to the San Pablo and Wildcat creeks. An earthquake fault zone approximately 1,500 feet wide has been established around the trace of the North Hayward Fault. Given the high risk of ground-shaking and surface rupture within the zone, residential construction is not permitted in order to

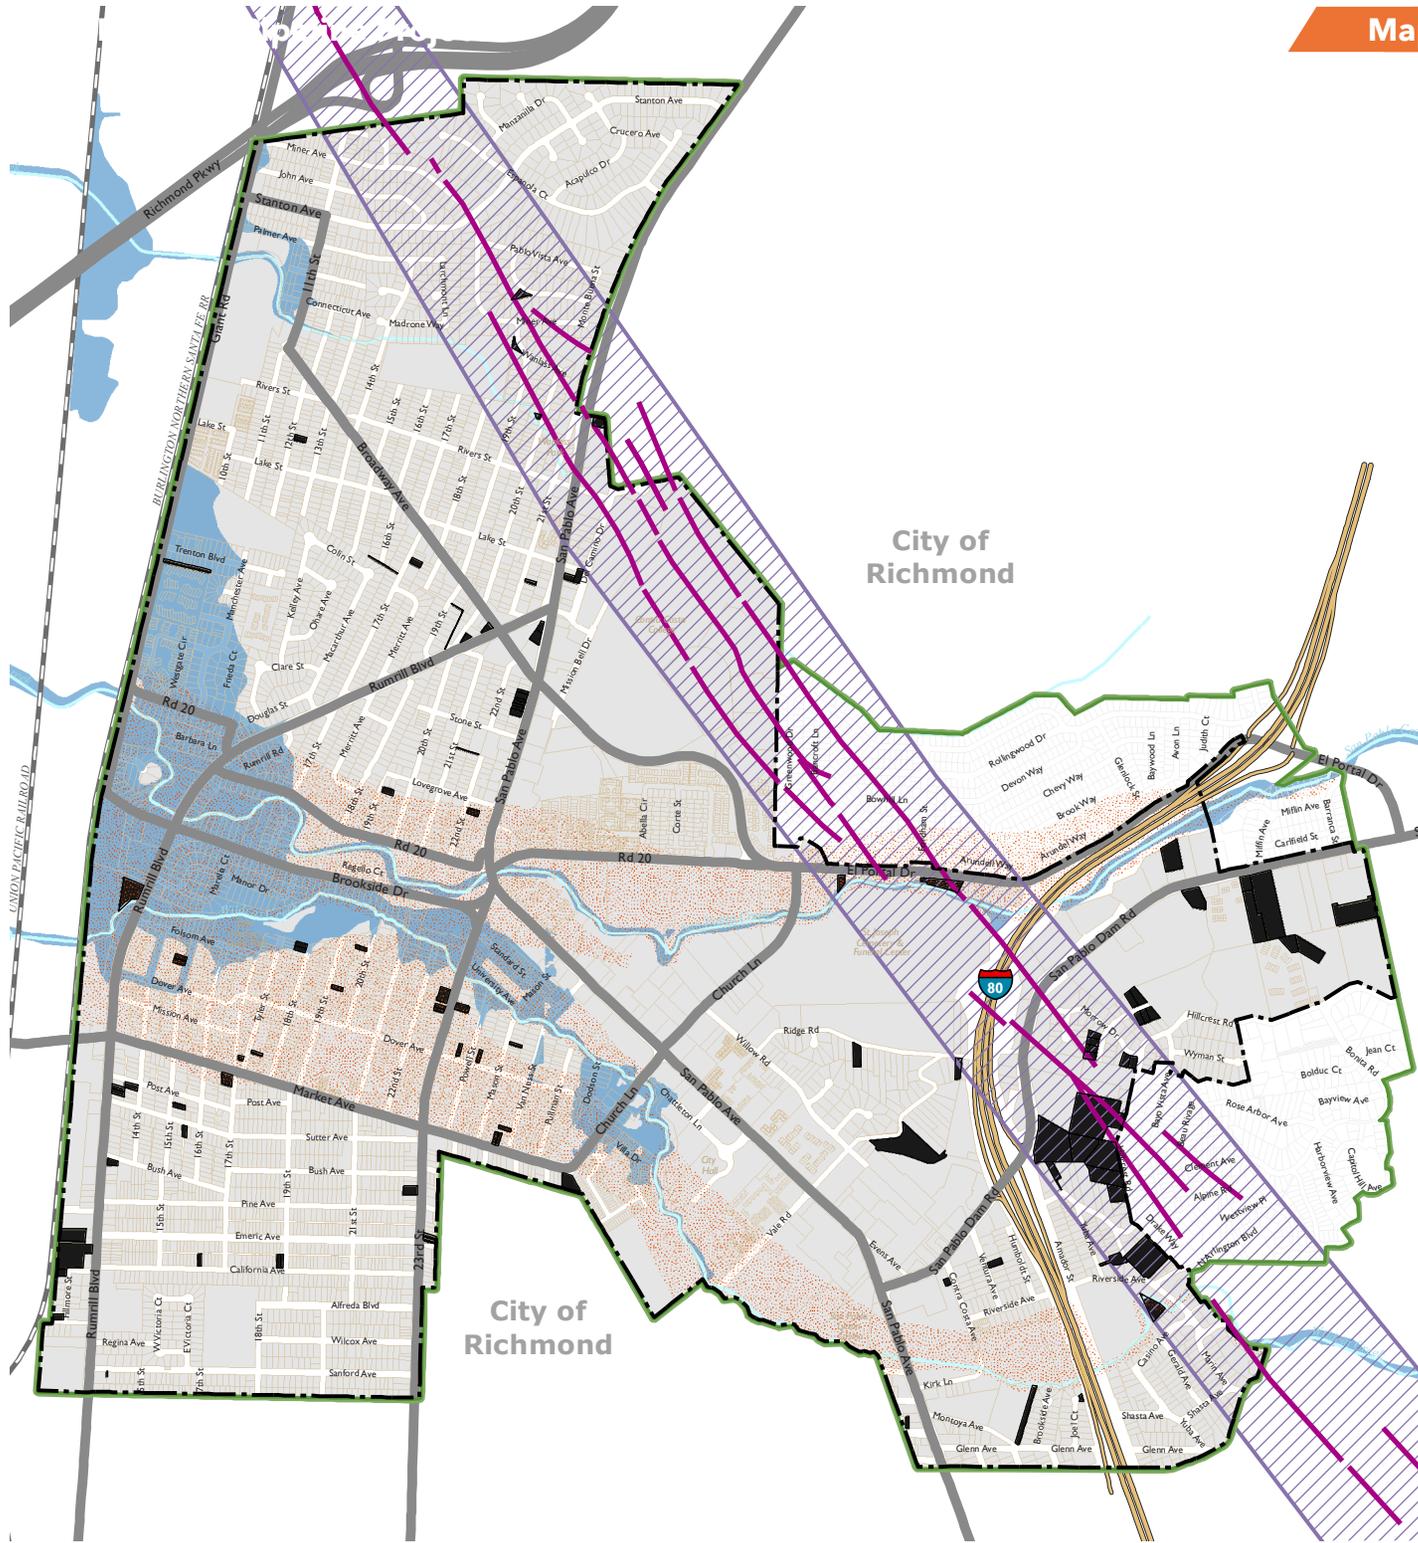

protect public safety and minimize the potential for loss of life and property. Residential construction is permitted within the 100-year flood plain and areas of liquefaction risk, subject to the regulatory standards of the California Building Code designed to ensure adequate protection.

Residential areas comprise over 45 percent of land within the City limit, primarily concentrated in small lot single-family neighborhoods. Approximately 78 percent of the residential land in San Pablo is developed with single-family homes, while 8 percent is developed with multi-family homes and 1.4 percent with mobile homes. The city's major commercial corridors, however, offer significant potential for redevelopment with residential and job-generating uses. Today, these corridors are typically lined with

older buildings and low-slung strip mall developments with large areas of surface parking. Recognizing the potential for redevelopment to help further community priorities for economic development, housing choice, and improved quality of life, the City has designated three corridor segments as Priority Development Areas (PDAs), making them eligible for regional grant funding to support planning and public investment in transportation and utility infrastructure which in turn will help attract private investment to achieve the envisioned land use pattern and growth. Shown on **Map 3-3**, the three PDAs are:

- **San Pablo Avenue PDA** - This PDA spans the full length of San Pablo Avenue as it passes through the city. A specific plan was adopted in 2011 to guide the redevelopment of the 261-acre area,

envisioning several new mixed-use districts centered around key community services and regional destinations, like Contra Costa College and Lytton Casino. There are three entitled but as yet unconstructed projects in this PDA, which will see construction of 255 new high density multi-family units.

- 23rd Street PDA** - This PDA extends the full length of 23rd Street from Brookside south to the City limit, encompassing an area of 22 acres. A specific plan was adopted in 2007 to provide a long-term strategy for the revitalization of 23rd Street by facilitating mixed use infill development on vacant and underutilized parcels, fostering a safe and pedestrian-friendly streetscape, and supporting the vitality of neighborhood businesses. While the areas has significant potential for new housing development, almost no construction has occurred in the last 15 years. Regulatory barriers have contributed, as discussion in Appendix C, and the Housing Action Plan in Chapter 4 incorporates programs to address impediments to housing development in this PDA.
- Rumrill Boulevard PDA** - Rumrill Boulevard is a major four-lane community corridor that extends north from San Pablo’s southwestern City limit to connect with Broadway and San Pablo Avenue. The southern portion of the corridor between Brookside and Costa is designated as a PDA, currently identified as an Employment Focus Area in Plan Bay Area and projected to see 22 new households and 194 jobs added by 2040. The area includes several large multi-family apartment complexes and a mobile home park, along with smaller multi-family and single family residences. A community wide survey conducted in 2022 identified strong community support for the incorporation of high density housing in the Rumrill PDA and, in tandem with the General

Plan and Housing Element updates, a Corridor Plan is being prepared to guide revitalization of the area and incorporate strategies to foster transit-oriented development, enhance regional equity, and bring mobility, housing, and economic development opportunities to a diverse community in need.

The City has also adopted a PDA Overlay District into the Zoning Code, which permits residential development at between 20 and 60 dwelling units per acre on all sites in the district. Additional standards for height and development density are also established, and the standards of the PDA overlay prevail in cases of conflict with the base designation.

Accessory Dwelling Units

San Pablo is a city of small lot single-family neighborhoods. The average single-family residential lot is only 5,100 square feet in size, which limits potential for additional detached accessory dwelling units (ADUs) on the lot; however, there is significant potential for ADUs or Junior ADUs incorporated into the primary structure. Since they are typically smaller than a single-family home, ADUs and Junior ADUs can be “affordable by design,” meaning they cost less to build, buy, or rent. As such they can offer affordable opportunities for older adults living on fixed incomes, younger residents living with roommates, and for lower income households. Demographic indicators (see Appendix B), including a relatively high proportion of non-family households, a growing older adult population, and a relatively large proportion of multi-generational households, signal a need for this type of housing in the short, medium and long-term in San Pablo.

Table 3-3 summarizes building permits issued for accessory dwelling units (ADUs) in San Pablo since 2018. Safe harbors in State Housing Element law allow for the use of trends since 2018 to project the future

Table 3-3: Recent ADU Approvals

YEAR	ADU BUILDING PERMITS ISSUED
2018	1
2019	6
2020	12
2021	14
Total	33
Annual Average	8.25
Projected 8-Year Development	66

Source: City of San Pablo, Annual Progress Reports, 2018-2021

rate of ADU production. By this measure, San Pablo can project at least 8.25 ADUs annually throughout the planning period. However, as noted in HCD’s Housing Element Site Inventory Guidebook, this methodology represents “a conservative option [that] only account[s] for the effect of the new laws without local promotional efforts or incentives.” In fact, ADU production trends in the city have increased noticeably since 2018, when an array of new State law intended to stimulate ADU production took effect.

Surplus Public Lands

The City of San Pablo identified two City-owned parcels appropriate for the development of new housing. One of the parcels, 1820 Rumrill Blvd, has been proposed for an affordable housing project, and another, Block E/Lot 4 at Plaza San Pablo, has been proposed a mixed-use housing project. Two additional City-owned parcels in San Pablo are considered surplus land in compliance with California’s Surplus Land Act. One of these parcels (13831 San Pablo Ave, the former City Hall site which is now vacated) represents a potential development opportunity; however, the other parcel (on San Pablo Dam Road) faces various physical development constraints.

IDENTIFICATION OF SUITABLE SITES AND REALISTIC CAPACITY

To identify appropriate sites to accommodate RHNA, a parcel-based analysis of properties within the City limit was conducted using County Assessor data. Vacant sites were identified, along with underutilized non-vacant sites with potential for redevelopment within the planning period and any surplus City-owned sites. For the initial analysis, two metrics were used to identify underused parcels: assessed value ratio (A/V) and low as-built floor area ratio (FAR). A/V ratio considers the relationship between the value of the land and the improvements constructed on it. Where the value of the land is worth substantially more than the value of the structures on it, there is an incentive for the owner to redevelop with new uses that command higher rents or sales prices. Similarly, a low FAR means that the square footage of buildings is small compared to the overall size of the site, indicating the potential for redevelopment with other uses. A commercially zoned property containing a low-slung shopping center with large areas of surface parking could be considered underused, particularly older, sub-optimally located centers away from major intersections with relatively high vacancy rates. Areas where vacant and underutilized sites cluster are locations where change is most foreseeable over the planning period and as such are an important focus of planning activities.

Based on this analysis, seven areas capable of accommodating new housing over the planning period were identified. An interactive online survey was then conducted to provide residents, business owners, and people who work or go to school in San Pablo with an opportunity to help identify appropriate locations for housing, as well as the typologies needed to meet local needs. The survey incorporated a map of the seven areas and participants were asked whether they supported housing in these areas, what type

of housing they felt would be appropriate, and their vision for future land uses, activities and amenities in each area. Respondents strongly supported adding new, higher density housing in all seven areas, with the Rumrill PDA and the Southeast area near the intersection of San Pablo Avenue and San Pablo Dam Road receiving the strongest community support.

Having developed and vetted an inventory of potential sites for housing to accommodate RHNA, the sites were then allocated to the various income categories and capacity was projected on the basis of the methodology and assumptions described below. **Map 3-4** shows the location of the housing sites throughout the city.

Low and Very Low Income RHNA Affordability Assumptions

Low and Very Low (L/VL) income households are those making up to 80 percent of the local area median income. While a 1-person household in this category may be able to afford market rate rents for smaller units such as studio apartments or ADUs based on HUD income limits for Contra Costa

County and a survey of rents in San Pablo, these units will typically need to be provided at below market rate (BMR) rents and sales prices, particularly for larger households and for Very Low or Extremely Low Income households. Pipeline projects where the developer has committed to making units available to L/VL income households through deed restrictions or similar means for a specified period of time (typically 55 years) may be counted toward L/VL RHNA. Additionally, State law (Government Code Section 65583.2(c)(3)) establishes a "default density standard" of 30 dwelling units per acre (du/ac) for lower-income units in Contra Costa County, which is the density that is "deemed appropriate" in State law to accommodate lower-income RHNA. Accordingly, the inventory includes L/VL RHNA sites with the following designations and densities: High

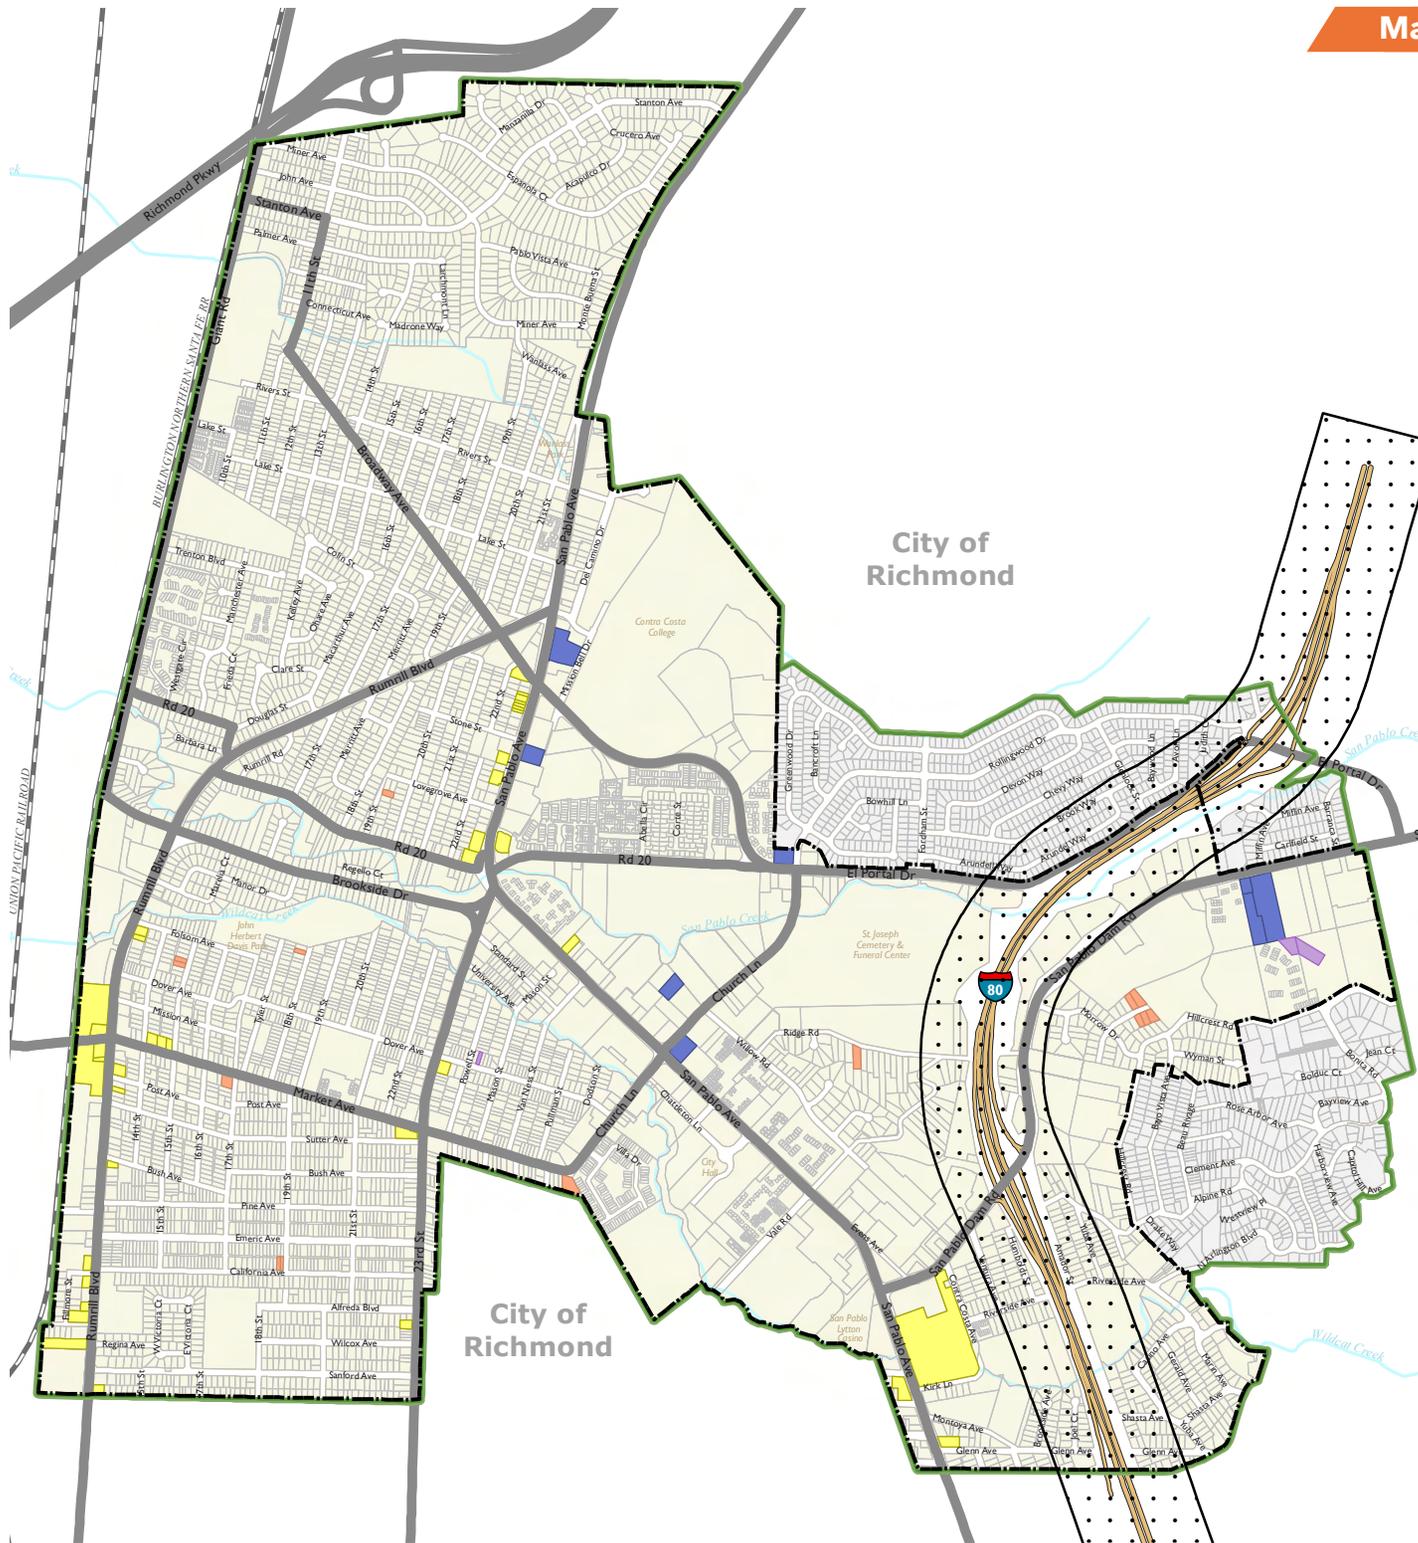

Density Residential (24.1-60 units/acre), Commercial Mixed Use (Up to 50 units/acre), Residential Mixed Use (Up to 50 units/acre).

Site Screening/Eligibility

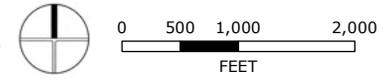

The inventory for L/VL RHNA includes both vacant and non-vacant sites. All sites were screened for compliance with the site adequacy criteria stipulated in State law, including that they be of appropriate size, be free from environmental constraints, be zoned to accommodate housing, have appropriate development standards, and be served by public facilities as needed to facilitate the development of a variety of housing products suitable for all income levels. Vacant sites included on prior inventories in two or more consecutive planning periods and non-vacant sites included on the prior period inventory cannot be carried forward to the current planning period to satisfy the City's Lower Income RHNA allocation unless they are rezoned to allow residential use by right at the default density for the jurisdiction. In view of feasibility considerations, parcels that are less than 0.5 acres in size are generally not considered suitable for lower income housing development as smaller parcels may not allow development of a sufficient number of units for proposed affordable housing projects to compete effectively for limited funding resources. Parcels larger than 10 acres in size are also not considered suitable by HCD as development of very large projects may lead to an over concentration of affordable housing in one location or may render proposed affordable housing projects ineligible for funding. Therefore, all sites attributed to L/VL RHNA on the inventory are between 0.5 and 10 acres in size.

Consistent with State law and guidance from HCD, L/VL RHNA sites included on the inventory that are not pipeline projects have been screened to ensure they are not located in FEMA-designated seismic, geologic, or flood hazard areas and that they do not require remediation of contaminated soil or water prior

to development. Sites on the inventory identified as suitable for L/VL households also conform to other best practices recommended by HCD, including proximity to transit routes, schools, jobs, parks, and daily services. As shown on **Map 3-3**, the sites are located on San Pablo Avenue, Rumrill Boulevard, Road 20 and San Pablo Dam Road, which are all transit routes. The location along these corridors provides good access to schools, shops, and other services. Additionally, all sites are within a 10-minute walking radius of existing parks. The inventory included in Appendix A details compliance with these eligibility criteria on a parcel-by-parcel basis.

The inventory includes one vacant site, the Ohmsai site, composed of three contiguous parcels under common ownership with an area of 3.7 acres located on San Pablo Dam Road in the northeastern part of the city. Additionally, the inventory includes five non-vacant sites. Under State law, additional analysis is required to demonstrate the viability of non-vacant sites for redevelopment with housing during the planning period. **Table 3-4** presents a range of factors that indicate strong potential for redevelopment of these five non-vacant sites, including A/V ratio, FAR, and age of the existing structures. City staff also conducted a windshield survey to confirm viability.

Inclusion on Prior Inventories

There are three sites - APNs 411340026, 416170005 and the Ohmsai site (420130020, 420130024, 420130025) included on the Inventory that were included in two prior consecutive planning periods; however, all of these sites already have zoning that permits the development of housing at 30 du/ac or greater by right. As such, these sites may be carried forward and counted toward the City’s Low and Very Low Income RHNA in the current Housing Element cycle. Additional programs have been added to the Housing Action Plan (Chapter 4) to address other barriers to housing development, including regulatory and process-related impediments.

Methodology for Capacity Calculations

Pipeline Projects

There are five approved affordable housing projects in the development pipeline included on the inventory and one proposed project for which an exclusive negotiating agreement has been approved, as detailed in **Table 3-2** above. Collectively, these projects involve construction of 59 very low income units and 154 low income units. The inventory assumes the projects will be constructed as approved.

Realistic Capacity Assessment

Realistic capacity of the vacant Ohmsai site was determined by applying an assumed density of 36.4 du/ac to the gross site area, consistent with City practice. This is approximately 75 percent of maximum permitted density in the R4 district. San Pablo has not seen recent development in the R4 district that can serve as a reference point for past performance and other recent affordable projects in the city have been approved at or above the maximum permitted making use density bonuses; however, 36.4 du/ac is used as a conservative estimate. This density is at the lower end

of the range in comparable projects recently approved in San Pablo.

For non-vacant sites, the existing FAR (calculated as the ratio of existing square footage of buildings and structures on the site to the total site acreage) was subtracted from the maximum FAR permitted under the land use designation in order to establish the remaining development capacity of the site. Then an assumed density of either 45.6 du/ac or 60 du/ac was applied to the remaining development capacity, expressed in acres, to establish realistic capacity. These densities are consistent with those of other recently approved developments in the corresponding districts in San Pablo. The assumption is that the whole of the sites will be redeveloped with a mix of commercial and residential uses consistent with the applicable general plan land use and zoning and that the level commercial development on the site would be equivalent to what exists today. This does not preclude sites from developing with 100 percent residential uses, it simply provides a conservative estimate of residential capacity.

Table 3-4: Non-Vacant Sites: Indicators of Redevelopment Potential

APN	ADDRESS	EXISTING LAND USE	GENERAL PLAN LAND USE	ACREAGE	A/V RATIO	AS BUILT FAR	YEAR BUILT
411340026	2405 CHURCH LN	General Commercial	High Density Residential	0.54	0.52	0.00	n/a
416170005	14560 SAN PABLO AVE	Church/Religious Facility	High Density Residential	1.29	0.00	0.00	n/a
417120019	13742 SAN PABLO AVE	General Commercial	Commercial Mixed Use	0.66	0.44	0.46	2000
416073004	2697 EL PORTAL DR	General Commercial	Commercial Mixed Use	0.51	0.50	0.12	2000
416150012	14400 SAN PABLO AVE	General Commercial	Residential Mixed Use	0.58	0.91	0.10	1999

Summary

In total, the inventory includes adequate sites that can accommodate 532 L/VL units, which represents 195 percent of the City's L/VL RHNA of 273 units. Therefore, the inventory has sufficient capacity to meet RHNA obligations with a substantial buffer to ensure the City can navigate the no net loss provisions of State law in the event that sites do not develop as projected.

MODERATE INCOME RHNA SITES

Affordability Assumptions

Moderate Income households are those making between 81 and 120 percent of the local area median income, which for a 3-person household in San Pablo ranges from \$98,650 to \$135,650 annually (see B-36 in Appendix B). Based on HCD income limits and affordable housing cost estimates, the affordable monthly rent for a 3-person household in this income category ranges from \$2,187 to \$3,112 per month and the affordable house price is up to \$604,725. Data on contract rents in 2019 prepared by ABAG-MTC indicate that typical rents in San Pablo would be affordable to 99 percent of moderate income households. However, a survey of median rents on Zillow.com indicates that, at \$2,521 per month, a typical two-bedroom apartment in San Pablo would fall around the mid-point of what is affordable for a moderate income 3-person household as would an attached two-bedroom rental home, at \$2,680 per month. Further, the data indicate that a two-bedroom townhome (median rent \$3,400) would be out of reach for moderate income 3-person household. Therefore, on this basis, the inventory includes moderate income units in the following zoning districts that permit small scale attached homes and high density apartments and condominiums: R2 (up to 18 du/ac); R3 (up to 24 du/ac); and a range of sites within the PDA Overlay (20-60 du/ac).

Site Screening/Eligibility

The inventory for Moderate RHNA includes both vacant and non-vacant sites. All sites were screened and found to be free of known environmental constraints. There is one vacant site in the R2 district, two vacant sites in the R3 district, and five vacant sites on corridors in the PDA Overlay. The other 38 sites are non-vacant properties in the PDA overlay. As such, these sites have good access to transit, schools, shops, and other services. Additionally, all sites are within a 10-minute walking radius of existing parks. The inventory included in Appendix A details compliance with these eligibility criteria on a parcel-by-parcel basis.

Methodology for Capacity Calculations

For pipeline projects in this income category, projected capacity is taken as the number of units proposed. For the vacant R2 and R3 sites, an assumed density of 6.7 du/ac and 8.5 du/ac was applied respectively to the gross site area, reflective of recently constructed and approved development in the districts.

Sites within the PDA overlay are assumed to develop with mixed income projects, providing units that will be affordable to both moderate and above moderate income households in San Pablo. For vacant sites, the total realistic capacity was calculated by applying an assumed 55 du/ac to the gross site area reflective of the densities in other recently approved projects in the PDA Overlay. For non-vacant sites, the existing FAR (calculated as the ratio of existing square footage of buildings and structures on the site to the total site acreage) was subtracted from the maximum FAR permitted under the land use designation in order to establish the remaining development capacity of the site. Then an assumed density of between 36.4 du/ac and 60 du/ac was applied to the remaining development capacity, expressed in acres, to establish total realistic capacity. These densities are consistent with those of other recently approved

developments in the corresponding districts in San Pablo. The assumption is that the whole of the sites will be redeveloped with a mix of commercial and residential uses consistent with the applicable general plan land use and zoning and that the level commercial development on the site would be equivalent to what exists today. This does not preclude sites from developing with 100 percent residential uses, it simply provides a conservative estimate of residential capacity.

Having established the total capacity of vacant and non-vacant sites in the PDA overlay, 30 percent of the units were assumed to be affordable to moderate income households in view of anticipated median rents based on implementation of related programs in the Housing Action Plan (Chapter 4).

Summary

The inventory includes 46 sites in the Moderate Income category with a combined capacity of 286 units, which represents 217 percent of the City's Moderate Income RHNA of 132 units. Therefore, the inventory has sufficient capacity to meet RHNA obligations with a substantial buffer to ensure the City can navigate the no net loss provisions of State law in the event that sites do not develop as projected.

ABOVE MODERATE INCOME RHNA SITES

Affordability Assumptions

Above Moderate Income households are those making over 120 percent of the local area median income. It is assumed that these units will be available at market rates. The inventory includes sites that can accommodate a range of units types, sizes, and densities consistent with the objective of increasing the range of housing types available in the community. For this RHNA category, the inventory consists of vacant single-family residential sites zoned R1 (up to

12 du/ac) and vacant and non-vacant sites in the PDA overlay (20-60 du/ac).

Site Screening/Eligibility

The inventory for Above Moderate RHNA includes both vacant and non-vacant sites. Non-pipeline sites were screened for known environmental constraints. One site, APN 411221002, is partially within the 100-year flood zone. For this site, only the net site acreage exclusive of the environmentally constrained area was considered in the capacity calculation. Additionally, several sites are located in areas of very high liquefaction risk. Development will be required to comply with federal, State, and local regulations for safe construction in areas of flood and liquefaction risk. The vacant single-family sites are located in established neighborhoods, primarily in the western and central portion of the city with good access to transit, schools, shops, and other services. Similarly, sites in the PDA overlay are centrally located with good access to transit, schools, shops, and other services. All sites are within a 10-minute walking radius of existing parks and open spaces.

Methodology for Capacity Calculations

For pipeline projects in this income category, projected capacity is taken as the number of units proposed. For

the vacant R1 sites, an assumed density of 10 du/ac was applied to the gross site area, reflective of recently constructed and approved development in the district.

As described above, sites within the PDA overlay are assumed to develop with mixed income projects, providing units that will be affordable to both moderate and above moderate income households in San Pablo. For vacant sites, the total realistic capacity was calculated by applying an assumed 55 du/ac to the gross site area reflective of the densities in other recently approved projects in the PDA Overlay. For non-vacant sites, the existing FAR (calculated as the ratio of existing square footage of buildings and structures on the site to the total site acreage) was subtracted from the maximum FAR permitted under the land use designation in order to establish the remaining development capacity of the site. Then an assumed density of between 36.4 du/ac and 60 du/ac was applied to the remaining development capacity, expressed in acres, to establish total realistic capacity. These densities are consistent with those of other recently approved developments in the corresponding districts in San Pablo. The assumption is that the whole of the sites will be redeveloped with a mix of commercial and residential uses consistent with the applicable general plan land use and zoning

and that the level commercial development on the site would be equivalent to what exists today. This does not preclude sites from developing with 100 percent residential uses, it simply provides a conservative estimate of residential capacity.

Having established the total capacity of vacant and non-vacant sites in the PDA overlay, 70 percent of the units were assumed to be affordable to above moderate income households. Programs in the Housing Action Plan (Chapter 4) address potential barrier to market rate housing development.

Summary

The inventory includes 52 sites in the Moderate Income category with a combined capacity of 805 units, which represents 236 percent of the City’s Moderate Income RHNA of 132 units. Therefore, the inventory has sufficient capacity to meet RHNA obligations with a substantial buffer to ensure the City can navigate the no net loss provisions of State law in the event that sites do not develop as projected.

SUMMARY OF RHNA UNITS ACCOMMODATED UNDER CURRENT ZONING

Table 3-5 summarizes the total number of housing units that can be accommodated in the planning period under current zoning, with a breakdown by RHNA category. The location of the sites is shown on **Map 3-4**. No rezoning is needed to accommodate RHNA; however, programs identifying zoning changes necessary to facilitate development of housing sites and ensure consistency with new State law have been incorporated into the Housing Action Plan (Chapter 4). **Table 3-5** also shows projected ADU production at all affordability levels, based on the annual rate of ADU permitting in San Pablo since 2018 and the findings of the ADU affordability study completed by the Association of Bay Area Governments (ABAG). As shown, there is sufficient capacity to meet RHNA obligations at all levels of affordability with a

Table 3-5: Draft Sites Inventory - Summary

	LOW/VERY LOW	MODERATE	ABOVE MODERATE	TOTAL
Vacant	135	27	47	209
Non-Vacant	184	251	584	1019
Pipeline	213	8	174	395
Subtotal	532	286	805	1623

TOTAL	572	306	811	1689
RHNA	273	132	341	746

substantial buffer to ensure the City can navigate the no net loss provisions of State law in the event that sites do not develop as projected.

3.2 Administrative Resources

This section describes the public agencies involved in housing activities in San Pablo.

CITY OF SAN PABLO

As a small city, San Pablo has a relatively limited number of housing resources and programs. Furthermore, due to its population size, San Pablo does not receive direct federal funding allocations. The City's former Redevelopment Agency previously provided financial and staff resources to promote affordable housing development and services, but as with many cities across the state, San Pablo has lost many of its tools and funding with the dissolution of local redevelopment agencies in 2012.

In January 2020, the City hired a new in-house Chief Building Official, who will help streamline housing approval and production. In August 2020, the City also hired its first Housing Analyst, responsible for overseeing all of the City's housing-related efforts, such as facilitating the production of new housing and administering housing-related grants and programs.

Incentives for Housing Production

In line with state policies, the City of San Pablo offers incentives for developers who chose to build affordable housing. However, these incentives have had relatively limited impact in San Pablo in the last decade, given that the City has had so few development projects.

State Residential Density Bonus

In accordance with the State of California's Density Bonus Law, the City of San Pablo is required to offer a density bonus that allows up to a 35 percent increase in project density and/or a variety of other incentives, including minimum parking requirements and waiving of other development standards, depending on the type and amount of affordable units provided. Note that the City plans to update its local density bonus ordinance to comply with state law.

Accessory Dwelling Units (ADU)

The City of San Pablo is currently in the process of updating its ADU ordinance to comply with the most recent state laws, which have been progressively easing ADU development standards (described in more detail below).

Tenant Protections and Resources

As described above, all multifamily units in San Pablo are protected by the state's Tenant Protections Act of 2019 (AB 1482), which includes an annual rent cap and just-cause protections. The City of San Pablo does not have any additional local rent stabilization or just-cause eviction policies in place. Counseling and legal tenant services are offered by nonprofit organizations such as Bay Area Legal Aid, which have an office in Richmond.

CONTRA COSTA COUNTY

Contra Costa Senior Legal Services and the Housing Services Collaborative (ECHO Housing & Bay Area Legal Aid) for tenant and landlord resources, such as legal services, tenant-landlord counseling services, fair housing services, and broader education about housing rights and responsibilities. Furthermore, a database of deed-restricted affordable properties across Contra Costa County is updated regularly on the County's website.

3.3 Financial Resources

This section offers a summary of funding sources that are available or potentially available for housing development and supportive services in San Pablo. Overall, financial tools and funding sources are very limited. Prior to its dissolution, the San Pablo Redevelopment Agency provided staff and financial resources for affordable housing development and services. Today, the City's Low-Income Housing Fund (LIHF) is San Pablo's primary funding source.

Due to its small population, San Pablo does not receive direct federal funding allocations; instead, Community Block Development Grants (CBDG) and other federal funds are provided to Contra Costa County by the U.S. Department of Housing and Urban Development (HUD) on an annual formula basis for use within constituent jurisdictions. The County acts as the administrative jurisdiction for these funds that are available to support various services and activities, including housing related activities, that would benefit residents of urbanized areas. The funds are distributed through a competitive RFP process where eligible applicants - typically nonprofit affordable housing developers and public agencies - can apply for funds, which may include rehabilitation, new construction or supportive infrastructure.

CITY OF SAN PABLO

San Pablo Low-Income Housing Fund

The Low-Income Housing Fund (LIHF) is San Pablo's only source of funding for affordable housing. The fund may be used for a variety of purposes, including: (1) preserving long-term affordability of units, (2) homeless prevention and rapid rehousing, and (3) development of new housing. The LIHF was previously funded through a 20 percent set aside of tax increment earned in the City's Redevelopment areas; however, with the dissolution of redevelopment

agencies in 2012, the City no longer receives new tax increment revenues. In March 2020, the LIHF had a balance of \$5.5 million. Since then, \$500,000 has been appropriated from the LIHF to fund the COVID-19 Housing Assistance Grant Program.

COVID-19 Housing Assistance Grant Program

On May 4, 2020, the San Pablo City Council approved the Housing Assistance Grant Program, to offer one-time grants to households to support payment of rent, mortgage, or utilities. Grants are available to households earning 80 percent or less of AMI. Grant amounts range from \$400 to \$1,000 per household, depending on AMI level and household size. The program was funded by an appropriation from the City's Low-Income Housing Fund. Two rounds of grants have been disbursed so far (\$500,000 total). The program has been approved for a third round.

Homeowner Support

Previously, the City offered a Home Renovation Loan Fund for low- and moderate- income households, but this program has since expired.

San Pablo Loan Assistance for Sustainable Housing (SPLASH) Program

The San Pablo Loan Assistance for Sustainable Housing (SPLASH) Program is a first-time homebuyer program offered by the San Pablo Housing Successor Agency (HSA) of the City of San Pablo for qualified low-income aspiring homeowners, in partnership with the San Pablo the San Pablo Economic Development Corporation (EDC). The program offers "silent second loans" of up to 20 percent of the home value for a period of 30 years to first-time home buyers, with priority for first-responders, teachers, seniors, and veterans. SPLASH can be used with the following first-time homebuyer programs:

- **CalHome:** Offers up to \$38,000 in a "silent" down payment assistance loan for low-income households purchasing in Contra Costa.

- **MyHome Assistance Program:** Through California Housing Finance Agency, apply through private loan officers who have been approved and trained by the Agency.
- **Neighborhood LIFT:** A collaboration with Wells Fargo and NeighborWorks® America, Neighborhood LIFT provides eligible homebuyers with \$25,000 in down payment assistance on qualified properties. Funds have largely been expended, however some banks still have limited funds to offer.
- **WISH:** Mechanics Bank is partnered with San Pablo EDC to make grants available, offering first-time homebuyers a matching grant up to \$22,000 (\$4 for every \$1 the homebuyer puts in).
- **Bank of the West Lender Credit:** Up to \$10,500 lender credit for qualified low to moderate income applicants (available 8/2022 - 1/2023).

SAN FRANCISCO BAY AREA REGION

Bay Area Housing Finance Authority (BAHFA)

BAHFA was established by California State Legislature AB 1487 (2019, Chiu) to support the production and preservation of affordable housing by placing new revenue options on the ballot. Due to the economic disruption caused by the COVID-19 pandemic, the decision was made not to place a revenue measure on the November 2020 ballot. Any new revenue source to be placed on the ballot would require voter approval by a two-thirds vote. Possible future options include:

- General obligation bond backed by property tax receipts (also known as a GO bond)
- Parcel tax
- Gross receipts tax
- Per-employee corporate "head tax"
- Commercial linkage fee (only authorized after voters approve a GO bond or parcel tax)

BAHFA shares decision-making with the ABAG Executive Board related to raising revenues or expenditure of funds.

CONTRA COSTA COUNTY

Tenant Protections and Resources

Contra Costa County provides some funding (through the CDBG program) to Contra Costa Senior Legal Services and the Housing Services Collaborative (ECHO Housing & Bay Area Legal Aid) for tenant and landlord resources, such as legal services, tenant-landlord counseling services, fair housing services, and broader education about housing rights and responsibilities. Furthermore, a database of deed-restricted affordable properties across Contra Costa County is updated regularly on the County's website.

Homeowner Resources

The County offers various resources for existing and new homeowners:

- **Neighborhood Preservation Program (NPP).** This program offers low-interest loans and/or grants to low-income homeowners for various types of home improvements. The County partners with Habitat for Humanity to administer the program. The program is funded by Community Development Block Grant (CDBG) funding.
- **Weatherization Program.** This program offers technical and financial assistance for home energy efficiency improvements. Funded through state and federal resources, this program is primarily targeted to lower-income households.
- The County also provides referrals to other programs, such as the California Housing Finance Agency's first-time homebuyer program, the Mortgage Credit Certification program, Habitat for Humanity's resources for home repairs, and other counseling services.

- Sources of funding and financing for affordable housing production and preservation. The County issues tax-exempt revenue bonds for affordable housing development financing through the County's Multifamily Mortgage Revenue Bond Program. The County does not offer any set-aside subsidies for the construction or preservation of deed-restricted affordable housing. Although other counties across the Bay Area have approved general obligation bonds for affordable housing (such as Measure A-1 in Alameda County or Measure A in Santa Clara County), Contra Costa has not placed an affordable housing bond measure on the ballot. Measure J, which was on the ballot in March 2020 for transportation and housing improvements, was defeated.
- Note that the County administers federal and state funding programs that can be used for affordable housing development. These are described in a later section.
- **Affordable Housing and Sustainable Communities (AHSC)** is a competitive state grant program that promotes infill development and the reduction of greenhouse gas emissions. AHSC favors combined investments in affordable housing, transit, and active transportation infrastructure.
- **Multifamily Housing Program (MHP)** provides deferred long-term loans for the construction and acquisition-rehabilitation of permanent and transitional affordable rental housing.
- **No Place Like Home Program (NPLH)** provides funding for the development of permanent supportive housing to assist persons with mental illness and/or experiencing homelessness. This program includes both competitive and noncompetitive allocations to counties.
- **SB 2 (Building Homes and Jobs Act)** imposed a new real estate recording fee of \$75 on selected real estate transactions. In the first year, SB 2 Planning Grants were made available to local governments for planning and technical assistance to streamline housing development. Subsequent phases of the program will include funds for the development or preservation of affordable housing.

Homelessness Resources

The Contra Costa Health, Housing, & Homelessness Services Department administers the Coordinated Entry System for residents experiencing homelessness. Services offered by this group are funded through federal and state subsidies.

STATE OF CALIFORNIA

The State of California has several active funding programs for the planning and construction of new affordable housing development, including several new or recently expanded sources. These funding sources have different criteria and goals, and San Pablo's competitiveness is therefore likely to vary by program.

- **Infill Infrastructure Grant (IIG) Program and Transit Oriented Development (TOD) Housing Program.** These are recently expanded programs that primarily target the construction of new affordable housing and related infrastructure near transit.
- **Local Early Action Planning (LEAP)** is a one-time planning grant program to support cities and counties as they plan for the upcoming 6th RHNA cycle.

FEDERAL

Several funding sources are available at the federal level for affordable housing development and preservation.

Low Income Housing Tax Credits

The LIHTC program is a federal tax subsidy that gives investors a roughly dollar-for-dollar credit on their tax liability in exchange for equity contributions to subsidize affordable housing development projects. LIHTC equity is often the largest source of subsidy for affordable housing production and may also be used for affordable housing preservation. The California Tax Credit Allocation Committee administers and allocates tax credits throughout the State of California.

Housing Choice Vouchers (Section 8)

Housing Choice Vouchers are a federal rental assistance program that provides rental payments directly to landlords. Approximately 7,000 federal Housing Choice Vouchers are administered by the Housing Authority of Contra Costa County today. About 20 percent of the HACCC's allocation may be used for Project-Based Vouchers (PBVs), which can be leveraged to support loans for affordable housing development.

Other Federal Sources

Other federal programs include Emergency Solutions Grants (ESG) and the Affordable Housing Program (AHP). Contra Costa County is responsible for administering federal programs including HOME, Community Development Block Grants (CDBG), and Housing Opportunities for People with AIDS (HOPWA).

4

Housing Action Plan

Goal 1: Housing Supply and Choice

Goal 2: Affordability and Housing Security

Goal 3: Equal Access to Housing

Goal 4: Neighborhood Quality

Goal 5: Energy Conservation and Waste Reduction

Goal 6: Local Government Capacity

4 Housing Action Plan

The Housing Action Plan describes the specific goals, policies, and programs the City will undertake to achieve the long-term housing objectives set forth in the San Pablo Housing Element. These goals, policies, and programs are intended to provide a framework for increasing the range of housing options in the community, removing barriers and constraints to housing construction, improving the condition of existing housing, and providing equal access housing opportunities and services for all residents. The Housing Action Plan has been informed by a careful analysis of local housing conditions and community input.

The goals and policies contained in the Housing Element address San Pablo's identified housing needs and are implemented through a series of programs. Housing programs define the specific actions the City will take to achieve specific goals and policies. The action plan includes both programs currently in operation and new activities which have been added to address the community's housing needs. It should be noted that the listing of a particular funding source of a particular program and/or action does not denote that it has been allocated or appropriated as a source of funding for such a program and/or action.

GOAL H-1: Increase housing supply and facilitate production of at least 800 new homes by 2031.

- Policy 1-1** Maintain sufficient land designated and appropriately zoned for housing to achieve a complementary mix of single-family and multi-family development to accommodate RHNA allocations at all levels throughout the planning period.
- Policy 1-2** Promote development of a variety of housing types, sizes, and densities that meet community needs based on the suitability of the land, including the availability of infrastructure, the provision of adequate services and recognition of environmental constraints.
- Policy 1-3** Identify and work to reduce or remove regulatory and process-related barriers to housing development in San Pablo.
- Policy 1-4** Promote mixed use developments with a residential component in San Pablo's Priority Development Areas (PDAs) and locate higher density residential development in proximity to employment, shopping, transit, recreation, and other services.
- Policy 1-5** Continue to encourage the provision of a variety of housing choices and types in the community, including innovative forms of housing.
- Policy 1-6** Continue to partner with and support non-profit and for-profit organizations in their efforts to construct, acquire, and improve housing to accommodate households with lower and moderate incomes. Participation of non-profit and for-profit developers in an advisory role when implementing housing programs is desirable to help understand

the needs and opportunities in the community.

- Policy 1-7** Facilitate the development of student housing at the Mixed Use Center North site near Contra Costa College through density bonuses and priority permit processing.

Program 1-A Inventory of Available Sites. Maintain and publish an inventory of properties available for residential development on the City's website, updating it at regular intervals.

Responsible Agency/Department: Community Development Department

Timeframe: Publish inventory by April 2023; updates to be made quarterly throughout the planning period.

Objective: 746 new housing units, consistent with RHNA obligations

Funding: General Fund, Low Income Housing Fund

Program 1-B Rumrill Corridor Plan. The City has secured a grant from the Association of Bay Area Governments (ABAG) and Metropolitan Transportation Commission (MTC) and is preparing a Corridor Plan for the Rumrill PDA. The plan will guide future development along the corridor and incorporate an integrated mix of high-density housing, employment, and recreational uses throughout the PDA to serve community need. With input from community members and property owners, the Plan should revisit the Industrial Mixed Use designation that currently applies on most of the land south of Market Street on the western side of corridor and explore a mix of uses more in tune with market demand, economic opportunities, and community needs. Given the

high concentration of low-income housing that exists along the corridor today (fully 48 percent of the housing units in the PDA are subsidized by HUD or the low-income housing tax credit), the Plan should focus on strategies to facilitate more market rate development and housing affordable to moderate income households while also incorporating a strong suite of anti-displacement measures.

Responsible Agency/Department: Community Development Department

Timeframe: Adoption by end of 2023

Objective: 314 new high density housing units by 2031, including at least 90 that are affordable for moderate income households

Funding: PDA Grant funding from ABAG/MTC

Program 1-C Repeal or Revise the 23rd Street Specific Plan. The 23rd Street Specific Plan was adopted in 2007 to revitalize and increase the development potential of the 23rd Street Corridor, designated as a PDA; however, while buildout was projected at 282 new housing units, half of which were to have been constructed by 2030, the area has only seen construction of one single-family home and an ADU in the 15 years since adoption. The Plan is not achieving its objectives and contains complex and restrictive policies and standards that inhibit development. Therefore, the City will repeal the Plan and/or revise standards and provisions applicable in the 23rd Street PDA. The effort should involve the following:

- Review and revise standards for residential density and building heights to align them with market opportunities;
- Harmonize development standards

with those in the PDA Overlay district which also applies to the Plan area;

- Modify/update PDA Overlay district standards to enhance clarity and usability
- Permit residential uses by right in either a standalone or mixed-use format;
- Eliminate requirements for ground floor retail and replace with regulatory or process incentives;
- Incorporate incentives for moderate income housing and “shopkeeper” units;
- Establish objective standards for live/work units so that they can be provided without the need for a conditional use permit.

Responsible Agency/Department: Community Development Department

Timeframe: End of 2023

Objective: 314 new high density housing units by 2031, including at least 90 affordable for moderate income households

Funding: SB2 and LEAP grants; General Fund

Program 1-D Revise Multifamily Minimum Parcel Size. At 10,000 square feet, the minimum parcel size required for multifamily zones is substantially larger in San Pablo than in other neighboring jurisdictions. The City’s zoning code makes provisions for substandard R3 (Multifamily Residential) and RMU (Residential Mixed-Use) parcels and identifies specific standards that apply; however, there are no such provisions for substandard R4 (High-Density Multifamily Residential) or CMU (Commercial Mixed-Use) parcels. As a result, this could present a challenge

for redevelopment within these zones. Therefore, the City will review multifamily lot size standards and revise or incorporate provisions to facilitate high quality development in these zones.

Responsible Agency/Department: Community Development Department

Timeframe: End of 2025

Objective: 240 new housing units in R4 and CMU districts by 2031

Funding: SB2 and LEAP grants, General Fund

Program 1-E Facilitate Lot Consolidation. Assist developers in finding opportunities for lot consolidation to maximize development in zoning districts that allow high density multifamily development. Target sites within the PDAs and promote residential development in either a mixed use or standalone format, focusing on locations where there is common, proximate (if not contiguous) ownership of individual parcels.

Activities to support lot consolidation include:

- Identification and marketing of opportunities for lot consolidation;
- Outreach to property owners and potential housing developers utilizing targeted mailings, emails and phone calls; and,
- Providing a map of these opportunity areas on the City’s website.

The Planning Commission and City Council will also consider incentives for this program, including:

- Consider reducing fees for simple lot mergers;

- Expediting permit processing, providing parcel map waivers where possible;
- Identifying and targeting specific financial resources; and
- Modifying development standards.

Responsible Agency/Department:

Community Development Department, Public Works Department

Timeframe: Identify consolidation opportunities by April 2023; ongoing implementation with annual reporting via Annual Progress Report to HCD

Objective: 1,037 new multifamily units by 2031

Funding: SB2; General Fund

Incentives for High Density Residential Development. Promote multifamily and mixed development in San Pablo's PDAs through the following actions: (1) process incentives such as fast track permitting, expedited design review, and streamlined environmental review when possible; (2) regulatory incentives such as reduced parking requirements; and (3) fee reductions, waivers, or deferrals for projects that create low- and moderate-income housing and other financial incentives such as development agreements for City-owned properties. Responsible Agency/Department: Community Development Department Timeframe: 2023 with adoption of General Plan Update

Objective: 1,037 new multifamily homes in PDAs by 2031

Funding: General Fund, Low Income Housing Fund

Program 1-F Reduced Parking Standards. The construction of parking spaces typically adds 15 percent to the total project cost for multifamily residential developments and as such, reduced parking requirements can help the financial feasibility of projects. The Zoning Ordinance (Section 17.54.050) currently provides waivers or reductions in parking standards for senior housing, mixed-use projects, and projects in proximity to transit. Given that San Pablo's PDAs, in particular, are well served by transit, further reductions that provide additional incentives are warranted. Through this program the City will identify and implement further reductions increase the feasibility of residential development in the PDAs, potentially including increased credits for mixed use development, proximity to transit, and implementation of Transportation Demand Management (TDM) incentives by residential projects.

Responsible Agency/Department:

Community Development Department and Public Works Departments

Timeframe: Update Zoning Ordinance to incorporate reductions by end of 2023

Objective: 1,037 new multifamily homes in PDAs by 2031

Funding: SB2 and LEAP Grants, General Fund

Program 1-G Faith-Based Community Housing. Churches, synagogues, and mosques can be important partners in providing affordable housing in San Pablo. As landowners with a mission of compassion and community service, religious institutions in the community may have land available for redevelopment with housing to serve community members in need. The City will conduct outreach to faith-based organizations in the community to gauge the level of interest in developing housing on their properties and to understand potential barriers and challenges. Based on input from the faith-based community, the City should evaluate the feasibility of developing a program to facilitate and promote the development of secular-oriented housing on properties owned by faith-based institutions in the community. The program may include technical assistance and development support to faith-based organizations (e.g., the preparation of factsheets; introductions to qualified design professionals, construction contractors, property management firms, and affordable housing operators; consultations on navigating the development application process) and or promotional activities to raise awareness of available programs and incentives (e.g., mailers, phone calls, meetings, and publication of information on the City's website).

Responsible Agency/Department:

Community Development Department, San Pablo Economic Development Corporation (EDC)

Timeframe: End of 2026

Objective: 15 new very low-income housing units by 2031

Funding: General Fund, Low Income Housing Fund

Program 1-H Shopkeeper Housing. In contrast to live-work units, which are a commercial use that allows residential occupancy incidental to an approved non-residential use, shopkeeper units are dwelling units that are physically separated from a commercial space used for a business operated by the occupant of the associated residential unit. The commercial spaces are typically ground-floor retail or office spaces below living spaces where commercial spaces can only be leased to occupants of the residential spaces. The City will consider amendments to the Zoning Ordinance to allow shopkeeper units in commercial and mixed-use districts as a way of providing additional housing while creating walkable mixed-use districts in appropriate locations, such as the 23rd Street and Rumrill PDAs.

Responsible Agency/Department: Community Development Department

Timeframe: End of 2023

Objective: 12 shopkeeper units by 2031

Funding: SB2 and LEAP grants; General Fund

Program 1-I Housing for Families. Continue to promote the development of housing units with three or more bedrooms by providing regulatory incentives such as reduced lot coverage or building height bonuses, on a case-by-case basis, for rental housing developments.

Responsible Agency: Community Development Department

Timeframe: Identify incentives and update Zoning Ordinance by end of 2023

Objective: 20 housing units with three or more bedrooms in the planning period

Funding: General Fund and development fees

Program 1-J Incentives for “Missing Middle” Housing. Pursuant to the Subdivision Map Act (Government Code Section 66410-66499), parcel maps submitted for City approval must be prepared by a licensed land surveyor; however, as the City does not have staff qualified to review proposed subdivision and parcel maps for compliance with engineering requirements, applicants are required to pay the cost of a consultant hired by the City in addition to an administrative fee. The City does not receive many subdivision applications but this additional charge also applies to the cost of parcel maps, lot line adjustments and similar map actions, which could hamper production of small scale “missing middle” housing such as envision under SB9, which allows for urban lot splits and creating additional residential units on existing lots. Effective July 1, 2022, the fee for parcel maps, lot line adjustments and lot mergers is \$2,000, plus the consultant fee and a 17 percent administrative fee. Therefore, the City will consider actions to reduce or mitigate the cost of map actions as a way of incentivizing “missing middle” housing, such as reducing or waiving processing fees if the new lots and units are designated for the affordable housing development.

Responsible Agency/Department: Community Development Department, Public Works Department

Timeframe: End of 2026

Objective: 25 low- or moderate-

income units through SB9 implementation by 2031

Funding: General Fund

Program 1-K Objective Standards for Ministerial Review. To help streamline project approvals and ensure that the review of residential projects is based on objective standards as required by the Housing Accountability Act and other State requirements (e.g. urban lot splits under SB 9 and expedited ministerial review pursuant to SB 35), the City shall review and revise the existing residential development standards, including procedures for review and approval of both ministerial zoning actions and conditional use permits (CUPs) to comply with applicable statutory and case law. As part of this review, the City will also determine which existing design guidelines (included in Appendix A of the Zoning Ordinance as well as the guidelines incorporated in the 23rd Street and San Pablo Avenue Specific Plans) could provide a basis for a clear and objective set of standards to meet State requirements.

Responsible Agency/Department: Community Development Department

Timeframe: End of 2027

Objective: Compliance with State law

Funding: General Fund, Grant funds from State and Regional sources, if available

Program 1-L Accessory Dwelling Units. San Pablo is a city of small lot single-family neighborhoods, which limits potential for additional detached accessory dwelling units (ADUs) on the lot; however, there is significant potential for ADUs or Junior ADUs (JADUs) incorporated into the primary structure.

Since they are typically smaller than a single-family home, ADUs and Junior ADUs can be “affordable by design,” meaning they cost less to build, buy, or rent. As such they can offer affordable opportunities for older adults living on fixed incomes, extended family members, younger residents living with roommates, and for lower income households. Demographic indicators, including a relatively high proportion of non-family households, a growing older adult population, and a relatively large proportion of multi-generational households, signal a need for this type of housing in the short, medium and long-term in San Pablo. Therefore, the City will pursue the following actions to promote the construction of ADUs throughout the community:

- Provide incentives for ADU construction, such as reduced parking requirements in proximity to transit stops; streamlined processing; or technical assistance;
- Promote ADU/JADU construction such as by posting informational materials and links to available resources on the City website or conducting educational workshops for community members;
- Monitor ADU and JADU permitting/ construction trends and affordability in San Pablo, reporting performance in its Housing Element Annual Progress Reports and taking action as needed to ensure compliance with “no-net loss” provisions of State law if performance is not as projected by mid-point in the planning period.

Responsible Agency/Department: Community Development Department

Timeframe: (a) identify incentives by end of 2024; (b) post informational materials and resources by end of 2022; (c) reporting with annual report

to HCD in April 2023; annually by April of each year thereafter

Objective: 66 new ADUs/JADUs by 2031

Funding: General Fund

Program 1-M Encourage Innovative and ‘Non-Traditional’ Forms of Housing.

Provide opportunities and facilitate innovative housing approaches in financing, design, construction and types of housing to increase the variety and supply of lower and moderate-income housing. Examples include co-housing, eco-housing, manufactured housing, new construction or rehabilitation “sweat equity” housing for first time lower or moderate-income homeowners, and cooperatives or joint ventures between owners, developers and nonprofit groups in the provision of affordable housing. Undertake background research and conduct study sessions with the Planning Commission and City Council in 2024 to identify any specific follow-up actions needed.

Responsible Agency/Department: Community Development Department

Council Timeframe: Conduct study sessions by end of 2024; report on options in 2025

Objective: Create opportunity for innovative housing types

Funding: General Fund

Program 1-N Encourage Manufactured Housing.

Continue to allow manufactured housing units in single-family detached areas, consistent with State law requirements, to provide a mix of affordable and moderate-income homes. The City’s Zoning Ordinance allows manufactured housing by right in single-family detached areas in R-1,

R-2, and R-3 zones, so long as they are placed on permanent foundations, connected to public utilities and provided with the appropriate number of parking spaces under City regulations.

Responsible Agency/Department: Community Development Department

Timeframe: 2023-2031

Objective: 20 moderate income manufactured housing units

Funding: General Fund and permit fees

GOAL H-2: Take action to address affordability and housing security for all income groups and family types in San Pablo.

Policy 2-1 Continue to promote and support the development of affordable housing units for lower income households and strive for the provision of housing that is affordable to, and meets the needs of, current and future residents of San Pablo.

Policy 2-2 Monitor and track housing demolition and construction rates in San Pablo, including rates of production by RHNA category, unit size, and tenure.

Continue to encourage the development of housing that meets the needs of large households.

Policy 2-3 Promote the development of student and teacher housing near Contra Costa College.

Policy 2-4 Work with the Contra Costa Housing Authority to promote the upkeep and maintenance of public housing units located in San Pablo.

Program 2-A Community Land Trust Collaboration.

A Community Land Trust (CLT) is a nonprofit organization made up of community residents and public representatives that purchases land to serve local community needs, such as by creating green spaces and building and managing housing for low- and moderate-income households. CLTs have significant technical expertise related to land acquisition and management, and because they own the land, they can provide a range of affordable homeownership opportunities and housing options for generations. This program involves exploring a collaboration or partnership with Richmond LAND, Contra Costa's first CLT, to increase the supply of permanently affordable housing options in San Pablo. Through this initiative, the City may contribute land, funds, and technical expertise. In particular, the program should focus on opportunities to consolidate parcels in the PDAs and on acquisition of existing single-family rental housing.

Responsible Agency/Department:

Community Development Department and San Pablo Economic Development Corporation

Timeframe: Report to City Council on options by July 2025

Objective: Acquisition of property in San Pablo

Funding: General Fund; Low Income Housing Fund

Program 2-B Rental Assistance. Households paying more than 30 percent or more of their income on housing are considered cost burdened, while those paying 50 percent or more are considered severely cost burdened. In San Pablo, 67 percent of all renter households are cost burdened and 28 percent are severely cost burdened. Rental assistance is an effective way to prevent homelessness and improve housing security, however, the waitlist for Housing Choice Vouchers (the federal Section 8 rental assistance program) in Contra Costa County has been closed since 2008. With assistance from the federal Coronavirus Relief Fund, the City provided rental assistance to lower income households impacted by COVID-19 through its Housing Assistance Grant Program to provide relief during the pandemic. The City will continue to leverage local, State, and federal funding, as available, to maintain and continue rental assistance programs and will explore options for establishing an ongoing rental assistance programs for households at risk of homelessness. This program also involves promoting the availability of rental assistance in the community.

Responsible Agency/Department:

Community Development Department, Contra Costa County Public Housing Authority

Timeframe: Report to City Council on rental assistance programs options by January 2025

Objective: Assistance for 720 household most at risk of homelessness annually

Funding: Contra Costa County programs, Low Income Housing Fund, San Pablo EDC, Federal and State housing funds.

Program 2-C Preservation of Deed-Restricted Assisted Housing. The majority of the 568 assisted low-income units in San Pablo are at low risk of conversion to market rate in the planning period; however, there are 60 units at moderate risk and 81 units at high risk, which represents a significantly higher share than in the county or the Bay Area as a whole. If these low-income units convert to market rate, the cost of replacing them would exceed \$55 million (see Appendix B); therefore, preservation of these assisted units through the extension of deed restrictions is a more effective approach. The City will proactively pursue preservation of existing deed restricted units by:

- Creating a local database of subsidized affordable properties in San Pablo, tracking unit count, AMI level served, and expiry date of deed-restriction;
- Conduct outreach to property owners and provide information on tax credits, funding, and resources for rehabilitation as appropriate;
- Consider providing subsidies for expiring deed-restricted properties.

Responsible Agency/Department: Community Development Department

Timeframe: End of 2023 for creation of local database; with annual reporting via Housing Element Annual Progress report to HCD

Objective: Preservation of 141 deed-restricted units in the planning period

Funding: General Fund (staff costs), Contra Costa County programs, Low Income Housing Fund, San Pablo EDC, Federal and State housing funds.

Program 2-D Loan Assistance for Sustainable Housing. In surveys, San Pablo residents expressed a strong desire to stay in the community and purchase a home. Even as prices have risen dramatically in recent years, single-family home prices in San Pablo remain relatively lower than in other surrounding Bay Area communities in part because of the small home size, and as such, when provided with financial and technical support, buying a first home in the community is within reach for some San Pablo community members. Therefore, the City will continue to support the San Pablo Loan Assistance for Sustainable Housing (SPLASH) Program for qualified low-income aspiring homeowners, in partnership with the San Pablo EDC. The program offers “silent second loans” of up to 20 percent of the home value for a period of 30 years to first-time home buyers, with priority for first-responders, teachers, seniors, and veterans.

Responsible Agencies: Community Development Department, San Pablo EDC

Timeframe:

Objective: 16 loans to qualified first-time buyers by 2031

Funding: Contra Costa County Programs, San Pablo EDC, Low Income Housing Fund

Program 2-E First-Time Homebuyer Assistance.

Continue to promote first-time homebuyer assistance programs available to San Pablo residents, including Contra Costa County’s Mortgage Credit Certificate Program, through the following actions:

- Publish information quarterly in the City’s E-Newsletter and on the City’s website.

- Provide information regarding the programs at the service counter in the Community Development Department located at City Hall, the public libraries, and community centers.
- Send an annual letter to local real estate agents and lending institutions notifying them of the availability of the programs for clients who might qualify.

Responsible Agency/Department: Community Development Department; Contra Costa County, San Pablo EDC

Timeframe: Annually, with quarterly updates to materials (as needed) and reporting via the Annual Housing Element Progress Report to HCD

Objective: Subsidy for 10 first-time homebuyers

Funding: General Fund; Contra Costa County

Program 2-F Mobile Home Parks. The Zoning Ordinance (Section 17.60.060) prohibits enlarging or extending mobile home parks to include any additional area, but does not include any provisions intended to improve or maintain this important type of affordable housing. Similarly, the Subdivision Ordinance has not been updated to reference the most recent State requirements for conversion of a mobile home park to a condominium or other use, except for a mandate to comply with the applicable provisions of the California Government Code. The City is also responsible for regular inspections of mobile home parks to ensure code compliance. Therefore, the City will evaluate approaches to preserving and improving maintenance at the existing parks and protecting the residents’ access to comparable affordable units in the event of redevelopment or relocation.

Responsible Agency/Department: Community Development Department, Police Department, Code Enforcement Division

Timeframe: End of 2027

Objective: Preservation of 398 mobile homes or access to comparable affordable units

Funding: SB2; General Fund

Program 2-G Single-Room Occupancy Hotels.

Single-Room Occupancy (SRO) hotels, or “Residential Hotels,” have provided vital housing for low-wage workers, transient laborers, recent immigrants, and other groups throughout California’s history. The typical SRO unit is eight feet by ten feet with shared toilets and showers down the hallway. At the time of preparation of this Housing Element, there were two SRO hotels in San Pablo with a total of 60 rooms. The City will consider amending the Zoning Ordinance to allow SRO units to be occupied by two persons to increase the potential for these units to help reduce homelessness and increase housing options for low-income couples.

Responsible Agency/Department: Community Development Department

Timeframe: End of 2027

Objective: Preservation of 60 SRO units

Funding: General Fund

Program 2-H Home Sharing and Tennant Matching.

Home-sharing and tenant matching programs pair existing homeowners with renters in need of space. These programs make efficient use of existing housing stock and provide affordable rental rates without the need for new construction. Home sharing can help homeowners

supplement their income and can be a particularly effective tool to support independent living for seniors and disabled residents. The City will assess the feasibility of establishing a home-sharing and tenant matching program in collaboration with Contra Costa College and/or non-profit groups such as Front Porch Home Match, Covia, or Home Match Contra Costa.

Responsible Agencies: Community Development Department

Timeframe: Report to City Council on options by April 2025

Objective: 10 home sharing opportunities created

Funding: General Fund

- Waiver or deferment of development fees;
- Priority processing; and,
- Other incentives identified by the project sponsor or the City that will reduce development costs while achieving the overall intent of the City's zoning standards.

Responsible Agency/Department: Community Development Department

Timeframe: Ongoing

Objective: 273 new units affordable to lower income households in the planning period

Funding: General Fund, Low Income Housing Fund, Contra Costa County programs

GOAL H-3: Equal housing opportunity for all residents of San Pablo, regardless of race, religion, sex, marital status, ancestry, national origin, color, or ability.

Program 2-I Incentives for Affordable and Special Needs Housing. Continue to offer density bonuses and other incentives to increase the financial feasibility of developing housing for lower income residents and special needs groups in San Pablo, based on the percentage of affordable units in a development. Developers granted a density bonus are required to enter into an Affordable Housing Contract with the City to ensure the continued affordability of the units. Affordable rent units are subject to annual rent adjustments based upon changes in the older adult tenants' monthly income.

Incentives offered for affordable and special needs housing include, but are not limited to:

- A reduction in the site development standards or a modification of zoning code requirements, such as minimum setbacks, parking standards, increased maximum building height, reduced street standards and for indoor and outdoor activity areas, etc.

Program 2-J Facilitate Affordable Rental and Cooperative Family Housing Opportunities. San Pablo has recently approved an adaptive reuse of a vacant office building into 54 micro-units of permanent supportive housing in conjunction with the County and with State and Federal funding. Facilitate the development of additional affordable rental and cooperative family housing that provides on-site support services for extremely low-and very low-income families in collaboration with the Contra Costa Health Services and the Interagency Council on Homelessness through the use of available funding.

Responsible Agency/Department: Community Development Department; Contra Costa Health Services; non-profits

Timeframe: Ongoing, as opportunities arise

Objective: Provision of affordable housing with support services

Funding: General Fund, County, State, and Federal Grants

Policy 3-1 Fair Housing Enforcement. Enforce fair housing laws and address discrimination in the building, financing, selling, or renting of housing based on race, religion, family status, national origin, disability, or other protected class.

Policy 3-2 Collaborative Fair Housing Efforts. Work collaboratively with local non-profit, public, and private sector partners to raise awareness and achieve implementation of fair housing practices.

Policy 3-3 Diverse Housing Opportunity. Diversify and expand the housing stock in San Pablo in order to better accommodate the varied housing needs of current and future residents.

Policy 3-4 Special Needs Housing. Continue to promote housing developments that meet the special needs of senior citizens, disabled, homeless, large families and female-headed households.

Policy 3-5 Equal Distribution. Avoid the over-concentration of housing constructed expressly for lower income households in any single portion of any neighborhood.

Program 3-A Housing for Extremely Low-Income Households. In San Pablo, nearly 75 percent of older adult renters live in extremely low-income households while residents of color are disproportionately more likely to be extremely low income or live below the poverty line than other groups

(See Appendix B). Recognizing that local funding capacity for affordable housing has been severely diminished by the dissolution of redevelopment agencies, the City will continue to facilitate production of affordable housing, including units targeted to extremely low income (ELI) households and persons with special needs (large households, female-headed households, older adults, disabled/developmentally disabled, homeless, and farmworkers), through the following efforts:

- Provide administrative assistance upon request to developers seeking available State and federal funding and/or tax credits for the construction of low- and moderate-income housing.
- Facilitate projects that incorporate affordable units by granting modifications to development standards, expediting the review process, and/or providing financial incentives consistent with City regulations and State law.
- Contact affordable housing developers at least once each year to solicit interest and apprise them of available assistance programs.
- Whenever feasible, provide targeted assistance for special needs housing and extremely low income (ELI) units through density bonuses and/or regulatory incentives, modified development standards, and fee deferrals.

Responsible Agency/Department: Community Development Department

Timeframe: 2023-2031, with annual progress reporting

Objective: Permits for at least 115 extremely low-income units, consistent with the City's regional allocation of such units for the planning period

Funding: Federal and State funds, Contra Costa County programs (CDBG, HOME, and other funding allocations)

Program 3-B Emergency Shelters. Update the Municipal Code to remove constraints to the development of emergency shelters, including the 500-foot separation requirement from other emergency shelters, and establish parking requirements based on staffing level only, consistent with AB 139 and SB 2.

Responsible Agency/Department: Community Development Department

Timeframe: End of 2023

Objective: Consistency with State law

Funding: SB2; General Fund

Program 3-C Employee Housing. State law requires that any employee housing providing accommodations for six or fewer employees be treated as a single-family structure with a residential land use designation and that no conditional use permit, zoning variance, or other zoning clearance shall be required of employee housing that serves six or fewer employees that is not required of a family dwelling of the same type in the same zone. The City will update the Municipal Code to comply with California Code, Health and Safety Code Section 17021.5, including the incorporation of a definition of the term "employee housing."

Responsible Agency/Department: Community Development Department

Timeframe: End of 2023

Objective: Consistency with State law

Funding: SB2; General Fund

Program 3-D Zoning for Residential Care Facilities.

Residential care facilities provide varying levels of care for persons who require assistance for daily living, including older adults, the developmentally disabled, and others. To ensure compliance with State law regarding these facilities the City will:

- Review and revise applicable parking standards to ensure they do not pose an obstacle to development of residential care facilities;
- Revise the current definitions for different types of facilities to avoid confusion by more closely following the terms used in State law;
- Evaluate the degree to which existing standards may impede development of these facilities (including through an examination of the types of accommodations that have been sought by applicants proposing to develop these types of facilities, the type and extent of information the City requires to conduct its evaluation, and the City's decision) and propose amendments to the Zoning Ordinance if necessary.

Responsible Agency/Department: Community Development Department

Timeframe: End of 2023

Objective: Consistency with State law

Funding: SB2; General Fund

Program 3-E Transitional and Supportive Housing.

Transitional housing acts as a bridge between a crisis shelter and permanent housing, providing temporary housing while residents develop more independent living skills and stability. Supportive housing offers permanent, stable living situations for those in

need of a continuum of care plan, such as treatment for adult clients with serious mental illness and co-occurring disorders. The City will review the Zoning Ordinance and update as needed for compliance with State law regarding the treatment of transitional and supportive housing facilities.

Responsible Agency/Department: Community Development Department

Timeframe: End of 2023

Objective: Consistency with State law

Funding: SB2; General Fund

Program 3-F Landlord/Tenant Dispute Resolution.

Continue to work with Housing Rights, Inc. (HRI) or other non-profit legal services providers to minimize and resolve conflicts and disputes between landlords and tenants and eliminate all forms of housing discrimination. Through this program, the City will continue to post information about tenant/landlord rights and conflict resolution programs on its website and in City newsletters and communications. Additionally, the City will implement a tracking system to record the number of referrals and document residents' concerns.

Responsible Agency/Department: Community Development Department

Timeframe: Set up tracking system by end of 2023, with annual reporting on performance; annual update of website materials; at least annual dissemination of newsletters and communications.

Objective: Resolution of conflicts and disputes between landlords and tenants, and elimination of all forms of housing discrimination

Funding: General Fund

Program 3-G Just Cause Eviction Protections.

California law (AB1482) provides protection from steep rent increases for renters in most multifamily housing developments constructed more than 15 years ago; however, San Pablo has a high percentage of renters living in single-family homes that are exempt from these protections and a high rate of cost burdened renter households (see Appendix B). Under this program, the City will explore implementing a mediation program to assist in settling landlord-tenant disputes regarding rent increases and payment, which can end just cause for eviction. The objective of this program would be to resolve disputes and prevent evictions in San Pablo, particularly for low income renters.

Responsible Agency/Department: Community Development Department

Timeframe: Report to City Council on options by January 2024

Objective: Provide mediation services for at risk households throughout the planning period

Funding: General Fund

Program 3-H Awareness of Fair Housing Programs.

Surveys indicate that San Pablo residents are largely unfamiliar with fair housing programs available to them (see Appendix D), including services provided by Bay Area Legal Aid, Contra Costa Senior Legal Services, and 211 Contra Costa. This program involves the following actions to increase awareness of fair housing programs and services among San Pablo residents, with a focus on segments of the population disproportionately affected by fair housing issues, including older adults and residents of color:

- Designating an Equal Opportunity Coordinator within the City responsible for outreach and referrals to appropriate agencies
- Hosting regular "housing clinics" to inform residents of resources and rights in partnership with non-profit groups offering free legal services in English and Spanish, such as Bay Area Legal Aid, Eviction Defense Center, or other similar groups
- Providing general information and education to undocumented residents who may not be eligible for free legal services.

Responsible Agency/Department: Community Development Department

Timeframe: Designate coordinator by July 2024; implement first "housing clinic" in Q1 2024

Objective: Provide mediation services for at risk households throughout the planning period

Funding: General Fund

Program 3-I Outreach to People Living with Developmental Disabilities in San Pablo.

Work with the Regional Center of the East Bay (RCEB) to implement an outreach program that informs families within the City about housing and services available for persons with developmental disabilities. The program would include the development of an informational brochure and inclusion of information on services available for the developmentally disabled population and links to service agencies on the City's website.

Responsible Agency/Department: Community Development Department; RCEB; non-profits

Timeframe: Launch program in 2024
Objective: Inform families about housing and services available for persons with developmental disabilities
Funding: General Fund

GOAL H-4: Enhanced quality of existing residential neighborhoods in San Pablo, through maintenance and preservation, while minimizing displacement impacts.

- Policy 4-1 Home Rehabilitation.** Continue to provide low-interest, deferred loans to extremely low-to moderate-income property owners to rehabilitate their homes.
- Policy 4-2 Enhancing Conditions in City Neighborhoods.** Continue to take measures and provide incentives for upgrading and improving the environment of City neighborhoods.
- Policy 4-3 Historically Significant Residential Buildings.** Continue to preserve historically significant housing and promote the Early California Architecture style to preserve San Pablo’s architectural heritage.
- Policy 4-4 Inspection Programs.** Promote the conservation and rehabilitation of the housing stock through pre-sale and pre-licensing inspection programs.
- Policy 4-5 Safe Neighborhoods.** Continue to seek ways to create safe neighborhoods through Neighborhood Watch, community policing, and other approaches.

Program 4-A Provide Low-Interest Loans for Housing Rehabilitation through the Contra Costa County Neighborhood Preservation Program. Continue to facilitate the County’s provision of low-interest loans to extremely low to moderate income owner occupied and rental property owners to bring units up to current building code standards, modify buildings for improved mobility of disabled and elderly persons, demolish irreparable secondary buildings, expand units to alleviate overcrowding, identify and remove lead paint hazards, and allow for general property improvements. The Neighborhood Preservation Program is run through Contra Costa County and is available throughout the City.

In addition, inform residents about the availability of low-interest loans by distributing this information via the City e-newsletter to households in San Pablo. All newsletters will be sent in the major languages that are representative of the City’s population.

Under this program Contra Costa County will provide low interest rehabilitation loans from such programs as CDBG and California Housing Rehabilitation Program to assist San Pablo residents in rehabilitating their homes. The program offers low-interest loans (3 percent) for up to \$50,000. City involvement could include:

- Promotion of the program to San Pablo residents;
- Review of pro forma analysis;
- Provision of available demographic or other background data necessary to complete applications;
- Review and comment upon draft application;
- Letters of support as appropriate;

Responsible Agency/Department: Community Development Department; Contra Costa County, San Pablo EDC
Timeframe: 2023-2031
Objective: Rehabilitation of 27 lower income units by 2031 (3/year)
Funding: Contra Costa County CDBG Funds; California Housing Rehabilitation Program.

Program 4-B Provide Technical Assistance and Counseling for Rehabilitation Loans. Continue to provide free technical assistance and counseling to approved loan applicant homeowners interested in developing plans and specifications for rehabilitation. The City will provide technical assistance to homeowners on the following issues:

- Interpreting code requirements;
- Architectural consultation regarding structural work essential to the conservation program;
- Instructions on how to solicit bids order to get the best terms;
- Guidance in letting and enforcing contracts;
- Assist in monitoring construction; and
- Referral to consumer protection services whenever appropriate.

Responsible Agency/Department: Community Development Department; Contra Costa County
Timeframe: 2023-2031
Objective: Provision of technical assistance and referrals
Funding: General Fund; Contra Costa County CDBG funds

Program 4-C Implement the Neighborhood Clean-Up Program. Continue to implement the Neighborhood Clean-up Program to help keep San Pablo clean, by implementing the following measures:

- Providing a voucher-type program for San Pablo residents to take unwanted household items and trash to the Richmond Dump; and
- Distributing brochures about the program and send informational letters to every household in San Pablo.

Responsible Agency/Department: Community Development Department, Public Works Department, Code Enforcement Division (Police Department), and Contra Costa County

Timeframe: Vouchers distributed year-round

Objective: Reduce trash and improve the appearance of neighborhoods

Funding: General Fund, Contra Costa County CDBG funds

Program 4-D Implement the Motor Vehicle Abatement Program. Continue to implement the Motor Vehicle Abatement Program to keep the streets clear of abandoned motor vehicles by towing vehicles after adequate notice is given to the registered owner.

Responsible Agency/Department: Community Development Department, Code Enforcement Division (Police Department)

Timeframe: 2023-2031

Objective: Abandoned vehicles removed (650 per year based on recent accomplishments)

Funding: General Fund

Program 4-E Monitor Housing Conditions for Code Compliance. Continue to monitor the conditions of the housing stock through regular housing inspections through the Police Department's Code Enforcement inspection program. The City examines buildings and other structures reported to be dangerous or damaged. The Building Official locates the property's owner through a preliminary title report for any structure found unsafe, and serves a written notice stating the defects of the building requiring the owner to commence either the required repairs or improvements, or the demolition of the building

Responsible Agency/Department: Code Enforcement Division (Police Department), Community Development Department, Building Division

Timeframe: 2023-2031

Objective: Inspect about 400 single-family, townhome, and condominium units per year

Funding: General Fund (enforcement fees and fines)

Program 4-F Neighborhood Stabilization Program. Assist in implementing the Contra Costa County Neighborhood Stabilization Program operated by the County through CDBG funding to assist local governments to provide targeted emergency assistance to acquire and redevelop abandoned and foreclosed residential properties that might otherwise become sources of abandonment and blight within the communities.

Responsible Agency/Department: Community Development Department; Code Enforcement Division (Police Department), Contra Costa County

Timeframe: 2023-2031

Objective: Assistance for 5 lower income housing units

Funding: General Fund; Contra Costa County Program

Program 4-G Healthy Homes Program Implementation. Coordinate with Community Energy Services Corporation (CESC) to implement the Healthy Homes program in San Pablo. The program removes and remediates asthma triggers in households where asthma sufferers reside in eligible cities. Home improvements to reduce mold, wood rot, and dust mites may include the installation of fans, repairs to leaking problems and general cleaning.

Responsible Agency/Department: Community Development Department; CESC

Timeframe: 2023-2031

Objective: Healthy Homes improvements for 5 lower income units

Funding: General Fund; CESC

Program 4-H Home Repair Programs. Continue to promote and assist in the program offered by Contra Costa County to provide free, high quality, major and minor home repairs to low-income residents. The services include most plumbing, electrical and carpentry repairs, furnace and minor roof repairs, and the installation of safety features such as grab bars, handrails, and ramps.

Responsible Agency/Department: Community Development Department, Code Enforcement Division (Police Department); Contra Costa County

Timeframe: 2023-2031

Objective: Repairs to 20 lower income homes

Funding: General Fund; Contra Costa County

Program 4-I Residential Health & Safety Program. The Residential Health & Inspection Program establishes the procedures for the inspection of all single and multiple family residential non-owner-occupied units, and for inspection of all dwellings sold within the San Pablo city limits. The program helps ensure the City's residential units comply with existing building, electrical, fire and plumbing code standards, to ensure structures are safe for occupancy, and the housing stock is maintained. This program requires all rental properties to obtain a "Certificate of Compliance" every 12 to 36 months, depending on the number of demerits a property receives during inspection. It also requires all single-family homes more than 10 years old, or with a "Certificate of Compliance" more than three years old to obtain a new one before the property is sold, transferred, or assigned. The Certificate is awarded for homes that pass inspection and are evaluated as being in compliance with the City's housing code, zoning ordinance, and other City ordinances relating to health and safety.

Responsible Agency/Department: Community Development Department, Building Division

Timeframe: 2023-2031

Objective: Inspect about 750 rental and owner-occupied single-family, townhome, and condominium units per year

Funding: General Fund (Residential and Health Safety Fees).

Program 4-J Enhanced Rental Health and Safety Program. San Pablo's Residential Health & Safety (RH&S) Program requires the inspection of single-family and multi-family buildings at the time of sale, and provides one avenue for rental tenants to report health and safety issues. Existing County programs target owner-occupied units only and there is no funding for rehabilitation and maintenance of renter-occupied units. Through this program, the City will explore improvements to the RH&S Program that will allow for improved reporting of rental health and safety concerns and provide referral to mediation programs as appropriate.

Responsible Agency/Department: Community Development Department, Building Division

Timeframe: End of 2023

Objective: Consistency with State law

Funding: SB2; General Fund

Program 4-K Coordination with the Police Department. Continue the Police Department's participation in the review of building plans. The Chief of Police or designee will participate in the Internal Plan Review Committee for all major subdivisions to ensure that subdivisions are planned to promote safe environments and prevent crime. Consider neighborhood plans, safe routes to schools, intersection cameras and park access.

Responsible Agency/Department: Community Development Department; Police Department

Timeframe: 2023-2031

Objective: Police Department review of development proposals

Funding: Permit Fees

GOAL H-5: Proactive energy conservation and waste reduction activities in all residential neighborhoods

Policy 5-1 Promote energy conservation programs and incentives, including those offered by Bay Area Regional Energy Network (BayREN), Pacific Gas & Electric (PG&E), East Bay Municipal Utility District (EBMUD), and RecycleMore.

Policy 5-2 Encourage the incorporation of energy conservation design features in existing and future residential developments to conserve resources and reduce housing costs.

Policy 5-3 Encourage the use of building placement, design, and construction techniques that promote energy conservation, including green building practices, the use of recycled materials, and the recycling of construction and demolition debris.

Program 5-A Energy Efficient Design. Promote the use of solar energy and other environmentally sound, energy efficient methods for heating and cooling homes, consistent with adopted building, mechanical and plumbing codes. Provide information through the website and newsletters to residents, highlighting the availability of financial incentives available through federal, State, and local government programs such as those offered by Bay Area Regional Energy Network (BayREN), Pacific Gas & Electric (PG&E), East Bay Municipal Utility District (EBMUD), and RecycleMore.

Responsible Agency/Department:
Community Development Department;
Public Works Department
Timeframe: 2023-2031
Funding: General Fund

Responsible Agency/Department:
Community Development Department;
Public Works Department
Timeframe: 2023-2031
Funding: General Fund

Examples of City staff work priorities specific to the Housing Element include:

- Conduct the annual review of the Housing Element.
- Review options for funding affordable housing.
- Make recommendations for housing opportunity sites and for funding.
- Conduct community outreach and provide community information materials
- Engage property owners in identifying opportunities for the construction of affordable housing.
- Pursue unique opportunities where the City can participate in the construction of affordable housing, either on City-owned sites, or through funding or regulatory means.
- Develop ongoing and annual outreach and coordination with non-profit housing developers and affordable housing advocates.
- Continue to participate in ongoing regional activities related to housing.

Responsible Agency/Department:
Community Development Department;
City Manager; Planning Commission;
City Council

Timeframe: April 2023 and annually thereafter as part of the annual review of the Housing Element

Objective: Identification of annual work priorities for housing

Funding: General Fund

GOAL H-6: Strengthen local government institutional capacity, provide information to the community and monitor accomplishments to respond effectively to housing needs.

Program 5-B Green Building Incentives. Evaluate the feasibility of offering incentives for residential and mixed-use projects built to green building standards that exceed the requirements of Title 24 (CalGreen). Incentives may include density/intensity bonus, fee waivers, or expedited processing. Harmonize incentives with those provided for high density multifamily projects in the PDAs (see Programs 1-E, 1-F, 1-G above).

Responsible Agency/Department:
Community Development Department;
Public Works Department
Timeframe: Report to City Council by January 2026
Funding: General Fund

Policy 6-1 The City recognizes that housing that is safe, healthy and affordable is an important City priority and the City will take a proactive leadership role in following through on identified Housing Element implementation actions in a timely manner.

Policy 6-2 Work with community groups, other jurisdictions and agencies, non-profit housing sponsors and the building and real estate industry when implementing Housing Element programs.

Policy 6-3 The City will provide outreach and information to the community on the availability of programs to address individual housing needs, and will actively involve the community through information, outreach and review.

Program 5-C Sustainable Design. Encourage and facilitate environmentally sensitive construction practices by:

- Restricting the use of chlorofluorocarbons (CFCs), hydrochlorofluorocarbons (HCFCs), and halons in mechanical equipment and building materials;
- Promoting the use of products that are durable and allow efficient end-of-life disposal (recyclable);
- Requiring large project applicants to submit a construction waste management plan for City approval;
- Promoting the use of locally or regionally available materials; and
- Promoting the use of cost-effective design and construction strategies that reduce resource and environmental impacts.

Program 6-A Work Priorities. As part of the annual review of the Housing, establish work priorities to implement the Housing Element related to community outreach, awareness and input on housing concerns and strive to ensure that all City publications include information on housing programs.

Program 6-B Annual Housing Element review.

As required by State law, the City will review the status of Housing Element programs by April of each year, beginning April 2023. As required by statute, annual review will cover:

- Consistency between the Housing Element and the other General Plan Elements. As portions of the General Plan are amended, the Housing Element will be reviewed to ensure that internal consistency is maintained. In addition, a consistency review will be implemented as part of the annual general plan implementation report required under Government Code Section 65400.
- Statistical summary of residential building activity tied to various types of housing, household need, income and Housing Element program targets.
- Use of HCD review sheets for annual review compliance.
- Public review with the Planning Commission and City Council.

Responsible Agency/Department: Community Development Department; Planning Commission; City Council

Timeframe: April 2023 and annually thereafter

Objective: Review and monitor Housing Element implementation; submit Annual Report to HCD in April of each year

Funding: General Fund

Program 6-C Water and Sewer Service to Affordable Housing Developments.

Consistent with SB 1087 (Government Code Section 65589.7), the City will provide a copy of the adopted Housing Element to water and sewer providers

immediately upon adoption and will work with water and sewer providers to adopt written policies and procedures that grant priority for service allocations to proposed developments that include housing units affordable to lower income households.

Responsible Agency/Department: Community Development Department, East Bay Municipal Utility District (EBMUD) and West County Wastewater District

Timeframe: 2023

Objective: Comply with Government Code Section 65589.7

Funding: General Fund

Program 6-D Housing Coordination with Contra Costa County.

Continue to coordinate with Contra Costa County on the annual allocation to San Pablo residents of rental assistance, CDBG, rehabilitation, neighborhood preservation and other programs funded through the County.

Responsible Agency/Department: Community Development Department; Contra Costa County

Timeframe: Annually

Objective: Maximize annual subsidies available to San Pablo residents

Funding: General Fund, Contra Costa CDBG, Section 8 and other funds

Program 6-E Coordination with Development Community.

Continue to work with non-profit and for-profit housing developers to assist in achieving the City's housing goals and implementing programs. Coordination should occur on an ongoing basis, and as special opportunities arise as the Housing Element is implemented. Participation

of non-profit and for-profit developers in an advisory role when implementing housing programs would be desirable to help understand the needs and opportunities in the community.

Responsible Agency/Department: Community Development Department

Timeframe: Ongoing and as opportunities arise

Objective: Outreach and involvement of non-profit and for-profit housing developers

Funding: General Fund

Program 6-F Lobby for Changes to State Law Requirements and Housing Funding.

In coordination with other jurisdictions in Contra Costa County, as appropriate, lobby for modifications to address unfunded State mandates and to provide opportunities for additional funding for affordable housing.

Specific modifications include, but are not limited to, the following:

- **Address** unfunded mandates and expenses local governments must incur to comply with State requirements.
- **Assist** local governments in meeting their affordable housing requirements and identify alternatives means of funding through the State of California to replace Redevelopment.

Responsible Agency/Department: Community Development Department; City Manager; Planning Commission; City Council

Timeframe: Ongoing throughout the planning period

Objective: Work with other Contra Costa County jurisdictions and lobby for modifications to State law

Funding: General Fund

Program 6-G Publicize and Provide Information on Housing Programs. Promote the availability of Contra Costa County programs for housing construction, homebuyer assistance, rental assistance and housing rehabilitation through the following means: (a) creating a link on the City’s website that describes programs available in the City of San Pablo and provide direct links to County agencies that administer the programs; (b) including contact information on County programs in City mail-outs and other general communications that are sent to residents; (c) maintaining information on programs at the City’s public counters; (d) training selected City staff to provide referrals to appropriate agencies; (e) distributing information on programs at public locations (library, schools, etc.); and (f) using the activity calendar and public information channel.

Examples of specific information would include:

- Fair Housing Laws
- Rehabilitation loan programs
- Contra Costa County Housing Authority information
- Housing programs, including rental assistance programs such as Section 8
- Code enforcement
- Homebuyer assistance
- Information about affordable housing

Responsible Agency/Department: Community Development Department

Timeframe: Review and obtain materials by June 2023; distribute and post materials, conduct staff training by December 2023; annually update thereafter.

Objective: Distribute educational materials at public locations and make

public service announcements through different media at least two times a year.

Funding: General Fund

Program 6-H Community Outreach Housing Element Program Implementation.

Coordinate with local businesses, housing advocacy groups, neighborhood groups and others in building public understanding and support for affordable housing, workforce housing, special needs housing and other issues related to housing, including the community benefits of affordable housing, mixed use and pedestrian-oriented development. The City will notify a broad representation of the community to solicit ideas for housing strategies when they are discussed at Planning Commission or City Council meetings.

Specific actions should be linked to the preparation and distribution of materials as identified in Programs above. Specific outreach activities include:

- Maintain the Housing Element mailing list and send public hearing notices to all interested public, non-profit agencies and affected property owners.
- Post notices at City Hall, the library, and other public locations.
- Publish notices in the local newspaper.
- Post information on the City’s website.
- Conduct outreach (workshops, neighborhood meetings) as Housing Element programs are implemented.
- Assure that public meetings are publicized and provide opportunities for participation from housing experts, affordable housing advocates, special needs

populations and the community as a whole.

- Provide public information materials about available energy conservation programs, such as the PG&E Comfort Home/Energy Star new home program, to interested property owners, developers and contractors.
- Promote and help income-eligible households to access federal, state and utility income qualifying assistance programs.
- Provide public information materials to developers, contractors and property owners on existing federal, state and utility incentives for installation of renewable energy systems, such as rooftop solar panels, available to property owners and builders.

Responsible Agency/Department: Community Development Department

Timeframe: Consistent with implementing programs Timeframes

Objective: Conduct community outreach and distribute materials

Funding: General Fund

Program 6-I Neighborhood Meetings. Encourage developers of major housing projects to conduct neighborhood meetings with residents early in the process to undertake problem solving and facilitate more informed, faster, and more constructive development review.

Responsible Agency/Department: Community Development Department

Timeframe: 2023-2031

Objective: Early community involvement and discussion when housing developments are proposed

Funding: General Fund; developer funds

Appendix B: San Pablo Housing Needs Assessment

This section examines the current population characteristics and housing conditions of San Pablo and forecasts anticipated population and household growth. Both local and regional changes since the previous Housing Element are assessed to provide the full scope of housing needs. Analysis in each of the sections below informs the housing programs and policies provided in a subsequent chapter of this Housing Element that will address the housing needs of the city.

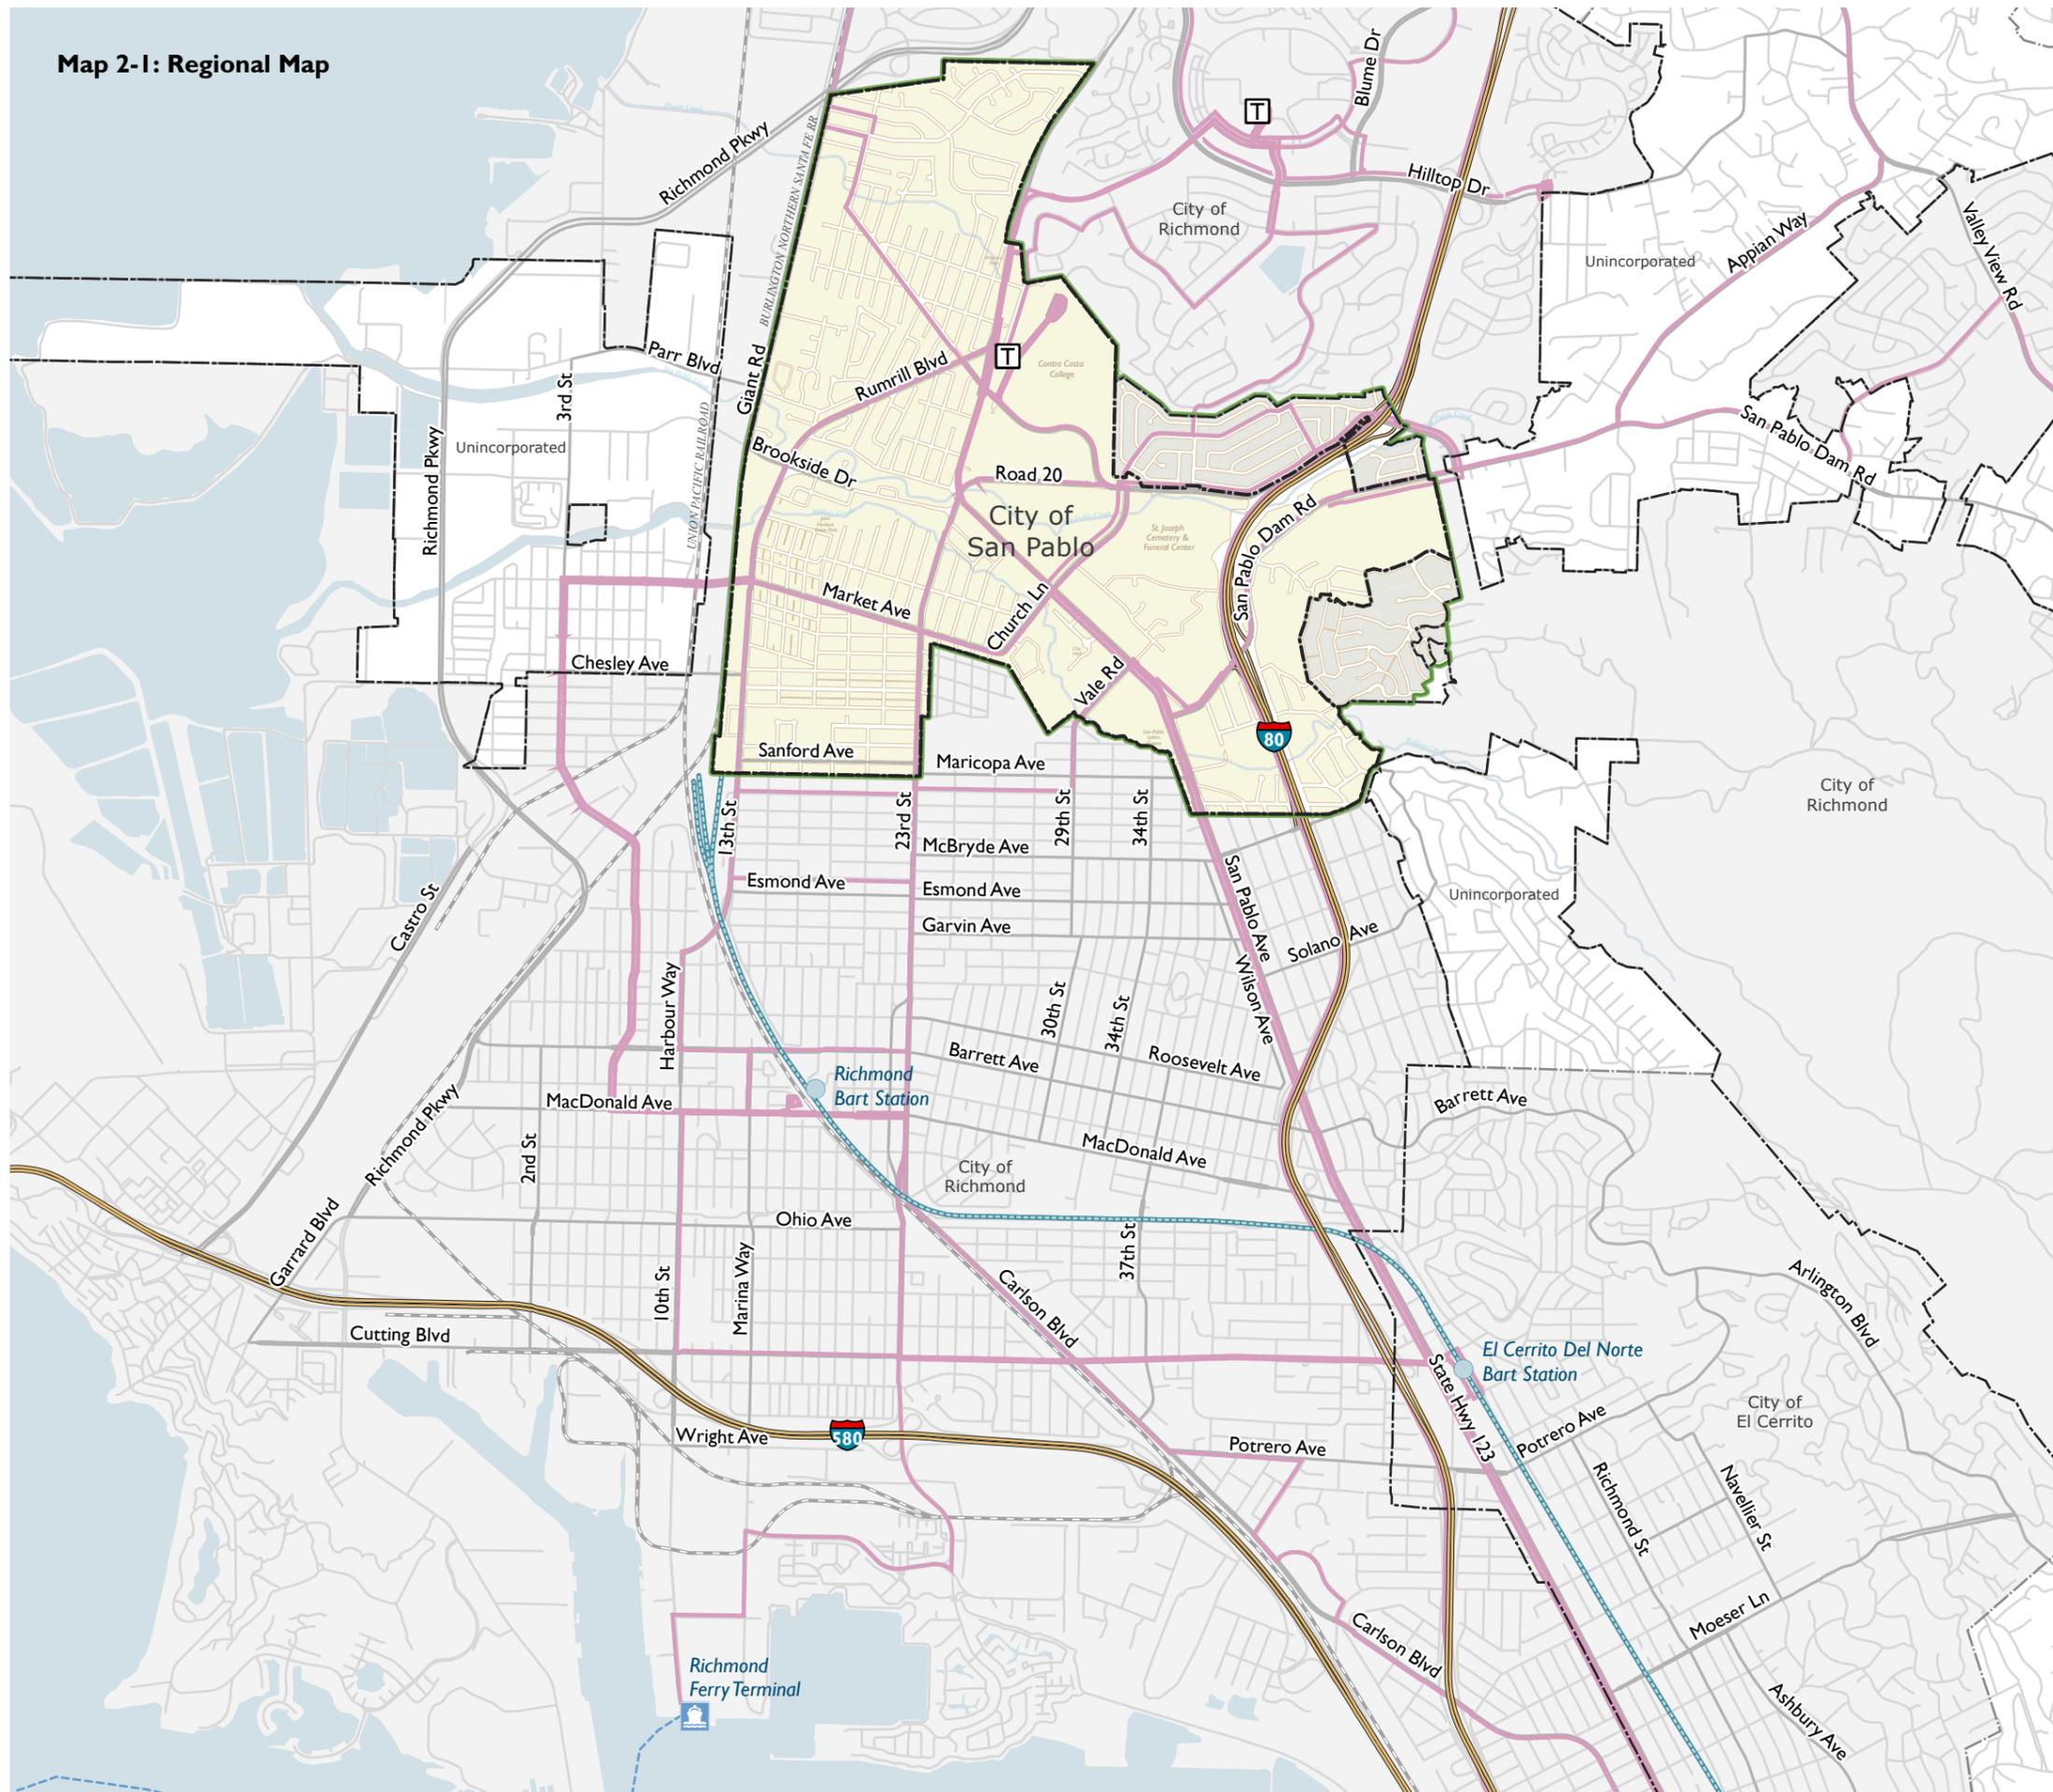

The Association of Bay Area Governments-Metropolitan Transportation Commission (ABAG-MTC) has produced Local Housing Needs Data packets for jurisdictions in the ABAG-MTC region that have been pre-approved by the State Department of Housing and Community Development (HCD). These data packets largely rely on 2015-2019 five-year American Community Survey (ACS) and 2013-2017 Department of Housing and Urban Development (HUD) Comprehensive Housing Affordability Strategy (CHAS) estimates, among other sources. Where the ABAG-MTC data packet does not provide sufficient information, alternate data sources are used.

B.1 Community Profile

San Pablo is situated within the western portion of Contra Costa County, inland from the eastern shore of San Pablo Bay. It is an enclave, largely surrounded by the City of Richmond and bordered by the unincorporated community of North Richmond to the west. Interstate 80 passes through the eastern portion of the San Pablo in a north-south direction, and the city is conveniently located minutes driving distance away from the Bay Area cultural centers of Berkeley, Oakland and San Francisco. Prominent geographic features in the area include ridges of the Wildcat Canyon Park, which forms a backdrop to the city to the east, and the waters of San Pablo Bay to the northwest.

The city exhibits the characteristics common in many Bay Area cities: it is nearly fully developed with little or no land separating city limits from adjacent urban development. Within the city limit there are 1,667.3 acres (2.6 square miles) of land, including residential, commercial, and industrial developments, as well as public facilities, including parks and schools. The city has excellent access to the regional transportation network and is a thriving community with a diverse population and relatively lower housing costs compared to the wider Bay Area. The majority of land in San Pablo is built-out with a high proportion of established, small-lot single-family neighborhoods. The City is undertaking an update to its General Plan in tandem with this Housing Element to promote a land use pattern and policies that will help to accelerate housing production, especially for higher density infill development, “missing middle” housing options, and accessory dwelling units (ADUs) in single-family areas. The planning area considered in this update, including both the city and its sphere of influence, is depicted in Map 2-1.

B.2 Population Characteristics

According to the California Department of Finance (DOF), the total population of San Pablo in 2020 was 31,413, an increase of 7.8 percent since 2010 (29,139). ABAG-MTC has provided DOF estimates of population growth indexed to the population in the year 1990 for San Pablo and surrounding regions. Shown in Chart B-1, these data points represent the population growth in each of the geographies relative to their populations in 1990. The break between 2009 and 2010 is due to the differences between population estimates in 2009 and census counts in 2010. DOF uses the decennial census to benchmark subsequent population estimates. As evidenced in the plot, San Pablo has seen a lower relative growth rate than both Contra Costa County and the Bay Area during the 1990 to 2020 period.

Chart B-1: San Pablo and Surrounding Areas Population Growth, 1990-2020

ABAG projects that by 2040 the population of San Pablo will increase to 34,090, an 8.1 percent increase from the current 2020 population of 31,413 as shown in Table B-1.

Table B-1: San Pablo Projected Population (2010-2040)

2010	2015	2020	2025	2030	2035	2040

Source: Association of Bay Area Governments, Projections 2040

POPULATION BY AGE

Current and future housing needs are usually determined, in part, by the age characteristics of a community's residents. Each age group has distinct lifestyles, family type and size, incomes, and housing preferences. Consequently, evaluating the age characteristics of a community is important in determining its housing needs.

According to the 2019 ACS five-year estimates, the city's median age is 33.5, which is 6.2 years younger than Contra Costa County's median age of 39.7. The difference in median age suggests that San Pablo has a younger population than the overall population of Contra Costa County. Despite this, the data in Table B-2 confirms that older age groups in San Pablo are nonetheless growing to hold a larger share of the overall population; 8.7 percent of the population was age 65 and over in 2000 compared to 10.1 percent in 2019. This data from ABAG-MTC is based on U.S. Census and American Community Survey five-year data.

An increase in the older population may mean there is a developing need for more older adult housing options. There has also been a move by many to age-in-place or downsize to stay within their communities, which can mean more multifamily and accessible units are also needed.

Table B-2: Population by Age, San Pablo (2000-2019)

Age Group	2000		2010		2019	
	Number	Percent	Number	Percent	Number	Percent
0-4 years	2,738	9.1%	2,414	8.3%	1,861	6.0%

RACE AND ETHNICITY

Understanding the racial makeup of a city and region is important for designing and implementing effective housing policies and programs. These patterns are shaped by both market factors and government actions, such as exclusionary zoning, discriminatory lending practices and displacement that has occurred over time and continues to impact communities of color today. Since 2000, San Pablo has seen a large increase in its Hispanic or Latinx population from 46.3 percent to 60.1 percent. Both the non-Hispanic White and non-Hispanic Black or African American populations have decreased both in their total numbers and in their share of the city's overall population since 2000. Table B-3 shows these racial and ethnic trends between 2000, 2010, and 2019. The data is sourced from the U.S. Census (for 2000 and 2010) and on American Community Survey five-year data (for 2019).

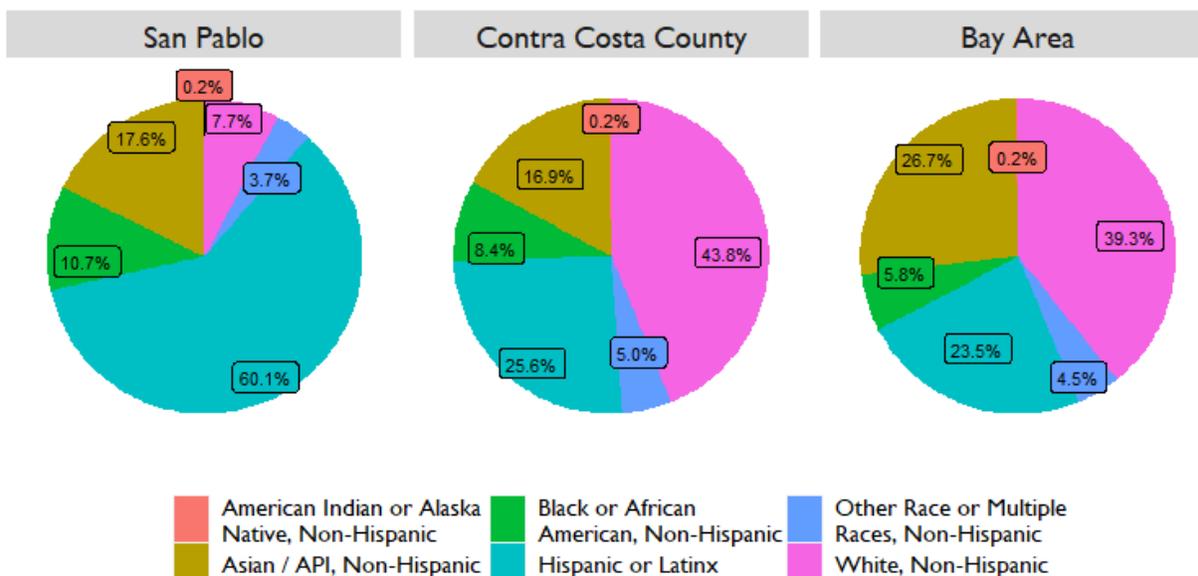

Table B-3: Population by Race, San Pablo (2000-2019)

Racial/Ethnic Group	2000		2010		2019	
	Number	Percent	Number	Percent	Number	Percent
American Indian or Alaska Native, Non-Hispanic	125	0.4%	73	0.3%	50	0.2%
Asian / API, Non-Hispanic	5,036	17.3%	4,437	15.2%	5,446	17.6%
Black or African American, Non-Hispanic	5,403	18.6%	4,446	15.3%	3,325	10.7%
White, Non-Hispanic	4,886	16.8%	2,944	10.1%	2,386	7.7%
Other Race or Multiple Races, Non-Hispanic	167	0.6%	777	2.7%	1,138	3.7%
Hispanic or Latinx	13,490	46.3%	16,462	56.5%	18,622	60.1%
Total	29,107	100%	29,139	100%	30,967	100%

Source: ABAG-MTC Housing Needs Data Workbook, 2021

Furthermore, as seen in Chart B-2, San Pablo has a much larger non-White population than when compared to its surrounding areas. This chart also shows that despite the shrinking of San Pablo’s non-Hispanic Black or African American population since 2000, these racial/ethnic groups still makes up a greater proportion of the city’s population compared to Contra Costa County and the Bay Area.

Chart B-2: San Pablo and Surrounding Area Population by Race/Ethnicity, 2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B03002)

Looking at the older adult and youth population by race can add an additional layer of understanding, as families and older adults of color are even more likely to experience challenges finding affordable housing. People of color make up 59.1% of older adults and 62.0% of youth under 18 (see Figure 3).

B.3 Household Characteristics

HOUSEHOLD SIZE

According to ACS five-year estimates data, the average household size in San Pablo in 2019 was around 3.31 persons, a slight increase from 3.26 persons in 2010. San Pablo's average is higher than the average for Contra Costa County as a whole (2.87). As seen in Table B-4, San Pablo has a much larger share of households of five or more persons (22.3 percent) than either the county (12.4 percent) or the Bay Area (10.8 percent).

Table B-4: San Pablo and Surrounding Areas Households by Household Size, 2019

Household Size	San Pablo		Contra Costa County		Bay Area	
	Number	Percent	Number	Percent	Number	Percent
1-Person Household	1,961	21.3%	86,232	21.8%	674,587	24.7%
2-Person Household	1,860	20.2%	124,699	31.6%	871,002	31.9%

5-Person or More Household	2,056	22.3%	48,833	12.4%	294,257	10.8%
Total	9,221	100%	394,769	100%	2,731,434	100%

Source: ABAG-MTC Housing Needs Data Workbook, 2021

HOUSEHOLD CHARACTERISTICS

A summary of household characteristics in San Pablo, Contra Costa County, and the Bay Area is provided in Table B-5. A family household is a household consisting of two or more people residing together and related by birth, marriage, or adoption. A non-family household consists of a householder living alone (a one-person household) or where the householder shares the home exclusively with people to whom they are not related. According to the ACS data (2015-2019) as analyzed by ABAG-MTC, the greatest share (42.9 percent) of households in San Pablo are married-couple family households. Overall, family households account for 73.8 percent of households in San Pablo, which is on par with Contra Costa County (72.2 percent) and somewhat higher than that of the Bay Area (66.4 percent). However, San Pablo has a greater share of single-parent households (30.9 percent) than either Contra Costa County (17.1 percent) or the Bay Area (15.2 percent).

Table B-5: San Pablo and Surrounding Areas Household Type, 2019

Household Types	San Pablo		Contra Costa County		Bay Area	
	Number	Percent	Number	Percent	Number	Percent
Female-Headed Family Households	1,919	20.8%	48,256	12.2%	283,770	10.4%
Male-headed Family Households	931	10.1%	19,180	4.9%	131,105	4.8%
Married-couple Family Households	3,959	42.9%	217,370	55.1%	1,399,714	51.2%
Other Non-Family Households	451	4.9%	23,731	6.0%	242,258	8.9%
Single-person Households	1,961	21.3%	86,232	21.8%	674,587	24.7%
Total	9,221	100%	394,769	100%	2,731,434	100%

Source: ABAG-MTC Housing Needs Data Workbook, 2021

HOUSEHOLD INCOME

Household income is one of the most significant factors affecting housing choice and opportunity. Income largely determines a household's ability to purchase or rent housing. While higher-income households have more discretionary income to spend on housing, lower- and moderate-income households are limited in the range of housing they can afford and are more often renters. Typically, as household income decreases, cost burdens and overcrowding increase.

For the purpose of evaluating housing affordability, housing need, and eligibility for housing assistance, income levels are defined by guidelines adopted each year by the California State Department of Housing and Community Development (HCD). For Contra Costa County, the applicable Area Median Income (AMI) for a family of four in 2021 is \$125,600. HUD has defined the following income categories for Contra Costa County, based on the median income for a household of four persons for 2021:

- Extremely low-income: 30 percent of AMI and below (\$0 to \$41,100)
- Very low-income: 31 to 50 percent of AMI (\$41,101 to \$68,500)
- Low-income: 51 to 80 percent of AMI (\$68,501 to \$109,600)
- Moderate-income: 81 to 120 percent of AMI (\$109,601 to \$150,700)
- Above moderate-income: 120 percent or more of AMI (\$150,701 or more)

Table B-5 shows the HUD definitions for Contra Costa County's maximum annual income level for each income group, adjusted by household size. For the purposes of defining income limits, HUD combines Contra Costa County with Alameda County in the "Oakland-Fremont, CA HUD Metro Fair Market Rent (FMR) Area." This data is used when determining a household's eligibility for federal, state, or local housing assistance and used when calculating the maximum affordable housing payment for renters and buyers.

Table B-6: HUD Income Levels by Household Size (Oakland-Fremont, CA HUD Metro FMR Area, 2021)

Household Size	Maximum Income Level				
	Extremely Low	Very Low	Low	Median	Moderate
1 Person	\$28,800	\$47,950	\$76,750	\$87,900	\$105,500
2 Persons	\$32,900	\$54,800	\$87,700	\$100,500	\$120,550
3 Persons	\$37,000	\$61,650	\$98,650	\$113,050	\$135,650
4 Persons	\$41,100	\$68,500	\$109,600	\$125,600	\$150,700
5 Persons	\$44,400	\$74,000	\$118,400	\$135,650	\$162,750
6 Persons	\$47,700	\$79,500	\$127,150	\$145,700	\$174,800
7 Persons	\$51,000	\$84,950	\$135,950	\$155,750	\$186,850
8 Persons	\$54,300	\$90,450	\$144,700	\$165,800	\$198,900

Source: HUD Income Limits 2021

The ABAG-MTC Housing Needs Data Workbook for 2021 divides San Pablo's population by HUD income levels. The Data Workbook relies on data from the HUD Comprehensive Housing Affordability Strategy 2013-2017 release. This income data is based on the ACS 2013-2017 estimates, and thus does not align exactly with categories assigned to the 2021 HUD established income levels. Table B-7 provides this data. While Contra Costa County and the Bay Area overall have relatively similar distributions of households at

each income level, San Pablo has a much greater share of households that made less than 100 percent of AMI (79.2 percent) than either the county (46.2 percent) or the Bay Area (47.7 percent). In fact, the plurality of households in San Pablo (28.5 percent) made between zero and 30 percent of AMI.

Table B-7: San Pablo and Surrounding Areas Households by Household Income Level

	<i>San Pablo</i>		<i>Contra Costa County</i>		<i>Bay Area</i>	
	<i>Number</i>	<i>Percent</i>	<i>Number</i>	<i>Percent</i>	<i>Number</i>	<i>Percent</i>

Total	9,257	100%	389,619	100%	2,701,033	100%

Source: ABAG-MTC Housing Needs Data Workbook, 2021

B.4 Employment

, there are 14,728 persons in the labor force in San Pablo. As seen in Table B-8, the largest industry represented among San Pablo workers is Health and Educational Services (33.8 percent). Compared to Contra Costa County and the Bay Area, employees in the Financial and Professional Services account for significantly less of San Pablo's employment distribution (12.8 percent) than that of the county (24.7 percent) and the Bay Area overall (25.8 percent). On the other hand, San Pablo has a greater share of its workforce represented in the Construction industry (13.4 percent) than either the county (7.2 percent) or the Bay Area overall (5.6 percent).

Table B-8: San Pablo and Surrounding Areas Employment by Industry (2019)

	<i>San Pablo</i>		<i>Contra Costa County</i>		<i>Bay Area</i>	
	<i>Number</i>	<i>Percent</i>	<i>Number</i>	<i>Percent</i>	<i>Number</i>	<i>Percent</i>

Source: ABAG-MTC Housing Needs Data Workbook, 2021

B.5 Special Needs Groups

Certain groups have greater difficulty in finding suitable affordable housing due to their special needs and circumstances. This may be a result of employment and income, family characteristics, disability, or household characteristics. Consequently, certain residents in San Pablo may experience more instances of housing cost burdens, overcrowding, or other housing problems. The categories of special needs addressed in this Element include:

- Extremely low-income households
- Older adult households
- Persons with disabilities, including developmental disabilities
- Large households
- Female-headed households
- Persons experiencing homelessness
- Farmworkers

EXTREMELY LOW-INCOME RESIDENTS

California State Housing Law requires local governments to address the needs of “Extremely Low-Income” populations, which refers to households with incomes below 30 percent of the Area Median Income (AMI) for the community.

As seen in Table B-9, 28.5 percent of San Pablo households are extremely low-income (defined as making less than 30 percent of Area Median Income (AMI)). Examining household income by racial/ ethnic group, Black or African American (non-Hispanic) households have the highest proportion, nearly 40%, of households with extremely low-incomes. Households that identify as White (non-Hispanic), American Indian or Alaska Native (non-Hispanic), or some other race or multiple races (non-Hispanic) have a prevalence of 32.5 percent, 31.8 percent, and 29.3 percent, respectively, of those who are below 30 percent of AMI. Asian (non-Hispanic) and Hispanic or Latinx households have the lowest prevalence of extremely low-income households at 25.4 percent and 24.2 percent, respectively.

Table B-9: Household Income Distribution by Race (San Pablo)

<i>Racial/Ethnic Group</i>	<i>0%-30% of AMI</i>	<i>31%-50% of AMI</i>	<i>51%-80% of AMI</i>	<i>81%-100% of AMI</i>	<i>>100% of AMI</i>	<i>Total</i>
American Indian or Alaska Native, Non-Hispanic	31.8%	0.0%	68.2%	0.0%	0.0%	100%
Asian/API, Non-Hispanic	25.4%	19.5%	17.0%	10.3%	27.9%	100%
Black or African American, Non-Hispanic	39.7%	15.9%	14.2%	11.8%	18.4%	100%
White, Non-Hispanic	32.5%	18.9%	16.1%	8.8%	23.7%	100%
Other Race or Multiple Races, Non-Hispanic	29.3%	18.8%	24.4%	5.2%	22.3%	100%
Hispanic or Latinx	24.2%	23.9%	23.6%	10.7%	17.6%	100%
All Households	28.5%	20.8%	20.1%	10.4%	20.2%	100%

Source: ABAG-MTC Housing Needs Data Workbook, 2021

Federal statistics can also help the City quantify the extent of the extremely low-income population. The federal government defines poverty as a minimum level of income (adjusted for household size and composition) necessary to meet basic food, shelter, and clothing needs and is constant throughout the country. For 2021, the Federal Poverty Level (FPL) for a family of four is \$26,500, significantly less than the regional \$41,100 threshold for 30 percent of AMI. Consequently, some households that are defined as extremely low-income in San Pablo are not considered as living below the FPL. This is indicative of the higher cost of living in San Pablo and the Bay Area overall as compared to other areas of the country. According to ACS 2019 five-year estimates, San Pablo has a poverty rate of 16.3 percent. This is much higher than the poverty rate of 8.7 percent in Contra Costa County overall. Poverty rates have dropped in San Pablo and Contra Costa County overall since 2012, from 19.3 percent and 10.2 percent, respectively. Table B-10 displays the poverty status by race/ethnic group among San Pablo residents. Poverty is highest among those who identify as Black or African American (22.0 percent) and lowest among those who identify as Asian or Asian Pacific Islander (10.4 percent).

Table B-10: Poverty Status by Race (San Pablo)

<i>Racial/Ethnic Group</i>	<i>Percent Below Federal Poverty Line</i>
American Indian or Alaska Native, Hispanic and Non-Hispanic	12.2%
Asian/API, Hispanic and Non-Hispanic	10.4%
Black or African American, Hispanic and Non-Hispanic	22.0%
White, Hispanic and Non-Hispanic	19.8%
White, Non-Hispanic	21.9%
Other Race or Multiple Races, Hispanic and Non-Hispanic	13.7%
Hispanic or Latinx	16.4%

Source: ABAG-MTC Housing Needs Data Workbook, 2021

OLDER ADULT RESIDENTS

The majority of those older adults in San Pablo identify as some other race or multiple races (40.9 percent). In San Pablo, the proportion of those 65 and older who are either Asian or Black or African American is much greater than it is among younger age groups. In contrast, the proportion of younger residents who identify as White is greater among younger age groups.

Table B-11: Older adult and Youth Population by Race (San Pablo)

<i>Race</i>	<i>Age 0-17</i>		<i>Age 18-64</i>		<i>Age 65+</i>	
	<i>Number</i>	<i>Percent</i>	<i>Number</i>	<i>Percent</i>	<i>Number</i>	<i>Percent</i>

Total	7,622	100%	20,205	100%	3,140	100%

Source: ABAG-MTC Housing Needs Data Workbook, 2021

As these residents age, housing costs typically increase as residents must to ensure their homes remain accessible and safe. In San Pablo, 42.3 percent of residents aged 62 and over have an income below 30 percent of AMI, which is higher than the rate of 28.5 percent found among the overall population in San Pablo. As seen in Table B-12, older adult renters are much more likely to fall into the extremely low-income (zero to 30 percent of AMI) or very low-income (31 to 50 percent of AMI) categories than older adults who own their homes. Strikingly, among renters aged 62 and over, 75.2 percent are considered extremely low-income.

Table B-12: Older adult Households¹ by Income and Tenure (San Pablo)

Income Group	Owner Occupied		Renter Occupied		All Older adult Households	
	Number	Percent	Number	Percent	Number	Percent
0%-30% of AMI	200	19.9%	515	75.2%	715	42.3%
31%-50% of AMI	190	18.9%	85	12.4%	275	16.3%
51%-80% of AMI	243	24.2%	45	6.6%	288	17.0%
81%-100% of AMI	104	10.3%	25	3.6%	129	7.6%
>100% of AMI	269	26.7%	15	2.2%	284	16.8%
Total	1,006	100%	685	100%	1,691	100%

Notes:

- I. For the purposes of this table, ABAG-MTC considers older adult households to be those with a householder who is aged 62 or older.

Source: ABAG-MTC Housing Needs Data Workbook, 2021

Those older adult households considered low-income (making between 31 and 50 percent of AMI) are the group most likely to be spending more than 50 percent of their overall household income on housing costs at 50.9 percent. Older adult households who are considered extremely low-income (making less than 30 percent of AMI) are actually less likely than those considered very low-income to be spending over 50 percent of their income on housing costs at 34.4 percent.

Table B-13: Cost-Burdened Older adult Households¹ by Income Level (San Pablo)

% of Income Used for Housing Costs	0%-30% of AMI	31%-50% of AMI	51%-80% of AMI	81%-100% of AMI	>100% of AMI
<30% of Income	32.9%	25.5%	64.2%	77.5%	95.1%
30%-50% of Income	32.9%	23.6%	33.0%	14.7%	4.9%
>50% of Income	34.3%	50.9%	2.8%	7.8%	0.0%
Total	100%	100%	100%	100%	100%

Notes:

- I. For the purposes of this table, ABAG-MTC considers older adult households to be those with a householder who is aged 62 or older.

Source: ABAG-MTC Housing Needs Data Workbook, 2021

Other potential older adult housing needs that may require a specific governmental response include:

- **Assisted living facilities.** Assisted living facilities provide older adult residents with the opportunity to maintain an independent housing unit while receiving needed medical services and social support. Congregate care facilities include housing with medical and health services.

- **Relocation assistance.** Some older adult residents need assistance in relocating to a dwelling that better suits their space and income needs.
- **Mobility impairment.** Mobility-impaired older adult residents requiring special accessibility features in their dwelling units. Mobility impairment may require that special accessibility features be included in the design and construction of a home. Mobility impairment can also create a need for a living arrangement that includes health, meals, cleaning, and/or other services as part of the housing package. A number of living arrangements are possible, from older adult citizen developments with individual dwelling units to assisted living facilities to 24-hour support services. Table B-14 shows the prevalence of different types of disabilities among older adults over age 65 in San Pablo. The most prevalent type of disability is ambulatory difficulty, experienced by 24.9 percent of San Pablo older adults. An ambulatory difficulty refers to a mobility impairment that causes significant difficulty walking or climbing stairs.

Table B-14: Older adults (Age 65 and Over) by Type of Disability (San Pablo)

<i>Disability</i>	<i>Percentage of Older adults</i>
With an ambulatory difficulty ¹	24.9%
With an independent living difficulty ²	17.8%
With a hearing difficulty ³	9.4%
With a self-care difficulty ⁴	9.4%
With a cognitive difficulty ⁵	9.2%
With a vision difficulty ⁶	4.5%

Notes:

1. Ambulatory difficulty refers to having serious difficulty walking or climbing stairs.
2. Independent living difficulty refers to having difficulty doing errands alone due to a physical, mental, or emotional problem.
3. Hearing difficulty refers to those who are deaf or have serious difficulty hearing.
4. Self-care difficulty refers to having difficulty bathing or dressing.
5. Cognitive difficulty refers to having difficulty remembering, concentrating or making decisions due to a physical, mental, or emotional problem.
6. Vision difficulty refers to those who are blind or have serious difficulty seeing.

Source: ABAG-MTC Housing Needs Data Workbook, 2021

Older Adult Housing

Currently, San Pablo has 427 units and 280 State licensed beds specifically reserved for older adult housing (Table B-15). Of that total, 254 units are restricted to be affordable. Given that many older adults prefer to “age in place” and live independently in their own homes as long as they can, senior housing typically caters primarily to residents who are 85 years and older, and the existing units may be adequate for current populations in that cohort. However, the City will continue to support the construction of older adult housing, particularly in locations near services such as shopping, medical care, and recreation, to prepare for the aging population.

Table B-15: Older Adult Housing

<i>Facility Name</i>	<i>Address</i>	<i>Units</i>	<i>Licensed Beds</i>	<i>Affordable</i>	<i>Project Type</i>
Brooksdale San Pablo	13956 San Pablo 94806	-	140	Yes	Apartment (assisted living)
Casa Adobe Senior Housing	1924 Church Lane 94806	53	-	Yes (low-income)	Apartment
El Portal Gardens	14041 San Pablo Ave 94806	80	-	Yes (low-income)	Apartment
Emeritus at Creekside Lodge	13956 San Pablo 94806	116	140	Yes	Apartment (assisted living)
Judson Homes	1320 Road 20 94806	56	-	Yes (low-income)	Apartment
Kidd Manor	100 Austin Court 94806	40	-	Yes (low-income)	Apartment
Monte Vista	13728 San Pablo Ave 94806	82	-	Yes (low-income)	Apartment
Total		427	280

PERSONS WITH DISABILITIES

Persons with disabilities have physical or mental impairments that require special housing designed for self-sufficiency. According to 2019 American Community Survey estimates compiled by ABAG, 3,685 persons (12.0 percent of the non-institutionalized population) in San Pablo had a disability. This proportion is about equivalent to Contra Costa County (11.2 percent) and slightly higher than that of the Bay Area (9.6 percent).

Disability can further be broken down into six categories. The Census Bureau provides the following definitions for these disability types:

- Hearing difficulty: deaf or has serious difficulty hearing.
- Vision difficulty: blind or has serious difficulty seeing even with glasses.
- Cognitive difficulty: has serious difficulty concentrating, remembering, or making decisions.
- Ambulatory difficulty: has serious difficulty walking or climbing stairs.
- Self-care difficulty: has difficulty dressing or bathing.
- Independent living difficulty: has difficulty doing errands alone such as visiting a doctor's office or shopping.

These disability types are counted separately and are not mutually exclusive, as an individual may report more than one disability; thus, these counts should not be summed. Table B-16 provides a breakdown of San Pablo's adult population by disability type. The most prevalent disability was ambulatory difficulty at 5.9 percent.

Table B-16: San Pablo Disability by Type

<i>Disability</i>	<i>Percentage of the Civilian Non-Institutionalized Population Aged 18 and Over</i>
With an ambulatory difficulty	5.9%
With a cognitive difficulty	5.2%
With an independent living difficulty	4.3%
With a self-care difficulty	2.8%
With a hearing difficulty	1.9%
With a vision difficulty	1.8%

Source: ABAG-MTC Housing Needs Data Workbook, 2021

Further, residents with disabilities may have more difficulty in finding employment. In San Pablo, according to 2019 ACS estimates compiled by ABAG, approximately 13.3 percent of the civilian noninstitutionalized population 18 years to 64 years in the labor force with a disability were unemployed, while only 6.4 percent of those with no disability were unemployed. The census considers individuals to not be in the labor force if they are not employed and are either not available to take a job or are not looking for one. This category typically includes discouraged workers, students, retired workers, stay-at-home parents, and seasonal workers in an off season who are not looking for work.

Given the barriers faced by persons with disabilities, the provision of affordable and barrier-free housing is essential to meet their housing needs. There are two approaches to housing design for residents with disabilities: adaptability and accessibility. Adaptable housing is a design concept in which a dwelling unit contains design features that allow for accessibility and use by mobility-impaired individuals with only minor modifications. An accessible unit has the actual special features installed in the house (grab bars, special cabinetry). To address these needs, the State requires design or accessibility modifications, such as access ramps, wider doorways, assist bars in bathrooms, lower cabinets, elevators and the acceptance of service animals.

Developmental Disabilities

Since January 2011, per SB 812 as codified in Section 65583, housing elements are required to address the housing needs of individuals with a developmental disability within the community. According to Section 4512 of the Welfare and Institutions Code a "developmental disability" means a disability that originates before an individual attains age 18 years, continues—or can be expected to continue—indefinitely, and constitutes a substantial disability for that individual, which includes intellectual disability, cerebral palsy, epilepsy, and autism. This term also includes disabling conditions found to be closely related to intellectual disability or to require treatment similar to that required for individuals with an intellectual disability, but not includes other disabling conditions that are solely physical in nature.

Many developmentally disabled persons can live and work independently within a conventional housing environment. More severely disabled individuals require a group living environment where supervision is provided. The most severely affected individuals may require an institutional environment where medical attention and physical therapy are provided. Because developmental disabilities exist before adulthood, the first issue in supportive housing for the developmentally disabled is the transition from the person's living situation as a child to an appropriate level of independence as an adult.

In San Pablo, the vast majority of residents with a developmental disability (82.2 percent) live in the home of a parent/family/guardian, see Table B-17. Further, approximately 44.9 percent (124 persons) of the population that has a developmental disability is under the age of 18, while the remaining 55.1 percent (152 persons) is over 18 years old.

Table B-17: San Pablo Population with Developmental Disabilities by Residence¹

<i>Residence Type</i>	<i>Number</i>	<i>Percent</i>
Home of Parent/Family/Guardian	226	82.2%
Community Care Facility	24	8.7%
Independent/Supported Living	21	7.6%
Intermediate Care Facility	2	0.7%
Foster/Family Home	2	0.7%
Other	0	0.0%
Total	275	100%

1. The California Department of Developmental Services provides ZIP code level counts. To get jurisdiction-level estimates, ZIP code counts were crosswalked to jurisdictions using census block population counts from Census 2010 SF1 to determine the share of a ZIP code to assign to a given jurisdiction. Independent living difficulty refers to having difficulty doing errands alone due to a physical, mental, or emotional problem.

Source: ABAG-MTC Housing Needs Data Workbook (California Department of Developmental Services, Consumer Count by California ZIP Code and Residence Type, 2020)

There are a number of housing types appropriate for people living with a development disability: rent subsidized homes, licensed and unlicensed single-family homes, inclusionary housing, Section 8 vouchers, special programs for home purchase, HUD housing, and SB 962 homes. The design of housing-accessibility modifications, the proximity to services and transit, and the availability of group living opportunities represent some of the types of considerations that are important in serving this need group. Incorporating ‘barrier-free’ design in all new multifamily housing (as required by California and Federal Fair Housing laws) is especially important to provide the widest range of choices for disabled residents. Special consideration should also be given to the affordability of housing, as people with disabilities may be living on a fixed income.

LARGE FAMILIES

Large families, defined as households of five or more related individuals, are a special need category because they are at higher risk for overcrowding if the city’s housing stock doesn’t have sufficient larger units with an adequate number of bedrooms. Additionally, many large families, particularly renters, often do not have sufficient income to afford larger homes or apartments.

In comparison to surrounding jurisdictions, San Pablo has a much higher proportion of large family households. Chart B-3 shows that while about 22.3 percent of households in San Pablo are considered large households, only 12.4 percent in Contra Costa County and 10.8 percent in the Bay Area are.

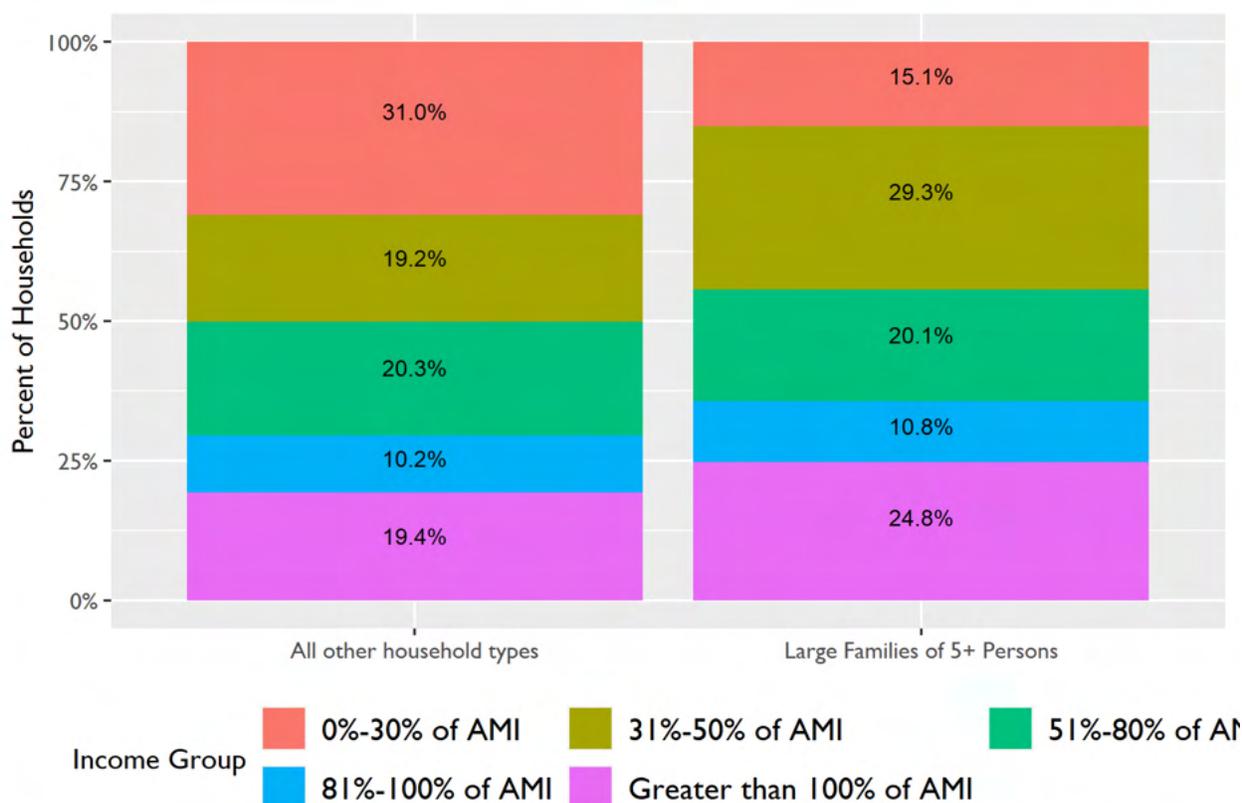

Table B-18: San Pablo Household Size by Tenure

<i>Housing Type</i>	<i>Owner-Occupied</i>		<i>Renter-Occupied</i>	
	<i>Number</i>	<i>Percent</i>	<i>Number</i>	<i>Percent</i>
1 Person Household	598	17.0%	1363	23.9%
2 Person Household	832	23.7%	1028	18.0%
3 Person Household	715	20.4%	963	16.9%
4 Person Household	534	15.2%	1,132	19.8%
5 Or More Person Household	830	23.7%	1,226	21.5%
Total	3,509	100%	5,712	100%

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25009)

Of the large families in San Pablo, approximately half are considered extremely low- or very low-income households (i.e., households earning less than 50 percent AMI), see Chart B-4.

Chart B-4: San Pablo Household Size by Household Income Level

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release)

Table B-19: San Pablo Cost Burden by Household Size

Income Category	Large Family (5+ Persons)		All Other Household Types	
	Number	Percent	Number	Percent
No Cost Burden	1,115	62.2%	3,704	50.0%
Cost Burden	509	28.4%	1,817	24.5%
Severe Cost Burden	170	9.5%	1,888	25.5%
Total	1,794	100%	7,409	100%

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release)

The affordability housing crisis for large families is also evidenced by the high cost-burden of housing, with nearly 40 percent of large families experiencing some level of cost burden (either regular or severe). However, large families are slightly less likely to experience severe cost burden in San Pablo than other household types.

FEMALE-HEADED HOUSEHOLDS

Female-headed families, including those with children, are identified as a special needs group because they are more likely to be supporting the household with one income, increasing the probability the household is low-income and housing cost-burdened. In San Pablo, there are more than twice as many female-headed households (1,919) as there are male-headed households (931), see Table B-20. Female-headed households represented about 17.7 percent of owner-occupied households and 22.7 percent of renter-occupied households.

Table B-20: San Pablo Household Type by Tenure

<i>Household Type¹</i>	<i>Owner-Occupied</i>		<i>Renter-Occupied</i>	
	<i>Number</i>	<i>Percent</i>	<i>Number</i>	<i>Percent</i>
Married-Couple Family Households	1866	53.2%	2093	36.6%
Female-Headed Family Households	620	17.7%	1299	22.7%
Male-Headed Family Households	323	9.2%	608	10.6%
Householders Living Alone	598	17.0%	1363	23.9%
Other Non-Family Household	102	2.9%	349	6.1%

1. For data from the Census Bureau, a “family household” is a household where two or more people are related by birth, marriage, or adoption. “Non-family households” are households of one person living alone, as well as households where none of the people are related to each other.

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25011)

Female-headed households with children (approximately 64 percent in San Pablo) are more likely to have greater housing needs and face difficulties in finding affordable housing as evidenced by the Census data revealing that female-headed households with children living below the poverty line is double that of female-headed households without children.

Table B-21: San Pablo Female-Headed Households by Poverty Status¹

<i>Poverty Level</i>	<i>Households With Children</i>		<i>Households Without Children</i>	
	<i>Number</i>	<i>Percent</i>	<i>Number</i>	<i>Percent</i>
Above Poverty Level	902	73.4%	600	87.0%
Below Poverty Level	327	26.6%	90	13.0%

1. The Census Bureau uses a federally defined poverty threshold that remains constant throughout the country and does not correspond to Area Median Income.

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B17012)

PERSONS EXPERIENCING HOMELESSNESS

A common method to assess the number of homeless persons in a jurisdiction is through a Point-in-Time (PIT) Count. The PIT Count is a biennial census of sheltered and unsheltered persons in a Continuum of Care (CoC) completed over a 24-hour period in the last ten days of January. The unsheltered PIT Count is conducted annually in Contra Costa County and is a requirement to receive homeless assistance funding from HUD. The PIT Count does not function as a comprehensive analysis and should be considered in the context of other key data sources when assessing the state of homelessness in a community.

According to HUD, a CoC is a “a community plan to organize and deliver housing and services to meet the specific needs of people who are homeless as they move to stable housing and maximize self-sufficiency. It includes action steps to end homelessness and prevent a return to homelessness.” Each Bay Area county is its own CoC. In Contra Costa County, Contra Costa Health Services oversees the CoC Program. Table B-22 provides an estimate of the homeless population by household type and shelter status in Contra Costa County. According to the 2019 PIT Count, there were 668 sheltered homeless persons and 1,627 unsheltered persons in Contra Costa County.

Table B-22: Homelessness by Household Type and Shelter Status in Contra Costa County

<i>Shelter Status</i>	<i>People in Households Composed Solely of Children Under 18</i>	<i>People in Households with Adults and Children</i>	<i>People in Households without Children Under 18</i>	Total
Sheltered – Emergency Shelter	0	159	359	518
Sheltered – Transitional Housing	0	32	118	150
Unsheltered	0	128	1,499	1,627

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Continuum of Care (CoC) Homeless Populations and Subpopulations Reports, 2019)

The PIT Count can be further divided by race or ethnicity, which can illuminate whether homelessness has a disproportionate racial impact within a community. The data from HUD on Hispanic/Latinx ethnicity for individuals experiencing homelessness does not specify racial group identity. Accordingly, individuals in either ethnic group identity category (Hispanic/Latinx or non-Hispanic/Latinx) could be of any racial background.

Table B-23: Racial/Ethnic Group Share of General and Homeless Population in Contra Costa County

<i>Racial/Ethnic Group</i>	<i>Share of Homeless Population</i>	<i>Share of Overall Population</i>
American Indian or Alaska Native (Hispanic and Non-Hispanic)	14.5%	0.5%
Asian / API (Hispanic and Non-Hispanic)	3.1%	17.2%
Black or African American (Hispanic and Non-Hispanic)	33.8%	8.7%
White (Hispanic and Non-Hispanic)	45.0%	55.8%
Other Race or Multiple Races (Hispanic and Non-Hispanic)	3.7%	17.7%
Hispanic/Latinx	16.6%	25.4%
Non-Hispanic/Latinx	83.4%	74.6%

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Continuum of Care (CoC) Homeless Populations and Subpopulations Reports, 2019)

The racial/ethnic breakdown of Contra Costa County’s homeless population is shown in Table B-23. Notably, those who identify as Black or African American (Hispanic and non-Hispanic) represent 33.8 of the unhoused population in the county, but only 8.7 percent of the overall population. Additionally, those identify as American Indian or Alaska Native (Hispanic and non-Hispanic) are also represented disproportionately among the unhoused population, as they make up 14.5 percent of homeless Contra Costa County residents but only 0.5 percent of its overall population. Asian/API, White, and those who identify as some other race or multiple races are all underrepresented among the homeless population compared to their share of the overall population. Further, those who identify as Hispanic/Latinx are also underrepresented among the unhoused.

Per HCD's requirements, jurisdictions also need to supplement county-level data with local estimates of people experiencing homelessness. The 2020 PIT Count identified 67 persons experiencing homelessness in San Pablo on the night of January 22, 2020. This is an increase of 21 people (31.3 percent) from the 46 unhoused individuals who were counted in the 2018 count. There are currently no homeless or transitional shelters in San Pablo. Though Contra Costa County offers various health and social services in San Pablo at the West County Behavioral Health Center. Furthermore, the City is actively looking for opportunities to create new transitional and permanent supportive housing in partnership with the county.

FARMWORKERS

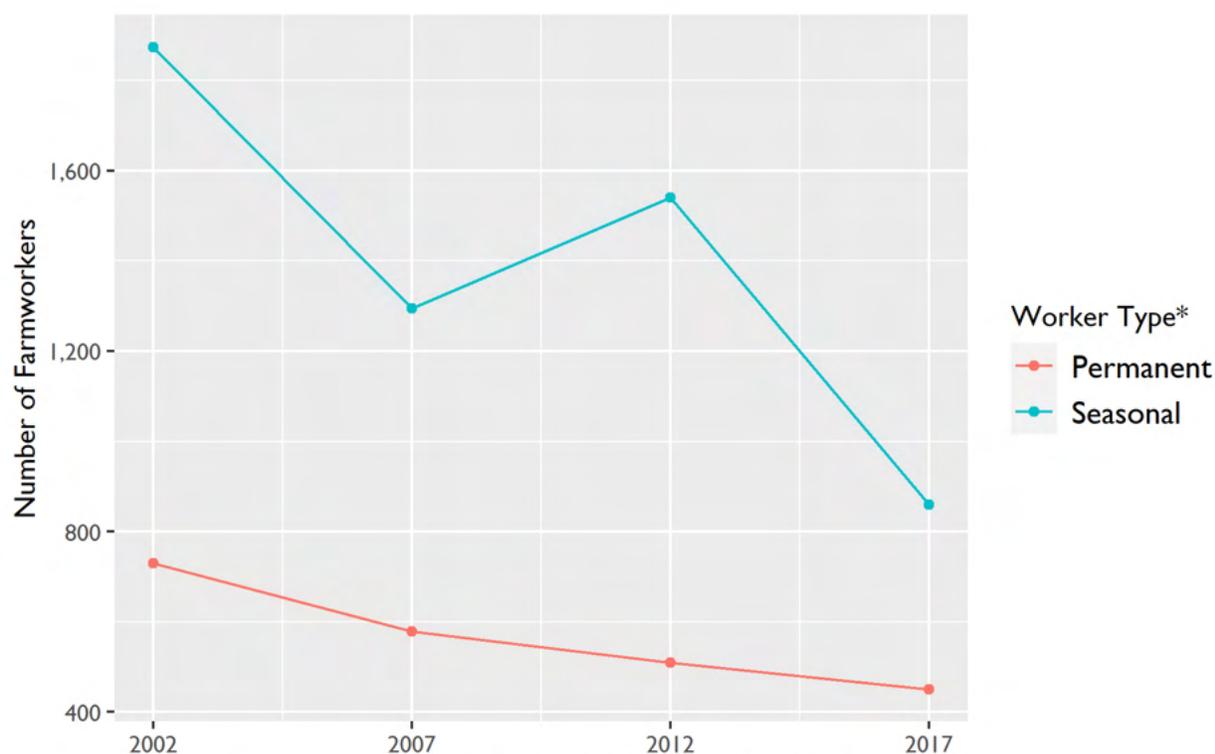

Farmworkers are traditionally defined as people whose primary incomes are earned through permanent or seasonal agricultural labor. Farmworkers are generally considered to have special housing needs due to their limited income and the often unstable nature of their employment. In addition, farmworker households tend to have high rates of poverty, live disproportionately in housing that is in the poorest condition, have extremely high rates of overcrowding, and have low homeownership rates. Given the high rate of urbanization in San Pablo, along with changes in local agriculture industries, farmworker residents are likely to be permanent, rather than migrant farmworkers. The special housing needs among the permanent farmworker population is of particular concern because the low-wages of the farmworker industry create high risk of farmworkers having challenges finding decent and affordable housing.

Although farmworkers still represent a special housing need in many communities, the advent of mechanization in harvesting crops, new planting techniques, and changes in the types of crops grown have substantially reduced the overall number of farmworkers and the proportion of migrant farmworkers. San Pablo is also located in a highly urbanized area of the Bay Area with no working farms within or adjacent to the city limits, which limits the presence of farmworkers in the city.

In the Contra Costa County, there has been a decrease in the number of seasonal and permanent farmworkers. According to the U.S. Department of Agriculture (USDA) Census of Farmworkers, between 2002 and 2017 Contra Costa County experienced a 38.4 percent decrease in the number of seasonal farmworkers (i.e., those that have worked on a farm 150 days or less) and a 54.1 percent decrease in the number of permanent farmworkers. In 2017, there were 1,310 farmworkers in total in Contra Costa County. See Chart B-5 for these trends.

In the local setting, estimating the size of the agricultural labor force can be especially problematic due to undercounts and inconsistent definitions across government agencies. According to the Census ACS five-year estimates, there were 139 San Pablo residents employed in the “agriculture, forestry, fishing and hunting” industry in 2019 – about 0.9 percent of the labor force. This is similar to Contra Costa County (0.5 percent) and the Bay Area (0.7 percent). Determining the breakdown by seasonal and permanent workers can be even more difficult. Data from the California Department of Education provides one local estimate by also tracking the student population of migrant workers, available in Table B-24. However, no schools in either San Pablo or Contra Costa County has reported any migrant worker students in the four years documented here by ABAG-MTC.

Chart B-5: Farm Labor in Contra Costa County, 2002-2017

*Farm workers are considered seasonal if they work on a farm less than 150 days in a year, while farm workers who work on a farm more than 150 days are considered to be permanent workers for that farm.

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Agriculture, Census of Farmworkers (2002, 2007, 2012, 2017), Table 7: Hired Farm Labor)

Table B-24: Migrant Worker Student Population¹

Academic Year	San Pablo	Contra County	Bay Area
2016-2017	0	0	4,630
2017-2018	0	0	4,607
2018-2019	0	0	4,075
2019-2020	0	0	3,976

1. The data used for this table was obtained at the school site level, matched to a file containing school locations, geocoded and assigned to jurisdiction, and finally summarized by geography.

Source: ABAG-MTC Housing Needs Data Workbook (California Department of Education, California Longitudinal Pupil Achievement Data System (CALPADS), Cumulative Enrollment Data, Academic Years 2016-2017, 2017-2018, 2018-2019, 2019-2020)

GENDER AND SEXUAL ORIENTATION

The housing data discussed in this section is taken from the 2019 ACS five-year estimates. According to its website, “The American Community Survey includes a question that intends to capture current sex; there are no questions about gender, sexual orientation, or sex at birth. Respondents should respond either ‘male’ or ‘female’ based on how they currently identify their sex.” Unfortunately, the City does not have any data related to its transgender residents. However, according to the National Center for Transgender Equality,

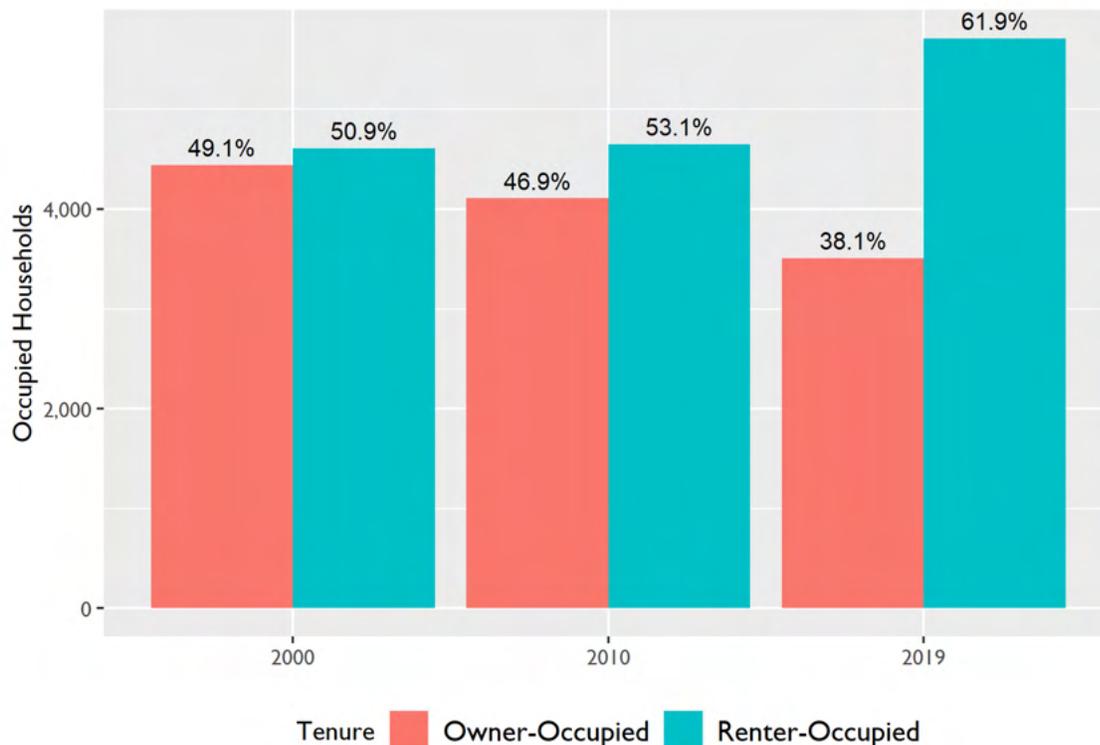

“[o]ne in five transgender people in the United States has been discriminated [against] when seeking a home, and more than one in ten have been evicted from their homes, because of their gender identity.” Thankfully, there is some data on LGBT residents available on the state level. Multiple phases of the U.S. Census Bureau’s Household Pulse Survey (HPS) have asked respondents their sexual orientation and gender identity in addition to their sex. The surveys found that approximately 2.6 million LGBT adults live in California, the highest population of any state in the country, putting its LGBT population at about 9.1%. Given the absence of data specific to San Pablo’s LGBT population, it is difficult to assess the level of housing need that this group faces.

B.6 Housing Market Characteristics

HOUSING TENURE

Since 2000, the percentage of renter-occupied households in San Pablo has continued to rise. Although the proportion of renters and owners was nearly equivalent in 2000 (50.9 percent and 49.1 percent, respectively), approximately 61.9 percent of all households were occupied by renters in 2019, see Chart B-6. In addition, households occupied by renters have increase in both proportional and absolute numbers while owner-occupied households have done the opposite; while there were 4,609 renter-occupied households and 4,442 owner-occupied households in 2000, there were 5,712 renter-occupied households and 3,509 owner-occupied households in 2019. This may be due to the conversion of formerly owner-occupied units to rental units and the lack of development of additional owner-occupied housing.

Chart B-6: San Pablo Household Tenure, 2000 – 2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, Census 2000 SFI, Table H04; U.S. Census Bureau, Census 2010 SFI, Table H04; U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25003)

San Pablo’s household tenure differs from patterns seen in the county and larger Bay Area, see Table B-25. While both Contra Costa County and the Bay Area see ownership rates exceeded 50 percent of the housing stock, the city does not. Further, Contra Costa County has higher rates of owner-occupied housing (65.9 percent) than does the Bay Area (56.1 percent).

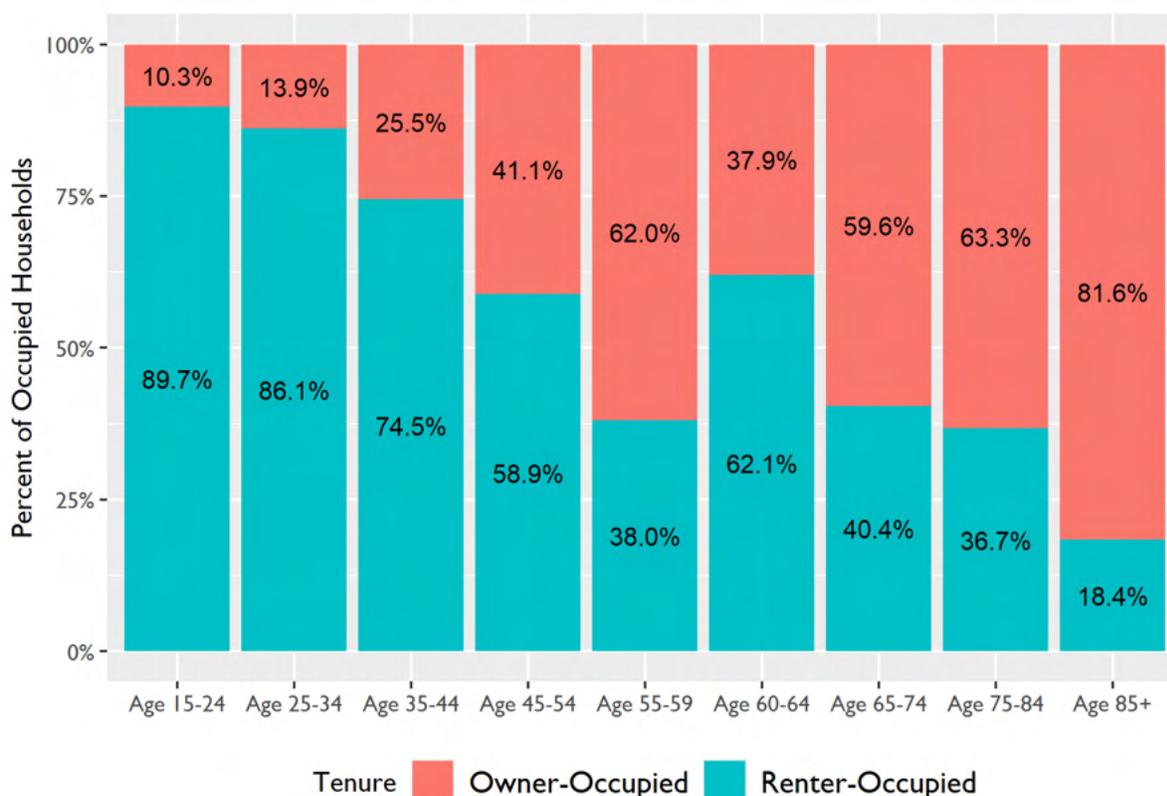

Table B-25: San Pablo and Surrounding Areas Household Tenure, 2019

Region	Owner-Occupied		Renter-Occupied	
	Number	Percent	Number	Percent
San Pablo	3,509	38.1%	5,712	61.9%
Contra Costa County	260,244	65.9%	134,525	34.1%
Bay Area	1,531,955	56.1%	1,199,479	43.9%

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25003)

The age of a resident—as well as the year the resident moved to the unit, race/ethnicity, household income, and housing type—can influence household tenure rates in a jurisdiction. Shown in Chart B-7, the majority of younger residents (54 years and below) are renters in San Pablo. While most residents above 55 years and above are owners, it should be noted that about 62.1 percent of those aged 60 to 64 years are renters. This may reflect the presence of older adult communities located in San Pablo that provide affordable rental housing, like the El Portal Gardens Apartments. This reflects a need for a variety of housing types for residents of all ages – including group homes and affordable rental as well as ownership units.

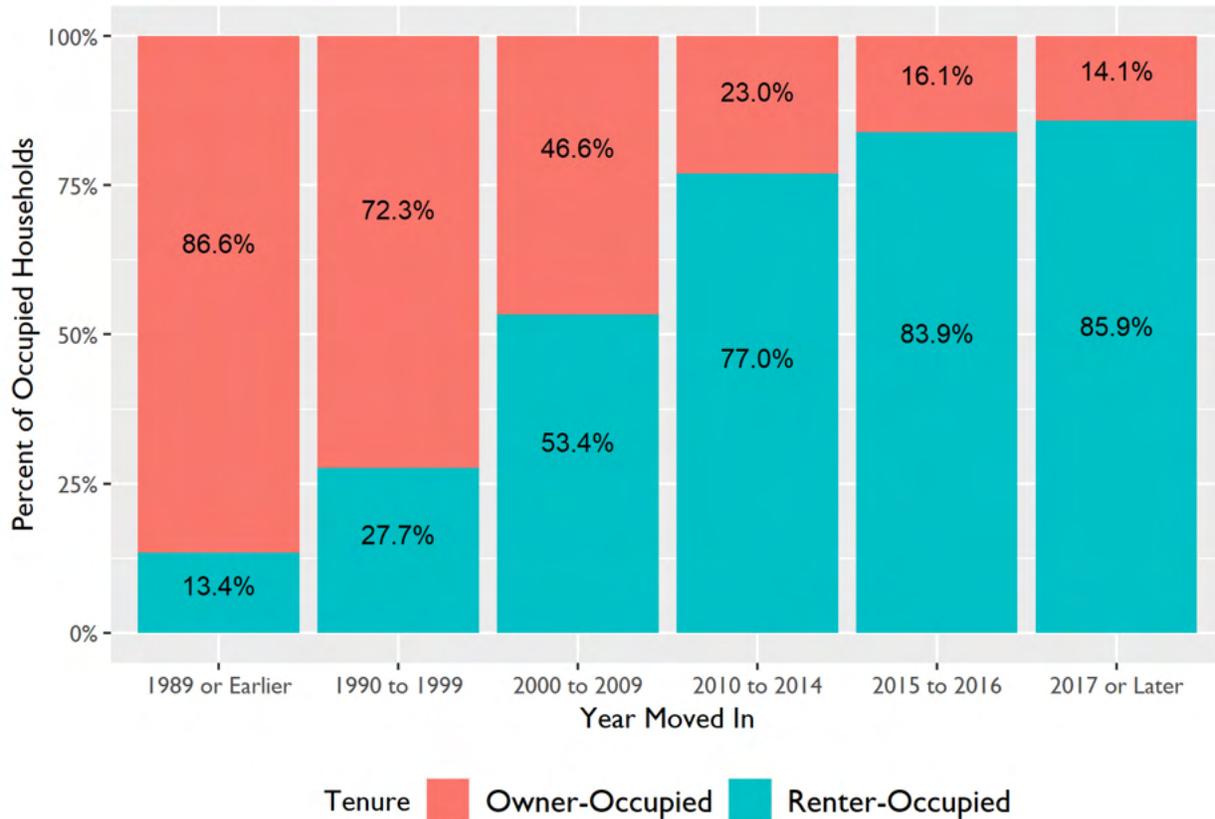

Chart B-7: San Pablo Housing Tenure by Age, 2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25007)

Ownership rates also change depending on the year the resident has moved into their current residence. Shown in Chart B-8, most residents who have moved to their current residence since 2000 are renters, which an increasing share over time. Residents who have lived in their housing units for a longer period (i.e., since before 2000) are overwhelming owners. While the trend towards increasing shares of renters started in 2000, it likely that the 2008 financial crisis exacerbated the trend considering the leap from 53.4 percent renters among those who moved in between 2000 to 2009 to 77.0 percent renters among those who moved in between 2010 to 2014.

Chart B-8: San Pablo Housing Tenure by Year Moved to Current Residence

Source: ABAG-MTC Housing Needs Data Workbook (Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25038)

Racial and ethnic disparities in tenure exist in San Pablo, shown in Table B-26. Households considered to be non-Hispanic white, Asian/Asian Pacific Islander (API) of any ethnicity, and American Indian or Alaska Native of any ethnicity tend to be owner-occupied, while households considered to be Black or African American of any ethnicity, other race or multiple races of any ethnicity, and Hispanic or Latinx are largely renter-occupied. Black or African American households of any ethnicity have the highest renter-occupied rates at 74.0 percent as of 2019.

Table B-26: San Pablo Housing Tenure by Race/Ethnicity, 2019

<i>Racial/Ethnic Group¹</i>	<i>Owner-Occupied</i>		<i>Renter-Occupied</i>	
	<i>Number</i>	<i>Percent</i>	<i>Number</i>	<i>Percent</i>
American Indian or Alaska Native (Hispanic and Non-Hispanic)	43	75.4%	14	24.6%
Asian / API (Hispanic and Non-Hispanic)	909	55.8%	719	44.2%
Black or African American (Hispanic and Non-Hispanic)	412	26.0%	1,171	74.0%
Other Race or Multiple Races (Hispanic and Non-Hispanic)	1,474	32.1%	3,115	67.9%
White (Hispanic and Non-Hispanic)	875	33.9%	1,704	66.1%
Hispanic or Latinx	1,270	37.6%	2,104	62.4%
White, Non-Hispanic	555	51.7%	518	48.3%

1. For this table, the Census Bureau does not disaggregate racial groups by Hispanic/Latinx ethnicity. However, data for the white racial group is also reported for white householders who are not Hispanic/Latinx. Since residents who identify as white and Hispanic/Latinx may have very different experiences within the housing market and the economy from those who identify as white and non-Hispanic/Latinx, data for multiple white sub-groups are reported here.

The racial/ethnic groups reported in this table are not all mutually exclusive. Therefore, the data should not be summed as the sum exceeds the total number of occupied housing units for this jurisdiction. However, all groups labelled “Hispanic and Non-Hispanic” are mutually exclusive, and the sum of the data for these groups is equivalent to the total number of occupied housing units.

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25003(A-I))

As ownership typically requires more upfront capital costs than renting, lower-income households are often renters. In San Pablo, the majority of lower-income households—those making less than 80 percent of AMI—are renters, while the majority of households making above 100 percent of AMI are owners. See Table B-27 for the complete breakdown by income group. This indicates that homeownership is likely out of reach for many lower-income households. Considering the disproportionate racial/ethnic share of renters in San Pablo, especially among Black or African American and Hispanic or Latinx households, this highlights a need to target both economic as well as racial/ethnic disparities to affirmatively further fair housing, which will be further discussed in Chapter 3.

Table B-27: San Pablo Housing Tenure by Income Level, 2019

<i>Income Group¹</i>	<i>Owner-Occupied</i>		<i>Renter-Occupied</i>	
	<i>Number</i>	<i>Percent</i>	<i>Number</i>	<i>Percent</i>
0%-30% of AMI	524	19.8%	2,118	80.2%
31%-50% of AMI	644	33.4%	1,284	66.6%
51%-80% of AMI	694	37.3%	1,165	62.7%
81%-100% of AMI	410	42.7%	550	57.3%
Greater than 100% of AMI	1,249	66.9%	619	33.1%

1. Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this table are based on the HUD metro area where this jurisdiction is located.

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release)

Rates of homeownership are typically higher in detached single-family homes than in multi-family housing, see Table B-28. San Pablo follows this trend in that nearly all the multifamily housing stock and the majority of mobile homes are renter-occupied, whereas the majority of (approximately 66 percent) of households in detached single-family are homeowners. While a significant share, about 43.5 percent, of attached single-family homes are occupied by renters, attached single-family homes only make up 5 percent of the housing stock in the city.

Table B-28: San Pablo Housing Tenure by Housing Type, 2019

<i>Housing Type</i>	<i>Owner-Occupied</i>		<i>Renter-Occupied</i>	
	<i>Number</i>	<i>Percent</i>	<i>Number</i>	<i>Percent</i>
Detached Single-Family Homes	2,688	66.5%	1,354	33.5%
Attached Single-Family Homes	463	56.5%	356	43.5%
Multi-Family Housing	210	5.3%	3,753	94.7%
Mobile Homes	148	37.3%	249	62.7%
Boat, RV, Van, or Other	0	-	0	-

HOUSING TYPE

During the 2010 to 2020 period, little housing development of any kind occurred in San Pablo. The number of single-family homes, per DOF estimates provided by ABAG-MTC shown in Table B-29, has marginally increased during this period, although the number of multifamily housing units has increased more significantly. The number of total units has decreased by 0.3 percent over this period driven exclusively by the loss of mobile homes. The number of mobile homes has decreased by 21.4 percent, representing a loss of 104 units.

Table B-29: San Pablo Housing Type Trends, 2010 – 2020

<i>Building Type</i>	<i>2010</i>		<i>2020</i>		<i>Percent Change (2010 – 2020)</i>
	<i>Number</i>	<i>Percent</i>	<i>Number</i>	<i>Percent</i>

OVERCROWDED HOUSEHOLDS

Overcrowding, as defined by the U.S. Census, occurs where there is more than 1.01 persons per room (excluding bathrooms and kitchens) in an occupied housing unit and severe overcrowding occurs when there is more than 1.5 persons per room. Overcrowding is typically a consequence of an inadequate supply of affordable housing. San Pablo has more than three times the rate of overcrowded units (17 percent) to that of Contra Costa County (5.0 percent) or the Bay Area (6.9 percent), see Table B-30.

Table B-30: Overcrowding¹ Severity by Region

Region	Not Overcrowded		Overcrowded		Severely Overcrowded	
	Number	Percent	Number	Percent	Number	Percent
San Pablo	7,651	83.0%	1,373	14.9%	197	2.1%
Contra Costa County	374,726	94.9%	13,950	3.5%	6,093	1.5%
Bay Area	2,543,056	93.1%	115,696	4.2%	72,682	2.7%

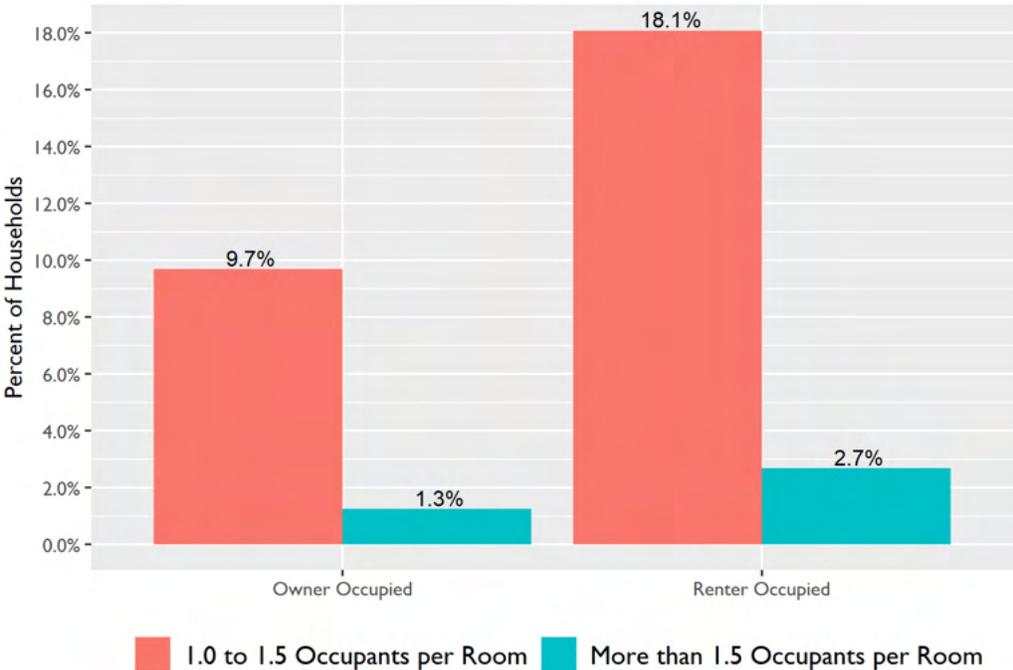

1. The Census Bureau defines an overcrowded unit as one occupied by 1.01 persons or more per room (excluding bathrooms and kitchens), and units with more than 1.5 persons per room are considered severely overcrowded.

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release)

Renters more often experience overcrowding with multiple households sharing a unit to make it possible to stay in their communities. This trend is consistent in San Pablo with about 20.8 percent of renter-occupied households experiencing some level of overcrowding while only 11.0 percent of owner-occupied households experiencing over-crowding, see Chart B-9. Rates of severe overcrowding are more than twice as high among renters than they are among owners.

Renters may experience higher rates of overcrowding because they are more likely to be lower income than are homeowners. Lower-income households in San Pablo (those making less than 80 percent of AMI), generally tend to have higher rates of overcrowding. For instance, as shown in Table B-31, among extremely-low-income households (i.e., those making less than 30 percent of AMI) 10.0 percent are considered overcrowded while 4.2 percent are severely overcrowded. In San Pablo, it’s notable that households with higher incomes (i.e., those making greater than 100 percent of AMI) also have relatively high rates of overcrowding, with 7.2 percent overcrowded and 2.6 percent severely overcrowded. This reflects a lack of sufficient housing supply for all income levels.

Chart B-9: Overcrowding by Tenure and Severity in San Pablo

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release)

Like tenure, rates of overcrowding are unevenly distributed by race/ethnicity. Chart B-10 below demonstrates the breakdown of overcrowding within various racial/ethnic groups in San Pablo. According to the ABAG-MTC data workbook the “Census Bureau does not disaggregate racial groups by

Table B-31: Overcrowding¹ by Income Level and Severity in San Pablo

<i>Income Group²</i>	<i>Overcrowded</i>	<i>Severely Overcrowded</i>
0%-30% of AMI	10.0%	4.2%
31%-50% of AMI	17.5%	4.6%
51%-80% of AMI	7.5%	1.3%
81%-100% of AMI	5.3%	4.2%
Greater than 100% of AMI	7.2%	2.6%

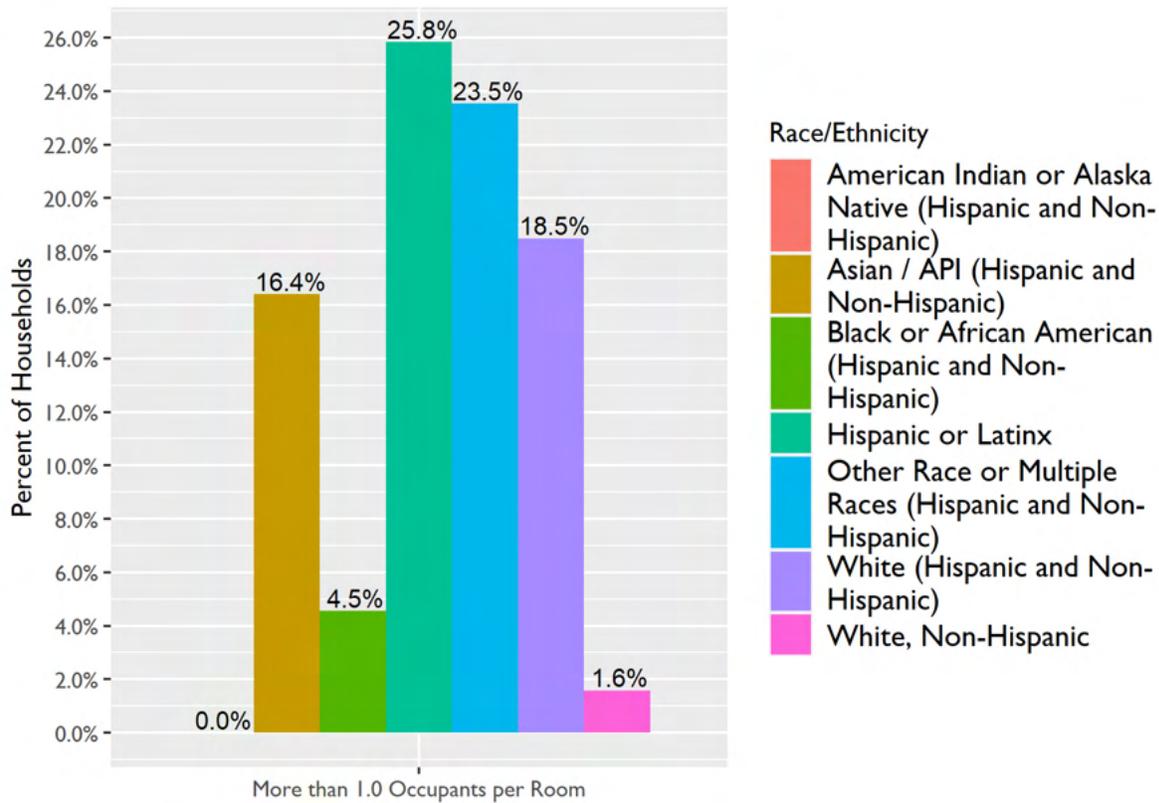

1. The Census Bureau defines an overcrowded unit as one occupied by 1.01 persons or more per room (excluding bathrooms and kitchens), and units with more than 1.5 persons per room are considered severely overcrowded.

2. Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this table are based on the HUD metro area where this jurisdiction is located.

Hispanic/Latinx ethnicity. However, data for the white racial group is also reported for white householders who are not Hispanic/Latinx. Since residents who identify as white and Hispanic/Latinx may have very different experiences within the housing market and the economy from those who identify as white and non-Hispanic/Latinx, data for multiple white sub-groups are reported here.” In addition, “[t]he racial/ethnic groups reported in this table are not all mutually exclusive. Therefore, the data should not be summed as the sum exceeds the total number of occupied housing units for this jurisdiction. However, all groups labelled ‘Hispanic and Non-Hispanic’ are mutually exclusive, and the sum of the data for these groups is equivalent to the total number of occupied housing units.”

Overcrowding is most prevalent among Hispanic or Latinx households and other race or multiple race households of any ethnicity as 25.8 percent and 23.5 percent of each group experiences overcrowding, respectively. Overcrowding rates are low for non-Hispanic white households (1.6 percent) and for American Indian or Alaska Native households of any ethnicity (0.0 percent – although this may be the result of insufficient data).

Chart B-10: Overcrowding by Race/Ethnicity in San Pablo

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25014)

COST BURDEN

Cost burden, or overpayment, is defined as monthly shelter costs in excess of 30 percent of a household’s income. Severe cost burden is defined as paying over 50 percent of household income for shelter costs. Shelter cost is defined as the monthly owner costs (mortgages, deed of trust, contracts to purchase or similar debts on the property and taxes, insurance on the property, and utilities) or the gross rent (contract rent plus the estimated monthly cost of utilities). HUD Comprehensive Housing Affordability Strategy (CHAS) data provides estimates of cost burden by tenure and income category. Estimates use the HUD Area Median Family Income (HAMFI) to determine overpayment. HAMFI is the median family income calculated by HUD for each jurisdiction in order to determine Fair Market Rents (FMRs) and income limits for HUD programs. HAMFI is not necessarily equivalent to other median income calculations due to a series of adjustments made by HUD.

Nearly half of all San Pablo households experience some level of cost burden. Of the 4,353 households experiencing some level of cost burden, 94 percent considered lower-income, indicating that housing affordability is particularly out of reach for lower-income households in San Pablo.

Further, renters are particularly impacted by cost burden since renters are limited to the rental market while owners can build equity with their homes. Renters in San Pablo tend to have higher rates of cost burden than owners – for instance, 57.4 percent of all renters experience some level of cost burden while only 30.3 percent of owners do. Rates are further unevenly distributed between renters and owners by income level, as evident in Table B-32 below.

Table B-32: Cost-Burdened Households in San Pablo by Income and Tenure¹

Income Category	Renters		Owners		Total Households ²	
	Number	Percent	Number	Percent	Number	Percent
Extremely-Low-Income (Under 30% HAMFI³)						
No Cost Burden/Not Computed	330	15.6%	180	34.0%	510	19.3%
Cost Burden	494	23.4%	160	30.2%	654	24.7%
Severe Cost Burden	1,290	61.0%	190	35.8%	1,480	56.0%
Very-Low-Income (30% - 50% HAMFI)						
No Cost Burden/Not Computed	310	24.1%	345	54.0%	655	34.0%
Cost Burden	670	52.1%	134	21.0%	804	41.8%
Severe Cost Burden	305	23.7%	160	25.0%	465	24.2%
Low-Income (50% - 80% HAMFI)						
No Cost Burden/Not Computed	705	60.5%	444	64.0%	1,149	61.8%
Cost Burden	450	38.6%	195	28.1%	645	34.7%
Severe Cost Burden	10	0.9%	55	7.9%	65	3.5%
All Lower-Income (Under 80% HAMFI)						
No Cost Burden/Not Computed	1,345	29.5%	969	52.0%	2,314	36.0%
Cost Burden	1,614	35.4%	489	26.2%	2,103	32.7%
Severe Cost Burden	1,605	35.2%	405	21.7%	2,010	31.3%
Moderate- and Above-Moderate-Income (Over 80% HAMFI)						
No Cost Burden/Not Computed	1,095	94.0%	1,480	89.7%	2,575	91.5%
Cost Burden	70	6.0%	140	8.5%	210	7.5%
Severe Cost Burden	0	0.0%	30	1.8%	30	1.1%
All Income Groups						
No Cost Burden/Not Computed	2,440	42.6%	2,449	69.7%	4,889	52.9%
Cost Burden	1,684	29.4%	629	17.9%	2,313	25.0%
Severe Cost Burden	1,605	28.0%	435	12.4%	2,040	22.1%

1. According to HUD, households spending 30 percent or less of their income on housing expenses have no cost burden, households spending 31 to 50 percent of their income have cost burden, and households spending 51 percent or more of their income have severe cost burden.

2. Discrepancies in sums are due to rounding errors.

3. HUD Area Median Family Income (HAMFI).

HOUSING VACANCY

Housing vacancy rates provide one metric to assess the balance between the supply and demand of housing in a region. Low vacancy rates occur when demand outpaces the supply of housing, while high vacancy rates indicate an oversupply of housing. Housing costs also tend to be higher with low vacancy rates. Estimates from the 2015-2019 ACS compiled by ABAG-MTC indicate that 572 (6.2 percent) out of the 9,221 housing units in San Pablo were vacant, which is higher than in the county (4.8 percent) but about equivalent to the entire Bay Area, as shown in Table B-33.

Table B-33: San Pablo Vacant Units by Type, 2019

<i>Vacancy Status</i>	<i>San Pablo</i>	<i>Contra Costa County</i>	<i>Bay Area</i>
For Rent	221	4,321	41,117
For Sale	15	2,012	10,057
For Seasonal, Recreational, or Occasional Use	0	2,188	37,301
Other Vacant	303	8,469	61,722
Rented, Not Occupied	33	741	10,647
Sold, Not Occupied	0	1,219	11,816
Total Vacant Housing Units	572 (6.2%)	18,950 (4.8%)	172,660 (6.3%)

Source: ABAG-MTC Housing Needs Data Workbook (American Community Survey 5-Year Data (2015-2019), Table B25004)

PERMITTED HOUSING

As discussed previously, there has been little housing development in San Pablo during the previous housing element cycle. Using data provided in the City's 2020 Annual Progress Report, the number of building permits issued from 2015 to 2020 is available by income group. In total, 74 permits were issued during this period, or about 16.5 percent of the 5th cycle RHNA. Most of this development occurred at the higher income ranges, with 31 units permitted for moderate-income households and 36 units permitted for above-moderate-income household. No very-low-income units were permitted and seven low-income units were permitted. See Table B-34 for the proportion of the RHNA met by income level during this period.

Table B-34: Housing Permitting in San Pablo, 2015 – 2020

<i>Income Group</i>	<i>Number of Permits</i>	<i>Percent of 5th Cycle RHNA</i>
Very Low Income	0	0.0%
Low Income	7	13.2%
Moderate Income	31	41.3%
Above Moderate Income	36	13.6%
Total	74	16.5%

Source: City of San Pablo, Annual Progress Report, 2020

HOUSING CONDITIONS

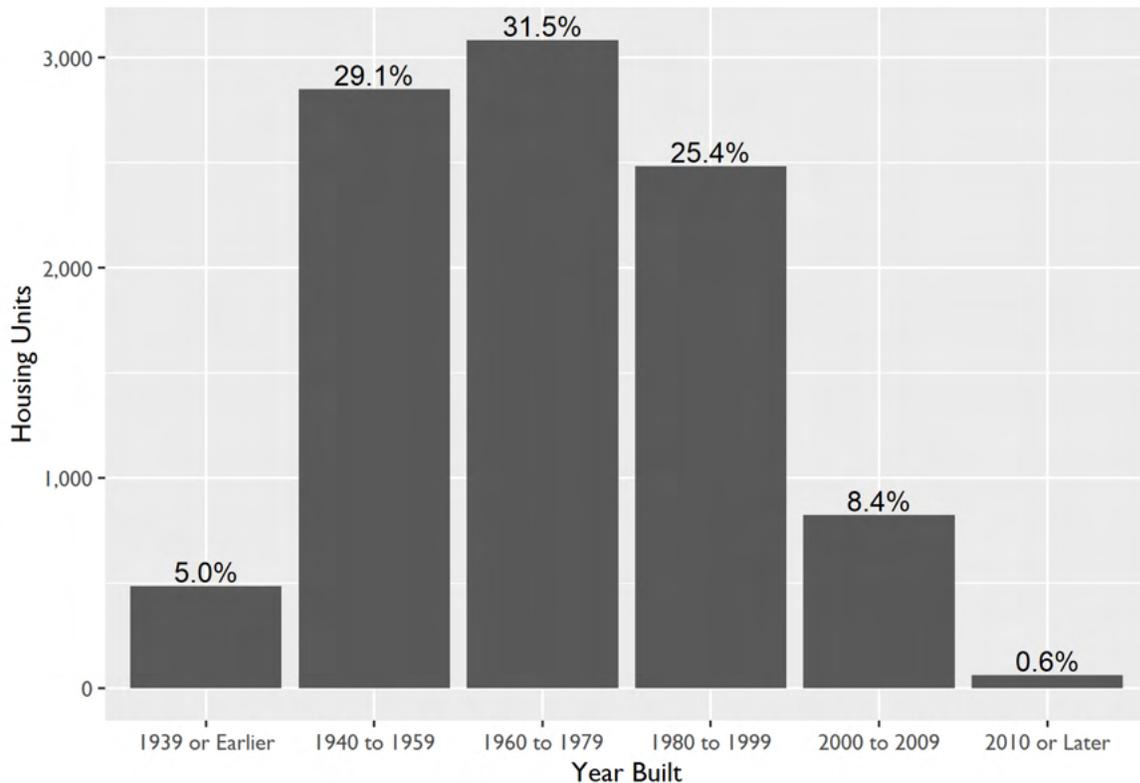

Both regionally and locally, insufficient housing supply and high housing costs create a higher risk for households to live in substandard conditions. Assessing the condition of the housing stock, including the age of buildings and substandard condition, is critical to address housing quality and safety needs in the city.

More than two-thirds of housing units in San Pablo were built before 1980 – this includes a large portion of units built in the World War II era as temporary worker housing for the neighboring Richmond shipyards. About a quarter of units in San Pablo were built between 1980 and 1999, and about 10 percent between 2000 and 2009. Virtually no new units have been built since the economy's recovery from the Great Recession. The City of Richmond has had similar development trends, while Contra Costa County has seen more housing development in the last two decades. See Chart B-11 for the age of San Pablo's housing stock as of 2019.

A high proportion of older buildings, especially those built more than 30 years ago, indicate that there are likely substantial health and safety housing conditions in the city. Housing is considered substandard when physical conditions are determined to be below the minimum standards of living, as defined by Government Code Section 17920.3. A building is considered substandard if any of the following conditions exist:

- Inadequate sanitation
- Structural hazards
- Nuisances
- Faulty weather protection
- Fire, safety or health hazards
- Inadequate building materials
- Inadequate maintenance
- Inadequate exit facilities
- Hazardous wiring, plumbing or mechanical equipment
- Improper occupation for living, sleeping, cooking, or dining purposes
- Inadequate structural resistance to horizontal forces
- Any building not in compliance with Government Code Section 13143.2

Chart B-1 I: Age of San Pablo Housing Stock

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25034)

Any household living in substandard conditions is considered in need of assistance, even if they are not actively seeking alternative housing arrangements. Estimating the number of substandard units can be difficult, but the lack of certain infrastructure and utilities can often be an indicator of substandard conditions. According to 2019 ACS estimates compiled by ABAG-MTC, as shown in Table B-35, about 2.1 percent of owners lack complete kitchen facilities while 0.4 percent of renters do. Further, approximately 0.9 percent of owners lack complete plumbing facilities while 1.0 percent of renters do. In total, there are 88 occupied housing units with incomplete plumbing facilities and 96 units with incomplete kitchen facilities.

Table B-35: San Pablo Substandard Housing Issues

<i>Building Amenity</i>	<i>Owner</i>	<i>Renter</i>
Incomplete Kitchen Facilities	2.1%	0.4%
Incomplete Plumbing Facilities	0.9%	1.0%

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25053, Table B25043, Table B25049)

B.7 Housing Costs and Affordability

The high levels of cost burden or overcrowding in San Pablo indicate high housing costs and a lack of affordability within a community. This section summarizes housing costs in San Pablo and assesses the extent to which housing is affordable for residents of the city.

HOUSING AFFORDABILITY BY HOUSEHOLD INCOME

Housing affordability can be estimated by comparing the cost of renting or owning a home in San Pablo with the maximum affordable housing costs to households at different income levels. In evaluating affordability, the maximum affordable price refers to the maximum amount that could be afforded by households in the upper range of their respective income category. Households in the lower end of each category can afford less in comparison. The maximum affordable home and rental prices for residents of San Pablo are shown in Table B-36. This table shows what type of household can afford what size and type of housing. The affordability of the city's housing stock by tenure and income group is discussed below. HCD has estimated the 2021 Contra Costa County AMI to be \$125,600.

Table B-36: San Pablo Housing Affordability by Income Group

<i>Household Size</i>	<i>Affordable Monthly Payment²</i>		<i>Housing Costs</i>		<i>Maximum Affordable Price</i>		
	<i>AMI Limits¹</i>	<i>Renter</i>	<i>Owner</i>	<i>Utilities³</i>	<i>Taxes & Insurance⁴</i>	<i>Renter</i>	<i>Owner⁵</i>
Extremely-Low-Income (<30% AMI)							
1 Person (Studio)	\$28,800	\$720	\$720	\$217	\$252	\$503	\$66,232
2 Person (1 Bedroom)	\$32,900	\$823	\$823	\$232	\$288	\$590	\$79,688

3 Person (2 Bedroom)	\$61,650	\$1,541	\$1,541	\$280	\$539	\$1,262	\$190,687

Table B-36: San Pablo Housing Affordability by Income Group

Household Size	Affordable Monthly Payment ²		Housing Costs			Maximum Affordable Price	
	AMI Limits ¹	Renter	Owner	Utilities ³	Taxes & Insurance ⁴	Renter	Owner ⁵
4 Person (3 Bedroom)	\$68,500	\$1,713	\$1,713	\$332	\$599	\$1,380	\$206,101
5 Person (4 Bedroom)	\$74,000	\$1,850	\$1,850	\$383	\$648	\$1,467	\$216,182
Low-Income (51%-80% AMI)							
1 Person (Studio)	\$76,750	\$1,919	\$1,919	\$217	\$672	\$1,702	\$271,706
2 Person (1 Bedroom)	\$87,700	\$2,193	\$2,193	\$232	\$767	\$1,960	\$314,780
3 Person (2 Bedroom)	\$98,650	\$2,466	\$2,466	\$280	\$863	\$2,187	\$349,262
4 Person (3 Bedroom)	\$109,600	\$2,740	\$2,740	\$332	\$959	\$2,408	\$382,221
5 Person (4 Bedroom)	\$118,400	\$2,960	\$2,960	\$383	\$1,036	\$2,577	\$406,682
Moderate-Income (81%-120% AMI)							
1 Person (Studio)	\$105,500	\$2,638	\$3,077	\$217	\$1,077	\$2,421	\$470,474
2 Person (1 Bedroom)	\$120,550	\$3,014	\$3,516	\$232	\$1,231	\$2,781	\$541,571
3 Person (2 Bedroom)	\$135,650	\$3,391	\$3,956	\$280	\$1,385	\$3,112	\$604,725
4 Person (3 Bedroom)	\$150,700	\$3,768	\$4,395	\$332	\$1,538	\$3,435	\$666,235
5 Person (4 Bedroom)	\$162,750	\$4,069	\$4,747	\$383	\$1,661	\$3,686	\$713,244

1. AMI limits based on 2021 HCD State Income Limits for Contra Costa County, other assumptions are derived from Zillow estimates (as of October 4, 2021) and the National Association of Realtors. The 2021 Contra Costa County AMI is \$125,600.

2. Affordable monthly payment for renters and owners is assumed to be one-twelfth of 30% of median income applicable for the number of bedrooms. The exception is moderate-income owners, whose affordable payment is assumed to be one-twelfth of 35% of median income applicable for the number of bedrooms as specified by HCD, pursuant to HSC 50052.5(b)(4).

3. Utilities are estimated according to the 2021 Contra Costa County Housing Authority Utility Allowance Schedule. Estimates are based on the combined average cost of gas and electric heating, cooking and water heating, as well as other electric, water, trash collection, sewer, air conditioning, refrigeration and range/microwave across all unit types [i.e., elevator/high-rise/apartment/walk-up (multi-family), detached house/single family dwelling, mobile/manufactured home, row house/townhouse & semi-detached/duplex]. Costs are assumed equivalent for owners and renters.

4. Taxes and insurance are assumed to be 35% of monthly affordable housing costs for owners.

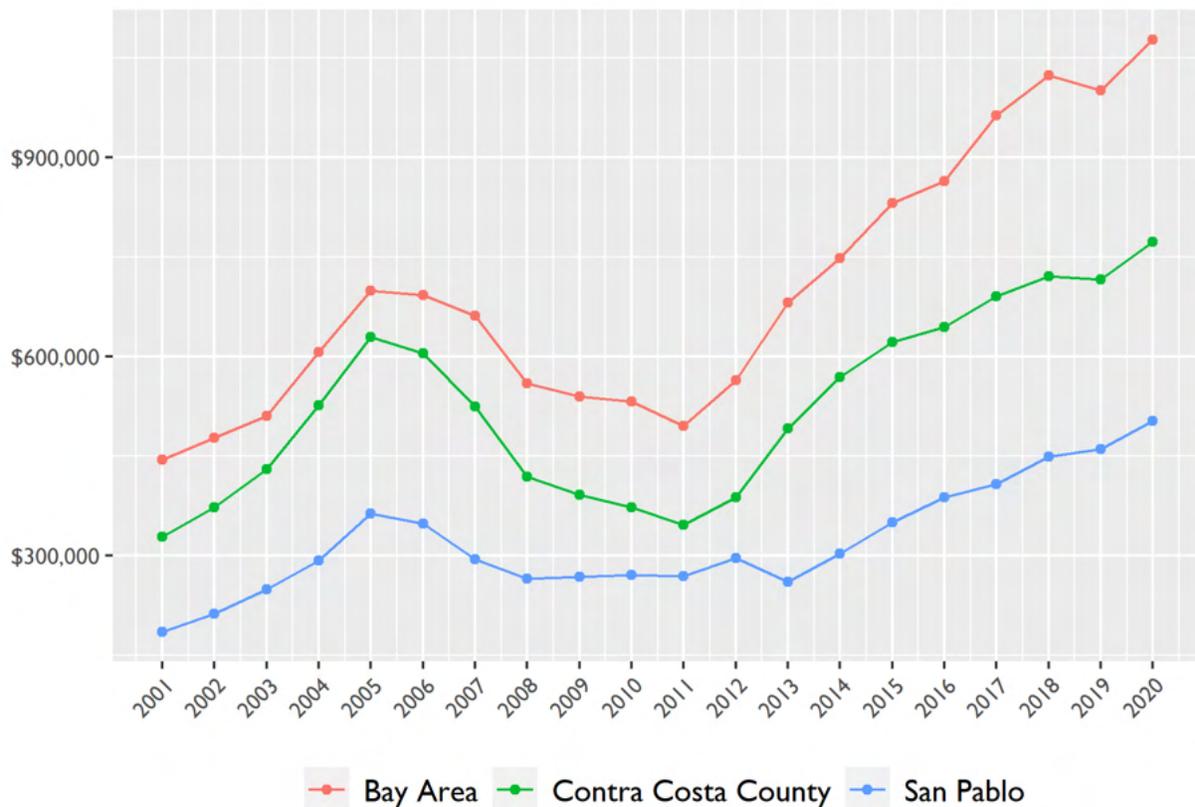

5. Assumed 30-year amortization, 2.82% interest rate, 6.0% down payment and closing costs equal to 2% of the sale price.

Source: HCD State Income Limits, 2021; Contra Costa Housing Authority Utility Allowance Schedule, 2021; Zillow Mortgage Rates, October 2021; National Association of Realtors Research Group, Downpayment Expectations & Hurdles to Homeownership, April 2020; Dyett & Bhatia, 2021

OWNERSHIP COSTS

Like many cities in the Bay Area, housing costs in San Pablo have continued to rise over the last two decades. Home values are tracked using the Zillow Home Value Index (ZHVI) as compiled by ABAG-MTC, which is a smoothed, seasonally adjusted measure of the typical value for homes in the 35th to 65th percentile range. The regional ZHVI estimate is a household-weighted average of county-level ZHVI files, where household counts are yearly estimates from DOF's E-5 series. As demonstrated in Chart B-12, home values did not decline as steeply in San Pablo as they did in Contra Costa County and the Bay Area following the 2008 financial collapse. In fact, value largely plateaued between 2008 and 2014. Between 2014 and 2020 home values have continually risen in San Pablo and have surpassed the previous high of \$363,366 in 2005 to reach over \$500,000.

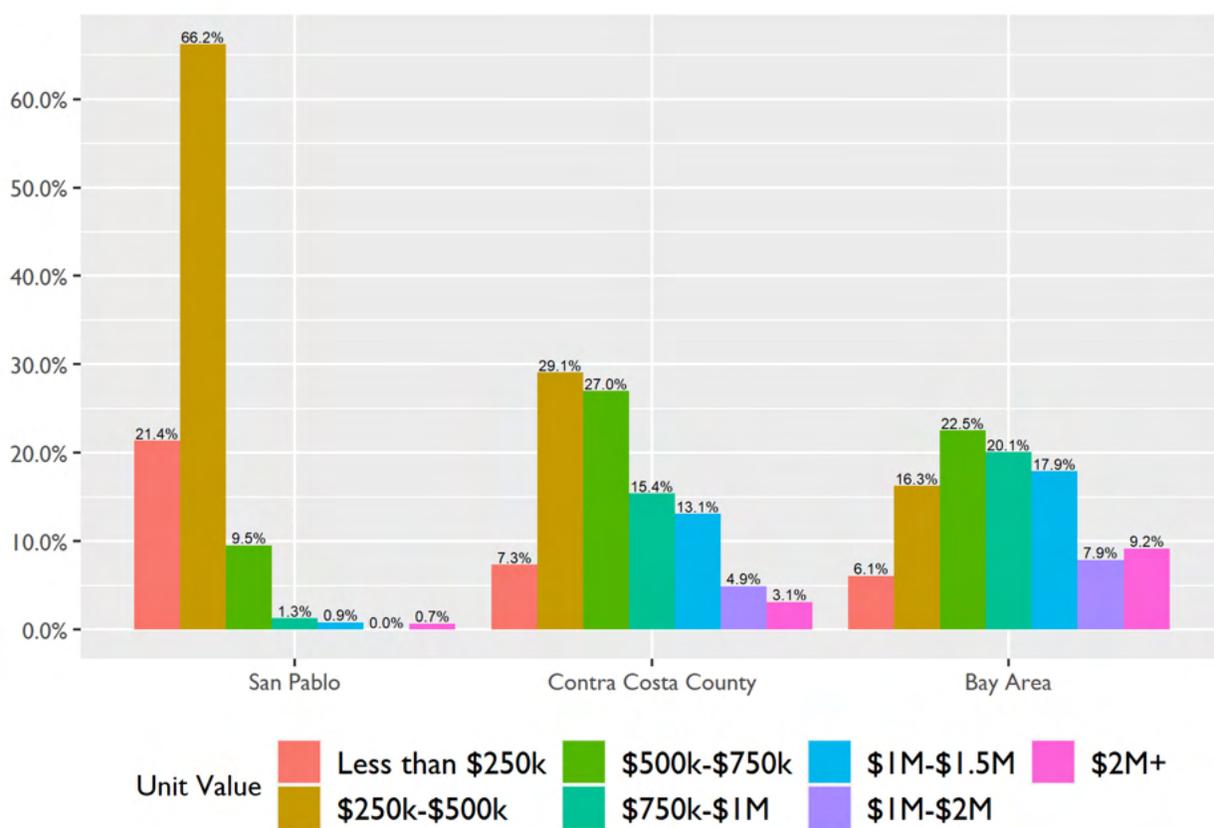

Chart B-12: San Pablo and Regional Area Zillow Home Value Index (ZHVI), 2001 – 2020

Source: ABAG-MTC Housing Needs Data Workbook (Zillow, ZHVI December 31, 2001 – December 31, 2020)

In addition to the ZHVI, the ABAG-MTC data worksheet provides estimates of home values for owner-occupied units based on the 2019 ACS. Shown in Chart B-13, this data confirms the disparity in home value across region as indicated by the ZHVI. While the ZHVI estimates the typical household is valued over \$500,000, the ACS indicates that most units (about 87.6 percent) are actually valued below \$500,000. This is a very different distribution than is seen in the county or Bay Area, both of which have more even distributions by unit value. Contra Costa County does skew towards lower unit values while the Bay Area tends to skew towards higher unit values. The ZHVI is better aligned with these regional estimates. Given that housing costs have only risen since the 2019 ACS, the 2020 ZHVI will be used to estimate housing value in San Pablo—although it should be noted that this may slightly overestimate housing cost.

Chart B-13: San Pablo and Regional Area Owner-Occupied Unit Values, 2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25075)

The ZHVI tracks a variety of types of owner-occupied housing units, including both single-family homes and condominiums. Table B-37 provides a breakdown of the ZHVI by housing type and size between 2010 and 2020. Not all housing types have available data for the 2010 period. In total, housing value has increased by about 85.5 percent between 2010 and 2020. Three-bedroom units in particular have seen a relatively high increase in value by about 112.6 percent during the period. As of 2020, the highest value housing type in San Pablo is a four-bedroom housing unit at \$577,832.

Table B-37: San Pablo Zillow Home Value Index (ZHVI), 2010 - 2020

Housing Type	December 2010 ZHVI	December 2020 ZHVI	Percent Change (2010 – 2020)
Total	\$272,445	\$505,418	85.5%
Single-Family	\$310,601	\$523,281	68.5%
Condo	-	\$415,756	-
1 Bedroom	-	\$373,791	-
2 Bedroom	-	\$439,152	-
3 Bedroom	\$247,964	\$527,080	112.6%
4 Bedroom	-	\$577,832	-
5+ Bedrooms	\$272,445	\$505,418	85.5%

Source: Zillow Home Value Index, December 31, 2010 and December 31, 2020

Given the ZHVI estimates provided in Table B-37 and housing affordability levels from Table B-36 it is apparent that no lower-income household can afford a home at an appropriate size. Some larger households may be able to afford units that have fewer bedrooms, which would lead to overcrowding. For instance, a four-person low-income household would be able to afford a \$382,221 unit, which would be sufficient to purchase only a one-bedroom unit per the ZHVI. Moderate-income households of any size, on the other hand, would be able to afford to purchase a home at the appropriate size. This demonstrates an affordability gap for lower-income households in the city, as such households generally would not be able to afford to buy a home without significant subsidy. Increased housing production for a range of housing types would also help to increase affordability, but this analysis shows that housing in a market like that of the Bay Area is only generally affordable to moderate- or higher-income households. Chart B-14 visualizes the affordability gap for the typical household, which is defined as a four-person household living in a three-bedroom housing unit.

RENTER COSTS

In 2019, according to ACS estimates provided by ABAG-MTC, the median contract rent in San Pablo was \$1,324. According to the Census, contract rent is the monthly rent agreed upon regardless of any furnishings, utilities or services that may be included. Data regarding contract rent excludes units for which no cash rent is paid. Table B-38 illustrates that rent in San Pablo is significantly lower than in the county and in the Bay Area. Rents in San Pablo were generally stable between the 2009 and 2015 period, increasing by about 7.3 percent. This differs from the county and Bay Area, which saw median contract rent increases by 15.1 percent and 20.4 percent, respectively. However, between 2015 and 2019 rent costs spiked in San Pablo—increasing by about 32.5 percent—while the county and Bay Area saw slightly less dramatic increases, 26.2 percent and 28.4 percent respectively.

Table B-38: San Pablo and Regional Area Rents¹, 2009 – 2019

<i>Jurisdiction</i>	<i>2009 Median Contract Rent</i>	<i>2015 Median Contract Rent</i>	<i>2019 Median Contract Rent</i>
San Pablo	\$931	\$999	\$1,324
Contra Costa County	\$1,161	\$1,336	\$1,686
Bay Area	\$1,196	\$1,440	\$1,849

1. County and regional counts are weighted averages of jurisdiction median using rental unit counts from the relevant year.

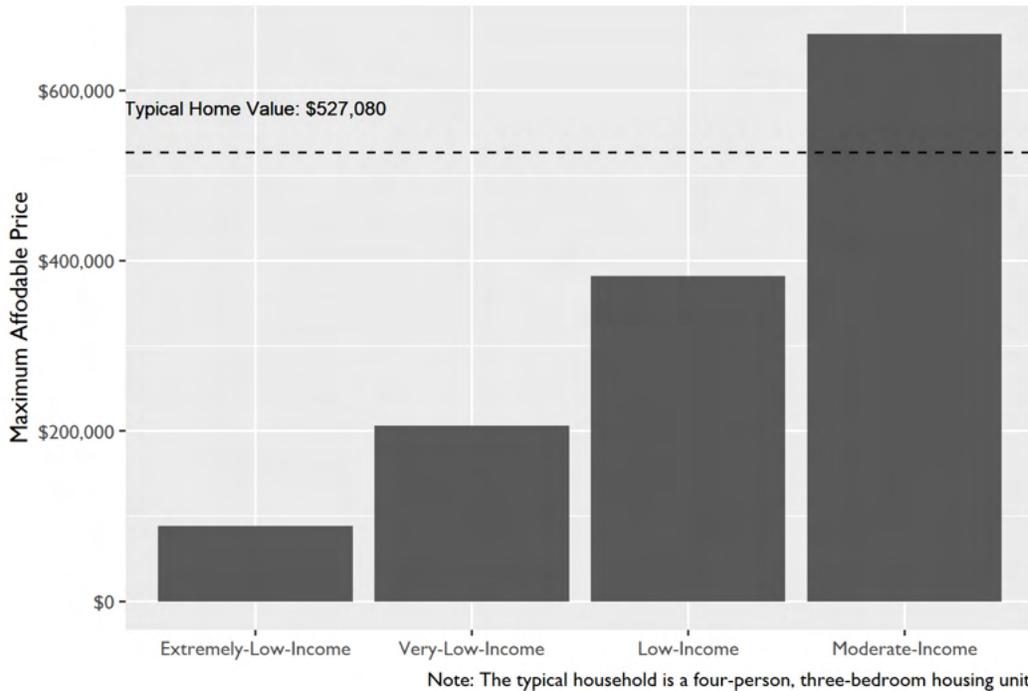

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data releases, starting with 2005-2009 through 2015-2019, B25058, B25056 (for unincorporated areas))

Thus, while rents have risen at faster pace in the city than in the surrounding region, San Pablo still remains a relatively affordable option for renters when compared to the county or Bay Area. As demonstrated in Chart B-15, most (65.5 percent) renter-occupied units in San Pablo have contract rents below \$1,500. This differs from the county, where 39.4 percent of units have contract rents below \$1,500, and the Bay Area, where 35.2 percent of units are below that threshold. Further, 13.3 percent of the county rental stock and 24.7 percent of the Bay Area rental stock have contract rents above \$2,500 while only 0.6 percent of San Pablo’s rental stock exceeds that amount.

As rents have risen in the city, it is likely that lower-income households have been less able to afford units at a suitable size. U.S. Census microdata compiled by the Integrated Public Use Microdata Series (IPUMS) USA can be used to estimate rental costs by unit size. IPUMS data corresponds to the Public Use Microdata Area (PUMA) for Contra Costa County (Far Southwest)—Richmond (Southwest) & San Pablo Cities. The PUMA does not necessarily have the same boundaries as other Census-derived estimates.

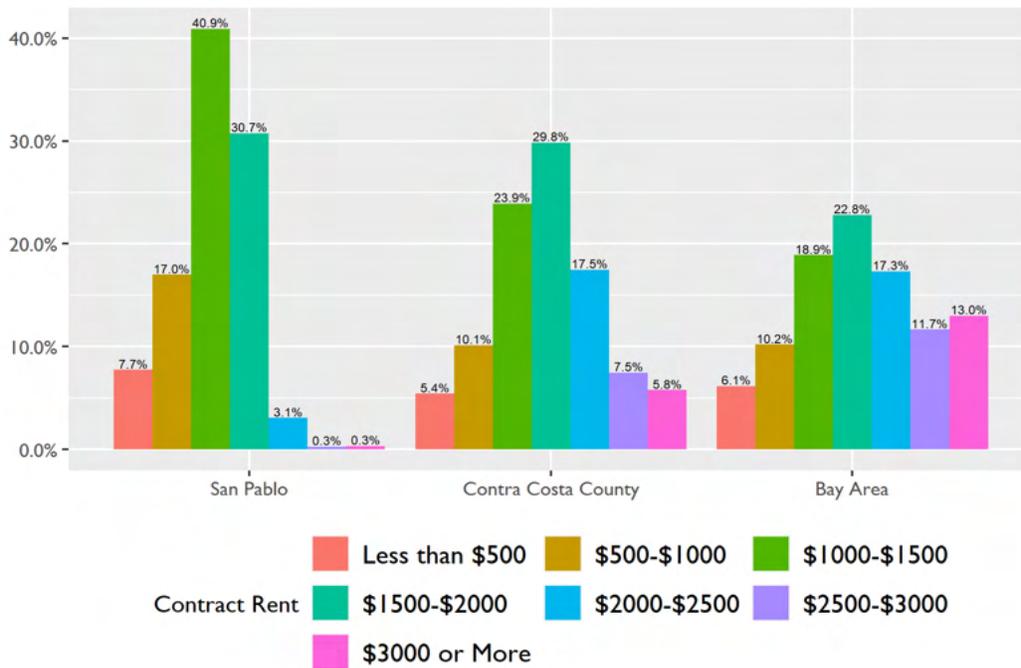

Additionally, estimates are weighted by the representativeness of the sampled household given IPUMS-derived weights. Table B-39 provides estimated median monthly gross rents in the PUMA by the number of bedrooms. Unlike contract rent, gross rent includes additional costs for utilities and fuels.

Chart B-14: Ownership Affordability Gap for the Typical Household

Source: Zillow Home Value Index, December 31, 2020; Dyett & Bhatia, 2021

Chart B-15: Contract Rents for Renter-Occupied Units, 2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25056)

Table B-39: San Pablo Monthly Gross Rental Rates, 2019

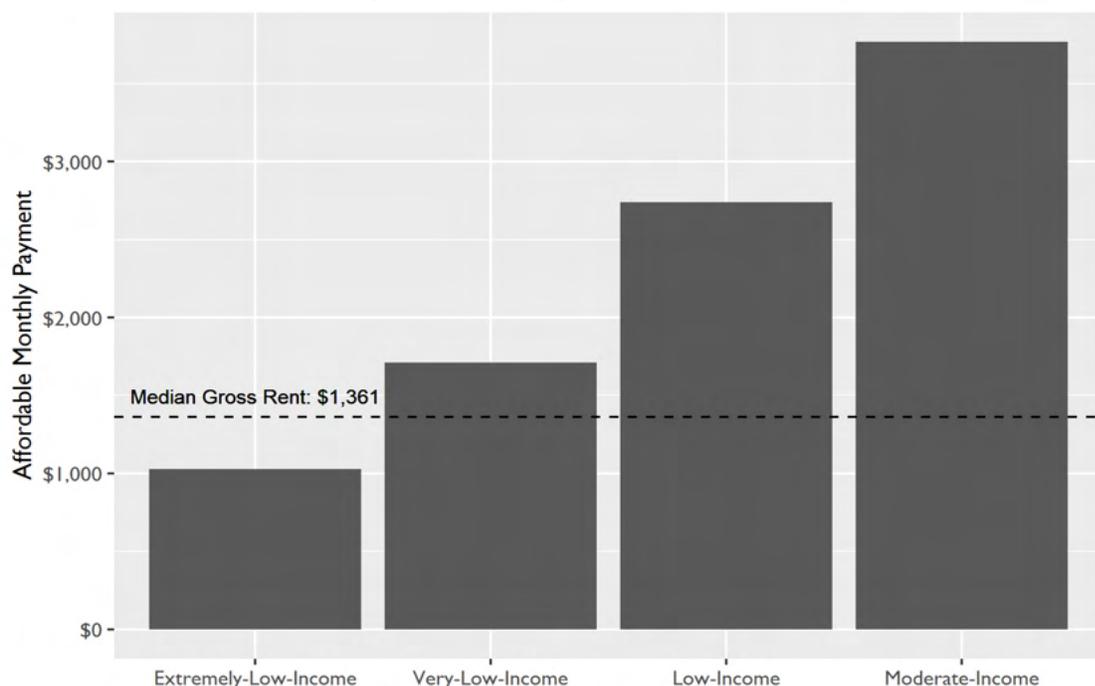

Number of Bedrooms	Estimated Number of Households ¹	2019 Median Monthly Gross Rent ²
0	540	-
1	1,043	\$900
2	5,565	\$1,146
3	14,771	\$1,361
4	14,245	\$1,790
5	3,192	\$2,200
6	448	\$1,860
7	10	-
8	78	\$520

1. Household count is based on the Public Use Microdata Area (PUMA). While PUMAs generally follow the boundaries of census-defined “places,” total household counts may differ from other Census-derived estimates.
2. Estimates of median gross rent are weighted by an IPUMS-derived household weight. Estimates may be inaccurate due to missing data and outliers.

Source: IPUMS USA, 2015-2019 ACS

According to the gross rental estimates (i.e., including utilities and other costs) from Table B-39 above and monthly affordable payments presented in Table B-36, extremely-low-income households in San Pablo would not be able to afford to rent an appropriately sized unit. However, larger extremely-low-income households could afford to rent a unit with fewer bedrooms – for instance, a four-person household could afford to rent a one-bedroom unit. This mismatch is likely one of the causes behind the city’s relatively high rate of overcrowding. All other income levels, including low- and very-low-income households, would be able to afford to rent an appropriately sized unit. Chart B-16 demonstrates this affordability gap for the typical extremely-low-income household.

Chart B-16: Rental Affordability Gap for the Typical Household

Note: The typical household is a four-person, three-bedroom housing unit.

Source: IPUMS USA, 2015-2019 ACS; Dyett & Bhatia, 2021

B.8 Assisted Housing at Risk of Conversion

State Housing Element law requires that communities identify the status of assisted low-income rental units that are “at risk” of conversion to market rent status within ten years of the statutory mandated update of the Housing Element (from January 2023 to January 2031). The California Housing Partnership (CHP) estimates that there are 568 assisted low-income units in San Pablo. Table B-40 shows that while most units in San Pablo are at low risk of conversion, there are 60 units (10.6 percent) at moderate risk and 81 units (14.3 percent) at high risk. The proportion of units facing some level of risk is significantly higher in the city (24.9 percent) than in the county (3.4 percent) or Bay Area (5.4 percent). While California Housing Partnership’s Preservation Database is the state’s most comprehensive source of information on subsidized affordable housing at risk of losing its affordable status and converting to market-rate housing, this database does not include all deed-restricted affordable units in the state.

Table B-40: Assisted Units at Risk of Conversion

<i>Risk Level¹</i>	<i>San Pablo</i>		<i>Contra Costa County</i>		<i>Bay Area</i>	
	<i>Number</i>	<i>Percent</i>	<i>Number</i>	<i>Percent</i>	<i>Number</i>	<i>Percent</i>
Low	427	75.2%	13,403	96.5%	110,177	94.6%
Moderate	60	10.6%	211	1.5%	3,375	2.9%
High	81	14.3%	270	1.9%	1,854	1.6%
Very High	0	0%	0	0%	1,053	0.9%

1. California Housing Partnership uses the following categories for assisted housing developments in its database:

- Low Risk: affordable homes that are at-risk of converting to market rate in 10+ years and/or are owned by a large/stable non-profit, mission-driven developer.
- Moderate Risk: affordable homes that are at-risk of converting to market rate in the next 5-10 years that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer.
- High Risk: affordable homes that are at-risk of converting to market rate in the next 1-5 years that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer.
- Very-High Risk: affordable homes that are at-risk of converting to market rate within the next year that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer.

Source: ABAG-MTC Housing Needs Data Workbook (California Housing Partnership, Preservation Database, 2020)

Per HCD guidance, local jurisdictions must also list the specific affordable housing developments at risk of converting to market rate uses to supplement the aggregate numbers provided in Table B-40. The assisted housing inventory is available in Table B-41 below.

Table B-41: San Pablo Assisted Housing Inventory

<i>Project Name</i>	<i>Project Address</i>	<i>Project Type</i>	<i>Total Affordable Units</i>	<i>Date Constructed</i>	<i>Affordability End Date</i>
Montevista Older Adult Apartments	13728 San Pablo Avenue	Older adults	81	2003	2058
Casa Adobe Older Adult Apartments	1924 Church Lane	Family	53	1991	2063
El Paseo Family Apartments	1150 Brookside Drive	Family	130	2008	2063
Giant Road Family Apartments	907 Lake Street	Family	84	2007	2062
Total			348		

Source: County of Contra Costa

COST ANALYSIS

The typical development cost of affordable housing projects in San Pablo is about \$393,799 per unit. Estimates are derived from the average projected development costs per unit provided in recent California Tax Credit Allocation Committee (TCAC) project tax credit applications, see Table B-42. If the 141 units identified by the CHP as facing some level of risk converted to market rate housing during the 10-year period, the total replacement cost would be about \$55,525,612.

Table B-42: Typical Development Costs of Affordable Housing

<i>Project Name</i>	<i>TCAC Application Year</i>	<i>Per Unit Cost¹</i>
Church Lane	2017	\$418,536
Montevista Older adult Apartments	2018	\$292,056
Hilltop Commons	2020	\$470,804
Average		\$393,799

1. Derived from stated “true cash per unit cost” or “effective per unit costs”, where applicable, in TCAC project applications.

Source: California Tax Credit Allocation Committee, Project Staff Reports 2017-2020

The cost of preservation for the typical affordable housing project can be estimated by finding the difference between fair market rent and affordable rent. As shown in Table B-36 the affordable monthly rental payment for a very-low-income, four-person household in San Pablo is \$1,713. In fiscal year 2021 the HUD Fair Market Rent (FMR), or gross rent estimate, in the Oakland-Fremont, CA HUD Metro FMR area for a three-bedroom unit was \$3,196. The difference between these two prices is the “affordability gap,” which is about \$1,483 in San Pablo. Given this affordability gap, the total cost of preserving all 141 at-risk units would be approximately \$209,103 per month or \$2,509,236 per year. This translates to a cost of \$25,092,360 over the 10-year period, or \$177,960 per unit. This is likely an overestimation of cost, since the FMR area that San Pablo is part of includes Bay Area jurisdictions with much higher rental costs. Even so, preservation costs are lower than replacement costs.

RESOURCES FOR PRESERVATION

There are two primary resources available for preserving at-risk units: 1) public agencies, nonprofit housing corporations, and tenant groups; and 2) public financing or subsidy programs. HCD maintains a current list of all “qualified entities” across the state, which are nonprofit or for-profit organizations or individuals that agree to maintain the long-term affordability of affordable housing developments. Table B-43 provides the list of all qualified entities for Contra Costa County. The City would work with these organizations to preserve the housing units in danger of conversion. Additional housing resources, including funding sources, that the City utilizes are discussed further in Chapter 5.

Table B-43: Qualified Entities in Contra Costa County

<i>Qualified Entity</i>	<i>City</i>	<i>Contact</i>
Affordable Housing Associates	Berkeley	(510) 649-8500
Satellite Housing Inc.	Berkeley	(510) 647-0700

B.9 Energy Conservation

Household energy consumption, along with transportation, constitutes a significant proportion of total urban energy use. Efforts to reduce or minimize the overall level of urban energy consumption are essential to mitigate the high costs of energy and the environmental impacts of energy use.

Reductions in energy use can be achieved through the coordination of land development and transportation infrastructure. San Pablo is a largely developed and auto-oriented city with primarily single-family residential uses. Commercial and retail corridors are located in the center of the city, surrounded by residential neighborhoods and schools. There are a number of opportunity areas where land could be developed or redeveloped to meet new residential or other needs.

To achieve energy conservation goals, the City will continue strict enforcement of the building standards of the 2019 edition of the California Building Standards Code, Title 24 of the California Code of Regulations and amendments related to energy conservation. Title 24 establishes energy budgets or maximum energy

use levels for dwelling units. The standards of Title 24 supersede local regulations and mandate implementation by local jurisdictions.

The City prepared and adopted a Climate Action Plan (CAP) in 2012 using 2005 baseline information provided by the Greenhouse Gas (GHG) Inventory. The CAP provides a policy framework to reduce citywide GHG emissions, while also promoting improvements to increase livability, health and safety. According to the CAP, during the 2005 baseline year nearly 174,135 metric tons of carbon dioxide equivalent (MTons CO₂e) were produced in San Pablo. About 28.7 percent of community emissions came from energy usage, while 59.6 percent came from transportation. About 16.0 percent of emissions came from the residential sector. A number of objectives and strategies, which continue to be implemented by the City, target the reduction of residential emissions.

As part of the City's efforts to reduce climate-changing GHG emissions, the City Council voted to join MCE, formerly Marin Clean Energy, in 2014. MCE is a not-for-profit, Community Choice Aggregation (CCA) electricity provider that gives customers affordable "green" electricity choices in partnership with PG&E. All residents, excluding those who opted out, were enrolled in MCE's standard Light Green plan in March of 2015. The Light Green plan is sourced from at least 50 percent renewable resources. Deep Green, which relies on 100 percent clean energy, is also available at a higher cost to residents. The MCE program has been projected to significantly reduce the GHG emissions associated with electricity usage in the city. A variety of other resources for residential energy conservation are available to San Pablo residents, including a free energy efficiency toolkit, rebates through the Energy Upgrade California – Contra Costa County Program, free "Green House Calls," and the free Residential Home Improvement/Weatherization Program.

B.10 Key Findings

- **Findings Regarding Statutorily Defined Special Needs Groups.**
 - **Extremely-Low-Income Residents.** Non-Hispanic Black or African American households, which make up 10.7 percent of the city's population, are disproportionately more likely to be extremely-low-income or live below the poverty line than other racial/ethnic groups. Overall, San Pablo has a higher poverty rate (16.3 percent) than the county (8.7 percent).
 - **Older adult Residents.** Older adult residents have relatively lower incomes than the overall city population. Older adult renters in particular are particularly vulnerable, as they tend to live on fixed incomes and nearly three-quarters of older adult renters are considered extremely-low-income.
 - **Persons with Disabilities.** In the city there is a similar proportion of persons with a disability to the county and region. Most residents with a developmental disability live in the home of a parent/family/guardian and are over 18 years old.
 - **Large Families.** At 22.3 percent of all households, the city has a much higher proportion of large family households than the county (12.4 percent) and the Bay Area region (10.8 percent). However, these households tend to be less cost-burdened and have relatively higher incomes than other San Pablo households.
 - **Female-Headed Households.** In the city, female-headed households, which make up 20.8 percent of all households in San Pablo, tend to be renter-occupied, and those with children under the age of 18 are more likely to live below the poverty line. The proportion of single

- parent headed—both female-headed and male-headed—households is higher in the city than in the county or the region.
- **Persons Experiencing Homelessness.** Recent point in time counts indicate a homeless population of 67 persons in San Pablo and 2,295 persons in the county. Since there are no shelters available in the city, all individuals experiencing homelessness in San Pablo are considered unsheltered. The city contains a higher proportion (100.0 percent) of unsheltered people than does the county (70.1 percent).
 - **Farmworkers. San Pablo has very few farmworker residents.** A similar proportion of the labor force work in the “agriculture, forestry, fishing and hunting” industry in the city (0.9 percent), the county (0.5 percent), and the Bay Area (0.7 percent), although this is not exactly equivalent to “farmworkers.” While there are a number of students considered migrant workers in the Bay Area, there are none in the city or county.
 - **Demographics.** While the city has a lower median age than the county, the share of older residents (i.e., those 65 and older) grew from 8.7 percent to 10.1 percent between 2000 and 2019, which represents a lower share than in Contra Costa County as a whole. During this same period, the proportion of Hispanic or Latinx residents also increased from 46.3 percent to 60.1 percent, while the city’s share of non-Hispanic white and non-Hispanic Black or African American residents declined. Nevertheless, San Pablo is racially and ethnically distinct from the county and region. Compared to both the county and the region, the city still has a significantly higher share of Hispanic or Latinx residents. Compared to the county and the region, a higher proportion of city residents work in the construction industry while a lower proportion work in the financial and professional services industry.
 - **Income.** San Pablo has a proportionally larger number of extremely low-income households (28.5 percent) compared to Contra Costa County (13.5 percent) and Bay Area overall (14.7 percent). Similarly, San Pablo also has a proportionally larger number of very-low-income households in comparison to Contra Costa County and the Bay Area overall.
 - **Cost Burden.** Nearly half of all residents experience some level of cost burden, and lower-income households and renters see higher than average rates.
 - **Overcrowding.** Households in the San Pablo experience higher rates of overcrowding (17.0 percent) than do households in the county (5.0 percent) or the region (6.9 percent). Overcrowding disproportionately impacts renters (20.8 percent), lower-income households (14.2 percent of extremely-low-income, 22.1 percent of very-low-income, and 8.8 percent of low-income), Hispanic or Latinx households (25.8 percent), and multiple or other race households (23.5 percent).
 - **Housing Quality.** Most residential buildings in the city are at least 30 years old, and a relatively high proportion of owners have incomplete kitchen facilities. The proportion of incomplete kitchen (2.1 percent of owners, 0.4 percent of renters) and plumbing facilities (0.9 percent of owners, 1.0 percent of renters) is one estimate of substandard housing.
 - **Housing Tenure.** Unlike the county (34.1 percent) or the region (43.9 percent), San Pablo is mostly comprised of renters (61.9 percent), including renters who occupy single-family homes (about one-third of detached single-family homes are renter-occupied). In the city, Black or African American households (74.0 percent), multiple or other race households (67.9 percent), and Hispanic or Latinx households (62.4 percent) are more likely to be renters, as are lower-income households (71.0 percent). The share of renters as well as the total number of renter-occupied units has increased

dramatically in the city between 2000 (4,609 renter-occupied households or 50.9 percent) and 2019 (5,712 renter-occupied households or 61.9 percent).

- **Vacancy.** The vacancy rate is higher than in the county but about the same as the wider Bay Area. While housing costs are comparatively low and need is great, San Pablo has a vacancy rate of 6.2 percent, which is higher than the county as a whole (4.8 percent). Further, about 236 units or 41.3 percent of vacant units in the city are on the market (i.e., for rent or for sale), as compared to 29.6 percent of vacant units in the Bay Area on the market (51,174 units). This suggests that there is pressure on rental and affordable housing stock to convert as property owners seek to profit from a hot market.
- **Production and Need at Various Income Levels.** Most housing was built before 1980, with very few housing units built in the last decade. The total number of units in the city has slightly decreased between 2010 and 2020 (0.3 percent decrease), although there has been some multifamily development. Importantly, there has been a significant loss of mobile home units since 2010 (loss of 104 units, or a 21.4 percent decrease). Further, considering socio-economic conditions in the city, the rate of overcrowding and the rate of housing cost burdened households, there is a demonstrated need for additional housing for both lower-income and above-moderate-income households.
- **Housing Affordability.** Housing costs are relatively lower in the city than in the county and Bay Area, but there remains a significant affordability gap for lower-income households. Given the prevailing rent and home sales prices in the city, lower-income households cannot afford to rent or own a home at the appropriate size, while extremely-low-income households cannot afford to rent in the city. Further, a number of assisted (subsidized) housing units are at risk of conversion to market rate housing during the next 10 years, including 81 units at high risk as identified by the California Housing Partnership.

Appendix C – Housing Constraints

State law requires housing elements to identify and evaluate potential and actual governmental and non-governmental constraints that affect a jurisdiction’s ability to maintain and improve existing housing and develop housing to meet its housing needs. Governmental constraints can include land use regulations, fees and exactions, and processing and permitting times, among others. Non-governmental constraints can be infrastructural, environmental, or market-based. This appendix provides an assessment of these constraints to help identify any approaches San Pablo could use to reduce or overcome the constraints and improve its ability to meet the community’s housing needs.

C.I Governmental Constraints

San Pablo regulates the use and development of land through the General Plan, Zoning Ordinance, Subdivision Ordinance, and a variety of building and site development standards. These requirements are intended to protect the health, safety, and general welfare of the community but such regulations, associated procedures, and processing fees can also reduce the City’s ability to meet its housing objectives by increasing the feasibility and cost of developing housing.

LAND USE AND HOUSING POLICIES

San Pablo’s housing stock is comprised largely of single-family homes and medium-density residential development (8 to 16 dwelling units per acre). Low Density residential development occupies almost a third of the acreage within the incorporated area and another 8 percent is Medium Density residential. More than half of the unincorporated acreage within the Planning Area is also occupied by Low Density residential uses.

The San Pablo General Plan 2030, which guides long-range physical development in the city, was adopted on April 18, 2011. Key themes of the General Plan revolve around economic development, creating a pedestrian and bicycle-friendly community, and promoting residential development. The Plan’s guiding policies for residential neighborhoods propose to both “protect and enhance quality of life” and “promote a variety of housing types and prices within neighborhoods to serve the economic needs of all segments of the community.”¹ Additionally, a major emphasis of the General Plan was to introduce the concept of mixed-use development to bring jobs and shopping areas close to where residents live to improve convenience and reduce reliance on auto use.² Providing for the development of residential and mixed-use projects in mixed-use areas made it possible to allow for more residential development without significantly changing the character of existing residential neighborhoods. As

¹ San Pablo General Plan 2030, April 2011, pp. 1-15-1-163-20.

² Ibid, pp. 3-7 and 3-8.

discussed below, the State's elimination of municipal redevelopment in 2012, along with a variety of other economic changes, now require re-examination of the Plan's use classifications and other policies to achieve the desired levels of residential production.

The Land Use & Physical Design Element of the General Plan provides the foundation for San Pablo's land use regulations, which are implemented through the zoning ordinance. The Plan established three residential classifications, four mixed-use, and two commercial land use classifications as shown in Table C-1: San Pablo General Plan Land Use Density and Intensity Standards. Residential uses are permitted in the mixed-use districts subject to restrictions that constrain development to varying degrees but are not permitted under either of the commercial designations. The use restrictions, density and intensity standards provide the framework under which both residential and non-residential development can occur (Table C-1).

- a. **Low Density Residential.** Located at infill sites in Old Town and central San Pablo, the Low Density Residential designation allows for family detached development with a density range of up to 12.0 and an average expected density of 8.0 units per acre.
- b. **Medium Density Residential.** Located at sites along a major road, the Medium Density Residential designation allows for residential development at a density of 13.0 to 24.0 units per acre (with an average expected density of 18.0 units per acre). The designation is primarily intended for attached housing, duplexes, townhomes or apartments.
- c. **High Density Residential.** Located at sites along a major road, the High Density Residential designation allows for residential development at a density of 25.0 to 60.0 units per acre (with an average expected density of 30.0 units per acre). The designation is primarily intended for townhomes or apartments or condominiums with 4 stories and above.
- d. **Mixed Use Center North.** Located around the intersection of San Pablo Avenue and El Portal Drive, this designation allows for residential development at a density of 40.0 to 80.0 units per acre (with an average expected density of 60.0 units per acre). This designation is intended for multifamily apartment buildings.
- e. **Mixed Use Center South.** Located around the intersection of San Pablo Avenue and Church Lane, this designation allows for residential development at a density of 20.0 to 40.0 units per acre (with an average expected density of 32.0 units per acre) for the whole site. This designation is intended mostly for townhomes.
- f. **Commercial Mixed Use.** Located at sites all over the city, this designation allows for residential development at a density of 12.0 to 24.0 units per acre (with an average expected density of 20 units per acre). This designation is intended for townhomes and multifamily apartment buildings.
- g. **Residential Mixed Use.** Located primarily along San Pablo Avenue between Brookside Drive and El Portal Drive, this designation allows for residential development at a density of 10.0 to 18.0 units per acre (with an average expected density of 14 units per acre). This designation is intended for townhomes and multifamily apartment buildings.

The 2015 Housing Element (Program H-3.2.1) called for the City's Zoning Ordinance to be updated in 2015 to reflect the residential densities in the City's General Plan 2030, San Pablo Avenue Specific Plan and the 23rd Street Specific Plan. The amendments to the Zoning Ordinance established several new zoning districts to implement the 2030 Plan's proposed mixed-use designations—Mixed Use Center North, Mixed Use Center South, Commercial Mixed Use, and Residential Mixed Use—all of which accommodate residential development.

Table C-1: San Pablo General Plan Land Use Density and Intensity Standards

<i>Land Use Classification</i>	<i>Opportunity Sites Gross Acreage</i>	<i>Floor Area Ratio (FAR; includes all uses—non-residential and residential)</i>		<i>Density (units per gross acre)</i>
		<i>Minimum</i>	<i>Maximum</i>	
Low Density Residential	4.8	-	-	Up to 12
Medium Density Residential	3.2	-	-	12.1 – 24
High Density Residential	17.3	-	-	24.1 – 60
Mixed Use Center North	2.7	0.30 ²	2.5	Up to 80 ¹
Mixed Use Center South	16.1	0.50 ²	2.5	Up to 60 ¹
Commercial Mixed Use	28.6	0.40 ²	1.5	Up to 50 ^{1,4}
Residential Mixed Use	25.6	- ⁵	1.5	Up to 50 ¹
Neighborhood Commercial	13.3	0.30	1.0	-
Regional Commercial	25.6	0.30	0.75	-
Entertainment District Overlay	10.1		0.5 above base district maximum ³	-
Industrial Mixed Use	23.7	0.30	0.60	-

1. Included within the FAR limit.
2. The frontage of a site along San Pablo Avenue is required to be devoted to active uses. Residential is not permitted at the ground level along San Pablo Avenue.
3. Additional FAR available for entertainment uses only.
4. Residential uses only allowed when commercial FAR is 0.5 or greater.
5. While no minimum FAR is specified, development along San Pablo Avenue must have active uses on the ground floor.

Source: City of San Pablo, 2010; Dyett & Bhatia, 2010

The General Plan estimated that the Planning Area’s population would increase to about 34,950 by 2030, an increase of about 8.5 percent over 2010, driven primarily by regional economic growth and migration. This growth was anticipated to include close to 1,000 new housing units much of it in the Circle S, Mission Plaza, South San Pablo Avenue, Town Center, and West San Pablo Avenue sub-areas, all of which were expected to be completely built out by 2030. Four other sub-areas (Rumrill Boulevard, Giant Road, Church Lane, and San Pablo Dam Road) were assumed to be 70 percent developed by 2030.

Current estimates are less robust and data show that San Pablo’s population grew by only 3.8 percent from 2000 to 2020, which is lower than the Bay Area’s growth rate. This slow-down is due in part to the Covid pandemic but, as discussed below, there are also other factors that dampened the city’s growth. In 2020 the population was estimated to be 31,413. Moreover, the number of housing units actually decreased by .03 percent during the same period due in part to the closing of the Circle S mobile home park.⁴ The Plan classified the Circle S site as Mixed Use Center South and called for a wide range of uses including residential as well as retail, commercial, office,

public/institutional, and hotels. Due in large part to the State’s elimination of municipal redevelopment programs in 2012, the only project that has been completed to date has been the new civic center.

In order to meet San Pablo’s changing circumstances and needs, the City is embarking on a targeted General Plan update in parallel with the adoption of this Housing Element. The City has received a grant from the State to help support this effort, which will focus on designing a land use pattern and formulating policies that will help to accelerate housing production. Data show that the housing type that experienced the most growth between 2010 and 2020 was multi-family with five or more units.³ The City hopes to continue this trend by developing and implementing strategies that promote higher density infill development as well as “missing middle”⁴ housing options, and ADUs in single-family areas.

Although the General Plan is, for the most part, serving the community well, the City is using this opportunity for a targeted update to also reflect changing conditions in the community and respond to emerging trends and new State law. As part of the update, a new Environmental Justice Element will be prepared, building on the Health Element for the 2030 General Plan that was recognized with a national American Planning Association award, and density, intensity, use mix requirements will be revisited. This will create an opportunity to address a number of the constraints this analysis identifies. The horizon of the General Plan will also be extended to 2040.

Rumrill Boulevard Corridor Plan

Rumrill Boulevard is a major four-lane community corridor that extends north from San Pablo’s southwestern City limit to connect with Broadway and San Pablo Avenue. The southern portion of the corridor between Brookside and Costa is designated as a Priority Development Area (PDA), currently identified as an Employment Focus Area in Plan Bay Area 2040 and projected to see 22 new households and 194 jobs added by 2040. The corridor is a predominantly Latinx area with major existing uses including industrial yards, the Rumrill Sports Park, an older mobile home park, and the Rumrill Garden Apartments, together with a variety of auto-related uses, grocery stores, churches, restaurants, commercial services, and several underused and abandoned properties. A Complete Streets Study for the corridor was completed in 2015, and complete street improvements are slated for construction in 2021-22.

In tandem with the General Plan and Housing Element updates, a Corridor Plan for the segment of Rumrill Boulevard between Brookside and Costa is being drafted with a view to establishing a coherent vision, land use and development strategy, and revitalization plan for the area. A citywide survey conducted in early 2022 found strong community support for higher density housing development along the Rumrill Corridor. With additional community and stakeholder input, the Corridor Plan is being developed to articulate a clear vision to guide revitalization of the corridor

³ Association of Bay Area Governments, Housing Needs Data Report: San Pablo, April 4, 2021, pp. 6 and 11.

⁴ Missing middle housing refers to a “range of house-scale buildings with multiple units—compatible in scale and form with detached single-family homes—located in a walkable neighborhood.” These housing typologies are typically more affordable than single-family homes, especially for moderate-income households. See more at <https://missingmiddlehousing.com/>.

and incorporate strategies to foster transit-oriented development, enhance regional equity, and bring mobility, housing, and economic development opportunities to a diverse community in need. The Corridor Plan will be adopted as an element or component of the General Plan.

Specific Plans

To implement General Plan policies for two other key corridors, the City adopted the San Pablo Avenue Specific Plan (SPSP) and the 23rd Street Specific Plan (23rd Street SP) in 2007 and 2011 respectively. These specific plans provided detailed guidance for future development and to further enhance the appearance and character of an area and replace the zoning provisions of the underlying districts within the Specific Plan areas (San Pablo Zoning Ordinance, Section 17.38.020.B). Section 17.38.040, Priority development area (PDA) overlay district (D2) also establishes alternate development standards for properties in the 23rd Street SP and SPSP plan areas and on Rumrill Road that are within a quarter mile radius of any existing or planned light rail, streetcar, or bus rapid transit station to promote higher density and pedestrian-oriented uses consistent with ABAG's Sustainable Community Strategy. These standards supersede requirements otherwise applicable to mixed-use projects that include residential uses and residential projects with four or more units. The Specific Plans could be amended to incorporate or cross-reference these standards, which allow densities up to 60 units per acre, maximum FAR of 2.5 and a maximum height of 60 feet.

23rd Street Specific Plan

The 23rd Street SP, adopted by the City in October 2007, provides a long-term strategy to revitalize and increase the development potential of the 23rd Street Corridor, a 22-acre half-mile stretch of 23rd Street between San Pablo Avenue and Pine Avenue. The Plan was intended to implement the 1996 General Plan by focusing on the creation of an identifiable neighborhood-serving commercial district. Goal LU-2 aims to promote a “land use mix that contributes to an increase in housing opportunities and jobs and fosters a more viable economy,” while Goal ED-2 seeks to provide “new jobs and housing opportunities in the Plan Area.”

The Plan establishes specific standards for development within the Plan area including a requirement for vertical mixed-use development along 23rd Street. Multi-family units are only allowed on the second floor or behind a permitted retail use on the ground floor. Live-Work living spaces are allowed with approval of a use permit. Residential development must have a minimum density of 30 units per acre unless the Planning Commission approves development as low as 15 units per acre or higher than 30 is needed due to unique site constraints or to avoid detriment to adjacent residential or commercial uses. The Plan also requires that residential development provide publicly accessible as well as private open space.

Almost the entire plan area has been zoned Commercial Mixed-Use (CMU) designation, which allows neighborhood-serving retail with residential use primarily on upper levels. Office use and stand-alone residential uses are also allowed. The maximum FAR is 2.5 for parcels that front on 23rd Street, the allowable development intensity is 55 dwelling units per acre (du/ac), and the building height limit is 50 feet for parcels that front on 23rd Street. Properties designated SP1 and SP2 are also subject to additional development and design standards included in the Specific Plan.

The 23rd Street SP estimated that 282 dwelling units would result from new development and the General Plan anticipated that 50 percent of the potential development would occur by 2030. Current data show that only 2 new units have been developed in the plan area since 2007, a single family home and an ADU.

Staff has found the 23rd Street SP difficult to implement and often confusing. The requirement for ground floor commercial uses appears to be an impediment to development especially on mid-block properties. Although the City has been able to permit completely residential buildings as a conditional use according to Staff, neither the Plan nor the existing Code appear to allow such deviations. Moreover, the minimum standards for both residential and commercial development are overly strict for both residential and commercial development. In addition to the minimum density and restrictions for housing (e.g. only above the ground floor or behind ground floor retail) are often infeasible. The Plan's parking requirements are also an impediment, requiring covered parking and not reducing parking standards reductions (including for mixed-uses), although the area is significantly denser than the rest of the city. Live-work units also require a CUP, which discourages a type of development that would likely be appropriate for this planning area.

Under the State Density bonus law, the City could approve exclusively residential buildings as a waiver of requirements for eligible projects and could also modify other standards based on a determination that they make affordable housing infeasible. In order to encourage development to revitalize the area as well as build needed housing, the Housing Action Plan could propose to amend the Zoning Ordinance to specifically allow the Director or Planning Commission to approve this deviation as well as allow modification of other standards that may be constraining residential development.

San Pablo Avenue Specific Plan

The San Pablo Avenue Specific Plan (SPSP) was adopted by the City in September 2011 in response to the corridor's designation as a Priority Development Area (PDA) by the Metropolitan Transportation Commission and the Association of Bay Area Governments. In 2007. The broad objective of the Plan is to foster revitalization of San Pablo Avenue into a pedestrian- and transit-oriented boulevard integrating new development with key activity centers like Contra Costa College, City Hall, Doctors Medical Center, and the San Pablo Lytton Casino. The Specific Plan was written to implement General Plan proposals to:

- Initiate planning, rezoning and marketing of the City Hall site if the City Hall moves to an alternative location;
- Use the San Pablo Avenue Specific Plan to guide future development in the Circle-S site focus area; and
- Use design guidelines established by the San Pablo Avenue Specific Plan for development review in the San Pablo Avenue corridor.

The SPSP outlines a vision for an economically viable and healthy corridor with a neighborhood and community scale and focus, and a safe and pedestrian-friendly street environment provides a vision and policies for San Pablo Avenue to become a vibrant, accessible, and sustainable mixed-use corridor. The SP Planning Area encompasses 261 acres occupying about 15 percent of San Pablo's total area extending 2.25 miles along San Pablo Avenue from the unincorporated area north

of the City through the tribal lands occupied by the San Pablo Lytton Casino to Road 20 along the City's southern boundary.

A key component of the plan is its Affordable Housing Strategy⁵, which sets forth a suite of affordable housing goals and policies. The Strategy was designed to meet the requirements of the MTC/ABAG Station Area Planning Manual to create opportunities for affordable and accessible Housing including:

- Affordable housing goals to be achieved through inclusionary requirements or other policies and financing mechanisms;
- Analysis of inclusionary housing requirements;
- Providing a range of housing options;
- Minimizing displacement of existing residents;
- Accessibility/visitability policies that go beyond the scope of ADA and State requirement to ensure that some development is fully accessible for residents and visitors with disabilities.

A Market Study completed for the Specific Plan in 2010, concluded that:

- Prospective buyers and renters in the Study Area will include many first-time homebuyers; young and multigenerational families; students and others affiliated with Contra Costa College, the Doctors Medical Center, and the San Pablo Lytton Casino; and the elderly.
- In the short term demand in the Study Area was projected to be 390 units, or 65 units per year of market-rate housing from income-qualified households, which would be an absorption level of three to four units per month across the entire Study with 60 percent of demand for ownership housing and 40 percent for rental housing.
- Based on residential demand projections and ABAG population projections, the Study area would have a demand for 900 to 1,300 new market-rate units by 2030;
- Based on San Pablo residents' income levels, there is a notable demand for affordable housing, some of which could be met by the turnover of about 430 existing subsidized units with a need for about 18 to 25 affordable units annually through 2015; and
- Supportable product types include a combination of ownership townhomes, rental apartment units and multi-family housing appropriate for students.

The SPSP estimated that a total of 739 residential units could be built in the planning area by 2030 including a range of housing types with fewer than 200 units in residential only projects. Only 48 units (6.5 percent) were expected to be affordable to low-income households. While several large projects have been entitled in the Specific Plan Area since adoption in 2011, as yet no developments have been constructed.

The SPSP Land Use Diagram includes the following land uses classifications, organized into four categories: Residential, Mixed Use, Commercial, and Public. The development standards of

⁵ City of San Pablo, San Pablo Avenue Specific Plan, 2011, Chapter 7.

designations that permit residential uses are summarized below, and Table C-3 provides permitted uses by land use designation. Generally, the SPSP provides a predictable path towards development and contains helpful development standards and incentives.

- **Residential – Low Density Residential.** This designation is intended for single-family detached residential development of up to 12 units per gross acre, accommodating existing development in the northern-most end of the Planning Area, adjacent to Wanlass Park. New development within this classification is not expected. The minimum lot size is 5,000 square feet (6,000 square feet for a corner lot).
- **Residential – Medium Density Residential.** This designation is intended for a mix of housing types, with density ranging from 12.1 to 24 units per gross acre. Housing types may include single-family attached or multifamily dwellings. Medium Density Residential development will remain primarily along the central portion of the corridor. This designation is also applied to serve as a transition to higher intensity or commercial development (for example, south of Wanlass Park).
- **Residential – High Density Residential.** This designation is intended for multifamily buildings and townhomes between 24.1 and 60 units per gross acre. The higher densities of this designation may provide more affordable rental and ownership housing opportunities, while its location near active commercial centers may provide more lifestyle options. Developments in this classification would typically stand two to four stories high. Common open space and shared amenities are required within High Density Residential developments.
- **Mixed Use – Mixed Use Center North.** The Mixed Use Center North designation aims to establish an active destination that caters to a student population and allows high-intensity mixed-use development at or near the 1.6-acre Mission Plaza site, adjacent to Contra Costa College. Stores, restaurants/cafés or other active uses are required on the ground floor to promote an active pedestrian environment. (See Chapter 4: Urban Design and Building Development Standards for a detailed description of the desired active pedestrian environment.) Typical heights are expected to be four stories, with portions of buildings reaching 60 feet. The maximum FAR (for residential and non-residential uses combined) is 2.5; no separate residential maximum density is specified, to enable maximum use of FAR by smaller housing units geared to students. The minimum required commercial FAR is 0.3.
- **Mixed Use – Mixed Use Center South.** The Mixed Use Center South designation is limited to the former Circle-S site. Similar to Mixed Use Center North, this designation describes a new high-intensity mixed-use destination in an area with high growth potential. The Mixed Use Center South designation aims to establish a major new activity center and new citywide and regional destination for the City of San Pablo. Uses may include commercial, office (including medical offices), residential, institutional, and hotel. Typical heights are expected to reach three to five stories, with a maximum height of 60 feet. The maximum FAR is 2.5 and the maximum residential density allowed is 60 units per gross acre (included within the FAR limit). As noted above, the State’s elimination of redevelopment agencies in 2012 has required significant

revision to plans for the Circle S site and except for the new City Hall, which was completed in 2020, no other new development has been completed. The City has approved plans for three projects including a new Police Headquarters and Training Facility, a mixed-use development with 91 units and 9,175 square feet of commercial space, and a 20-lot townhouse development on a site previously approved for high-density mixed-use development.

- **Mixed Use – Commercial Mixed Use.** This is a mixed-use designation that includes office, retail, commercial, residential, and public uses. Active uses are required for frontage along San Pablo Avenue, and residential uses are allowed only when the commercial FAR is 0.5 or greater. This designation applies primarily to the gateway area at the southern end of the corridor, and near the intersection with Church Lane in the central portion of the corridor. Typical height is expected to be two to three stories, with a maximum allowable height of 40 feet. The maximum FAR is 1.5 and the maximum density is 50 units per gross acre.
- **Mixed Use – Residential Mixed Use.** The Residential Mixed Use designation applies primarily to the northern segment of the San Pablo Avenue corridor, north of Road 20. Located near Contra Costa College and recent commercial development, this area is characterized by small parcels and high pedestrian traffic. This designation is intended for a variety of residential and non-residential uses on infill sites and promotes pedestrian activity in a mixed-use environment. Residential Mixed Use development that fronts onto San Pablo Avenue must have active commercial uses at the ground floor; elsewhere, residential uses are permitted on the ground floor. Non-residential uses may include administrative, financial, business, professional, medical, dental, and public uses. The typical height is expected to be two to three stories, with a maximum allowable height of 40 feet. The maximum FAR is 1.5 and the maximum residential density (included within the overall FAR limits) is 50 units per gross acre.

The San Pablo Specific Plan does not identify Accessory Dwelling Units (ADUs) or Single-Room Occupancy (SRO) Hotels among the permitted uses and should be amended to do so. Since the Plan's adoption, the State law was amended to allow ADUs with multi-family residential development subject to certain requirements. SRO Hotels should be allowed in districts where hotels, motels, multi-family development, community care facilities, and other use types and other facilities with similar performance characteristics subject to conditions to ensure they are a good fit with nearby development.

Table C-2: San Pablo Specific Plan Permitted Residential Uses

<i>Permitted Uses¹</i>	<i>Residential (Medium and High Density)</i>	<i>Residential Mixed Use</i>	<i>Mixed Use Center (North and South)</i>	<i>Commercial Mixed Use</i>	<i>Commercial (Neighborhood and Regional)</i>
Residential Use Classes					
Dwellings	<i>See sub-classifications below</i>				
Single-Family Attached	R	R ²	-	-	-
Two-Family (Duplexes)	U	-	-	-	-
Multiple Family	R	R ²	R ²	R ^{2, 3}	-
Residential Care Facilities	R	U	-	-	-
Non-Residential Use Classes					
Community Care Facilities	U	U	U	U	U
Live-Work Units	A	R	R	R	U

1. R designates classes of uses permitted by right; A designates classes of uses that require an administrative review; U designates classes of uses permitted with a use permit; and – designates classes of uses that are prohibited.

2. Residential use types not permitted on the ground floor along San Pablo Avenue except in the Mixed Use Center South District where residential use types are permitted on the ground floor with a use permit.

3. Allowed if minimum FAR of 0.5 is met.

Source: City of San Pablo, San Pablo Avenue Specific Plan (2011)

Zoning Ordinance

Land uses within San Pablo are regulated by the City’s Zoning Ordinance, Title 17 of the San Pablo Municipal Code. The current Zoning Ordinance was adopted on May 18, 2015 and has since been amended several times for compliance with State law. The stated purpose of the Zoning Ordinance is to promote growth of the city in an orderly manner and to promote and protect the public health, safety, peace, comfort and general welfare in conformance with the general plan. However, some restrictions and procedures may hinder the San Pablo’s ability to meet its housing objectives by unreasonably increasing the cost of development and the time required to produce new units.

As noted in Table C-4 below, the Ordinance establishes 11 base districts and five overlay districts and designates two areas regulated by the 23rd Street and San Pablo Avenue Specific Plans. The four base districts are strictly residential with varying levels of permitted density. The residential use types permitted in the residential base districts as well as other mixed-use and non-residential districts are outlined in Table C-5. Residential uses are permitted by right in the appropriate residential zones, as well as in the RMU and CMU districts. Multifamily development is also permitted by right in the CR district. The NC and IMU districts are more limiting in terms of residential uses permitted – both districts require a use permit for multifamily development.

Specific development standards in each district, some of which do constrain residential development, are discussed in greater detail below.

Table C-4 below identifies the extent of land in San Pablo where residential development is permitted by residential use type.

Table C-4: Residential Development Permitted¹ in San Pablo

<i>Residential Type</i>	<i>Zoning Districts²</i>	<i>Acreage</i>	<i>Percent of Citywide Area</i>
Single-Family	R-1 through R-4; RMU; CMU; SP2-RMU; SP2-LDR	745.4	57.3%
Multifamily	R-3; R-4; RMU; CMU; CR; SP2-MDR; SP2-HDR	258.2	19.9%
Mixed-Use	RMU; CMU; CR; SP1-CMU; SP2-RMU; SP2-MUCS; SP2-MUCN; SP2-CMU	140.6	10.8%

1. Includes zoning districts that do not require a use permit for residential development.

2. Residential uses are restricted on the ground floor in SP1-CMU, SP2-RMU, SP2-MUCN, SP2-MUCS, and SP2-CMU districts.

Supportive Housing	R	R	R	R	R	-	-	-	-
Transitional Housing	R	R	R	R	R	-	-	-	-

1. “R” designates classes of uses permitted by right; “A” designates classes of uses that require an administrative review pursuant to Section 17.18.020, Plan check/zoning clearance; “U” designates classes of uses permitted with a use permit pursuant to Section 17.20.040, Conditional use permit; and “-” designates classes of uses that are prohibited. Any class of use not listed is prohibited.

2. Permitted in conjunction with existing and proposed single-family and multiple-family dwellings. Junior accessory dwelling units also allowed in existing and proposed single-family dwellings. See Section 17.60.070.

3. Six or fewer persons do not require a use permit and are permitted by right.

4. Supportive and transitional housing treated as residential uses, subject only to the permitting requirements that apply to residential uses of the same housing type location in the same zone.

DEVELOPMENT STANDARDS AND REGULATIONS

Restrictive development standards can constrain the feasibility of development within a jurisdiction and, therefore, limit the overall supply of housing – including affordable housing. In San Pablo, regulations in the 23rd Street and San Pablo Specific Plans along with those the zoning ordinance stipulates for some commercial districts are overly strict with respect to residential projects. Together with the extent of land now developed with single-family housing, the relatively small parcel size, and the scarcity of vacant land, these regulations limit the potential for providing higher-density housing outside of designated corridors.

While rents and sales prices for housing remain relatively low compared to other Bay Area jurisdictions, San Pablo's progress toward its 5th cycle Regional Housing Needs Allocation (RHNA) has lagged behind other cities in Contra Costa County (Table C-6.) For instance, in West County, while San Pablo has a slightly higher rate of permitting for low-income housing than similarly sized Hercules and a much higher rate of permitting for moderate-income housing than Pinole, no permits at all were issued for very low-income units between 2015 and 2020 and the permitting for above-moderate-income units lags significantly behind every other city in the County. The short-fall in higher-end housing is a likely result of negative perceptions about San Pablo discussed below. Currently, there are several higher-density and mixed-use projects in the City's development pipeline that will increase San Pablo's available housing stock at all income levels.

The following sections identify the potential housing constraints posed by San Pablo's current coverage, density, setback, parking, and other development standards and identify actions the City will take to remove such constraints.

Site Development Standards

In addition to identifying allowable uses, the Zoning Ordinance establishes standards such as minimum lot size, maximum residential density, maximum building height, and minimum front yard depth, all of which constrain development to some extent. Residential district development standards are provided in Table C-7, while standards applicable to residential projects in commercial and industrial districts are provided in Table C-9.

Site development standards in residential zones are generally comparable to those in neighboring jurisdictions. (See Table C-8 below for a comparison of regional development standards). San Pablo's R-4 and RMU districts both permit densities above 30 du/ac, and permitted densities are generally similar to other jurisdictions – although mixed-use districts in Richmond do permit higher densities. Building height limits are also on par or higher in San Pablo than neighboring jurisdictions. Required open space in multifamily districts is higher than in some places like Richmond but is generally comparable to those standards in other similarly sized communities. Maximum FAR in mixed-use districts is also somewhat low compared to other cities. Notably, minimum parcel size requirements for multifamily zones are substantially larger in San Pablo than in other jurisdictions. The City's zoning code makes provisions for substandard R3 and RMU parcels and identifies specific standards that apply; however, there are no such provisions for substandard R4 or CMU parcels. As a result, this could present a challenge for redevelopment within these zones. A program will be added to the Housing Action Plan to address this.

-
1. Parcels not meeting the minimum parcel area or parcel frontage requirements are subject to the provisions of Section 17.08.050, Nonconforming parking.
 2. Parcel coverage may be increased to fifty percent if two R-1 lots of five thousand square feet or less are consolidated.
 3. Maximum densities shown in this table may be increased pursuant to the state density bonus law for affordable housing and the city's density bonus ordinance.
 4. Additional setbacks may be required for development adjacent to creeks or steep slopes to meet the requirements in Chapter 17.08, Nonconformities, and other applicable laws and to ensure safety of development from unstable soils.
 5. For residential mixed uses, there is no minimum setback, and maximum setback is twenty feet.
 6. Portions of the building facade that exceed twice the height of adjoining buildings shall be set back from the adjoining property line a minimum of ten feet.
 7. Twenty-foot setback is required if covered parking is located in front of the building.
 8. Second story not allowed except by use permit.
 9. The planning commission shall determine if the placement of side yard windows would jeopardize the privacy of adjacent neighbors. The planning commission may impose greater setbacks or require other design features to protect privacy. The planning commission may also allow a minimum three-foot side yard at the second story if such setback would not jeopardize the privacy of adjacent neighbors. This reduced setback shall apply to one side of the dwelling only.
 10. Single-row dwelling groups with side yard access are discouraged and allowed only with a use permit.
 11. Within seventy-five feet of an R-1 or R-2 district, the height shall be limited to forty feet eave height, fifty feet roof peak height, and four stories.
 12. Mixed use residential and residential projects with 4 units or more within quarter mile radius of transit subject to alternate standards per Section 17.38.040, Priority Development Area overlay district.

Residential development standards in non-residential districts are generally more restrictive than those in residential zones. Sections 17.34.040 and 17.34.050 of the San Pablo Zoning Ordinance establish overall development standards and residential requirements, respectively. See Table C-9 below for a summary of development standards in commercial and industrial zones.

Commercial districts place overly strict restrictions on residential and mixed-use development. Although the CMU district permits up to 50 du/ac and does not require a use permit for multifamily projects, both the CR and NC districts only permit up to about 17.4 du/ac or up to about 21.8 du/ac

when in combination with non-residential uses. Further, the NC district requires a use permit for multifamily development. There is also a FAR penalty in the CMU district and projects may be required to provide ground floor commercial, depending on specific plan area. While the City has successfully used density bonus provisions to promote development in light of these restrictions, they unnecessarily limit the ability of developers to provide residential and mixed-use projects in commercial districts. The City should reform residential development standards in commercial districts to promote additional flexibility.

Table C-9: Residential Development Standards in Commercial and Mixed Use Districts⁴

	NC	CR	CMU ¹	IMU
Minimum parcel area (sq. ft.)	2,000	10,000	5,000	No minimum
Maximum building height (feet)	30	50	50	65
Minimum FAR	0.3	0.3	0.5	-
Maximum FAR				
Office	1.0	0.75	1.5	0.6
Non-Office	1.0	0.5	1.5	0.6
Maximum density (du/ac) ²	-	-	50 ³	-

1. For properties within SP1 and SP2 refer to each specific plan for development and other design standards.
2. Residential dwelling units in a commercial district shall not exceed one dwelling unit per 2,500 square feet of parcel size (about 17.4 du/ac) unless otherwise permitted in a specific plan. Residential dwelling units in combination with non-residential uses shall not exceed one dwelling unit per 2,000 square (about 21.8 du/ac).
3. Residential uses are only allowed when the commercial FAR is 0.5 or greater.
4. Mixed use residential and residential projects with 4 units or more within quarter mile radius of transit subject to alternate standards per Section 17.38.040, Priority Development Area overlay district.

Source: City of San Pablo, San Pablo Municipal Code, Section 17.34.040 Development standards

Overlay Districts

The City has five overlay districts that supplement the development standards of underlying districts to protect unique site features or implement location-specific regulations. Where the provisions of the overlay district conflict with the provisions of the underlying zoning district, the provisions of the overlay district prevail. The purpose of each overlay district and their respective development standards are summarized in Table C-10 below.

Additional restrictions on residential development in overlay districts are intended to protect sensitive uses from environmental conditions that may pose a health or safety risk and are generally appropriate to protect public health. Some provisions, such as the Air Quality Health Risk Overlay District (D3) and Creek Protection Overlay District (CP), implement requirements imposed by regional, State or federal agencies. In such instances it would be preferable to make specific reference to best practices or mitigation measure and require that projects incorporate such measures or alternate approaches subject to City review and approval.

The current wording of Section 17.38.050 Air quality health risk overlay district (D3) states that residential development “shall not be located” within 500 feet of the I-80 but also says that such

new development shall “provide project-level mitigation measures to reduce vulnerability to toxic air emissions from the freeway.” This provision presumably refers to the Planning Healthy Places guidelines published by the Bay Area Air Quality Management District (BAAQMD), which recommend several best practices to reduce exposure to air pollution that allow residential development with appropriate mitigation measures – including air filters, project phasing, and barriers, among others.⁶ Zoning amendments and other steps can be taken to review and revise overlay district requirements.

Table C-10: Overlay Districts Development Standards

<i>Overlay District</i>	<i>Purpose</i>	<i>Summary of Development Standards</i>
Hillside area overlay district (D1)	Protect public safety in generally unstable hillside areas.	Structures above one story require zoning administrator review. A geotechnical report, increased design standards, and additional fire protection is also required.
Priority development area (PDA) overlay district (D2)	Promote and provide for higher density and pedestrian oriented uses as part of, or in proximity to, transit stations in line with Plan Bay Area’s Sustainable Community Strategy. PDAs include Rumrill Road, 23rd Street Specific Plan, and San Pablo Avenue Specific Plan.	Permits a density between 20 du/ac and 60 du/ac (only applicable to mixed-use and integrated developments – residential projects must include a minimum of four units). Permits FAR between 0.5 and 2.5, and a maximum height of 60 feet.
Air quality health risk overlay district (D3)	Protect sensitive receptors from toxic air emissions, consistent with Bay Area Air Quality Management District guidelines, along the Interstate 80 corridor.	The following uses are restricted within 500 feet on both side of Interstate 80: residential development, parks and other open spaces, schools, child care facilities, senior centers, hospitals, and medical facilities. New development must provide project-level mitigation measures.
Multifamily overlay district (MF)	Recognize and protect existing multifamily development located on parcel(s) with an underlying zoning district that no longer allows multifamily development.	Multifamily uses are permitted in addition to the allowed uses of the underlying zoning district. Requests to expand or rebuild existing multifamily developments must be consistent with either R-3 or R-4, depending on corresponding density.
Creek protection overlay district (CP)	Protect creeks, as they play an important role in groundwater recharge, surface water distribution, and flood management	No structures are allowed in floodways, and any structure in a floodplain shall have its finished floor at or above the one-hundred-foot floodline. Additional setbacks may be required.

Typical Project Densities

San Pablo has not experienced high development activity until relatively recently; therefore, there are few projects by which to gauge “typical” project densities in the city. However, there are several projects currently in the City’s development pipeline that take advantage of the higher densities permitted along corridors and in mixed-use districts. Table C-11 summarizes the residential densities achieved in both recent projects (i.e., projects completed between 2018 and 2021) and pipeline projects. As can be seen, projects in the R-1 district—both recent and pipeline—tend to approach the maximum density. Further, pipeline projects in the CMU district and specific plan areas will also come close to or exceed the maximum permitted density of the applicable base zone. Maximum densities are more difficult to achieve in the R-2 and R-3 zones.

Table C-11: Typical Residential Densities, 2018-2022

Base Zone ¹	Permitted Density (du/ac)	Recent Development		Pipeline Development	
		Average Density	Percent of Permitted Density	Average Density	Percent of Permitted Density
R-1	12.0	11.2	93.0%	9.9	82.6%
R-2	18.0	-	-	6.7	37.2%
R-3	24.0	9.5	39.7%	7.4	30.7%
R-4	48.0	-	-	-	-
CMU	50.0	-	-	45.6	91.1%

Parking Standards

Required parking can significantly add to project development costs and reduce the feasibility of residential development. Chapter 17.54 of the San Pablo Zoning Ordinance requires residential off-street parking in all zoning districts. See Table C-12 below for a summary of off-street parking standards for a variety of residential uses. ADU parking standards are discussed separately below.

San Pablo’s multifamily parking standards may constrain residential development. For instance, the number of spaces required is not tied to the number of bedrooms in a unit – a project is required to provide two spaces per unit whether the unit consists of one bedroom or three bedrooms. Further, the requirement to provide covered parking—including garage parking—can interfere with the financial feasibility of multifamily projects. Alternatives to

Table C-12: Residential Off-Street Parking Requirements

<i>Residential Use</i>	<i>Parking Requirements</i>
Caretaker Residence	Two covered spaces are required for a caretaker residence.
Day Care, Large Family	Two covered spaces plus one space, covered or uncovered, for each employee are required for a large family day care.
Day Care, Small Family	Two covered spaces plus one space, covered or uncovered, for each employee are required for a small family day care.
Dwellings, Multiple-Family and Mixed-Use	Two covered spaces are required for each dwelling unit in a multiple-family dwelling. Both spaces shall be garage spaces, or one space may be a garage space and one space a carport space. Spaces for an individual unit may be in tandem, subject to approval of an administrative use permit. Required parking for buildings within one-quarter mile of a transit stop may be reduced by 10 percent.
Dwellings, Single-Family	<p>The following provisions apply to attached and detached single-family dwellings:</p> <ol style="list-style-type: none"> 1. For single-family dwellings located on a lot with a width of at least fifty feet, two enclosed parking spaces are required. If the spaces are located on the front half of the property, they must be enclosed in a garage with doors. If located on the rear half of the property, the spaces may be either in a garage or a carport. In either case, tandem spaces may be permitted subject to administrative review, and only if the driveway area in front of the garage or carport is at least eighteen feet long. Carports are not allowed in the front half of the property. 2. For single-family dwellings located on a lot with a width of less than fifty feet, two enclosed parking spaces are required. Alternatively, subject to administrative use permit, one space in a garage located in the front half of the lot and one uncovered space in the driveway for tandem parking may be provided if the driveway area is at least eighteen feet long. Carports are not allowed in the front half of the property. 3. Each driveway shall lead to a covered parking space. 4. Paved or unpaved driveways not leading to a required parking space are prohibited. In no case shall driveways or paved areas exceed fifty percent of the front and side street yards. 5. Only one driveway per parcel shall be allowed, except that a second driveway may be allowed on a corner lot to serve a secondary unit, subject to approval by the zoning administrator. 6. Carports. Only permanent structures are allowed. Carports are allowed on the rear half of lot and must meet setbacks.
Dwellings, Two Family (Duplexes)	Two spaces per unit are required for two-family dwellings. If the spaces are located in the front half of the property, the required spaces must be garage spaces with garage doors. If located on the rear half of the property, the spaces may be either garage spaces or carport spaces. The parking spaces for each unit may be in tandem, subject to an administrative approval, and provided the driveway area is at least eighteen feet long. Carports are not allowed in the front half of the property.
Transitional or Supportive Housing	One-half parking space per unit or based upon a site-specific parking and neighborhood analysis if less than this ratio is proposed. For supportive housing, no off-street parking is required where located within one-half mile of a public transit stop. Provided parking may be uncovered and shall use the multiple-family site planning criteria for parking lots in the Residential Design Guidelines.

Table C-12: Residential Off-Street Parking Requirements

<i>Residential Use</i>	<i>Parking Requirements</i>
Mobile Home Parks	One space is required for each mobile home. The space shall be adjacent to the mobile home.
Community Care Facilities	One space for every six beds plus one per employee.
Accessory Dwelling Units	A lot containing an accessory dwelling unit must provide at least one additional off-street parking space to serve the accessory dwelling unit, except as otherwise provided in Section 17.60.070.

Source: City of San Pablo, San Pablo Municipal Code, Section 17.54.020 Residential off-street parking requirements and Section 17.60.070 Accessory dwelling units

covered parking, including open landscaped parking, could reduce development costs. As listed in Table C-12, Residential Care Facilities are required to provide two covered spaces plus one additional space for each employee. This requirement, which appears in Section 17.54.020 is unusually onerous and an obstacle to the development of this important type of accommodation. Moreover, it conflicts with Table 17.54-A of the Ordinance, which states that Community Care Facilities shall provide one space for every six beds plus one per employee. The Richmond Zoning Ordinance, for example, requires only .25 spaces per bed for all times of Supportive Housing including Residential Care Facilities serving seven or more persons including necessary employees. The City will review and revise all parking standards as part of the Housing Action Plan to ensure they are appropriate in light of anticipated parking demand and location relative to transit.

Section 17.54.050 of the Zoning Ordinance provides waivers or reductions in parking standards subject to approval by the zoning administrator. Waivers for adjacent public parking facilities and on-street parking are available, as are reductions for senior housing, mixed-use projects, and projects in proximity to transit. Projects that conduct a Transportation Demand Management (TDM) study or include an agreement for shared off-site parking are also eligible for further reductions with a use permit – this provides a lower threshold than would typically be required under a variance for similar parking reductions. Given that most of San Pablo is close to transit, the 10 percent reduction in parking is widely available – as is the one space waiver upon provision of a bike rack. Increased credits for bicycle use, transit, and a healthier mixed-use reduction could further increase the feasibility of residential development in the city – especially within the San Pablo Avenue Specific Plan. Actions the City will take to increase flexibility in parking requirements are contained in the Housing Action Plan.

The existing Housing Element proposed amending the Zoning Code to allow reduced parking by right for all new residential projects located on San Pablo Avenue close to transit service. The Housing Element also proposed to reduce parking standards for multi-family development on San Pablo Avenue.⁷ The Code was amended in 2015 to allow a 10 percent reduction for buildings located within a quarter mile of transit but no reduction is available for the residential development

⁷ City of San Pablo, 2015-2023 Housing Element, pp. 38-39.

in mixed-use buildings where housing is the primary use. (Section 17.54.050.F and Section 17.54.050.H). Moreover, the approval of parking reductions based on transit accessibility appears to remain a discretionary decision subject to approval by the Director.

Although not within the scope of this analysis, it should be noted that the current parking requirements for Family Day Care homes appear to conflict with State law, which does not allow cities to impose any restrictions unless they are identical to those applied to all other residences in the same zoning district as the family day care home. (California State Health and Safety Code, Section 1597.45).

Building Code and Enforcement

San Pablo implements the California Building Code; Chapter 15.04 of the San Pablo Municipal Code adopts California Code of Regulations, Title 24, 2019 Edition by reference. While the City has not amended the California Building Code, it has adopted the California Fire Code as amended by the Contra Costa County Fire Protection District per Fire District Ordinance No. 2019-37. These amendments apply to the entire county and are generally related to public health and safety; as such they do not pose a constraint to housing in San Pablo.

The Building Division is responsible for issuing building permits and providing detailed inspections of electrical, mechanical, and plumbing projects. Building Inspection also investigates and responds to all citizen complaints concerning construction or safety issues of structures throughout the city. Further, the Code Enforcement Unit under the San Pablo Police Department works with absentee landlords and homeowners to reduce hazardous conditions. The Code Enforcement team also works with other departments within City government such as the Public Works Department and City Attorney's Office.

The Building Code Board of Appeals was established in to hear and decide appeals of orders, decisions or determinations made by the San Pablo Building Official relative to the application and interpretation of the California Building Codes. The Building Official's decision may be appealed by filing with the city clerk, within ten days from the date of service of such decision, a written, dated appeal. Any person, firm or corporation violating any of the provisions of Chapter 15.04, or any of the provisions of the codes adopted by reference, shall be guilty of a misdemeanor.

The Residential Health and Safety Ordinance (Chapter 15.52 of the San Pablo Municipal Code) establishes the procedures for the inspection of all single- and multifamily residential rental units, and for inspection of all dwellings sold within the San Pablo city limits. This program assures that the City's residential units comply with existing State and local building, electrical, fire and plumbing code standards, to ensure the structures are safe for occupancy, and housing stock is maintained to acceptable standards. A Residential Health and Safety (RH&S) inspection is required for properties that are for sale or non-owner occupied. RH&S inspections are conducted following fee payment, and certificate of compliance is issued within 60 days after the inspection. If the owner fails to correct all such deficiencies within six months after the original application was filed, a new application should be completed and the application fee must be repaid. Failure to obtain a certificate of compliance for properties that are for sale or non-owner occupied constitutes a violation of local codes dealing with health, safety or building within the meaning of Revenue and Taxation Code Sections 17274 and 2436.5.

Subdivision On- and Off-Site Improvements

On- and off-site improvements required as part of the subdivision process are detailed in Chapter 16.22 of the San Pablo Municipal Code. The following improvements are required:

- A. **General.** All improvements as may be required as conditions of approval of the tentative map or by city ordinance or resolution, together with, but not limited to, the required improvements set forth in this chapter shall be required of all subdivisions. Requirements for construction of on-site and off-site improvements for subdivisions of four or fewer parcels shall be noted on the parcel map, or waiver of parcel map or the subdivision improvement agreement recorded prior to or concurrent with the parcel map. Completion of improvements shall be in accordance with Section 16.22.100.
- B. **Frontage Improvements.** The frontage of each lot shall be improved to its ultimate adopted geometric section, including street structural section, curbs, sidewalks, driveway approaches and transitions.
- C. **Storm Drainage.** Stormwater runoff from the subdivision shall be collected and conveyed by an approved stormdrain system. The stormdrain system shall be designed for ultimate development of the watershed, shall be capable of collecting and conveying runoff generated by a ten-year flood, and shall be capable of providing overland release of one hundred-year flood waters to the main drainage channel or corridor. The stormdrain system shall provide for the protection of abutting and off-site properties that would be adversely affected by any increase in runoff attributed to the development. Off-site storm drain improvements may be required to satisfy this requirement.
- D. **Sanitary Sewers.** Each unit or lot within the subdivision shall be served by the sanitary sewer system that serves the city.
- E. **Water Supply.** Each unit or lot within the subdivision shall be served by the domestic water system that serves the city.
- F. **Other Utilities.** Each unit or lot within the subdivision shall be served by natural gas, electric, telephone and cablevision facilities.
- G. **Fencing.** Each parcel or lot within the subdivision that is adjacent to property containing a public facility shall have an approved fence adequate to prevent unauthorized access between the properties.
- H. **Other Improvements.** Other improvements including, but not limited to, grading, street lights, fire hydrants, signs, street lines and markings, street trees and shrubs, landscaping, monuments, bicycle facilities, fences, and smoke detectors, any other best management practices or requirements imposed by the city engineer in order to comply with current national pollutant discharge elimination system municipal storm water permit, or fees in lieu of any of the foregoing, shall also be required as determined by the city engineer in accordance with this title, the general plan and city standards and specifications.

- I. **Off-site Improvements.** If the subdivider is required to construct off-site improvements on land in which neither the subdivider nor the city has sufficient title or interest to allow construction, the city shall, within one hundred twenty days of recording the final map, acquire by negotiation or commence condemnation of the land. If the city fails to meet the one hundred twenty-day time limit, the condition for the construction shall be waived. Prior to approval of the final map, the city may require the subdivider to enter into an agreement to complete the off-site improvements at the time the city acquires title or an interest in the land. The subdivider shall pay the cost of acquiring off-site land or an interest in the land required to construct the off-site improvements.

The above requirements are typical for Contra Costa communities and, therefore, are not a constraint to development in the city.

Street design standards, provided in the Circulation Element of the General Plan, establish typical street sections for each roadway classification. These standards are summarized in Table C-13 below. San Pablo is a fully urbanized city and the likelihood that new streets will be created is very low.

Table C-13: San Pablo Street Design Standards

Street Type	Subtype	Width (feet)	
		Street ¹	Right-of-Way ²
Auto Arterial	4 lanes	66-70	76-86
	2 lanes	34-40	44-56
Urban Arterial	4 lanes	69-70	84-90
	2 lanes	48	64
Mixed-Use Boulevard	4 lanes	80-84	100-108
	2 lanes	56-64	72-84
Avenue	2 lanes + TWLTL ³	46	56-60
	2 lanes	32-40	44-60
Local	-	30-34	40-50

1. Includes bike lanes, travel lanes, medians, left turn lanes, two-way left turn lanes, and parking.

2. Includes sidewalks.

3. Two-way left turn lanes.

Source: City of San Pablo, 2030 General Plan, Circulation Element

While required improvements do not pose a constraint, the residential subdivision process is generally costly in San Pablo. Pursuant to the Subdivision Map Act (Government Code Section 66410-66499), parcel maps submitted for City approval must be prepared by a licensed land surveyor. Because the City does not have staff qualified to review proposed subdivision and parcel maps for compliance with engineering requirements, applicants are required to pay the cost of a consultant hired by the City in addition to an administrative fee. The City does not receive many subdivision applications but this additional charge also applies to the cost of parcel maps, lot line adjustments and similar map actions, which could hamper implementation SB 9 (Government Code Section 65852.21). The potential for urban lot splits and creating additional residential units on existing lots has generated some interest from San Pablo residents according to City staff.

Effective July 1, 2022, the fee for parcel maps, lot line adjustments and lot mergers is \$2,000, plus the consultant fee and a 17 percent administrative fee.⁸

Actions the City will take to reduce or mitigate the cost of subdivisions are included in the Housing Action Plan. One approach would be to reduce or waive processing fees if the new lots are designated for the affordable housing development.

Density Bonus Provisions and Other Incentives

The San Pablo Zoning Ordinance provides density bonuses and other incentives for the production of childcare and housing facilities for very-low-, low-, and moderate-income and senior households in Section 17.60.020, Density bonus and other incentives. The text in sub-section C, Types of Density Bonus and Other Incentives Allowed, appears consistent with the State requirements at the time the Ordinance was last updated in 2015 but Table 17.60-B erroneously states that the only 1 percent of the Very Low-Income target is required to qualify for the maximum bonus as shown in Table C-14 below. Both the text and the table need to be revised to comply with the most recent State requirements (Chapter 365, Statutes of 2021). The 2021 amendments increased the maximum density bonus of 50 percent for low, very-low, and moderate-income units, and 80 percent for 100 percent affordable projects and made a variety of other changes to the State-mandated requirements. The State law also increased the number of available incentives/concessions to four for 100 percent affordable projects.

Table C-14: San Pablo Density Bonus Summary

<i>Target Group</i>	<i>Minimum Percent Target Units</i>	<i>Bonus Granted</i>	<i>Additional Bonus for Each 1% Increase in Target Units</i>	<i>Percent Target Units Required for Maximum 35% Bonus</i>
Very-Low-Income	5%	20%	2.5%	1%
Low-Income	10%	20%	1.5%	20%
Moderate-Income (condo or planned development only)	10%	5%	1%	40%
Senior Citizen Housing Development	100%	20%	-	-

Source: City of San Pablo, San Pablo Municipal Code, Section 17.60.020 Density bonus and other incentives

Additionally, incentives are available to affordable housing units and other qualifying projects in connection with the application for a density bonus. The number of incentives or concessions granted varies depending on the proportion of affordable housing being incorporated, as summarized in Table C-15. Incentives and concessions can include a reduction in site development standards, approval of mixed-use zoning in conjunction with residential projects, deferred

⁸ City of San Pablo Public Works Fee Schedule, FY 2023.

development impact fees, and priority processing of a residential project that includes income-restricted units.

Table C-15: San Pablo Incentives/Concessions Summary

<i>Target Group</i>	<i>Target Units</i>		
Very-Low-Income	5%	10%	15%
Low-Income	10%	20%	30%
Moderate-Income (condo or planned development only)	10%	20%	30%
Maximum Incentive(s)/Concession(s)	1	2	3

Source: City of San Pablo, San Pablo Municipal Code, Section 17.60.020 Density bonus and other incentives

While Section 17.60.020 has not yet been updated to reflect new State law, Section 17.32.040 of the San Pablo Municipal Code states that local maximum densities may be increased pursuant to the State density bonus law for affordable housing and the City’s density bonus ordinance. Increased densities and incentives pursuant to State law are available to developers, regardless of local density bonus ordinances. To reduce potential conflict and uncertainty for interested developers, the City will update its density bonus ordinance pursuant to recent State law as part of the Housing Action Plan.

San Pablo does not currently offer any additional bonuses beyond what the State already provides. The feasibility and potential benefit of doing so will be evaluated as part of the process of updating the Ordinance.

Accessory Dwelling Units (ADUs)

Regulations and standards related to the provision of ADUs are provided in Section 17.60.070 of the San Pablo Municipal Code, last updated in 2020. ADUs are permitted ministerially if the project meets the established location requirements, development standards, all applicable building standards, and all applicable sanitary sewer, water, and stormwater requirements. As noted in Table C-5, ADUs are permitted by right in all zoning districts—both residential and non-residential—that allow residential development. A summary of ADU and junior (JADU) development standards is provided in Table C-16. It should be noted that an ADU that is 800 square feet or smaller and up to 16 feet in height with maximum four-foot side and rear yard setbacks shall be permitted, notwithstanding any other development standards.

The City’s ADU regulations comply with the minimum standards mandated by State law (California Government Code 65852.2 and do not appear to be a constraint on development. According to Annual Progress Reports (APRs) submitted to HCD between 2018 and 2021, a total of 33 building permits have been issued for ADUs. The number of permits issued has increased annually, from one in 2018 to 14 in 2021. To meet the growing demand for ADUs, the City should consider whether to establish more flexible standards, such as increasing the maximum height to more than 16 feet, subject to certain conditions, to facilitate additional ADU development as part of the Housing Action Plan. Also, Section 17.60.070 will be revised to state that ADUs may be developed accessory to single or multifamily development in any zone where single family or multifamily dwelling units are permitted instead of listing each of the zoning districts by name.

This will avoid the need to amend Section 17.60.070 if there are changes to the specific zoning designations.

Table C-16: Accessory Dwelling Unit Standards Summary

<i>Standard Type</i>	<i>Description of Standard</i>
Maximum Units	<ul style="list-style-type: none"> • Single-Family Development: Up to 1 ADU and 1 JADU on each lot. • Multifamily Development: Up to three or more, including up to 25% of the number of existing multifamily units as internal conversions plus up to 2 detached ADUs on each multifamily lot.
Lot Size	No minimum lot size.
Unit Size	<ul style="list-style-type: none"> • Attached: Between 850 sq. ft. to 1,000 sq. ft. (studio/one-bedroom) or between 1,000 sq. ft. to 1,200 sq. ft. (two or more bedrooms)¹ • JADU: Up to 500 sq. ft. • Detached: Up to 1,000 sq. ft. (studio/one-bedroom) or up to 1,200 sq. ft. (two or more bedrooms)
Required Setbacks	Not required for internal conversions. Minimum of 4 feet side and rear; front setbacks depend on the zoning district. Minimum of 6 feet is required between buildings. ²
Permitted Height	16 feet.
Required Parking	At least 1 additional off-street space. Not required within one-half mile walking distance of public transit, within an architecturally and historically significant historic district, an internal conversion, and when a car share vehicle pick-up location is within one block of the ADU.

1. Maximum square footage is limited to 50% of the existing primary dwelling unit size or 800 square feet, whichever is larger.
2. The 6-foot minimum shall not prevent the approval of ADUs less than 800 sq. ft. and up to 16 feet tall with correct setbacks.

Source: City of San Pablo, San Pablo Municipal Code, Section 17.60.070 Accessory dwelling units

Housing for Persons with Disabilities

About 12 percent of San Pablo’s residents have one or more disabilities; close to 6 percent had ambulatory disabilities and more than 5 percent reported that their disabilities were cognitive. Developmental disabilities are defined as severe, chronic, and due to a mental or physical impairment that begin before a person turns 18 years old. These can include Down’s Syndrome, autism, epilepsy, cerebral palsy, and mild to severe mental retardation. Some people with developmental disabilities are unable to work, rely on Supplemental Security Income, and live with family members. In addition to their specific housing needs, they are at increased risk of housing insecurity after an aging parent or family member is no longer able to care for them.⁹

Persons with developmental disabilities have special housing needs relative to other groups, requiring ease of access to transportation, employment, retail services and medical care. To meet the unique needs of those with disabilities, new housing development must comply with California

⁹ ABAG-MTC Housing Needs Data Report, 2021, pp. 53-54.

building standards (Title 24 of the California Code of Regulations) and federal (Americans with Disabilities Act) requirements for accessibility as well as meet other State mandates to accommodate persons with disabilities.

Reasonable Accommodation

In accordance with federal and State fair housing laws, Section 17.18.100 of the San Pablo Municipal Code establishes standards and regulations to allow for reasonable accommodations in the City's zoning and land use regulations, policies, and practices when needed to provide an individual with a disability an equal opportunity to use and enjoy a dwelling.

Requests for a reasonable accommodation must be made to the zoning administrator. Requests must include documentation of disability status, the specific accommodation request, and the necessity of the accommodation to ensure equal opportunity to use and enjoy the residence. The zoning administrator can approve the reasonable accommodation based on the following findings:

1. The requested accommodation is requested by or on behalf of one or more individuals with a disability protected under the fair housing laws.
2. The requested accommodation is necessary to provide one or more individuals with a disability an equal opportunity to use and enjoy a dwelling.
3. The requested accommodation will not impose an undue financial or administrative burden on the city as "undue financial or administrative burden" is defined in fair housing laws and interpretive case law.
4. The requested accommodation will not result in a fundamental alteration in the nature of the city's zoning program, as "fundamental alteration" is defined in fair housing laws and interpretive case law.
5. The requested accommodation will not, under the specific facts of the case, result in a direct threat to the health or safety of other individuals or substantial physical damage to the property of others.

The Housing Action Plan proposes to analyze the impact of sub-sections 17.18.100 H. and I. on the development of licensed residential care facilities and revise these provisions if necessary as discussed below.

Community Care Facilities

Residential Community Care Facilities (CCFs) are licensed by the Community Care Licensing Division of the State Department of Social Services to provide 24-hour non-medical residential care to children and adults with developmental disabilities who need personal services, supervision, and/or assistance essential for self-protection or sustaining the activities of daily living. According to the California Department of Social Services (CDSS), San Pablo has seven licensed residential care facilities as of May 2022, summarized in Table C-17 below. All but two of these facilities serve six or fewer persons and are, therefore, allowed by right.

Table C-17: Community Care Facilities in San Pablo

<i>Facility Name</i>	<i>License First Date</i>	<i>Facility Capacity</i>
Appletree Adult Residential Care Home	3/29/2007	4
Ventura Hills Manor	9/27/2010	14
Via Center	8/31/2012	6
Fitzpatrick Hills Manor LLC	9/26/2017	6
Webster Family Care Home I	6/15/2018	6
A&A Health Services San Pablo	1/5/2021	225
Webster Family Care Home II	10/18/2021	3

Source: California Department of Social Services, Community Care Licensing – Adult Residential Facility Locations, May 2022

The current zoning ordinance uses the term “Residential Care facilities” to describe Community Care Facilities with six or fewer persons, which are distinguished from Community Care Facilities for six or more persons. The existing zoning ordinance includes a separate classification description for Assisted Living that is identical to the description of Community Care Facilities. (Section 17.70.010, Residential use classes). The term “Assisted Living” is typically used to describe establishments that provide 24-hour medical, convalescent, or chronic care to individuals who, by reason of advanced age, chronic illness or infirmity, are unable to care for themselves, and are licensed as a skilled nursing facility by the State of California, including but not limited to, rest homes, nursing homes, and convalescent hospitals. Such facilities are distinguished from Residential Care, Hospitals, or Clinics.

The current ordinance lists residential care facilities for six or fewer persons as a single-family use permitted by right in all residential zones and the CMU district. Larger CCFs—those serving more than six persons—require a conditional use permit in all residential zones, as well as the NC, CR, and CMU districts. To grant a CUP, the Planning Commission may impose such conditions in connection with the use permit as it deems necessary, and must make findings that the establishment, maintenance, or operation of the use of the building applied for will not, under the circumstances of the particular case, be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood of such proposed use or be detrimental or injurious to property and improvements in the neighborhood or to the general welfare of the city.

The current ordinance does not include a definition for convalescent homes but classifies them as an institutional use along with hospitals, fire stations, government administrative offices and a variety of other uses. Assisted living facilities are allowed in the R-3, R-4, and RMU districts and in the CR and CMU subject to approval of a Conditional Use Permit.

Neighboring jurisdictions in the county—including Richmond, Hercules, and El Cerrito—also generally require CUPs for large CCFs. Note that Pinole permits all residential care facilities by right in all residential and some mixed-use districts. However, while none of these peer jurisdictions contain a larger CCF, San Pablo has two – including one licensed in 2021 (see Table C-17). Further, including smaller facilities, San Pablo has a CCF capacity of 0.009 per person where Richmond has a capacity of 0.0005 per person, Pinole has a capacity of 0.0006 per person, Hercules has a capacity

of 0.0009 per person, while El Cerrito has no available CCF capacity.¹⁰ Even though the CUP requirement does not appear to have been a constraint on the development of larger CCFs in San Pablo, the State Department of Housing and Community Development has expressed concern that such discretionary review requirement may be an obstacle to such facilities.

The Housing Action Plan will include a program to evaluate existing impediments to developing residential care facilities and propose necessary amendments to the Zoning Ordinance. These amendments will revise the current definitions for different types of facilities to avoid confusion by more closely following State law. To avoid confusion, the Ordinance will be revised to refer to Community Care Facilities Large for those with seven or more persons and Small (or limited) for those with six or fewer. The term “Residential Care Facilities”, which the State uses to identify a wide range of licensed facilities that provide varying levels of care for persons who require assistance for daily living, should not be used except as a generic term to describe such accommodations.

The Ordinance should be revised to allow facilities serving seven or more persons in districts where hospitals, convalescent homes and similar facilities are permitted. The Action Plan also proposes that the Ordinance be revised to define the scope of review for CCFs so that they are consistent with the features considered for review of facilities with similar development and performance characteristics. The provisions should strive to ensure that decisions are not based on the characteristics of facility occupants. As mentioned above, this program will analyze the impact of sub-sections Zoning Ordinance sub-sections 17.18.100 H. and I. on the development of licensed residential care facilities and revise these provisions if necessary. These sections specifically identify residential care facilities as a use where special consideration is required in order to grant an accommodation. The analysis should examine the types of accommodations that have been sought by applicants, the type and extent of information the City required to conduct its evaluation, and the City’s decision.

Emergency Shelters

Section 17.60.080 of the Zoning Ordinance allows permanent year-round emergency shelters by right in the RMU zone and CR zones subject to the same development standards applicable to other uses permitted in the same district and subject to the conditions authorized by State law. Table 17.34-A cross-references Section 17.60.080 but incorrectly states that emergency shelters require a use permit in the CR district. Permanent emergency shelters are subject to the following standards, which are within the parameters the State has established (Government Code Section 65583 (a) (4 (A) except for the required 500-foot separation which exceeds the maximum 300-foot separation allowed by the State.

1. The maximum number of beds or persons to be served nightly by an emergency shelter shall be thirty-five.
2. Off-street parking shall be based upon demonstrated need; provided, that parking for an emergency shelter shall not be more than that required for other residential or commercial uses permitted in the residential mixed-use (RMU) or regional commercial (CR) district as applicable.

¹⁰ Based on 2022 CDSS data on adult residential facilities and 2021 population estimates per the California Department of Finance E-5 Series.

3. Appropriately sized and located exterior and interior on-site waiting and intake areas shall be provided.
4. Appropriate exterior lighting shall be provided.
5. On-site management shall be provided.
6. Security shall be provided during the hours that the emergency shelter is in operation.
7. The maximum length of stay by a homeless person in an emergency shelter shall be six months.
8. An emergency shelter shall not be located within five hundred feet of another emergency shelter.
9. No individual or household shall be denied emergency shelter because of an inability to pay.

The City's 500-foot separation requirement is inconsistent with State law and will be reduced to 300 feet to implement the Housing Action Plan. The Plan also proposes that the Zoning Ordinance will be revised to eliminate the inconsistencies identified above.

The 2020 Point-in-Time Count identified 67 persons experiencing homelessness in San Pablo on the night of January 22, 2020. There are currently no available shelter beds in the city. There is approximately 0.15 acres of vacant land between two parcels in the RMU district, and an additional 1.38 acres across two parcels in the CR district. There are also a number of non-vacant underutilized lots in both zones that would be suitable for an emergency shelter. There is sufficient zoned capacity to accommodate the unmet need for shelter beds in San Pablo.

Assembly Bill 101 (AB 101) requires a Low Barrier Navigation Center (LNBC) to be permitted by right in mixed-use districts and nonresidential zones that permit multifamily development. A LNBC is defined as a "housing-first, low-barrier, temporary, services-enriched shelter focused on helping homeless individuals and families to quickly obtain permanent housing." The Zoning Ordinance does not include a definition or standards for the approval of LBNCs and will be amended to permit such facilities pursuant to State law as proposed by the Housing Action Plan.

Transitional Housing and Supportive Housing

The San Pablo Zoning Ordinance identifies supportive housing and transitional housing are treated as residential uses, subject only to the permitting requirements that apply to residential uses of the same housing type location in the same zone. This is true across residential and non-residential zoning districts.

Transitional housing is defined as "residential units operated under program requirements that call for (1) the termination of any assistance to an existing program recipient and (2) the subsequent recirculation of the assisted residential unit to another eligible program recipient at some predetermined future point in time, which point in time shall be no less than six months into the future."

Supportive housing is defined as "housing with no limit on length of stay and that is occupied by a target population as defined in subdivision (d) of Section 53260 of the California Health and Safety

Code, as the same may be amended from time to time, and that provides, directly or indirectly, a significant level of on-site or off-site services that assist supportive housing residents in retaining housing, improving their health status, and maximizing their ability to live and, when possible, work in the residents' community.”

The Housing Action Plan includes a program proposing to amend the Zoning Ordinance to identify both supportive and transitional housing as a permitted use in any district where either single or multi-family housing is allowed.

Single-Room Occupancy (SRO) Units

Single-room occupancy (SRO) units represent a housing alternative that is typically affordable to extremely-low-income households and formerly homeless persons. SROs are permitted by right in the RMU district and with a CUP in the CR district. Standards for SROs are provided in Section 17.60.090 of the Zoning Ordinance. SROs are subject only to the same development standards that apply to the other permitted uses in these zones, except for the following requirements:

1. Occupancy. An SRO unit shall be occupied by a single person. Occupancy of SRO units may be restricted to seniors or be available to persons of all ages.
2. Special Development. Units in an SRO housing development shall consist of a single room and may have a private or shared bathroom. A shared common kitchen and activity area may also be provided.
3. Management Standard. On-site management shall be provided.

At the time the current Housing Element was prepared, there were two SRO hotels in San Pablo with a total of 60 rooms—the Sands Motel and the San Pablo Motel, both located on San Pablo Avenue north of Rumrill Boulevard. It is unclear whether these facilities are currently approved as SRO housing under the applicable provisions of the Zoning Code. The Housing Action Plan proposes amending the Zoning Ordinance to allow SRO units to be occupied by two persons to increase the potential for these units to help reduce homelessness and increase housing options for low-income couples.

Manufactured Homes and Mobile Homes

Mobile homes (also referred to as manufactured homes) are considered single-family homes and are treated as such, given that they are certified under the National Mobile Home Construction and Safety Standards Act of 1974, which are installed on a permanent foundation approved by the City.

While mobile homes are treated as single-family residential uses, mobile home parks are not permitted in residential zones. They are permitted with a CUP in the CR and IMU districts. There are eight parks throughout the City with approximately 440 units as of 2020.¹¹ Mobile homes provide a significant source of housing for lower-income families – according to the California Department of Finance, mobile homes constituted about 4.0 percent of San Pablo's housing stock

¹¹ City of San Pablo, “Affordable Housing Strategy.” *Strategic Economics*, March 2020. Available at <https://www.sanpabloca.gov/DocumentCenter/View/13386/2020-Affordable-Housing-Strategy>.

in 2020. Owners of mobile home parks are required to comply with the applicable provisions of Sections 66427.4 and 664281.1 of the California Government Code, if they wish to convert mobile home parks into other uses.

The Zoning Ordinance prohibits enlarging or extending mobile home parks to include any additional area. (Section 17.60.060) but does not include any provisions intended to improve or maintain this important type of affordable housing. Similarly, the Subdivision Ordinance has not been updated to reference the most recent State requirements for conversion of a mobile home park to a condominium or other use except for a mandate to comply with the applicable provisions of the California Government Code as noted above. The Housing Action Plan will include an action to evaluate approaches to preserving the existing parks or protecting the residents' access to comparable affordable units.

Live-Work Facilities

The City defines live-work facilities as a structure or portion of a structure:

1. That combines a commercial or manufacturing activity allowed in the zone with a residential living space for the owner of the commercial or manufacturing business, or the owner's employee, and that person's household.
2. Where the resident owner or employee of the business is responsible for the commercial or manufacturing activity performed.
3. Where the commercial or manufacturing activity conducted takes place subject to a valid business license associated with the premises.

Live-work facilities are permitted with a CUP in the RMU, CMU, and IMU districts. Within the San Pablo Specific Plan Area, they are also permitted with administrative review in the MDR and HDR designations, by right in the RMU, MUCN/MUCS, and CMU designations, and with a CUP in the NC and CR designations. Additional standards regulating live-work units are contained in Section 17.60.040 of the Zoning Ordinance. The Housing Action Plan includes a proposal to revise the Ordinance to allow live-work units by right in mixed-use districts where the proposed commercial activity is allowed by right.

The Housing Action Plan will also propose to allow shopkeeper units in commercial and mixed-use districts. In contrast to live-work units, which are a commercial use that allows residential occupancy incidental to an approved non-residential use, shopkeeper units are dwelling units that are physically separated from a commercial space used for a business operated by the occupant of the associated residential unit. The commercial spaces are typically ground-floor retail or office spaces below living spaces where commercial spaces can only be leased to occupants of the residential spaces. This approach provides additional housing while creating a walkable mixed-use district.

Employee and Farmworker Housing

According to State law, housing elements must ensure that local zoning, development standards, and permitting processes comply with Health and Safety Code Sections 17021.5 and 17021.6. This generally requires employee housing for six or fewer persons to be treated as a single-family structure and residential use.

As noted in Appendix B agriculture is not a major industry in San Pablo and little to no need for housing specific to farmworkers. However, the City does not include a definition for employee or farmworker housing in the San Pablo Municipal Code. This City will amend the Zoning Ordinance to address this as part of the Housing Action Plan.

PERMITS AND PROCESSING PROCEDURES

Generally, the time taken to review and approve a proposal is directly proportional to the magnitude and complexity of the project. Projects subject to a use permit are subject to a “discretionary” review process, which typically requires more time than those projects permitted by right – i.e., projects subject to a “ministerial” review process. The following section assesses the typical timelines for residential projects to obtain entitlement and begin development in San Pablo, including the timelines of common discretionary processes.

As noted in Table C-5, residential uses generally do not require a use permit in any of San Pablo’s residential districts, although some commercial districts require one. A typical project begins with the developer filing an application for a tentative parcel map and appropriate application forms with a site plan. The application materials are first reviewed for completeness by the Planning Division staff or Zoning Administrator for consistency with City regulations and General Plan guidelines. Certain types of projects, such as multifamily housing projects, must go through design review. Otherwise, the plan is then approved at staff level. Administrative approvals typically take 30 days, and some projects include a 10-day appeal period – although ADUs do not get an appeal. If the project in question requires a use permit or a variance, it is sent to the Planning Commission for review. It typically takes about six weeks from completion to get scheduled for Planning Commission review, and an additional four to five weeks for public notice and review time. All new residential project plans are also copied to the Police Department for comment. The Police Department reviews safety and access issues before Planning Commission review.

The City also offers a pre-application meeting to discuss project requirements and priorities with developers. The meeting helps to inform developers about potential issues with their projects and typically helps to reduce review and approval time by a week or two. Given that permit processing procedures are comparable to other communities in the area, the San Pablo development review process does not represent a significant constraint to development.

Table C-18 and C-19 below identifies the typical processing time and approval authority for land use entitlements. It should be noted that each project does not necessarily have to complete all steps in the process (i.e., small scale projects do not require Environmental Impact Reports or rezoning). Also, certain approval procedures may run concurrently. Timelines are provided for a single-family, large multifamily, and small multifamily project.

Table C-18: Permit Procedure Timelines

Type of Permit or Decision	Typical Timeline ¹			Designated Approving Authority ²		
	Single-Family	Large Multifamily (100 Units)	Small Multifamily (10 Units)	Zoning Administrator	Planning Commission	City Council
Plan Check/Zoning Clearance	2-4 weeks	4-6 weeks	2-4 weeks	F	A	F
Official Code Interpretation	2-4 weeks	2-4 weeks	2-4 weeks	F	A	F
Similar Use Designation	2-4 weeks	2-4 weeks	2-4 weeks	F	A	F
Home Occupation Permit	1-2 weeks	1-2 weeks	1-2 weeks	F	A	F
Temporary Use Permit	*1-2 weeks	*1-2 weeks	*1-2 weeks	F	A	F
Minor Adjustment Administrative Use Permit	2-4 weeks	4-6 weeks	2-4 weeks	F	A	F
Minor Design Review	4-6 weeks	4-8 weeks	4-6 weeks	F	A	F
Reasonable Accommodation Entertainment Permit	2-4 weeks	4-6 weeks	24 weeks	F	A	F

<i>Single Family Infill</i>	<i>Subdivision</i>	<i>Multifamily Units</i>
Site Plan	Tentative Map	Site Plan
	Final Map	Design Review
	Initial Study	Variance ¹
	Site Plan Review	Negative Declaration
	Design Review	
2-4 months	6 months	2-4 months

1. A variance is not required for multifamily development, however if there are exceptional circumstances on the site, a variance may be requested by the developer.

Source: City of San Pablo.

Once a project has received entitlement, the developer must then apply for a building permit to initiate development. While the City does not have control over the time between entitlement and building permit applications, delays at this stage of the process—including time to secure financing—can be a significant setback for a project. In San Pablo, this timeline varies greatly. Some developers are ready to build immediately after receiving entitlement, but this depends on the availability of financing. Better resourced developers tend to move forward immediately, while smaller developers can take longer. Planning approvals last for one year, and the City works with developers to provide extensions as needed.

Conditional Use Permit (CUP)

Conditional use permits (CUPs) are required for multifamily dwellings in the Neighborhood Commercial and Industrial Mixed-Use districts, as well as for ground floor residential development in the Mixed Use Center South District. As noted in Table C-18 above, minor use permits typically take 14 days to receive approval, while major use permits require between 45 and 60 days. General requirements for CUPs are contained within Section 17.20.040 of the San Pablo Municipal Code. Required findings and conditions set forth in the Municipal Code are provided below:

- **Findings.** In order to grant any use permit, the findings of the planning commission shall be that the establishment, maintenance, or operation of the use of the building applied for will not, under the circumstances of the particular case, be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood of such proposed use or be detrimental or injurious to property and improvements in the neighborhood or to the general welfare of the city.
- **Conditions.** The planning commission may impose such conditions in connection with the use permit as it deems necessary to secure the purposes of this title and may require that such conditions are being or will be complied with.

Further, the City provides Residential Design Guidelines in Appendix A and Mixed-Use Design Guidelines in Appendix D of Title 17. These design guidelines are intended to assist designers and developers in understanding the City's goals and objectives for high quality residential development and may be imposed as a condition of approval.

While a CUP is appropriate in the IMU district, it unnecessarily restricts residential and mixed-use projects in the NC and MUCS districts. Efforts the City will take to increase flexibility and reduce constraints on residential development are included as part of the Housing Action Plan. To ensure that the review of residential projects is based on objective standards as required by the Housing Accountability Act and other State requirements (e.g. urban lot splits under SB 9 and expedited ministerial review pursuant to SB 35), the Housing Action Plan includes an action to review and revise the existing residential development standards and the design guidelines to comply with mandates for using objective standards for review of residential projects. The action in the Housing Action Plan includes review and revision as necessary of procedures for review and approval of both ministerial zoning actions and CUPs to comply with applicable statutory and case law.

Design Review

The Zoning Ordinance includes residential design guidelines that are not mandatory but may be used as a basis for project review and for conditions imposed by Staff or the Planning Commission (Section 17.32.090, Residential Design Guidelines). The 23rd Street and San Pablo Specific Plans also include design guidelines in addition to design and development standards. The 23rd Street SP specifically states that the SP guidelines replace the guidelines in Appendix D, Mixed-Use Design

Guidelines. Although some of the design guidance in the 23rd Street SP is advisory other provisions are mandatory.¹²

As noted above, to ensure that design review of residential projects is based on objective design standards as required by the Housing Accountability Act and other State requirements, the Housing Action Plan includes program proposing review and revision of the residential design guidelines in Appendix A of the Zoning Ordinance as well as the guidelines incorporated in the 23rd Street and San Pablo Avenue Specific Plans to comply with applicable statutory and case law. The San Pablo Avenue Specific Plan (SPSP) also includes both standards and guidelines. The SPSP states that its guidelines are “intended to serve as recommendations to guide development projects and the design review process [and] elaborate on the standards presented in Table 4-I as well as the streetscape design concepts discussed in Section 4-I.”¹³ The SPSP includes a program proposing development of “standards that apply to all residential care facilities to eliminate the possibility that standards will be imposed on an ad-hoc basis.”¹⁴ This proposal was never implemented.

Major Design Review

The procedures for conducting Major design review standards are in Section 17.20.030 of the San Pablo Municipal Code. Major design review is required for the following new residential construction and additions (for projects subject to a CUP this review is combined):

- Multiple-family with five or more residences in all zoning districts; and
- Residential care facilities in all zoning districts.

The Planning Commission is directed to ensure that these projects are consistent with applicable design guidelines as well as any community design plan or specific plan. The Commission is also required to ensure that:

- The location and design of proposed development gives particular consideration to privacy, views, and sunlight on adjoining properties and fosters the orderly and harmonious development and preservation of the public health and welfare of the city and its neighborhoods; and,
- The architectural design of structures and their colors and materials are visually harmonious with surrounding development, landforms, and vegetation.

These determinations are then used as a basis for finding that “the project under consideration adequately meets the requirements of this chapter and the applicable design guidelines.”

¹² 23rd Street Specific Plan, p. 7-1.

¹³ San Pablo Avenue Specific Plan, p. 4-43.

¹⁴ Ibid., p. 7-16.

If more than one type of design guideline, such as residential, commercial, industrial, and mixed-use, is applicable to a given project, the zoning administrator determines which provisions apply, based on the use(s), zoning district, and context.

The design guidelines are included in Appendices A through D of Title 17 of the San Pablo Municipal Code. These guidelines can be imposed as conditions of approval and are relatively “soft” compared to the more detailed and rigorous specific plan design guidelines. Even though the Planning Commission tends to approve residential projects and the design review process has not been identified as an obstacle, the guidelines are not sufficiently objective to meet State mandates.

Minor Design Review

Minor design review procedures in Section 17.18.090 of the San Pablo Municipal Code apply to less significant projects as an alternative to the major design review process. Minor design review is conducted by the zoning administrator for the following residential developments (does not apply to projects subject to a CUP):

- New single-family and two-family residences and additions of one hundred twenty-one square feet or more; and,
- Multiple-family residences with four or fewer units.

The zoning administrator is directed to consider the same factors when reviewing the smaller projects that the Commission uses for Major Design Review.

Minor design review decisions are subject to appeal to the Planning Commission and both Major and Minor design review decisions can ultimately be appealed to the City Council. Design review is almost always conducted in conjunction with the review of a use permit, and decisions on the underlying project are subject to environmental review as described in the next section.

As stated above, the Housing Action Plan includes an action to review and revise the existing residential development standards and the design guidelines to comply with mandates for using objective standards for review of residential projects to ensure that the review of residential projects is based on objective standards as required by the Housing Accountability Act and other State requirements (e.g. urban lot splits under SB 9 and expedited ministerial review pursuant to SB 35). This action will provide an opportunity to determine which design guidelines could provide a basis for a clear and objective set of standards to meet State requirements.

Environmental Review

San Pablo follows procedures set forth in the California Environmental Quality Act (CEQA) and has not adopted any additional procedures that describe how the City complies with the State requirements or to establish thresholds of significance for identifying projects that will subject to environmental review. The City has a website listing projects with final CEQA determinations, which lists 12 projects since 2017 none of which required an Environmental Impact Report. Four were exempt from CEQA review and the rest required preparation of a Mitigated Negative Declaration.

Many projects are “categorically exempt” from CEQA because of their size or nature, or because there is no reasonable possibility that they will have significant impact on the environment. Article

19 of the CEQA Guidelines lists the types of projects that are normally exempt; they include replacement or rehabilitation of existing facilities, construction or conversion of small structures, and minor alterations to existing land. Additionally, certain residential projects providing affordable urban, agriculture, or urban infill housing that meets specified acreage and unit criteria are also exempt from CEQA. The CEQA exemption for certain types of affordable housing was introduced by SB 1925 (2002, Sher) to amend Section 21080.10 of, to add Sections 21061.0.5, 21064.3, 21065.3, 21071, and 21072 to the Public Resource Code.

Projects funded with HOME, CDBG or other sources of federal funding and some projects with financing from the City or Contra Costa County may be subject to procedures in the National Environmental Policy Act (NEPA).

When projects are subject to review under CEQA, environmental requirements are handled in tandem with the City's requirements for public hearings and public review. As such, compliance with environmental review requirements do not pose an identifiable constraint to housing development in the City aside from the associated fees.

FEES AND EXACTIONS

Typical fees required to develop in San Pablo include entitlement fees, building fees, and impact fees imposed by a regional body. The City does not impose any development impact fees, unlike other cities in the region. To estimate the total typical costs, ABAG has developed a draft fee estimator for all jurisdictions in Contra Costa County – including San Pablo. The estimator examines three residential types, summarized below:

- **Single-family:** Single unit home with 3,100 square feet. The valuation is estimated at \$306,900.
- **Multifamily – Large:** 100-unit project at 800 square feet per unit (80,000 square feet total). The valuation is estimated at \$9,637,600.
- **Multifamily – Small:** 10-unit project at 800 square feet per unit (8,000 square feet total). The valuation is estimated at \$963,760.

The City Council approved a 2.6 percent increase in Building, Planning and Public Works user fees based on the Bureau of Labor Statistics Employment Cost Index. The methodology for establishing these fees was adopted by the Council in May 2021. The current fee schedule went into effect on July 1, 2022.¹⁵ Total typical fees for single- and multifamily projects are provided in Table C-21 below. Applications that require review by an outside consultant including EIRs and other environmental studies, subdivision maps, and parcel maps are subject to an additional fee equal to 17 percent of the consultant cost.

Planning and permit fees make up less than 50 percent of fees for all project types and are relatively low overall. The highest fees are generally those levied by non-City bodies, including the school district fee. Although not reflected in the typical fees below, additional fees imposed by outside agencies can pose an impediment to development in San Pablo. This includes water, wastewater, and fire mitigation fees that the City has no control over. Further, regional agencies without local review can have unpredictable costs that reduce certainty for developers.

Table C-21: San Pablo Fee Estimates

Fee Classification	Single-Family			Large Multifamily (100 Units)			Small Multifamily (10 Units)		
	Multiplier	Per ¹	Cost	Multiplier	Per ¹	Cost	Multiplier	Per ¹	Cost
Entitlement Fees									
Pre-Application Review	\$866.00	Set	\$866.00	\$866.00	Set	\$866.00	\$866.00	Set	\$866.00

State of CA Earthquake Assessment Fee	Based on Valuation		\$30.69	Based on Valuation		\$963.76	Based on Valuation		\$96.38
Fire Protection Fee	\$1,465.00	Set	\$1,465.00	\$1,905 + \$81/10k sf over 10k		\$2,472.00	\$1,905 + \$81/10k sf over 10k		\$1,905.00
Total Building Fees			\$10,345.69			\$55,342.76			\$18,233.38
Impact Fees									
School District Fee	\$4.08	SF	\$10,608.00	\$4.08	SF	\$326,400.00	\$4.08	SF	\$32,640.00
Subregional Transportation Mitigation Program (STMP)	\$5,881.00	Unit	\$5,881.00	\$2,897.00	Unit	\$289,700.00	\$2,897.00	Unit	\$28,970.00
Total Impact Fees			\$16,489.00			\$616,100.00			\$61,610.00
Total Project Fees			\$43,732.69			\$688,340.76			\$96,741.38
Cost Per Unit			\$43,732.69			\$6,883.40			\$9,674.14
Planning and Permit %			62.30%			10.5%			36.31%
Impact Fee %			37.70%			89.50%			63.69%

1. "Set" indicates a set fee, "Hr" indicates an hourly fee, "SF" indicates the fees is per square footage, and "Unit" indicates the fee is per unit.

Source: ABAG, Draft Contra Costa County Development Fee Estimates, April 2022

A comparison of San Pablo’s typical fees to other cities in Contra Costa County is provided below in Table C-22. Although San Pablo has increased permit fees in the last few years, the City remains on par or below other neighboring jurisdictions. Fees for all residential types are lower in San Pablo than the regional average, and the City maintains the lowest overall fees for multifamily projects.

Table C-22: Contra Costa County Fee Estimates

<i>City</i>	<i>Single-Family</i>	<i>Large Multifamily (100 Units)</i>	<i>Small Multifamily (10 Units)</i>
Antioch	\$22,146.24	\$813,910.78	\$103,950.44

TRANSPARENCY IN DEVELOPMENT REGULATIONS

Under State Government Code Section 65940.1, the City is obligated to provide transparency in publicizing land use controls and fees. The City provides a variety of resources on the planning process on their website¹⁵ – including the Master Fee Schedule, building permit information, planning applications, and the Zoning Map. Additional information on ADUs and Senate Bill (SB) 9 is also available. Contact information for the Planning and Zoning Division is also available on this webpage.

¹⁵ <https://www.sanpabloca.gov/1177/Planning-Zoning>

C.2 Non-Governmental Constraints

Non-governmental constraints range from environmental factors such as seismic hazards and noise to economic conditions including the cost and availability of financing, labor supply, the cost of materials and, more recently, supply chain problems. In the Bay Area particularly, the high cost of land can significantly increase the overall cost of housing development. All of these conditions can hamper residential development and are beyond the ability of local government to control. Nevertheless, there are approaches they can use to help offset the impacts of these constraints through their planning and regulation of land use and development.

In San Pablo, the major constraints to housing development include historic development patterns, environmental conditions, and regional and local market conditions – including regional discrimination in the housing market. The following section assesses the impact of these non-governmental constraints and steps the City can take as part of the Housing Action Plan to mitigate them.

PHYSICAL DEVELOPMENT PATTERN

San Pablo is a largely built out city with relatively few vacant parcels available for development. While there are several larger vacant parcels clustered east of I-80, these are located within an Alquist-Priolo Fault Zone where residential development is prohibited for reasons of seismic safety. Only about 2.7 percent of San Pablo’s land is considered vacant by the Contra Costa County Assessor. Further, the average size of a vacant parcel in the city is 0.3 acres, and about 81.6 percent of all vacant parcels are under 0.5 acres in size. San Pablo also has very low vacancy rates and few substandard buildings with high potential for redevelopment – as of March 2020, the City has a lower vacancy rate (4.1 percent) than Richmond (4.7 percent), Pinole (5.7 percent), El Sobrante (4.2 percent), the county (5.1 percent), and the nine-county Bay Area (4.8 percent).¹⁶ Generally, the average parcel size—including both vacant and non-vacant parcels—is about 0.2 acres. As a result, strategies for promoting and facilitating infill development will continue to be a priority for the City’s long range planning efforts.

In general, neighborhood commercial or mixed-use commercial are designated for areas along corridors such as 23rd Street, Rumrill Boulevard, and some portions of San Pablo Avenue with a regional commercial center designated for the area near San Pablo Avenue and San Pablo Dam Road adjacent to the exit from I-80. Multifamily residential uses are similarly located primarily along major corridors and, in some areas, create a buffer between major corridors or land designated for commercial uses and land designated for low-density residential, such as adjacent to I-80 or abutting commercially designated land along Rumrill Boulevard or 23rd Street. Single-family residential land uses make up the majority of the city’s neighborhoods between these corridors. Significant area within the city is also designated for public/institutional use, such as at Contra Costa College and several local elementary, middle, and high schools.

¹⁶ City of San Pablo, “Affordable Housing Strategy.” *Strategic Economics*, March 2020. Available at <https://www.sanpabloca.gov/DocumentCenter/View/13386/2020-Affordable-Housing-Strategy>.

Most neighborhoods across San Pablo have densities ranging from eight or fewer units per acre to between nine and 16 units per acre. Due to their small lot sizes, San Pablo's single-family neighborhoods still have many lots that fall in the density ranges of nine to 16 and 17 to 24 units per acre. Additionally, within areas designated as under the City's current General Plan as Low Density Residential and intended for single-family detached residential development, non-conforming multifamily uses frequently fall into the higher density ranges of 24 to 40 and over 40 units per acre. Examples include the fourplexes along Sutter Avenue at its intersection with 17th Street and along 15th Street south of Broadway Avenue. Many of the city's higher density areas are concentrated close to commercial corridors near San Pablo Avenue, 23rd Street, and Rumrill Boulevard, where densities range from eight to over 40 units per acre. Examples include the El Portal Apartment Homes at the intersection of San Pablo Avenue and 23rd Street, the Montevista Senior Apartment complex on San Pablo Avenue, and the Kona Apartments on Church Lane, which all have a density of over 40 units per acre.

While relatively high densities are possible in the city's single-family neighborhoods, the predominance of this housing type and small lot sizes generally limit the feasibility of affordable housing development. Despite these challenges, corridors like San Pablo Avenue, 23rd Street, and Rumrill Boulevard have high potential for housing development, including mixed-use and higher-density residential projects. Most commercial uses have an FAR that is well below their maximum permitted FAR under the City's existing General Plan Land Use designation – suggesting that many of these commercial sites with low FARs may present opportunities for redevelopment into more intense uses. To take advantage of this redevelopment potential, however, residential and mixed-use projects will generally need to consolidate a number of smaller lots.

While the lack of development impact fees in San Pablo makes consolidation more feasible for developers, the City does not provide specific incentives to do so. Due to limited local resources, however, there is a tradeoff between funds allocated for lot consolidation efforts and those directed towards affordable housing projects. To address that tradeoff, the City's Affordable Housing Strategy recommends a number of potential actions that can help increase San Pablo's housing stock – including inclusionary zoning, incentive zoning, and other City efforts to facilitate “missing middle” housing and ADUs. Other pre-development activities—including those related to removal of substandard structures and environmental review and remediation—would also help facilitate the consolidation and development of smaller parcels. Actions the City will take over the planning period to incentivize residential development on smaller lots, including affordable housing development, are included in the Housing Action Plan.

ENVIRONMENTAL CONSTRAINTS

Environmental factors such as topography, soils, landslides and seismic hazards, and noise, are constraints to housing development in the City. The San Pablo General Plan 2030 takes these factors into account in establishing policies for residential and mixed-use development in the Land Use Element. Where development is planned, the constraints can be mitigated through appropriate design and environmental planning.

The Contra Costa County Local Hazard Mitigation Plan (LHMP) was adopted by the City of San Pablo in April 2018. The LHMP provides a local hazards risk ranking, summarized in Table C-23. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along

with its potential impacts on people, property, and the economy. In San Pablo, the hazards of greatest concern are earthquakes and dam failure. Dam failure is also likely a secondary impact of earthquakes. Overall, risk levels for various hazards in San Pablo are about on par with other jurisdictions and unincorporated areas in Contra Costa County. Across all cities in the county, earthquake hazards are the greatest risk. The only hazard that poses a greater threat in San Pablo than other cities or unincorporated areas is dam failure, due to the potential for a large earthquake to critically damage the San Pablo Dam. While hazards exist within the city, there are still many options for increasing housing, promoting economic development, and addressing environmental justice safely.

Table C-23: Local Hazards Risk Ranking

<i>Rank</i>	<i>Hazard Type</i>	<i>Risk Rating Score (Probability x Impact)</i>	<i>Category</i>
1	Earthquake	54	High
2	Dam failure ¹	36	High
3	Severe weather	30	Medium
3	Landslide ²	30	Medium
4	Flood ³	18	Medium
5	Drought	9	Low
6	Wildfire ^{2,4}	6	Low
7	Sea level rise ⁵	0	None
7	Tsunami	0	None

1. Failure is assigned a medium probability of occurrence as a secondary impact from earthquake.
2. Very High and High severity zones were used to assign probability and impacts.
3. One percent annual chance event (100-year flood event) was used to assign probability and impacts.
4. There is no mapped risk within the city, but a score was given due to potential smoke impacts on people and economy.
5. 2100 upper range estimates and extreme tide were used to assign probability and impacts.

Source: Contra Costa County Local Hazard Mitigation Plan, 2018; Dyett & Bhatia, 2021

The impacts of these local hazards and other environmental conditions on housing development are summarized below:

- **Geology/Seismicity.** The Hayward Fault, a major fault line in the San Andreas Fault System, runs directly through the city; it represents a potential threat to safety and places restrictions on future development. In the LHMP’s analysis of risk potential in San Pablo, earthquakes and dam failure—which is often a secondary hazard following an earthquake—were the only hazards rated as “High” risk probability. Due to the potential for surface fault rupture along the Hayward Fault, Alquist-Priolo Zones apply to the area surrounding the fault line and restrict the development of residential buildings. Thus, future development potential is limited within the fault zone.
- **Slope and Hillside Considerations.** Hilly portions of the city, particularly in the hills to the east of I-80, are susceptible to natural hazards. In addition to earthquake risk, the hillsides

are susceptible to landsliding and have a soil rating of “very limited” due to their slope and shrink-swell susceptibility. Currently, the Hillsides Overlay District regulates the development of any structures over one story tall in this portion of the city. Future residential development, especially higher-density development, is limited in this area and often requires extensive geotechnical studies. The Hillside Area Overlay District (D1) modifies development standards in these areas.

- **Wildfires.** The eastern portion of the city is susceptible to wildfires. In addition to the Hayward Fault running through this portion of the city, it is adjacent to Wildcat Canyon Regional Park, which is identified as a Very High Fire Hazard Zone which may threaten the area, though current roadways in the area allow for sufficient evacuation routes in the case of a wildfire.
- **Hydrology and flooding.** Certain areas of the city fall under the 100- and 500-year flood zones, which restricts future residential development. According to the City’s LHMP, approximately nine percent of the population resides in special flood hazard areas currently. In particular, residential neighborhoods along the city’s western boundary will likely be affected by increased flooding in the future. This restricts the extent of new housing that may go in in these areas. The City has a number of flood hazard response measures in place to respond to the flood hazards presented by its waterways. These include the Flood Damage Prevention Ordinance, the City’s participation in the NFIP Community Rating System, and the Green Infrastructure Plan, along with other measures included in the LHMP. These programs place development restrictions in floodplain areas, while the Green Infrastructure Plan also proactively plans for floodplain management and improved water quality by setting targets for the amount of impervious surface in the city to be retrofitted by 2030 and 2040. Further, the failure of the San Pablo Dam following an earthquake poses a serious risk.
- **Air and noise quality.** While the City of San Pablo enjoys relatively little exposure to some harmful pollutants (according to CalEnviroScreen 3.0), San Pablo is most affected by diesel particulate matter (DPM). DPM is produced by exhaust from cars, trucks, buses, trains, ships, and other equipment with diesel engines. DPM in San Pablo likely comes in large part from cars, trucks, and other traffic passing through or near the city adjacent to I-80. In addition to I-80, city truck routes running along San Pablo Avenue, San Pablo Dam Road, Giant Road between Road 20 and Richmond Parkway, and Evans Avenue likely contribute to DPM exposure in San Pablo. Further, major sources of noise in San Pablo are related to vehicular traffic, particularly in areas along I-80. The railroad corridor along Giant Road also contributes to noise in the city. Future housing development must ensure that measures are in place to protect the community from air pollution and noise impacts from these sources. The Air Quality Health Risk Overlay District (D3) modifies development standards along the I-80 corridor, and generally restricts residential development.
- **Open Space, Creeks, and Wildlife.** While San Pablo is highly urbanized, it contains and is in close proximity to several important open space and biological resources that provide benefits to human, plant, and animal communities. The Wildcat and Rheem creeks, which run through the city, are important waterways within the greater Bay Area Delta system. The Wildcat Creek Restoration and Greenway Trail Project demonstrates the City’s commitment to preserving and enhancing its natural resources. Additionally, Wildcat Canyon Regional Park to the east provides significant open space opportunities and connects to the Bay Area

Ridge Trail. To the west, the Bay Trail runs along Richmond Parkway and almost connects into San Pablo via Wildcat Creek Trail. There are also pockets of open space near creek banks and on hillsides along San Pablo Dam Road. These hillsides have remained open space due to safety considerations (the steep slopes are susceptible to seismic activity as well as wildfire risks). St. Joseph Cemetery is 58 acres of open space along Church Lane and El Portal Drive and is not suitable for future residential development. Further, central coast riparian forests running along San Pablo Creek provide a vital resources and movement corridors to flora and fauna. Residential development is limited in and near these resources to preserve existing biodiversity, including required setbacks along the creeks.

MARKET CONSTRAINTS

Regional demand has a direct impact on the cost of land. A local government can either limit or provide an adequate supply of entitled land for development in order to meet the regional demand. Construction cost is affected by a variety of factors, including the national demand for materials and commodities, and the supply of local construction labor. The availability of financing is affected by factors that the local government cannot control, including capital levels of banks and investors, credit worthiness of borrowers, and the willingness of investors to supply capital for real estate.

Land and Construction Costs

Land costs are often difficult to estimate, and there is no single publicly available database that records urban land prices. A recent study conducted by researchers from the Federal Housing Finance Agency (FHFA) have estimated the price of residential land based on appraisals of single-family parcels conducted between 2012 and 2019.¹⁷ From this assessment they have made available land prices for all census tracts and zipcodes in the country. As summarized in Table C-22 below, the average land value per acre in the zipcodes either partially or wholly contained within the boundaries of San Pablo is about \$1,871,800 or 39.8 percent of the total property value. Median land value in San Pablo is lower than the greater Bay Area region, but higher than the county overall – although it comprises a smaller share of the total property value.

Table C-24: Median Single-Family Land Costs, 2019

<i>Region</i>	<i>Median Land Value Per Acre</i>	<i>Median Land Share of Property Value</i>
San Francisco Bay Area ¹	\$2,047,500	44.2%
Contra Costa County	\$1,529,900	40.2%
San Pablo area ²	\$1,871,800	39.8%

1. Based on the nine-county region.

2. Includes zipcodes that are either wholly or partially contained within the boundaries of San Pablo: 94806, 94801, 94803, 94804, 94805

Source: FHFA, Land Prices, October 2020; Dyett & Bhatia, 2022

Land acquisition cost estimates for the development of affordable housing in San Pablo are available from recent California Tax Credit Allocation Committee (TCAC) project tax credit applications.

¹⁷ William Larson, Jessica Shui, Morris Davis, and Stephen Oliner, “Working Paper 19-01: The Price of Residential Land for Counties, ZIP codes, and Census Tracts in the United States,” *FHFA Staff Working Paper Series* (October, 2020).

Estimates include projects that applied for a tax credit between 2017 and 2021, and are provided in Table C-25. Land acquisition costs are significantly higher for rehabilitation projects than for new construction projects, with San Pablo’s most recent new construction project estimating about \$85 per square foot or 14.9 percent of total project cost. While this is higher than the estimated cost per square foot provided in the previous Housing Element (\$35 per square foot), it remains in a similar range of total project costs (15 to 20 percent). Land costs have continued to rise in the City, especially for acquisition and rehab projects.

Table C-25: Land Costs for Affordable Housing Projects in San Pablo, 2017-2021

<i>Project Year</i>	<i>Project Name</i>	<i>Project Type</i>	<i>Land/Acquisition Cost¹</i>		
			<i>Total Cost</i>	<i>Cost per Sq. Ft.</i>	<i>Percent of Total Project Cost</i>
2017	Church Lane	Acquisition and Rehab	\$6,093,175	\$206.55	27.9%
2018	Montevista Senior Apartments	Acquisition and Rehab	\$17,600,000	\$340.66	69.4%
2020	Hilltop Commons	Acquisition and Rehab	\$89,872,449	\$349.87	58.9%
2021	Alvarado Gardens	New Construction	\$7,000,000	\$85.47	14.9%
Median Cost			\$12,300,000	\$273.61	43.4%

1. Land/acquisition costs include project costs related to land costs or value, demolition, legal, land lease rent prepayment, existing improvements value, and off-site improvements.

Source: Tax Credit Allocation Committee, Project Staff Reports 2017-2021; Dyett & Bhatia, 2022

Construction costs, including both hard cost (i.e. labor and materials) and soft cost (i.e. development fees, architectural and engineering services, and insurance) are generally high countywide. According to a report published by the Turner Center at UC Berkeley, trends in the prices of both labor and materials have likely contributed to hard cost increases over the 2009 to 2018 period.¹⁸ The Bay Area region was identified as the most expensive region in the state, where average hard costs were \$81 more expensive per square foot than in other parts of the state.

TCAC project tax credit applications provide an estimate of construction costs for affordable housing projects in San Pablo – see Table C-26. The median construction cost per square foot is about \$190.50, or 27.8 percent of the total project cost. However, in new construction these costs increase significantly – to \$322 per square foot and 56.2 percent of the total project cost. Construction costs have also risen over the course of the COVID-19 pandemic, due in part to supply chain disruptions. The lasting impacts of this trend are not yet known, but it is likely to increase the cost of housing in at least the short to medium term.

¹⁸ Hayley Raetz, Teddy Forscher, Elizabeth Kneebone, and Carolina Reid, “The Hard Costs of Construction: Recent Trends in Labor and Materials Costs for Apartment Buildings in California,” *Turner Center for Housing Innovation, 2020*.

Table C-26: Construction Costs for Affordable Housing Projects in San Pablo, 2017-2021

Project Year	Project Name	Project Type	Construction Cost ¹		Percent of Total Project Cost
			Total Cost	Cost per Sq. Ft.	
2017	Church Lane	Acquisition and Rehab	\$7,552,025	\$256.00	34.6%
2018	Montevista Senior Apartments	Acquisition and Rehab	\$2,428,200	\$47.00	9.6%
2020	Hilltop Commons	Acquisition and Rehab	\$32,108,872	\$125.00	21.0%
2021	Alvarado Gardens	New Construction	\$26,372,502	\$322.00	56.2%
Median Cost			\$16,962,264	\$190.50	27.8%

1. Includes new construction and rehab projects.

Source: Tax Credit Allocation Committee, Project Staff Reports 2017-2021; Dyett & Bhatia, 2022

The high cost of land in San Pablo is a constraint to the development of lower-income housing. Developers will have to construct multifamily housing at higher densities and smaller unit sizes to generate economies of scale for the development to be profitable, or obtain public or private subsidies to offset high land and construction costs. Further, although land values in San Pablo are relatively lower than in the Bay Area, maximum achievable rents are also lower than what can be generated in other Bay Area cities. This helps to maintain affordability, but it also reduces the potential for profit and limits incentives for additional development in the city.

Availability and Cost of Financing

One of the most significant factors related to the provision of adequate housing for all segments of the population is the availability of financing – both for real estate development and homeownership. Because the projected net operating income from affordable housing developments is lower than that from market rate developments, developers generally have to secure financing from a variety of sources. Typically, a project’s sources of funds can be divided into three major categories:

1. Equity;
2. “Senior” debt; and,
3. “Subordinate” debt.

Equity, the funds contributed by the developer, typically include some direct investment by the developer but additional funds are secured from tax credit investors. Because the amount of tax credits generated through a typical project far exceed most developers’ tax liability, other for-profit entities with large tax liabilities (“investors”) or syndicators who act as a broker between the developer and the investors, form a limited partnership with the developer. The partnership then allocates nearly all of the tax credits to the non-developer partners in exchange for equity in the project.

Congress created the Low Income Housing Tax Credit (LIHTC) program in 1986 to help low-income housing developers to raise equity for their projects. Each year, the U.S. Department of the Treasury issues tax credits to states for allocation to low-income housing projects. The California Tax Credit Allocation Committee, the State agency responsible for administering the credit has established additional regulations for allocating the credit. These include giving higher priority to projects near amenities such as public transit, public parks, public libraries, schools, and senior centers.

Because of the high cost of building housing in California and limited availability of federal tax credits, the State legislature also approved a State housing credit to augment the federal tax credits. The State credit is also restricted to projects that are not located in difficult to develop areas (DDAs) or qualified census tracts (QCTs) or, if located in DDAs or QCTs, with projects where 50 percent of the units are for individuals with special needs.¹⁹

The Low-Income Housing Fund (LIHF) is the City of San Pablo's only source of funding for affordable housing. The LIHF was previously funded through a 20 percent set aside of tax increment earned in the City's Redevelopment areas. Since the dissolution of redevelopment agencies in 2012, the City no longer receives new tax increment revenues. This fund may be used for a variety of purposes, including: (1) preserving long-term affordability of units, (2) homeless prevention and rapid rehousing, and (3) development of new housing. As of March 2020, the LIHF had a balance of \$5.5 million. Since then, \$500,000 has been appropriated from the LIHF to fund the COVID-19 Housing Assistance Grant Program.

Further, the county issues tax-exempt revenue bonds for affordable housing development financing through the county's Multifamily Mortgage Revenue Bond Program. The County does not offer any set-aside subsidies for the construction or preservation of deed-restricted affordable housing. Although other counties across the Bay Area have approved general obligation bonds for affordable housing (such as Measure A-1 in Alameda County or Measure A in Santa Clara County), Contra Costa has not placed an affordable housing bond measure on the ballot. Measure J, which was on the ballot in March 2020 for transportation and housing improvements, was defeated. Note that the county administers federal and State funding programs that can be used for affordable housing development.

The California Housing Finance Agency offers grants and loans for ADUs through a group of private lenders. Homeowners with annual incomes less than \$300,000 are eligible to apply for up to \$40,000 in assistance for pre-development costs including architectural designs, permits, soil and engineering tests and other expenses. Grants may also be used to buy down the interest rate on financing.²⁰

The cost of securing financing to purchase a home also impacts the cost of housing and access to homeownership for lower-income households. At the national level, interest rates have remained relatively low since 2015 and experienced a significant decline during the COVID-19 pandemic. However, rates have started to increase over the course of 2021 – as interest rates continue to rise, the

¹⁹ California Housing Consortium, "Resources: Affordable Housing 101: How is it Built?" <https://calhsng.org/resources/affordable-housing-101/how-is-it-built/>

²⁰ Cal HFA, ADU Grant Program, <https://www.calhfa.ca.gov/adu/index.htm> and <https://www.calhfa.ca.gov/adu/homeowner/adu-steps.pdf>

amount of public subsidy needed to bridge the affordability gap for moderate- and lower-income households will also rise. See Chart C-1 for the change in 30-year fixed rate mortgages since 2015.

A new source of funding that may become available during the planning period will be the Bay Area Housing Finance Agency (BAHFA), established by the State under AB 1487 (2019, Chiu), to support the production and preservation of affordable housing by placing new revenue options on the ballot. Although efforts to obtain the necessary approval of voters has been postponed due to the economic disruption caused by the COVID-19 pandemic, the decision was made not to place a revenue measure on the November 2020 ballot.)

Any new revenue source to be placed on the ballot would require voter approval by a two-thirds vote. Possible future options include:

- General obligation bond backed by property tax receipts (also known as a GO bond)
- Parcel tax
- Gross receipts tax
- Per-employee corporate “head tax”
- Commercial linkage fee (only authorized after voters approve a GO bond or parcel tax)

The average annual mortgage interest rates for the years 2015 through the fourth quarter of 2021 can be found in the table below. After peaking at close to 5 percent during the 4th quarter of 2018, the weekly rates fell to 3.11 percent by the end of 2021 but climbed back to 5.22 percent in August of 2022. Meanwhile, the typical home value in San Pablo has increased from \$562,000 in July 2021 to \$602,000 in June 2022.²¹

Generally speaking, households can afford to spend 30 percent of their monthly income on housing. This figure assumes that the household does not have an already high debt to income ratio, or other high monthly expenses. A two-person San Pablo household earning the Area-wide Median Income (AMI) of \$100,500 would theoretically be able to make a monthly housing payment of \$2,513. With a 10 percent down payment, minor other debts and the highest credit rating this hypothetical two-person family would be able to purchase a home that cost \$602,000. However, fewer options are available to those families unable to come up with a 10 percent down payment or low income households with an income of \$87,700 or less. Contra Costa County’s Mortgage Credit Certificate Program (MCC) is authorized to provide qualified first-time homebuyers with a federal income tax credit equal to 20 percent of the annual interest paid on the borrower’s mortgage. By reducing the borrower’s federal tax liability, the tax credit provides additional income that can be used for mortgage payments. Unfortunately, as of this writing there were no funds for this program.²² Another possible source is the Cal Home Program in Richmond offers up to \$38,000 in a “silent”

²¹ See https://www.trulia.com/CA/San_Pablo/ and <https://www.trulia.com/mortgage-rates/?auto=true&loantype=purchase&value=602000&zip=94806&cscore=760%2B&down=100000&va=false#request=ZR-FHWPXQY>

²² <https://www.contracosta.ca.gov/4768/Mortgage-Credit-Certificate-Program>

down payment assistance loan for low-income households purchasing in Contra Costa. This loan is secured by a Deed of Trust on the property and requires no monthly payments.²³

Source: Freddie Mac, Historical Weekly Mortgage Rates Data, 2015-2021

INFRASTRUCTURE CONSTRAINTS

Much of San Pablo’s infrastructure is old, however, the systems can still accommodate the projected housing needs during the planning period. The cost of infrastructure improvement required for residential development is borne by the developers. For large subdivisions, certain improvements may be required as conditions of approval of the tentative map. These include frontage improvements like curbs and sidewalks, storm drainage and sanitary sewer improvements, water supply and other improvements to street lighting, fire hydrants, street trees and shrubs. Improvements to existing infill parcels are typically not necessary. All of the infill parcels identified in the Housing Element have sufficient infrastructure availability for electricity, water and sewer to allow development. As a result, infrastructure does not pose a constraint to development in San Pablo.

²³ <https://communityhdc.org/down-payment-assistance-programs/>

Water

The East Bay Municipal Utility District (EBMUD) provides water services for Alameda and Contra Costa counties, including the City of San Pablo. According to EBMUD's 2020 Water Shortage Contingency Plan (WSCP), under base condition assumptions, EBMUD can meet customer demand (including residential demand) out to 2050 during normal years and single dry years. Growth projections in EBMUD's future water demand reflects residential need projections provided by the Association of Bay Area Governments (ABAG), Plan Bay Area, and local land use agencies. Further, per the 2020 Urban Water Management Plan (UWMP), EBMUD's Board of Directors approved Policy 3.07 which ensures that priority for new water service connections during restrictive periods is given to proposed developments within EBMUD's existing service area that include housing units affordable to lower-income households in accordance with California Government Code 65589.7.

EBMUD's water supply system consists of a network of reservoirs, aqueducts (pipelines), water treatment plants (WTP), pumping plants, and other distribution facilities and pipelines that convey Mokelumne River water from Pardee Reservoir to EBMUD Water Treatment Plants and terminal reservoirs. EBMUD has six WTPs in the service area including the San Pablo WTP, which is typically not used except in response to outages at other facilities or other unusual circumstances such as to support EBMUD's drought operations in 2015.

The capacity of the EBMUD water supply system is dependent on seasonal rainfall and collected snowpack in the Sierra Nevada watershed. On an average annual basis, about 90 percent of the water EBMUD uses is from this source. Water The secondary source is runoff from local watersheds at EBMUD's five terminal reservoirs: Briones, Chabot, Lafayette, Upper San Leandro, and San Pablo.

EBMUD's policy is to operate its terminal reservoirs to maintain enough standby storage to meet rationed customer demand for 180 days, in case the Mokelumne River supply is disrupted. After the emergency ends, the Mokelumne River supply is returned to service soon as practicable and within the regulatory framework to refill terminal reservoirs to meet minimum standby storage levels while also supplying inline plants. Emergency supplies through interties with the Contra Costa Water District (CCWD), San Francisco Public Utilities Commission (SFPUC), Dublin San Ramon Services District (DSRSD), and City of Hayward (Hayward) can be used during an emergency to reduce demand on the local reservoirs or used following an emergency to help EBMUD's recovery in re-establishing storage levels. EBMUD also has a water service contract with the US Bureau of Reclamation to receive water from the Central Valley Project in years when EBMUD's projected supply of stored water is forecast to be lower than 500 thousand acre-feet (TAF)²⁴

EBMUD's service area can be separated roughly into two climatic zones relative to the Berkeley-Oakland hills, East-of-Hills and West-of Hills. In the West-of-Hills area, where San Pablo is located,

²⁴ East Bay Municipal Utilities District, Urban Water Management Plan 2020 and Water Shortage Contingency Plan 2020, <https://www.ebmud.com/water/about-your-water/water-supply/urban-water-management-plan>

climate tends to be more moderate due to the marine influence of San Francisco Bay, whereas summer air temperatures in the East-of-Hills area can be considerably higher. West-of-Hills single-family residential water consumption is generally lower than East-of-Hills usage and outdoor water use, which accounts for about 28 percent of the total water use for residential customers, is a large component of total water use for single-family customers.

California Water Code Section 10631.1 requires that UWMPs include an estimate of projected water demand for lower income single-family and multi-family residential housing within EBMUD's service area. The Metropolitan Transportation Commission (MTC) established low-income thresholds in 2016 for Plan Bay Area 2040 to account for the Bay Area's high cost of living. For each census tract, the most recent MTC percentages of low income single-family and multi-family households were applied to single-family and multi-family demand projections from EBMUD's 2050 Demand Study to estimate the projected lower-income residential demand.

EBMUD's Board of Directors approved Policy 3.07 which ensures that priority for new water service connections during restrictive periods is given to proposed developments within EBMUD's existing service area that include housing units affordable to lower income households in accordance with California Government Code 65589.7. Policy 3.07 also states that EBMUD will not deny an application for services to a proposed development that includes affordable housing unless certain specific conditions are met, which could include a water shortage emergency condition, or if EBMUD is subject to a compliance order by the Department of Public Health that prohibits new water connections. Based on the requirement to provide priority to developments that include housing units affordable to lower income households, Policy 3.07 assures that EBMUD can meet the portion of overall water demands for lower-income households.²⁵

In accordance with Section 65589.7 of the California Government Code, the adopted Housing Element will be delivered to EBMUD.

Wastewater

West County Wastewater District (WCWD) provides wastewater treatment and disposal services to approximately 34,000 residences and 2,450 commercial and industrial businesses in western Contra Costa County including the City of San Pablo and parts of the adjacent unincorporated area. WCWD's collection system is overall performing well overall but the 2021 Sewer System Management Plan identified and recommended assets for replacement or rehabilitation in the near-term (five-year) planning horizon. This included many sewer lines throughout the City of San Pablo.²⁶ Larger pipes may be required to meet the continuing demand if residential areas of the city become more densely developed. WCWD has installed flow sensors within manholes identified as most likely to experience flows exceeding the capacity of the storm-drain system including one on San Pablo Avenue.

²⁵ EBMUD Urban Water Management Plan, pp. 34-36.

²⁶ WCWD Sewer System Management Plan, May 2019, p. 8-1 and <https://www.google.com/maps/d/u/0/embed?mid=1hsaWQcJN4CeYExXSGqTCbSAhuTE&ll=37.97296390941711%2C-122.3148609682617&z=13>

In accordance with Section 65589.7 of the California Government Code, the adopted Housing Element will be delivered to WCWD.

Dry Utilities

Pacific Gas & Electric (PG&E) provides gas and electric service to San Pablo residents and businesses with electricity through Marin Clean Energy (MCE), a public, not-for-profit provider that offers electricity produced primarily by non-polluting, renewable sources such as solar, wind, geothermal, hydroelectric, and bioenergy from projects in California, the Pacific Northwest, and Colorado. The exact proportion of each varies with time, based on demand and availability.²⁷ energy services, as well as energy efficiency and rebate programs. The San Pablo City Council voted to join MCE in 2014 to reduce climate-changing greenhouse gas (GHG) emissions.

SOCIAL CONSTRAINTS

In addition to physical and market constraints that reduce housing development, there several social constraints—both external and internal—that may hamper the feasibility of development in San Pablo. A common internal social constraint in the Bay Area is the tendency for some current residents to oppose new residential development in their community that they believe might reduce the quality of life in their neighborhoods and reduce property values. Multi-family projects, higher density development and housing planned for lower-income households are the most frequent targets of the so-called NIMBYs (Not In My Backyard). Discrimination based on the perception that neighborhoods and projects with residents who are lower-income and non-white are prone to crime, graffiti, and other adverse conditions. These perceptions may also significantly influence a developer’s choice to invest and pursue development opportunities in particular cities.

Although NIMBYism is prevalent in some Bay Area cities, it has not posed a significant constraint in San Pablo. Residents are generally very accepting of new projects, with little opposition during public meetings. While some groups and residents voice concern about development on San Pablo Avenue and along creeks, the City is generally able to work with the community to move new projects forward.

The attitudes and perceptions of potential homebuyers and renters do, however, affect San Pablo’s real estate market, which will reduce developer and investor interest. Even though crime rates have improved considerably since a high in 2006 and are lower than several nearby cities including Richmond, El Cerrito and Berkeley, the 2019 crime rate was still 1.3 times greater than the national average.²⁸ Low developer and investor interest is compounded by the fact that San Pablo suffers from the same high cost of construction, labor, and materials as the rest of the Bay Area.

C.3 Key Findings

This section is provided for staff review to summarize the key findings of this appendix to inform programs in the Housing Action Plan and narrative language in the body of the draft Housing Element. Key findings related to governmental and non-governmental constraints are provided below.

GOVERNMENTAL CONSTRAINTS

- **23rd Street and San Pablo Specific Plan restrictions.** Specific Plan policies and standards need updating and revision to facilitate residential and mixed-use development in light of current economic and real estate market conditions and to meet current State requirements. There is room for additional streamlining of standards that are overly complex such as restrictions that prohibit or limit residential uses in ground floor spaces fronting on San Pablo Avenue in Mixed Use areas limit the feasibility of residential development. At a minimum, regulations should be reduced in mid-block areas. required ground floor commercial uses, parking, Eliminating CUP requirement for live-work development and allowing for shopkeeper spaces that restrict use of ground floor retail to occupant of related housing unit would allow for alternative housing types to help populate corridors. The Specific Plans should also be amended to incorporate or cross-reference Section 17.38.040, Priority development area (PDA) overlay district (D2) of the Zoning Ordinance, which establishes alternate development standards for properties in the 23rd Street SP and SPSP plan areas and on Rumrill Road that are within a quarter mile radius of any existing or planned light rail, streetcar, or bus rapid transit station to promote higher density and pedestrian-oriented uses consistent with ABAG’s Sustainable Community Strategy. The Zoning Ordinance states that these standards supersede requirements otherwise applicable to mixed-use projects that include residential uses and residential projects with four or more units to allow densities up to 60 units per acre, maximum FAR of 2.5 and a maximum height of 60 feet.
- **Residential development in commercial districts.** In addition to the 23rd Street SP, some commercial districts in the city that would be appropriate for mixed-use or purely residential projects provide overly strict standards. This includes a CUP requirement for multifamily in the NC and MUCS districts, as well as relatively low permitted densities in the CR and NC districts. The FAR penalty in the CMU districts also reduced residential feasibility. Increased flexibility and further streamlining for residential projects in these areas will encourage additional residential development.
- **Minimum lot sizes.** The minimum lot size in the R-3 and R-4 districts (10,000 sq. ft.) is higher than comparable jurisdictions. There are only a few large R-4 parcels, and this standard may be appropriate to maintain. However, the City should consider reducing minimums in the R-3 district, which will help encourage the development of more “missing middle” housing typologies.
- **Parking standards.** There is potential for reform of parking standards, especially multifamily parking standards. At present, the number of required spaces is not tied to the number of bedrooms, and the requirement of covered parking can limit feasibility and

increase costs. Reductions or reforms may be particularly appropriate along corridors, with mixed-use projects, and in Specific Plan areas.

- **Density bonus ordinance.** The City’s density bonus ordinance must be updated pursuant to recent State law. Additional bonuses (including up to 80% for completely affordable projects) are now available.
- **Emergency shelters.** State law permits up to 300 feet separation from other shelters, however the City requires a 500-foot separation. This is a constraint and must be corrected. The City also needs to provide standards for Low-Barrier Navigation Centers pursuant to AB 101.
- **Transitional and supportive housing.** The status of transitional and supportive housing is unclear – both housing types must be permitted equivalently to similar residential buildings. The existing Municipal Code provides conflicting information on the by-right status of these housing types that needs to be corrected. Restrictions on where SRO housing and community care facilities can locate should also be reviewed and modified to permit these housing types in areas where similar uses are allowed.
- **Employee/farmworker housing.** While there is little housing need for farmworkers in San Pablo, pursuant to State law the City must include a definition of “employee housing” that is available to farmworkers. Employee housing for six or less people must be treated the same as a single-family home.
- **D3 Overlay.** The D3 Overlay restricts all residential development within 500 feet of the I-80. Pursuant to BAAQMD guidelines, however, there are mitigation measures that can be implemented to reduce pollution concerns while still allowing some residential development. Prohibiting residential development outright may constrain overall housing supply.
- **Subdivision costs.** The cost of subdividing land is particularly high in San Pablo due to the lack of a City-employed land surveyor. This substantially reduces the ability of property owners to successfully split their lots through SB 9, which may provide an important source of additional missing middle housing in the city.
- **ADU standard reforms.** ADU standards are generally appropriate, however additional flexibility could be provided for larger ADUs. This may include a CUP for two-story ADUs.
- **Objective development standards.** To ensure that the review of residential projects is based on objective standards as required by the Housing Accountability Act and other State requirements (e.g. urban lot splits under SB 9 and expedited ministerial review pursuant to SB 35), Existing residential development standards need to be revised and, as necessary, revised to comply with mandates for using objective standards for review of residential projects. This review should include existing procedures for review and approval of both ministerial zoning actions and CUPs to comply with applicable statutory and case law.

NON-GOVERNMENTAL CONSTRAINTS

- **Small lot sizes and limited vacant land.** Parcels in San Pablo are relatively small, which can make multifamily and higher-density development difficult to achieve. Further, there is limited available vacant land in the city for development. Costs associated with infill development can make affordable housing projects more difficult to complete. The City should consider actions aimed at incentivizing residential development on small lots, small lot consolidation, and other efforts to reduce costs associated with infill development.
- **Environmental constraints.** Major environmental constraints to development include seismic, slope, flooding, and wildfire concerns. Air and noise quality adjacent to the I-80 is also a substantial issue. Some of these constraints can be mitigated, while others provide a barrier to development.
- **Market constraints.** The cost of land and construction is relatively high in San Pablo, although the city commands lower market rents than other Bay Area jurisdictions. This has led to reduced incentives for new market rate residential development in the city. Financing for affordable housing development is limited, especially at the local and county level.
- **Availability of financing.** Financing for affordable housing development is limited, especially at the local and county level. Although housing in San Pablo is relatively affordable compared with other jurisdictions in Contra Costa County, financing options are limited for first-time and low-income home buyers unable to afford the required downpayment or qualify for conventional mortgage financing-
- **Social constraints.** General discrimination in development preferences due to San Pablo's status as a majority Latino and lower-income jurisdiction has also limited housing supply in the city. There is limited developer interest in the city due to perceived notions of resident preferences and potential profitability. These barriers might be reduced by City actions to facilitate land assembly, revise regulations to provide developers with greater flexibility and an easier review process as well as programs to improve the appearance of residential and commercial areas.

Appendix D: Assessment of Fair Housing

California Assembly Bill (AB) 686, passed in 2018, amended California Government Code Section 65583 to require all public agencies to affirmatively further fair housing (AFFH). AB 686 defined “affirmatively further fair housing” to mean “taking meaningful actions, in addition to combat discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity” for persons of color, persons with disabilities, and other protected classes. AB 686 requires an assessment of fair housing in the Housing Element which includes the following components: a summary of fair housing issues and assessment of the City’s fair housing enforcement and outreach capacity; an analysis of segregation patterns and disparities in access to opportunities, an assessment of contributing factors, and an identification of fair housing goals and actions.

San Pablo is a member of the Contra Costa County Consortium (Consortium), which jointly plans for the housing and community development needs of the county. This includes the allocation of Community Development Block Grant (CDBG) funds received from the Department of Housing and Urban Development (HUD) and the production of associated documents, like the Analysis of Impediments to Fair Housing Choice (AI). In 2019 the Consortium produced the 2020-2025 AI to fulfill its federal AFFH obligation. The assessment provided in this chapter relies on this document as a baseline for understanding fair housing issues in the region and in the city. Extensive public outreach, including within San Pablo, was conducted during the preparation of this document. Where necessary, additional data sources are used to provide an up-to-date assessment of fair housing in San Pablo, including AFFH Mapping and Data Resources provided by the State Department of Housing and Community Development (HCD).

D.1 Fair Housing Enforcement and Capacity

Fair housing services are an essential component of AFFH. They ensure that housing options are accessible to State and federally protected groups, including those based on race, color, gender, religion, national origin, familial status, disability, age, marital status, ancestry, source of income, sexual orientation, genetic information, or other arbitrary factors. Fair housing services help San Pablo residents understand and protect their right to access housing.

FAIR HOUSING SERVICES

The Eden Council for Hope and Opportunity (ECHO) Housing provides fair housing services to residents of several cities in Contra Costa County, including in San Pablo. They also serve Alameda County and Monterey County, and have offices in Antioch, Hayward, Livermore, Oakland, Monterey, and Salinas. ECHO Housing provides counseling, investigation, mediation, enforcement, and

education through their Fair Housing Program. Instances of housing discrimination can be reported to any of ECHO's program offices. According to the Consortium's 2020-2025 AI, ECHO Housing suffers from a severe lack of resources and capacity. As of 2019, only one fair housing counselor serves all of Contra Costa County. In general, fair housing organizations that serve the county are lacking resources, which reduces the strength of outreach to marginalized groups, such as limited-English proficiency (LEP) and LGBTQ residents. While the county has a Language Access Plan (LAP) and provides language assistance to persons upon request, the 2020-2025 AI notes that due to the diversity and size of the LEP population in the county a lack of language access may limit fair housing outreach efforts.

The City also works with Housing Rights, Inc. (HRI) to provide additional fair housing services. This partnership is meant to minimize and resolve conflicts and disputes between landlords and tenants, and eliminate all forms of housing discrimination by disseminating tenant/landlord conflict resolution information in the annual mailing about residential programs, and documenting residents' concerns at City Hall before forwarding them to HRI. The City implements a tracking system to record the number of referrals to HRI each year.

Housing discrimination complaints are one method to evaluate the extent of fair housing issues in a community. Complaints can be filed directly with HUD or with the California Department of Fair Employment and Housing (DFEH), or with local housing providers such as ECHO Housing. Per the 2019 Annual Report published by DFEH, there were a total of 320 discrimination complaints filed by residents of Contra Costa County, with 22 related specifically to housing. The 2020-2025 AI estimates that there have been 30 to 40 housing complaints filed across the county on an annual basis between 2011 and 2016. In San Pablo, across Fiscal Years (FY) 2016-2017, 2019-2020, and 2020-2021, ECHO Housing reported 12 total complaints or four complaints annually. Most complaints were on the basis of disability (66.7 percent), followed by race, income source, and other reasons (16.7 percent each). Percentages may not sum to 100 percent as complaints can be filed under multiple categories. Data for the period between 2017 and 2019 is not available, as ECHO Housing did not differentiate San Pablo cases from other urban county cases.

In November 2020, the City prepared an Affordable Housing Strategy (AHS) to develop policies and strategies to produce and maintain a supply of high-quality, affordable housing. In preparing the AHS, an online survey was distributed to the San Pablo community. Approximately 61 percent of respondents either strongly disagreed or disagreed with the statement: "I am familiar with local programs to help residents find an affordable home." While not specific to fair housing, this response indicates a lack of public awareness regarding local housing programs.

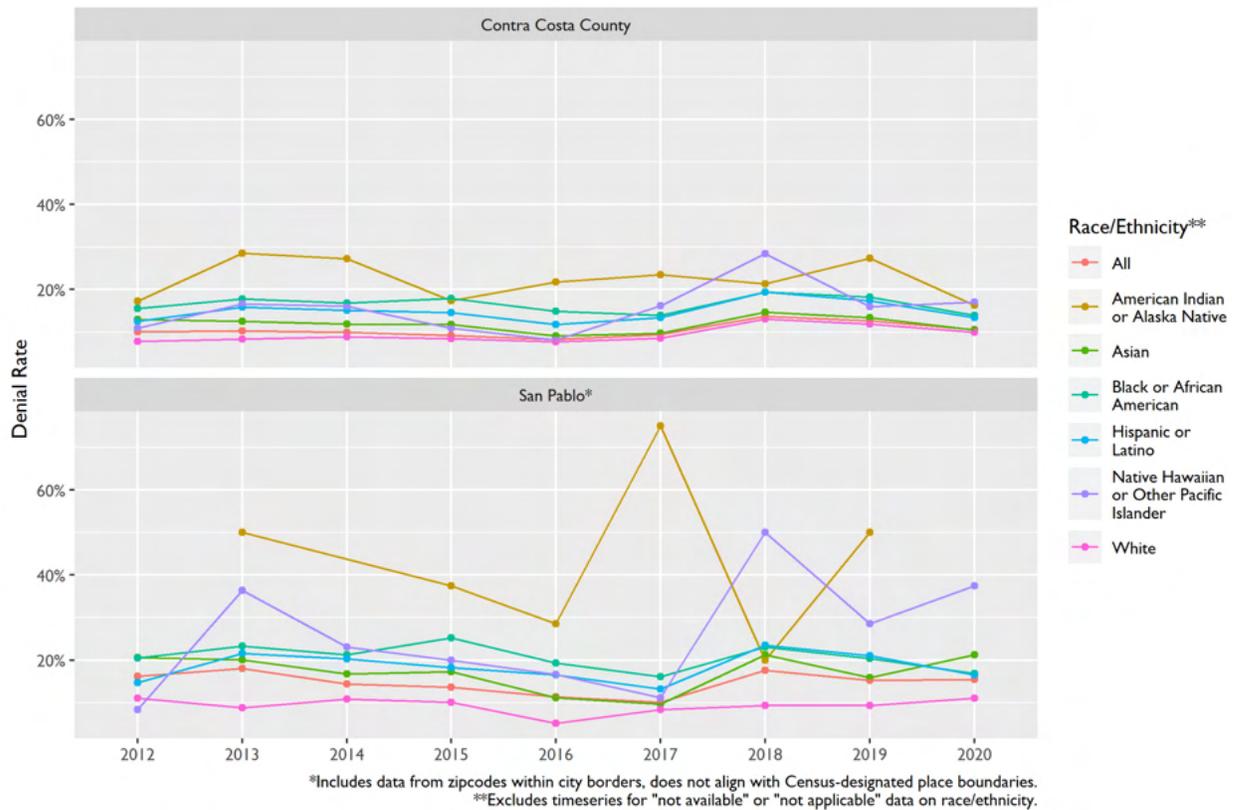

LENDING SERVICES

Discrimination in lending practices can be a major contributor to fair housing issues in a community, as this limits the ability of individuals to live in a location of their choosing. Loan denial rates can be derived from data provided by lending institutions in compliance with the Home Mortgage Disclosure Act (HMDA). The 2020-2025 AI found, based on 2016 HMDA data for the Oakland-Hayward-Berkeley region, that non-white applicants were consistently denied home loans at slightly higher rates than white applicants, with Pacific Islander and Native American applicants denied at the highest rates. The data does not indicate the grounds for the denial, and it cannot be proven on the basis of this data that the denials were not justified on the basis of standard financial criteria; however, the trend suggests

both that there is potential for bias within the financial system and that there may be a need for financial literacy training among non-whites to help those groups better understand how to improve their credit scores.

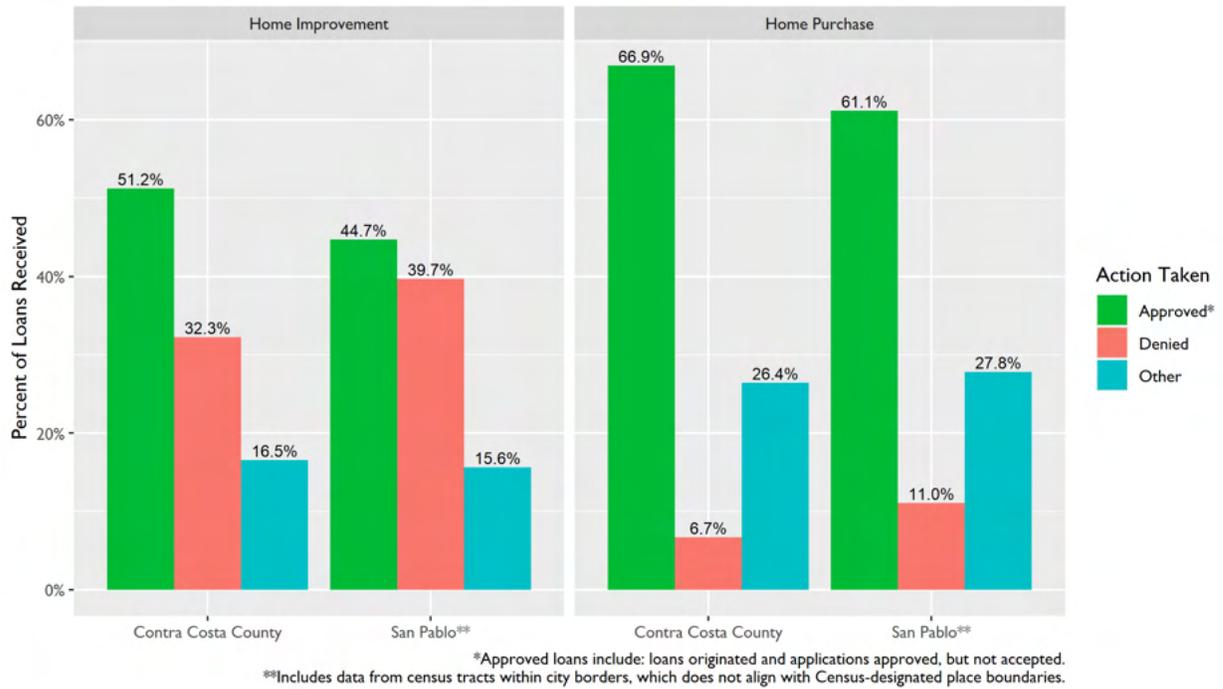

Charts 3-1 and 3-2 provide an overview of lending patterns in San Pablo when compared to the county. Chart 3-1 confirms the findings of the 2020-2025 AI and shows that such potentially discriminatory lending patterns have continued at the county level up until the year 2020. San Pablo has similarly seen uneven lending patterns and as of 2020 (the most recent year that data is available) Native Hawaiian or Other Pacific Islander and Asian applicants had the highest loan denial rates, followed by Black or African American and Hispanic or Latino applicants. Further, since 2012 white applicants in San Pablo have consistently experienced lower than average loan denial rates. The wider variation in loan denial rates for American Indian or Alaska Native and Native Hawaiian or Other Pacific Islander applicants is due to the low number of applicants during the period who identified as such. Chart 3-2 demonstrates that in 2020 the city had lower loan approval rates for both home improvement and home purchase loans than the county.

Source: Home Mortgage Disclosure Act Data, 2012-2020

Chart 3-2: HMDA Loan Applications, 2020

Source: Home Mortgage Disclosure Act Data, 2020

BROKERAGE SERVICES

Real estate brokers or salespersons whose business is in San Pablo may belong to one of several associations, but most likely belong to the Contra Costa Association of REALTORS (CCAR). Like all associations, CCAR has a Multiple Listing Service (MLS)—Paragon MLS—and is part of the NORCAL MLS ALLIANCE, an MLS data integration project across the seven leading MLSs in Northern California. CCAR is bound by the Code of Ethics and Standards of Practice of the National Association of REALTORS (NAR), which explicitly states in Article 10 that members shall not discriminate against any person on the basis of race, color, religion, sex, handicap, familial status, national origin, sexual orientation, or gender identity.

PROPERTY MANAGEMENT

The City’s AHS discusses the role of property management companies in San Pablo’s housing market. It notes that larger multifamily properties, which are often operated by professional property management companies, tend to command higher rents than smaller properties. These buildings are typically newer and provide modern amenities, while smaller rental buildings tend to be older, have smaller units, or provide fewer amenities. Property management companies are also more likely to raise rents on a regular basis. It is also estimated that in 2019, Wall Street investors owned and rented

103 single-family homes in San Pablo.¹ As discussed in the AHS, these types of property owners typically charge more than the area median rent and tenants report paying for maintenance and repairs as well as a variety of punitive fees, such as late payment fees.² Such practices may place additional burdens on groups already facing disproportionate housing needs.

D.2 Segregation and Integration

Patterns of segregation within a community may arise from both public and private housing discrimination, whether intentional or unintentional. Although racial and ethnic segregation is perhaps the most common and well-known form, other protected classes may also experience segregation. This section explores patterns and trends of segregation based on race and ethnicity, disability, familial status, and income level in San Pablo and the surrounding region. These groups are not mutually exclusive, and there may be considerable overlap across each protected class.

RACE AND ETHNICITY

Racial and ethnic patterns of segregation in San Pablo should be understood in the context of changing regional and local demographics. As shown in Table 3-1, the population of Contra Costa County has increased by 9.2 percent between 2010 and 2020, with a projected increase of about 14.2 percent between 2020 and 2040. The non-Hispanic white population has the lowest projected growth rate between 2020 and 2040, while the non-Hispanic multiracial population has the highest projected growth rate. While over 50 percent of the population is something other than non-Hispanic white, non-Hispanic whites represent a plurality of the population at about 45.5 percent, followed by Hispanics of any race (25.5 percent) and non-Hispanic Asians (15.3 percent).

The 2020-2025 AI confirms that the county is a large, diverse jurisdiction. The racial/ethnic makeup of the population is similar to the broader San Francisco-Oakland-Hayward, California Metropolitan Statistical Area (MSA), although the share of Hispanic residents is slightly higher and the share of non-Hispanic Asian or Pacific Islander is slightly lower in the county than in the broader region. The 2020-2025 AI also notes that diversity and integration are not synonymous, and that the county has both areas of racial and ethnic concentration as well as more integrated areas. Patterns of segregation will be explored in more detail below.

Hispanic (any race)	256,480	293,079	348,676	14.3%	19.0%
Total	1,052,554	1,149,800	1,312,536	9.2%	14.2%

1. NH refers to non-Hispanic.

Source: California Department of Finance, Table P-2D County Population by Total Hispanic and Non-Hispanic Race (2010-2060)

Despite the diversity of the county, population is unevenly distributed geographically by race/ethnicity. While East County is relatively white and wealthy, West County—including San Pablo—has a relatively high minority population and lower average household income. Table 3-2 breaks down 2019 population estimates by race/ethnicity by county subdivisions, or census county divisions (CCDs), in Contra Costa County.³ San Pablo, along with Richmond, is contained within West Contra Costa CCD, while cities like Walnut Creek and Concord are in Central Contra Costa CCD. West Contra Costa County CCD and Antioch-Pittsburg CCD contain the lowest proportion of non-Hispanic white residents (23.8 percent and 23.6 percent, respectively) in the county, compared to the 61.3 percent seen in Central Contra Costa CCD and 48.8 percent seen in East Contra Costa CCD. Figure 3-1 shows the concentration of non-Hispanic white residents by CCD.

Table 3-2: Population by Race/Ethnicity, Contra Costa County Subdivisions, 2019

<i>Race/Ethnicity</i>	<i>Percent Non-Hispanic White</i>
West Contra Costa CCD	23.8%
Briones CCD	36.1%
Central Contra Costa CCD	61.3%
Antioch-Pittsburg CCD	23.6%
Tassajara CCD	29.8%
East Contra Costa CCD	48.8%

Source: U.S. Census Bureau, Census 2019 ACS Five-Year Estimates (Table B03002)

³ County subdivisions, also referred to as census county divisions (CCDs), are delineated by the U.S. Census Bureau for statistical purposes but have no legal function and are not governmental units.

San Pablo is considered a majority-minority jurisdiction, as the majority of its population is something other than non-Hispanic white. This differs from other portions of the county, as evidenced in Figure 3-1, which tend to have a high proportion of white residents. As of 2019, according to American Community Survey (ACS) estimates, minority residents (i.e., all residents that identify as something other than non-Hispanic white) constituted about 92.3 percent of the city's total population. Unlike the county, about 60.1 percent of the city's population is Hispanic or Latino, followed by 17.2 percent non-Hispanic/Latino Asian and 10.7 percent non-Hispanic/Latino Black or African American, see Table 3-3. The number of non-Hispanic/Latino white, non-Hispanic/Latino Black or African American, and non-Hispanic/Latino American Indian and Alaska Native (AIAN) residents has steadily decreased since 2000. While the number of non-Hispanic/Latino Asian and non-Hispanic/Latino other residents decreased between 2000 and 2010, both groups have grown significantly between 2010 and 2019. On the other hand, while non-Hispanic/Latino Native Hawaiian and Other Pacific Islander residents increased between 2000 and 2010, this population has since declined. The number of Hispanic or Latino residents has continually increased since 2000. Population projections by race and ethnicity are unavailable at the city level as they have not been prepared by the DOF, the Association of Bay Area Governments-Metropolitan Transportation Commission (ABAG-MTC) or Contra Costa County.

Table 3-3: Population Growth by Race/Ethnicity, San Pablo, 2000 - 2019

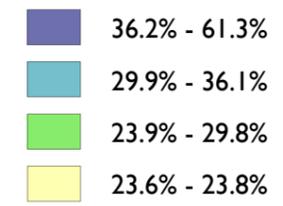

<i>Race/Ethnicity</i>	<i>Population</i>			<i>Percent Change</i>	
	<i>2000</i>	<i>2010</i>	<i>2019</i>	<i>2000-2010</i>	<i>2010-2019</i>
White, Non-Hispanic/Latino	4,886	2,944	2,386	-39.7%	-19.0%
Black or African American, Non-Hispanic/Latino	5,403	4,446	3,325	-17.7%	-25.2%
American Indian and Alaska Native, Non-Hispanic/Latino	125	73	50	-41.6%	-31.5%
Asian, Non-Hispanic/Latino	4,890	4,281	5,312	-12.5%	24.1%
Native Hawaiian and Other Pacific Islander, Non-Hispanic/Latino	146	156	134	6.8%	-14.1%
Other, Non-Hispanic/Latino	1,275	777	1,138	-39.1%	46.5%
Hispanic or Latino	13,490	16,462	18,622	22.0%	13.1%
Minority ¹	25,329	26,195	28,581	3.4%	9.1%
Total	30,215	29,139	30,967	-3.6%	6.3%

1. Minority refers to any person not listed as White, Non-Hispanic/Latino

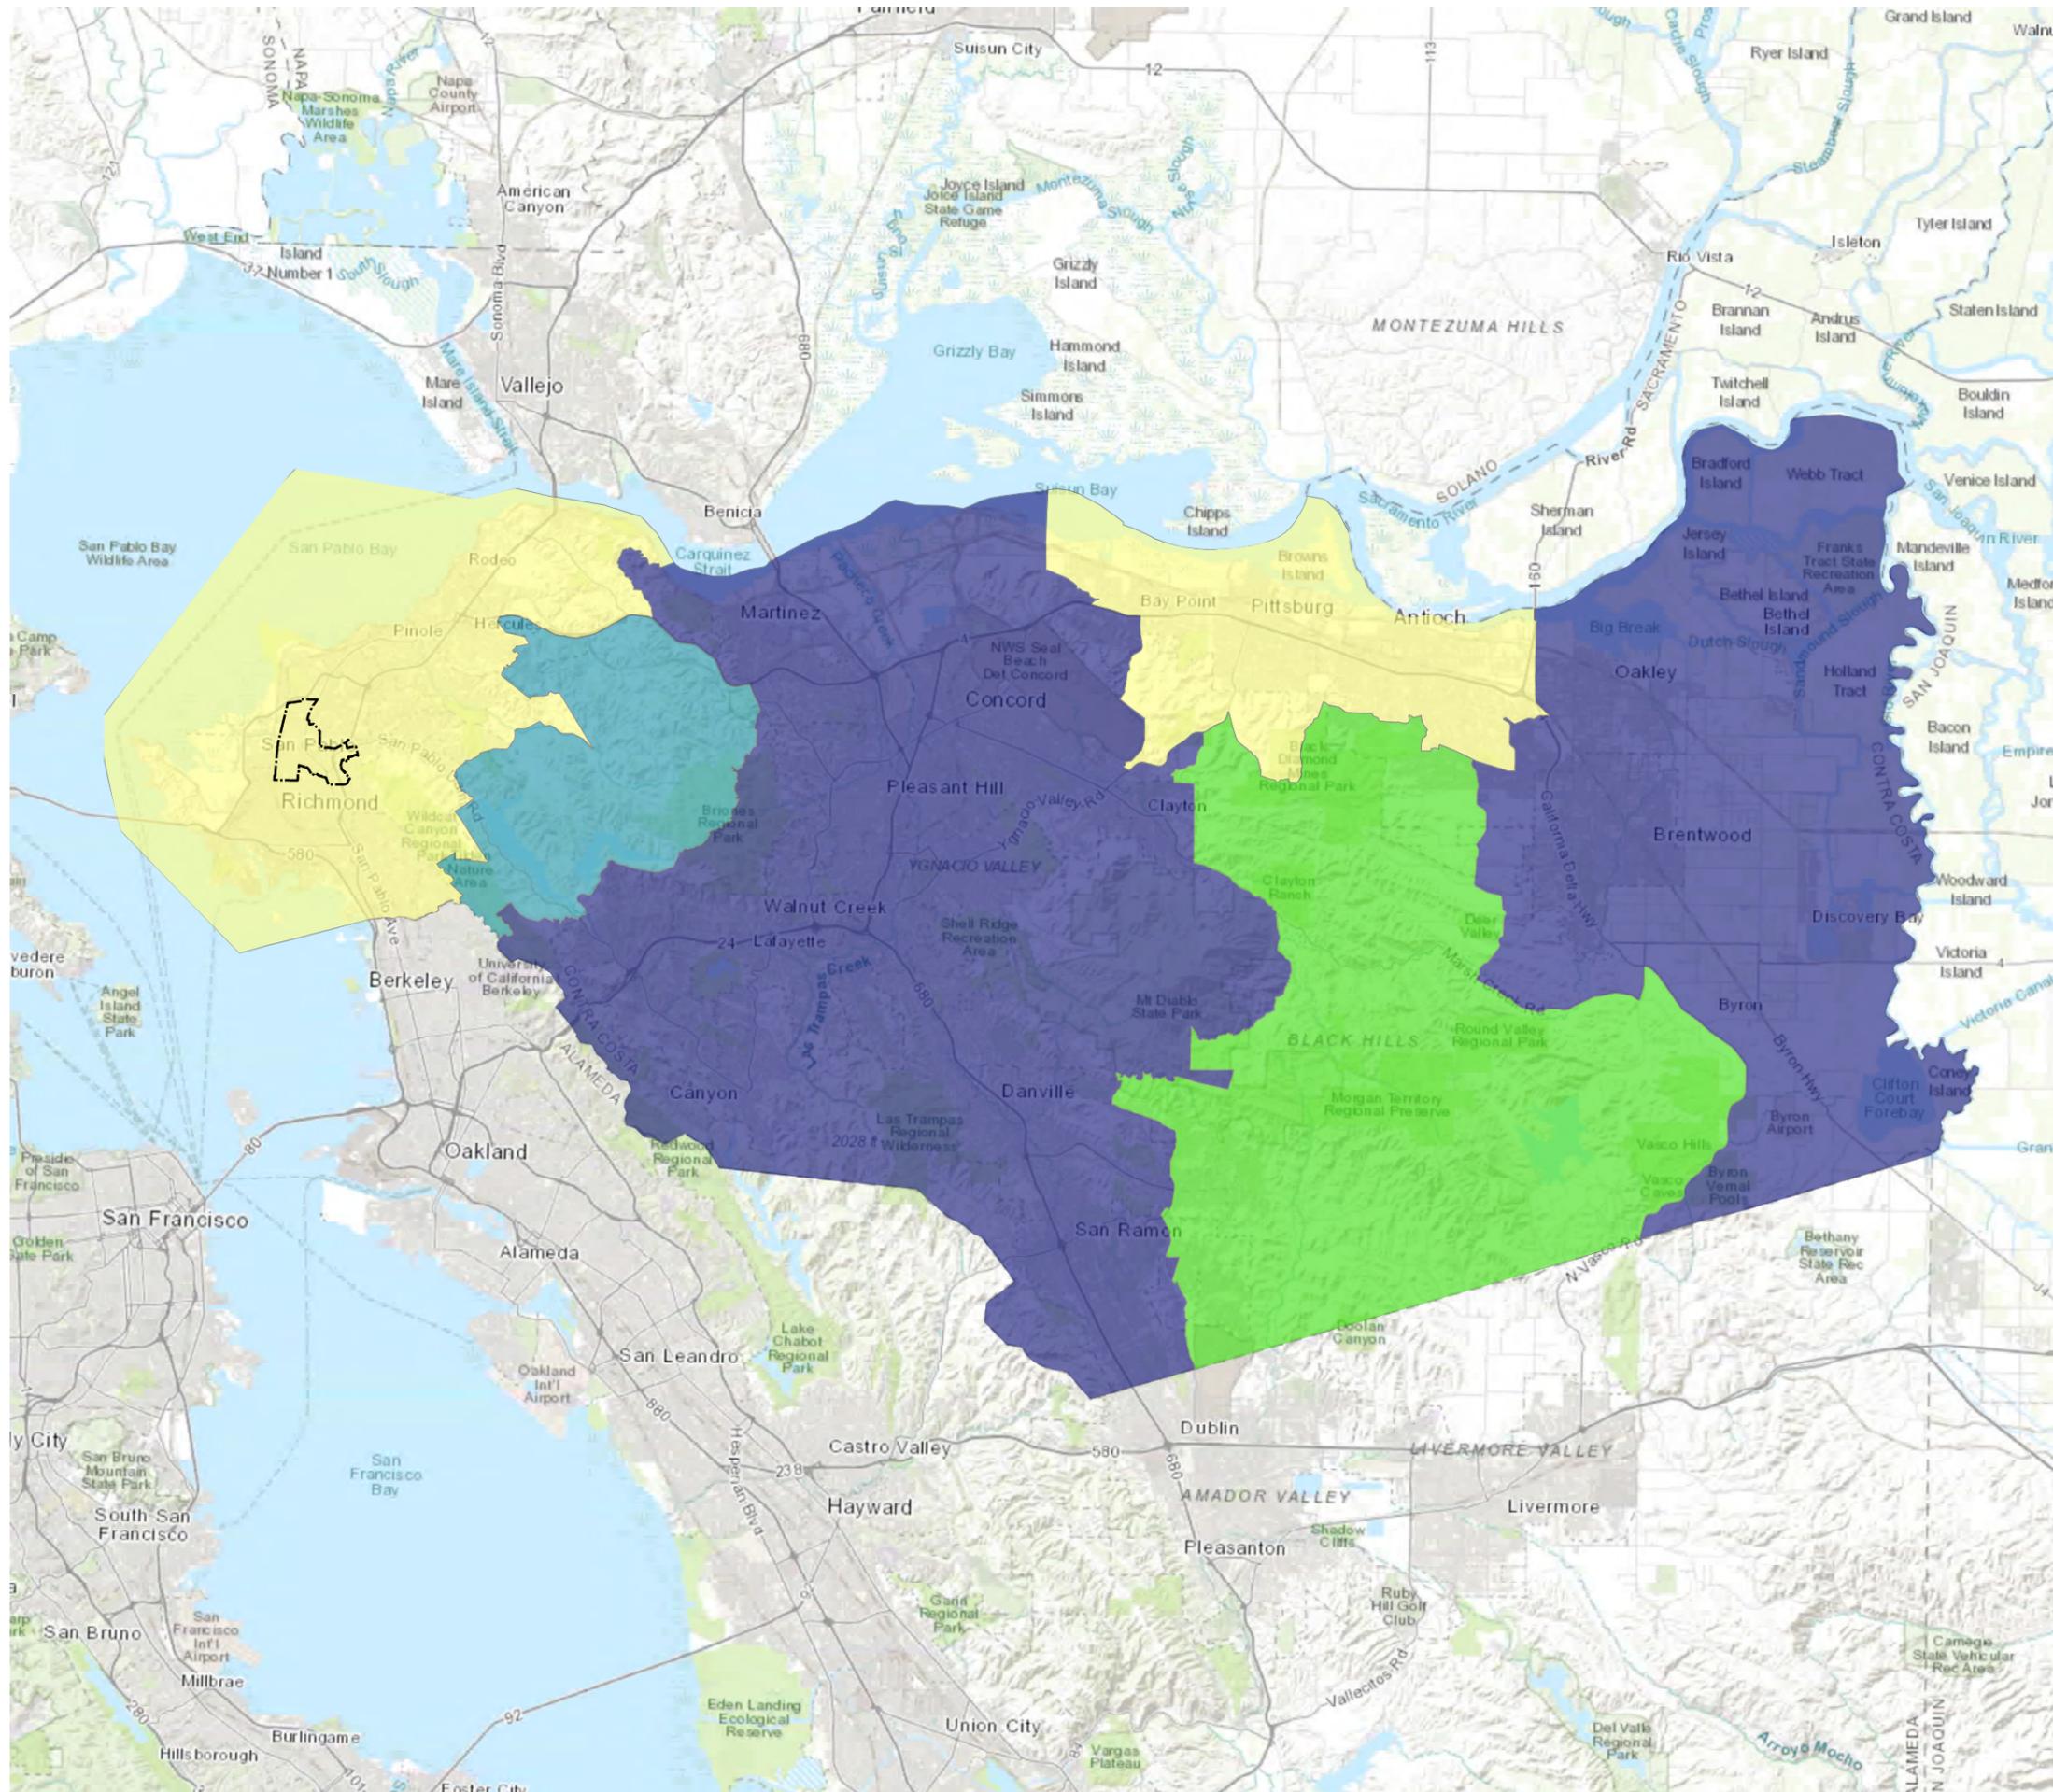

Source: U.S. Census Bureau, Census 2000 (SFI, Table P004); Census 2010 (SFI, Table P9); 2019 ACS Five-Year Estimates (Table DP05)

One method to gauge the extent of segregation in a jurisdiction is the dissimilarity index. The dissimilarity index measures the degree to which two groups are evenly distributed across a geographic area and is a commonly used tool for assessing residential segregation between two groups. The dissimilarity index provides values ranging from 0 to 100, where higher numbers indicate a higher degree of segregation among the two groups measured. According to HUD, dissimilarity index values

SAN PABLO GENERAL PLAN UPDATE
 Figure 3-1: Proportion Non-Hispanic White
 by County Subdivision

City Limits

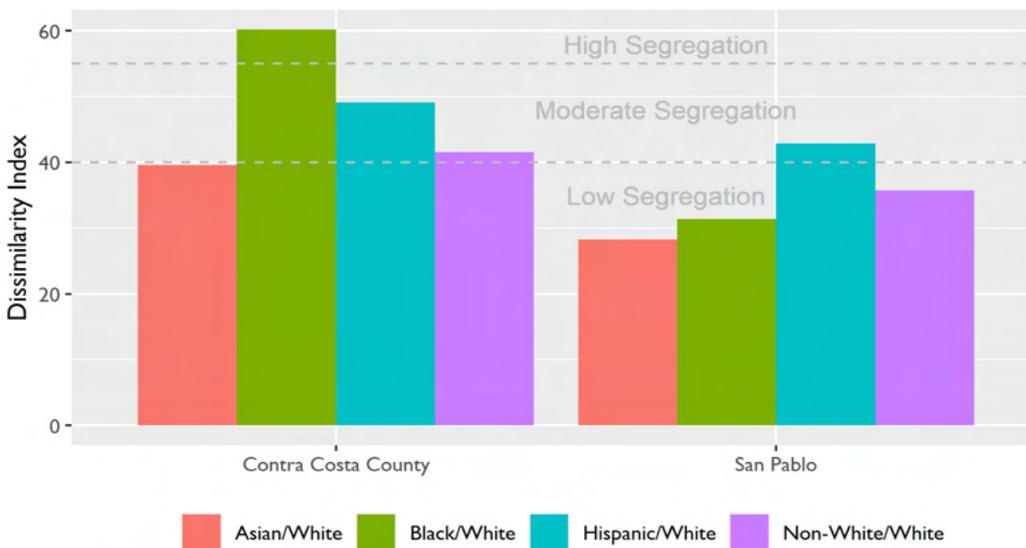

SOURCE: U.S. Census Bureau, Census 2019 ACS Five-Year Estimates (Table B03002);
 City of San Pablo, 2021; Contra Costa County GIS, 2021; Dyett & Bhatia, 2021

between 0 and 39.99 generally indicate low segregation, values between 40 and 54.99 generally indicate moderate segregation, and values between 55 and 100 generally indicate a high level of segregation. It is important to note that the dissimilarity index uses non-Hispanic white residents as the primary comparison group, whereas San Pablo is majority-minority jurisdictions. Dissimilarity index values compare racial and ethnic groups against the distribution of non-Hispanic white residents in a community and do not directly measure segregation between minority groups (e.g., non-Hispanic Black or African American and Hispanic or Latino segregation).

Chart 3-3 provides dissimilarity indices for San Pablo and the county derived from 2019 ACS estimates. While the county has relatively high levels of segregation, the city maintains relatively low levels. For instance, there is high segregation between Black and white residents in the county, but low levels of segregation for Black and white residents in San Pablo. However, there is a moderate level of segregation between Hispanic and white residents in the city.

Chart 3-3: San Pablo and Regional Dissimilarity Index

Source: U.S. Census Bureau, 2019 ACS Five-Year Estimates (Table B01003 and Table B03002)

The 2020-2025 AI finds that segregation in the county is primarily an inter-jurisdictional rather than an intra-jurisdictional phenomenon. It notes that there are high concentrations of Black and Hispanic populations in east and west county communities, while there are a low number Black and Hispanic residents in the central county. Geographically, San Pablo is part of West County. Hispanic residents are concentrated in San Pablo, as well as the cities of Pittsburg and Richmond. The trend of inter-city segregation explains why the county has higher levels of segregation as measured by the dissimilarity index while individual cities, like San Pablo, have relatively lower levels.

At the county level, segregation for Black residents has decreased since 1990, while levels of segregation for Hispanics and Asians/Pacific Islanders have increased. The 2020-2025 AI explains that the primary driver of desegregation has been the out-migration of Black residents from historically Black neighborhoods in the Cities of Richmond, Oakland, and San Francisco towards more suburban jurisdictions in the county with historically smaller Black populations. However, when using the alternate exposure index to measure segregation, the 2020-2025 AI concludes that the exposure of Black

residents to non-Hispanic white residents has not changed, and that as the proportion of Hispanic and Asian residents in the county has increased, the neighborhoods in which Black residents have historically lived have become increasingly less Black. Exposure estimates the probability that a member of one racial/ethnic group will interact with a member of another racial/ethnic group in their neighborhood. While the dissimilarity index shows a decreasing imbalance between Black and white residents, this is a byproduct of the increasing share of other minority populations. As the 2020-2025 AI notes, neighborhood amenities are still largely concentrated in predominantly white neighborhoods.

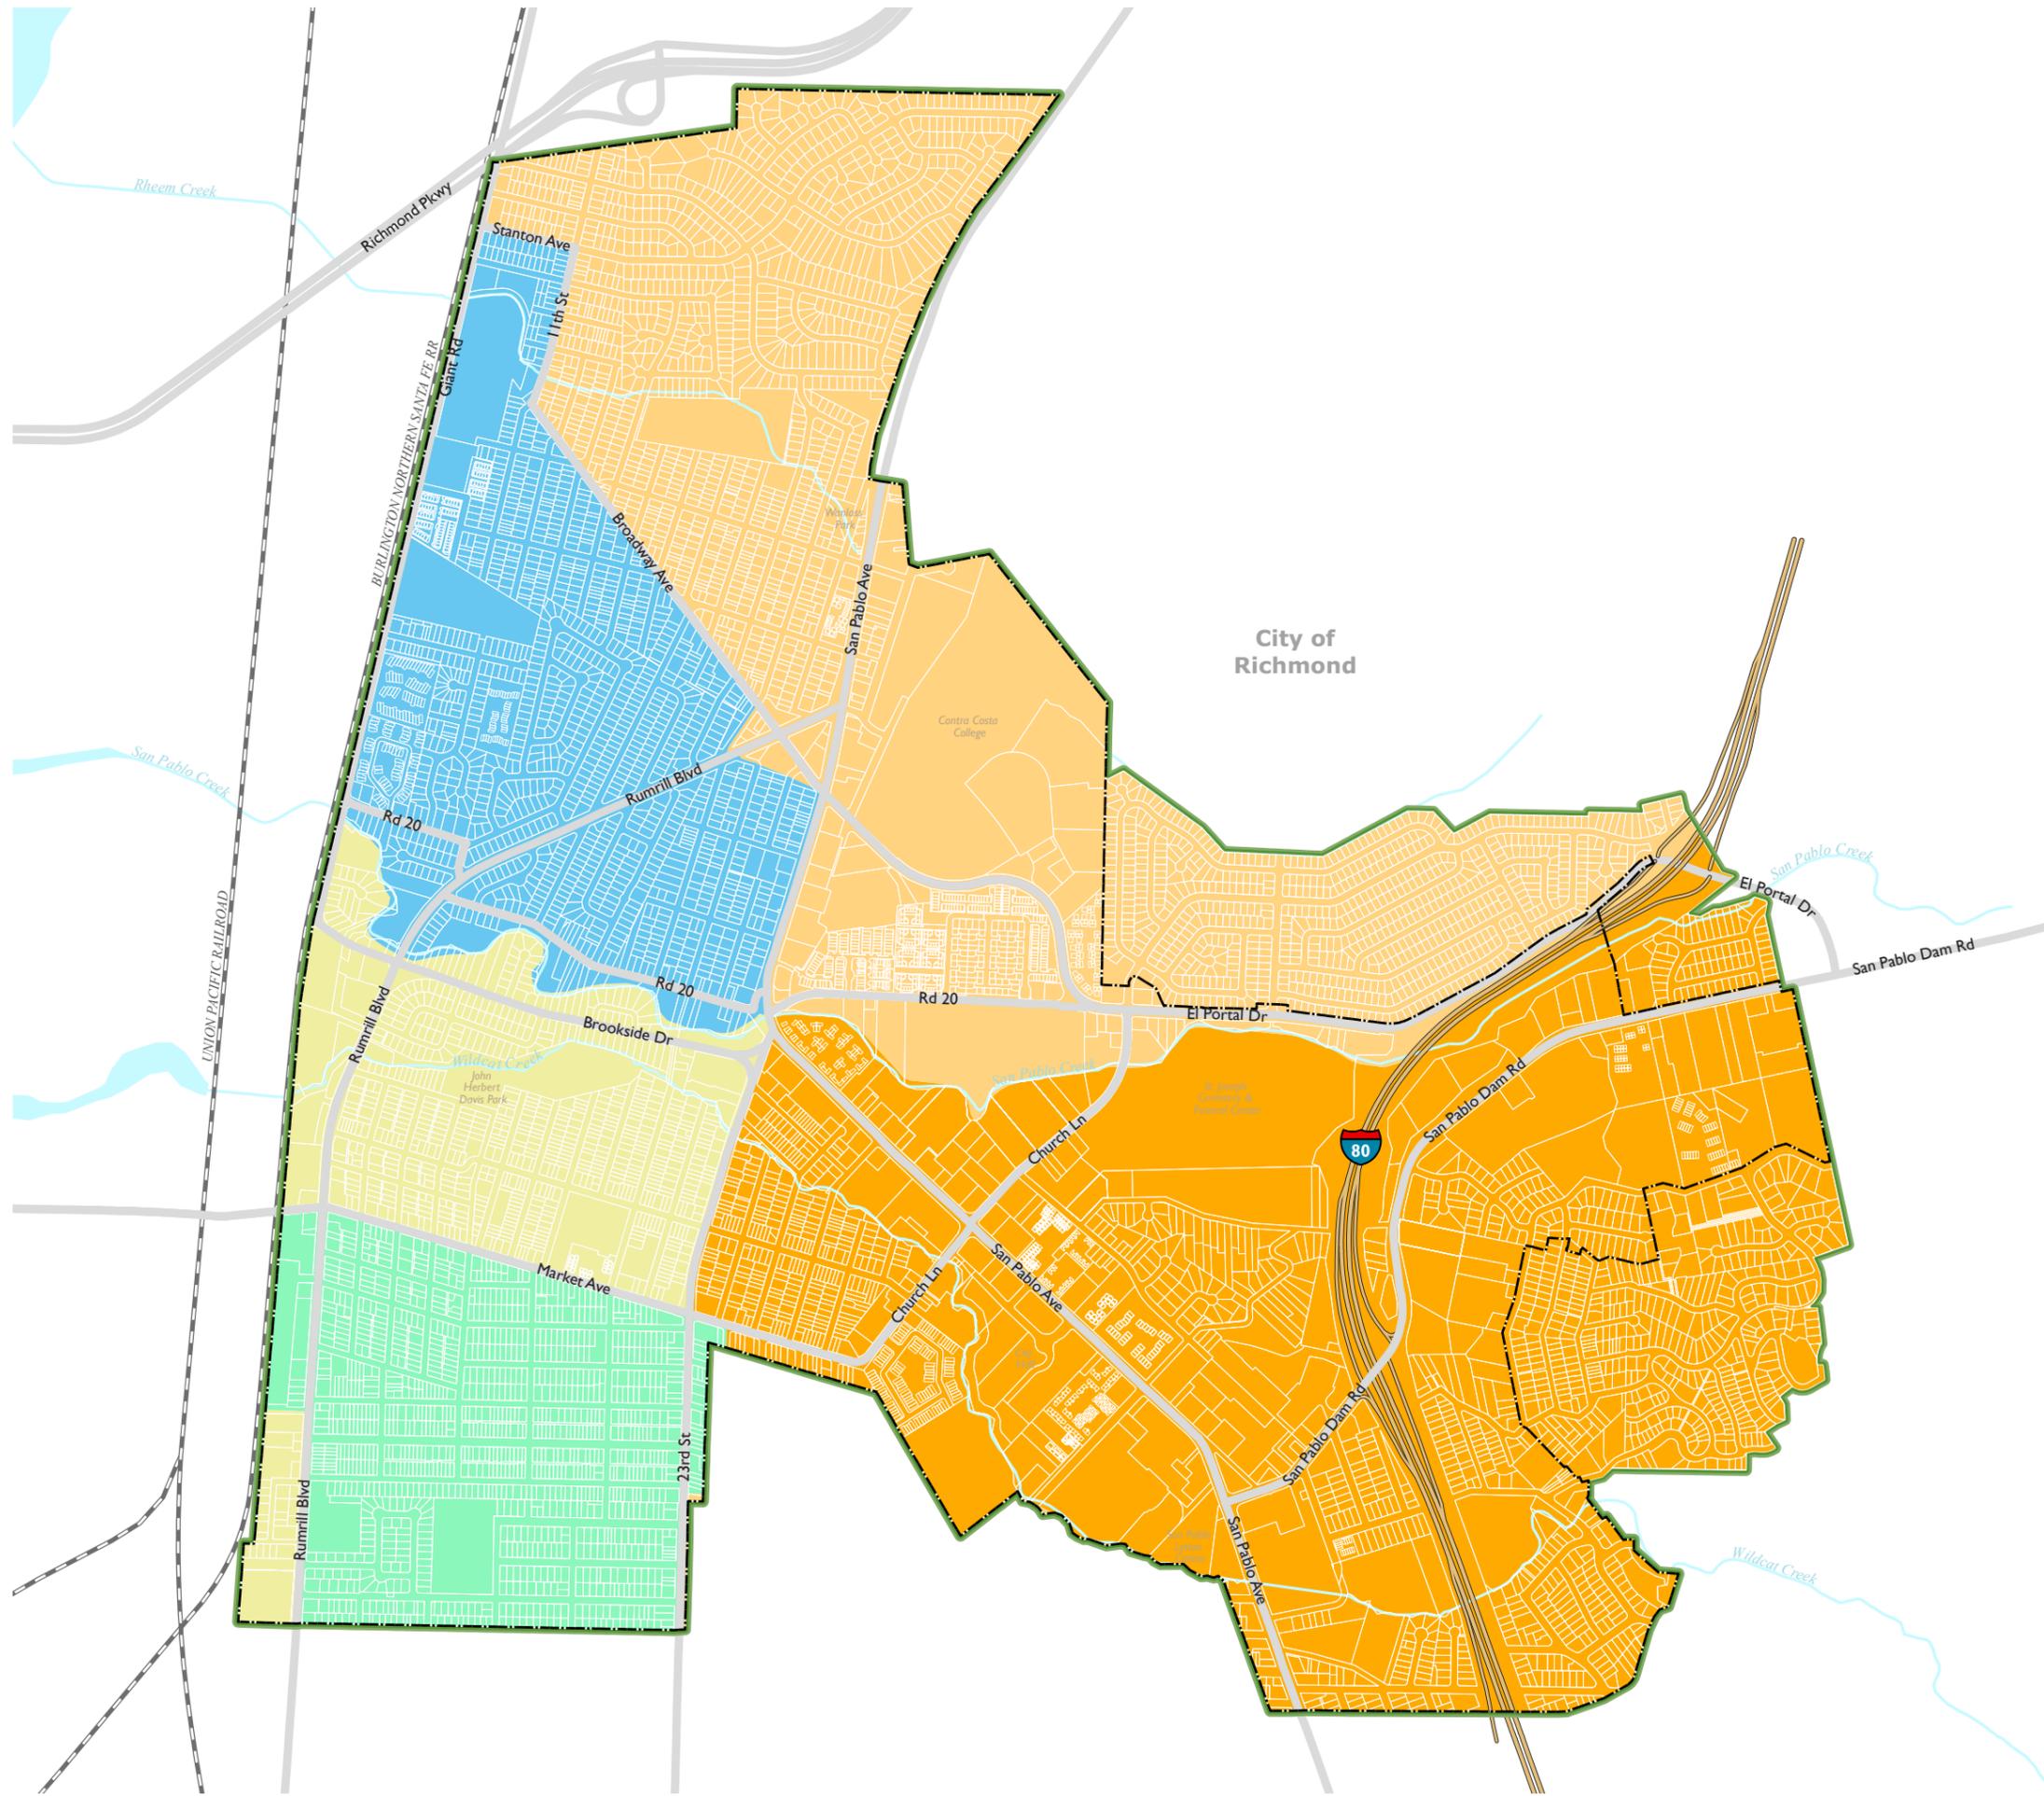

The shortcomings of the dissimilarity index, including the fact that San Pablo is a majority-minority city, may not capture the nuances of segregation between minority groups within the city. Further, the dissimilarity index is only available at the citywide level. To capture these nuances, HCD has provided neighborhood segregation typologies developed by the Urban Displacement Project (UDP) at UC Berkeley. These typologies identify tracts based on which racial/ethnic groups have more than 10 percent representation within a given census tract. The typologies consider five racial/ethnic groups—including Black, Latinx, White, Asian, and Other. As shown in Figure 3-2, while most of the city is either 3 or 4 Group Mix, there are concentrations of ethnic/racial groups in the western portion of the city. The southwestern portion of the city is Mostly Latinx, while the areas north of it are Black-Latinx and Asian-Latinx. Further, as displayed in Figure 3-3, most of the city is classified as Higher Diversity by the 2018 ESRI Diversity Index, with two sections of relatively lower diversity in the central and eastern portions of the city.

While there is a relatively higher concentration of Latino residents in the western portion of San Pablo, the 2020-2025 AI concluded that it is unlikely that existing land uses and zoning correlate with a concentration of non-white and low-income residents in San Pablo. While multifamily residence zones primarily lie along the San Pablo Avenue and 23rd Street corridors—which are the sites of increased diversity in the city—zoning for single-family residences remains dominant across the city. Further, the City is currently preparing the Rumrill Corridor Plan which will target development along Rumrill Boulevard in the portion of the city classified as Mostly Latinx and Black-Latinx. This will likely include increased multifamily residential or mixed-use development in those areas.

The 2020-2025 AI identifies three trends that will likely contribute to future segregation in the county: the regional housing crisis, aftereffects of the foreclosure crisis, and open space and growth boundaries. The high costs of new housing, as well as gentrification and displacement pressures, may continue patterns of segregation at the regional level as lower-income households and Black and Hispanic or Latino households face increasingly constrained housing choices. Further, the foreclosure crisis, which was particularly acute in San Pablo, has contributed to the decline of household wealth in communities of color, the deterioration of the physical quality of homes, and reduced opportunities for affordable homeownership. Finally, conserved open space limits the amount of land available for the development of higher-density affordable housing and raises equity questions in evaluating the future use of protected areas.

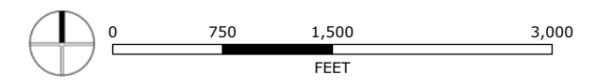

The 2020-2025 AI identifies three trends that will likely contribute to future segregation in the county: the regional housing crisis, aftereffects of the foreclosure crisis, and open space and growth boundaries. The high costs of new housing, as well as gentrification and displacement pressures, may continue patterns of segregation at the regional level as lower-income households and Black and Hispanic or Latino households face increasingly constrained housing choices. Further, the foreclosure crisis, which was particularly acute in San Pablo, has contributed to the decline of household wealth in communities of color, the deterioration of the physical quality of homes, and reduced opportunities for affordable homeownership. Finally, conserved open space limits the amount of land available for the development of higher-density affordable housing and raises equity questions in evaluating the future use of protected areas.

PERSONS WITH DISABILITIES

Persons with disabilities may face discriminatory housing practices based on their disability, including the lack of accessible dwellings and refusal by housing providers to provide reasonable accommodations. As noted in the Housing Needs Assessment Appendix, according to 2019 ACS five-year estimates, 3,685 persons (12.0 percent of the non-institutionalized population) in San Pablo had a disability. This proportion is about equivalent to Contra Costa County (11.2 percent) and slightly higher than that of the Bay Area (9.6 percent). As shown in Figure 3-4 below, there is a slight concentration of persons with a disability in the southern and eastern portions of the city. However, no single census tract contains a population with a disability that exceeds 20 percent of the tract's total population, which is the threshold typically used by HCD as an indicator of overconcentration.

FAMILIAL STATUS

Familial status may be another basis for discriminatory housing practices, including discrimination against families with children. Such discrimination may limit the choices of where families can live and lead to geographic concentrations within a community. Female householders with children in particular may be targets of discrimination. Within San Pablo, as indicated in Table 3-4, most children under 18 years live in married-couple households. About 29.3 percent of children live in female householder, no spouse present households, while 11.8 percent of children live in male householder, no spouse present households.

Table 3-4: Children Under 18 Years in San Pablo Households, 2019

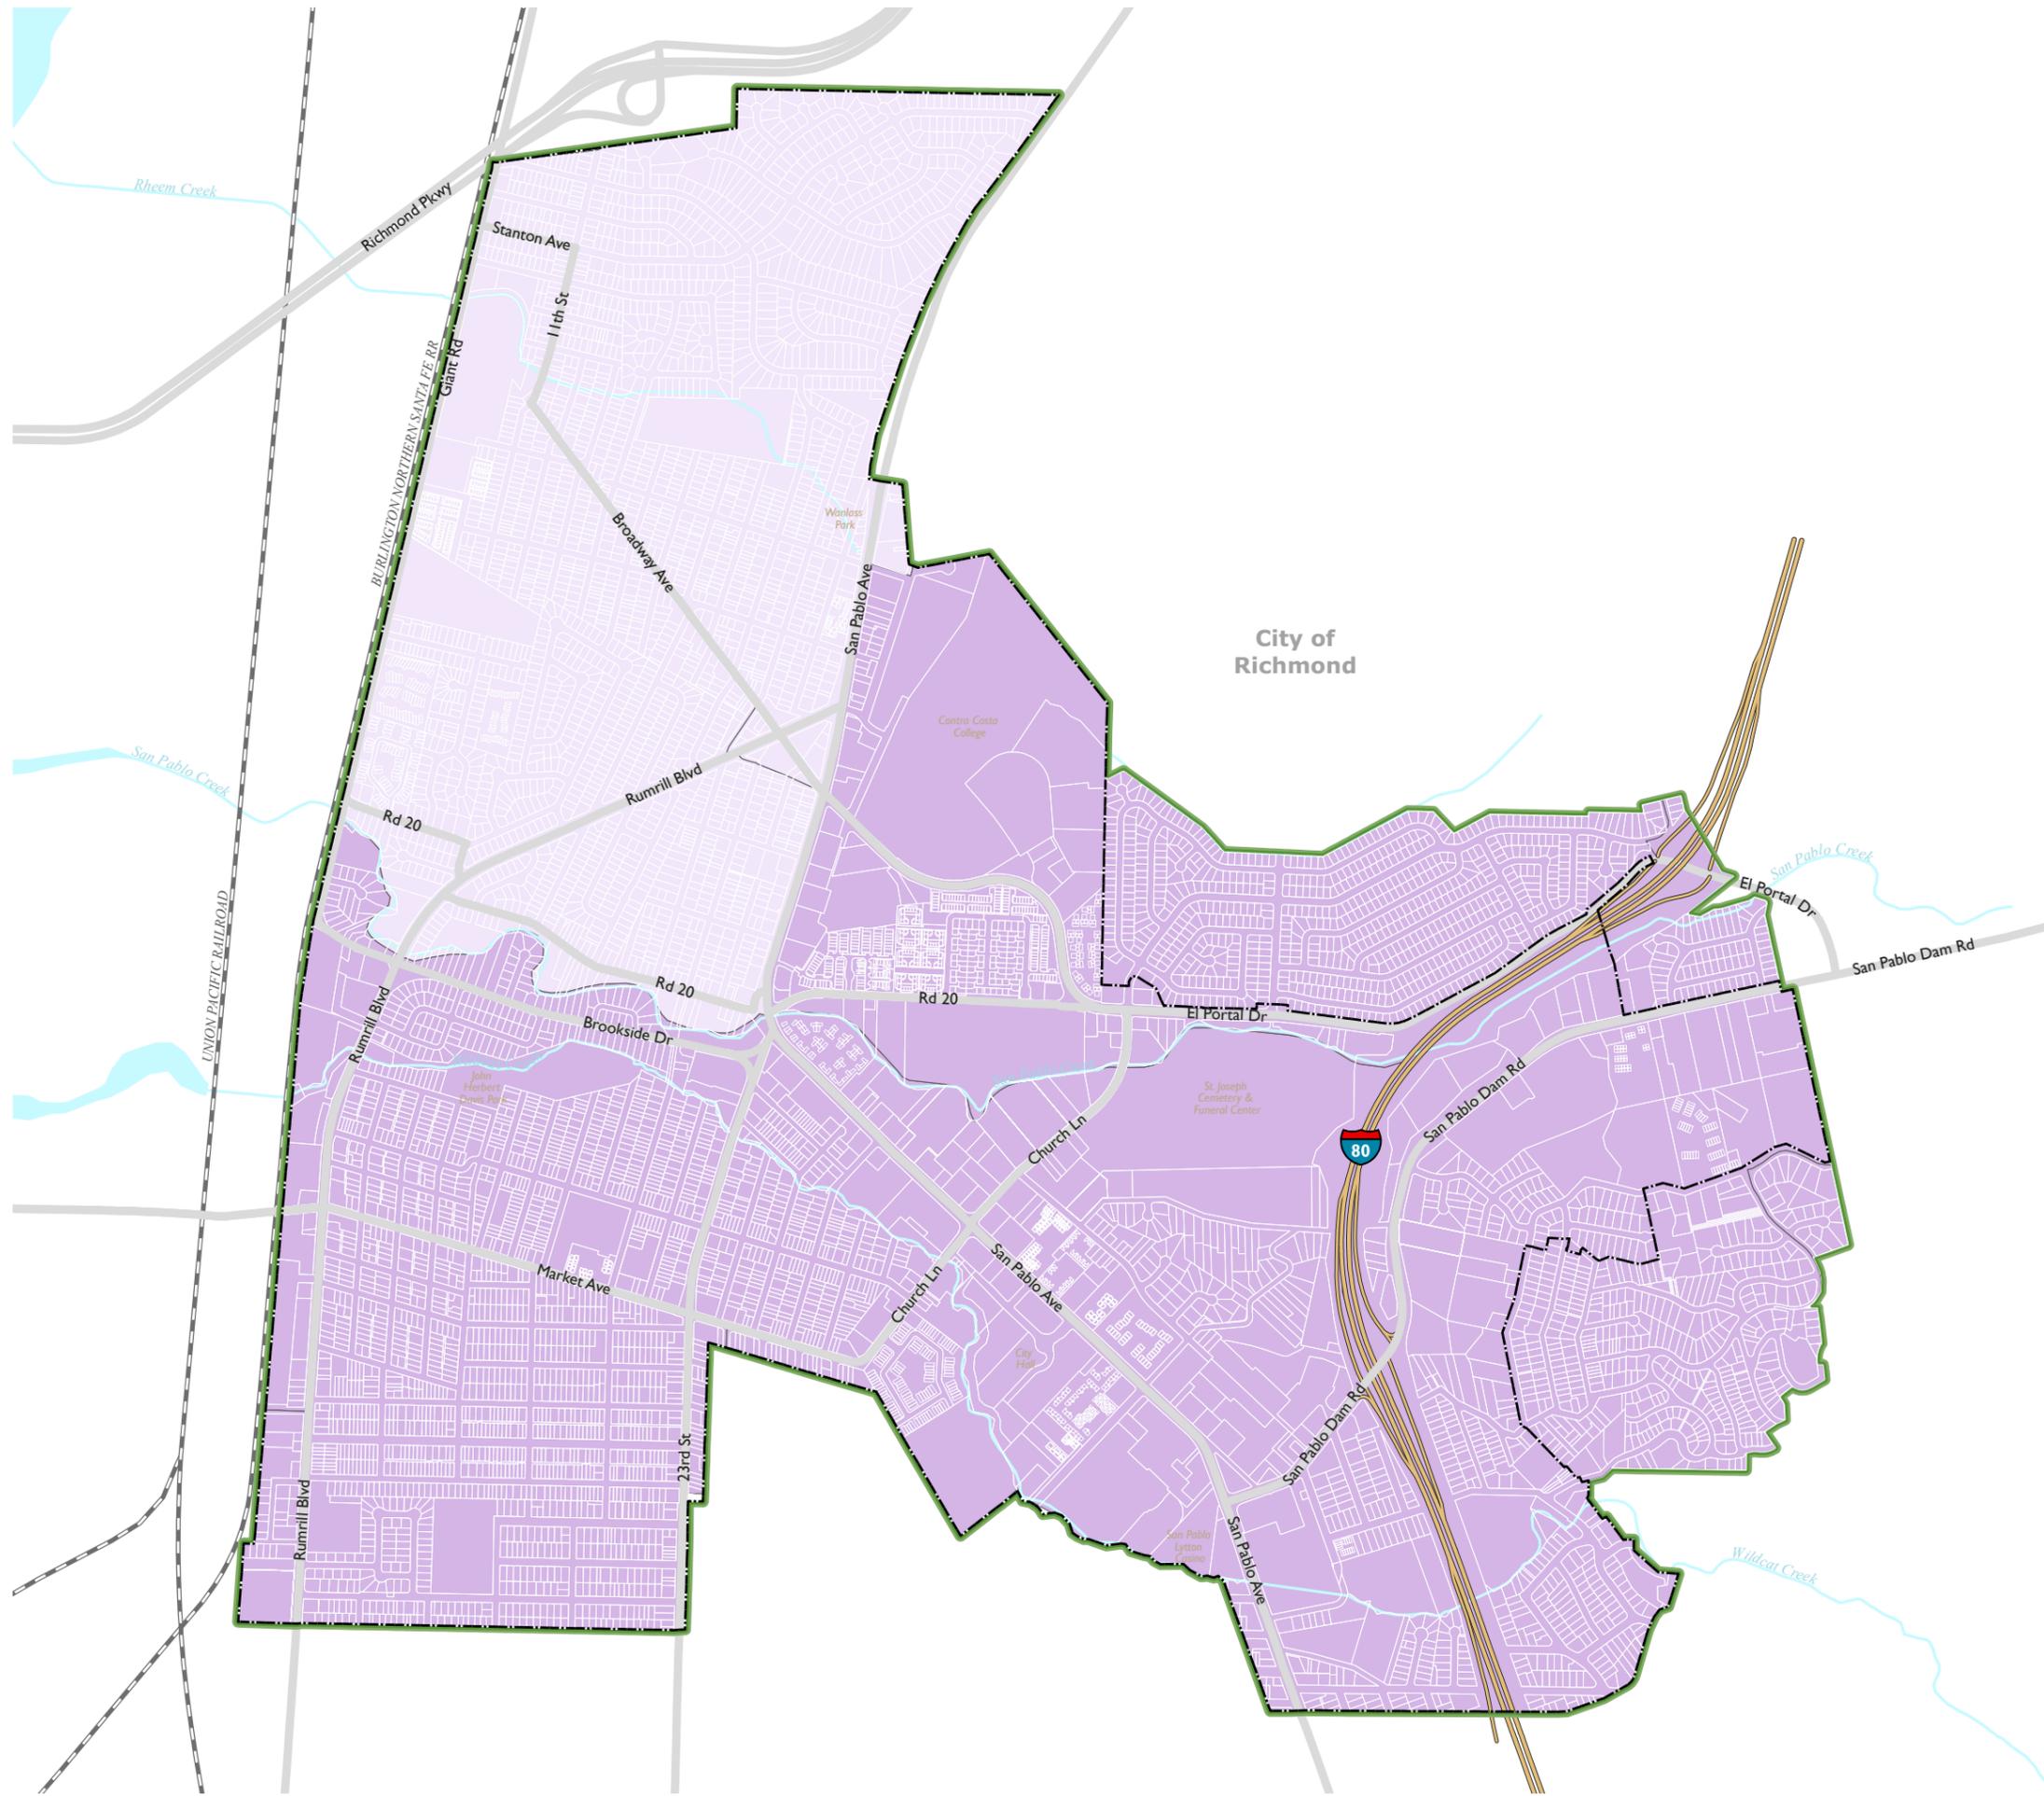

<i>Household Type¹</i>	<i>Number</i>	<i>Percent</i>
Married-Couple	4,486	58.9%
Male Householder, No Spouse Present	903	11.8%
Female Householder, No Spouse Present	2,233	29.3%
Other	0	0.0%
Total	7,622	100.0%

1. All households with children are considered family households.

Source: U.S. Census Bureau, 2019 ACS Five-Year Estimates (Table S0901)

Figures 3-5 through 3-6 below indicate there are some patterns of geographic concentration based on familial status. These figures show the percentage of children within a census tract that live within a certain type of family household. For instance, Figure 3-5 shows there is a comparatively lower share of children living in female-headed households in the southern and eastern portions of the city, while Figure 3-6 shows a relatively higher concentration of children living in married-couple households in the southern, eastern and northern portions of the city. At the regional scale, the 2020-2025 AI notes that Contra Costa County has a higher percentage of households that consist of families with children than in the broader Bay Area region. Within the county, there is a concentration of households headed by single mothers in San Pablo, Richmond, North Richmond, Bay Point, Pittsburg, and Antioch. These areas tend to have high combined Black and Hispanic/Latino populations. This differs from areas in the central county, which have low concentrations of single mothers and have relatively higher populations of white or Asian and Pacific Islander communities.

INCOME LEVEL

Geographic concentration by income, including concentration of poverty, is another type of segregation that may exist within a jurisdiction. The concentration of low- or moderate-income (LMI) individuals provides one method to gauge the extent of such segregation. HUD defines an LMI area as a census tract or block group where over 51 percent of the population is LMI – based on the HUD income definition of up to 80 percent area median income (AMI). Figure 3-7 provides the distribution of LMI block groups across San Pablo. As can be seen, nearly the entire city is considered an LMI area, with a small portion in the southeastern corner that does not cross the 51 percent threshold.

Poverty rates and the concentration of poverty over time can provide an insight into the economic wellbeing of households and individuals in the county and in San Pablo. According to the 2020-2025 AI, poverty in the eastern portion of the county has risen dramatically as lower-income residents have been displaced from more expensive parts of the Bay Area. In the county, the highest concentrations of both low-income and non-white populations are in Antioch, Concord, Hercules, Pinole, Pittsburg, Richmond, San Pablo, and Walnut Creek (low-income only).

As of 2019, about 16.3 percent of San Pablo's population is below the federal poverty line. Further, poverty is unevenly distributed by race/ethnicity (see Table 3-5). Residents living below the poverty line who identify as white alone, Black or African American alone, non-Hispanic/Latino white, or Hispanic or Latino of any race are overrepresented when compared to their share of the total population, while residents who identify as Asian alone are underrepresented among those below the poverty line. For instance, while Black or African American alone residents make up 10.8 percent of the total population, they constitute 14.6 percent of the population living below the poverty line. Residents who identify as Asian alone, on the other hand, make up 17.4 percent of the population but only constitute 11.4 percent of the population living below the poverty line.

Table 3-5: Poverty Rates in San Pablo, 2019

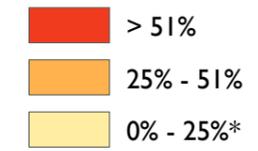

Race/Ethnicity ¹	Total Population		Population Below Poverty Level	
	Number	Percent	Number	Percent
White alone	11,284	36.9%	2,237	45.0%
Black or African American alone	3,315	10.8%	728	14.6%
American Indian and Alaska Native alone	156	0.5%	19	0.4%
Asian alone	5,306	17.4%	566	11.4%
Native Hawaiian and Other Pacific Islander alone	134	0.4%	0	0.0%
Other alone	10,378	33.9%	1,425	28.6%
Hispanic or Latino origin (of any race)	18,575	60.8%	3,052	61.3%
White alone, not Hispanic or Latino	2,263	7.4%	496	10.0%
Total	30,573	100.0%	4,975	100.0%

1. People who identify as Hispanic or Latino may be any race.

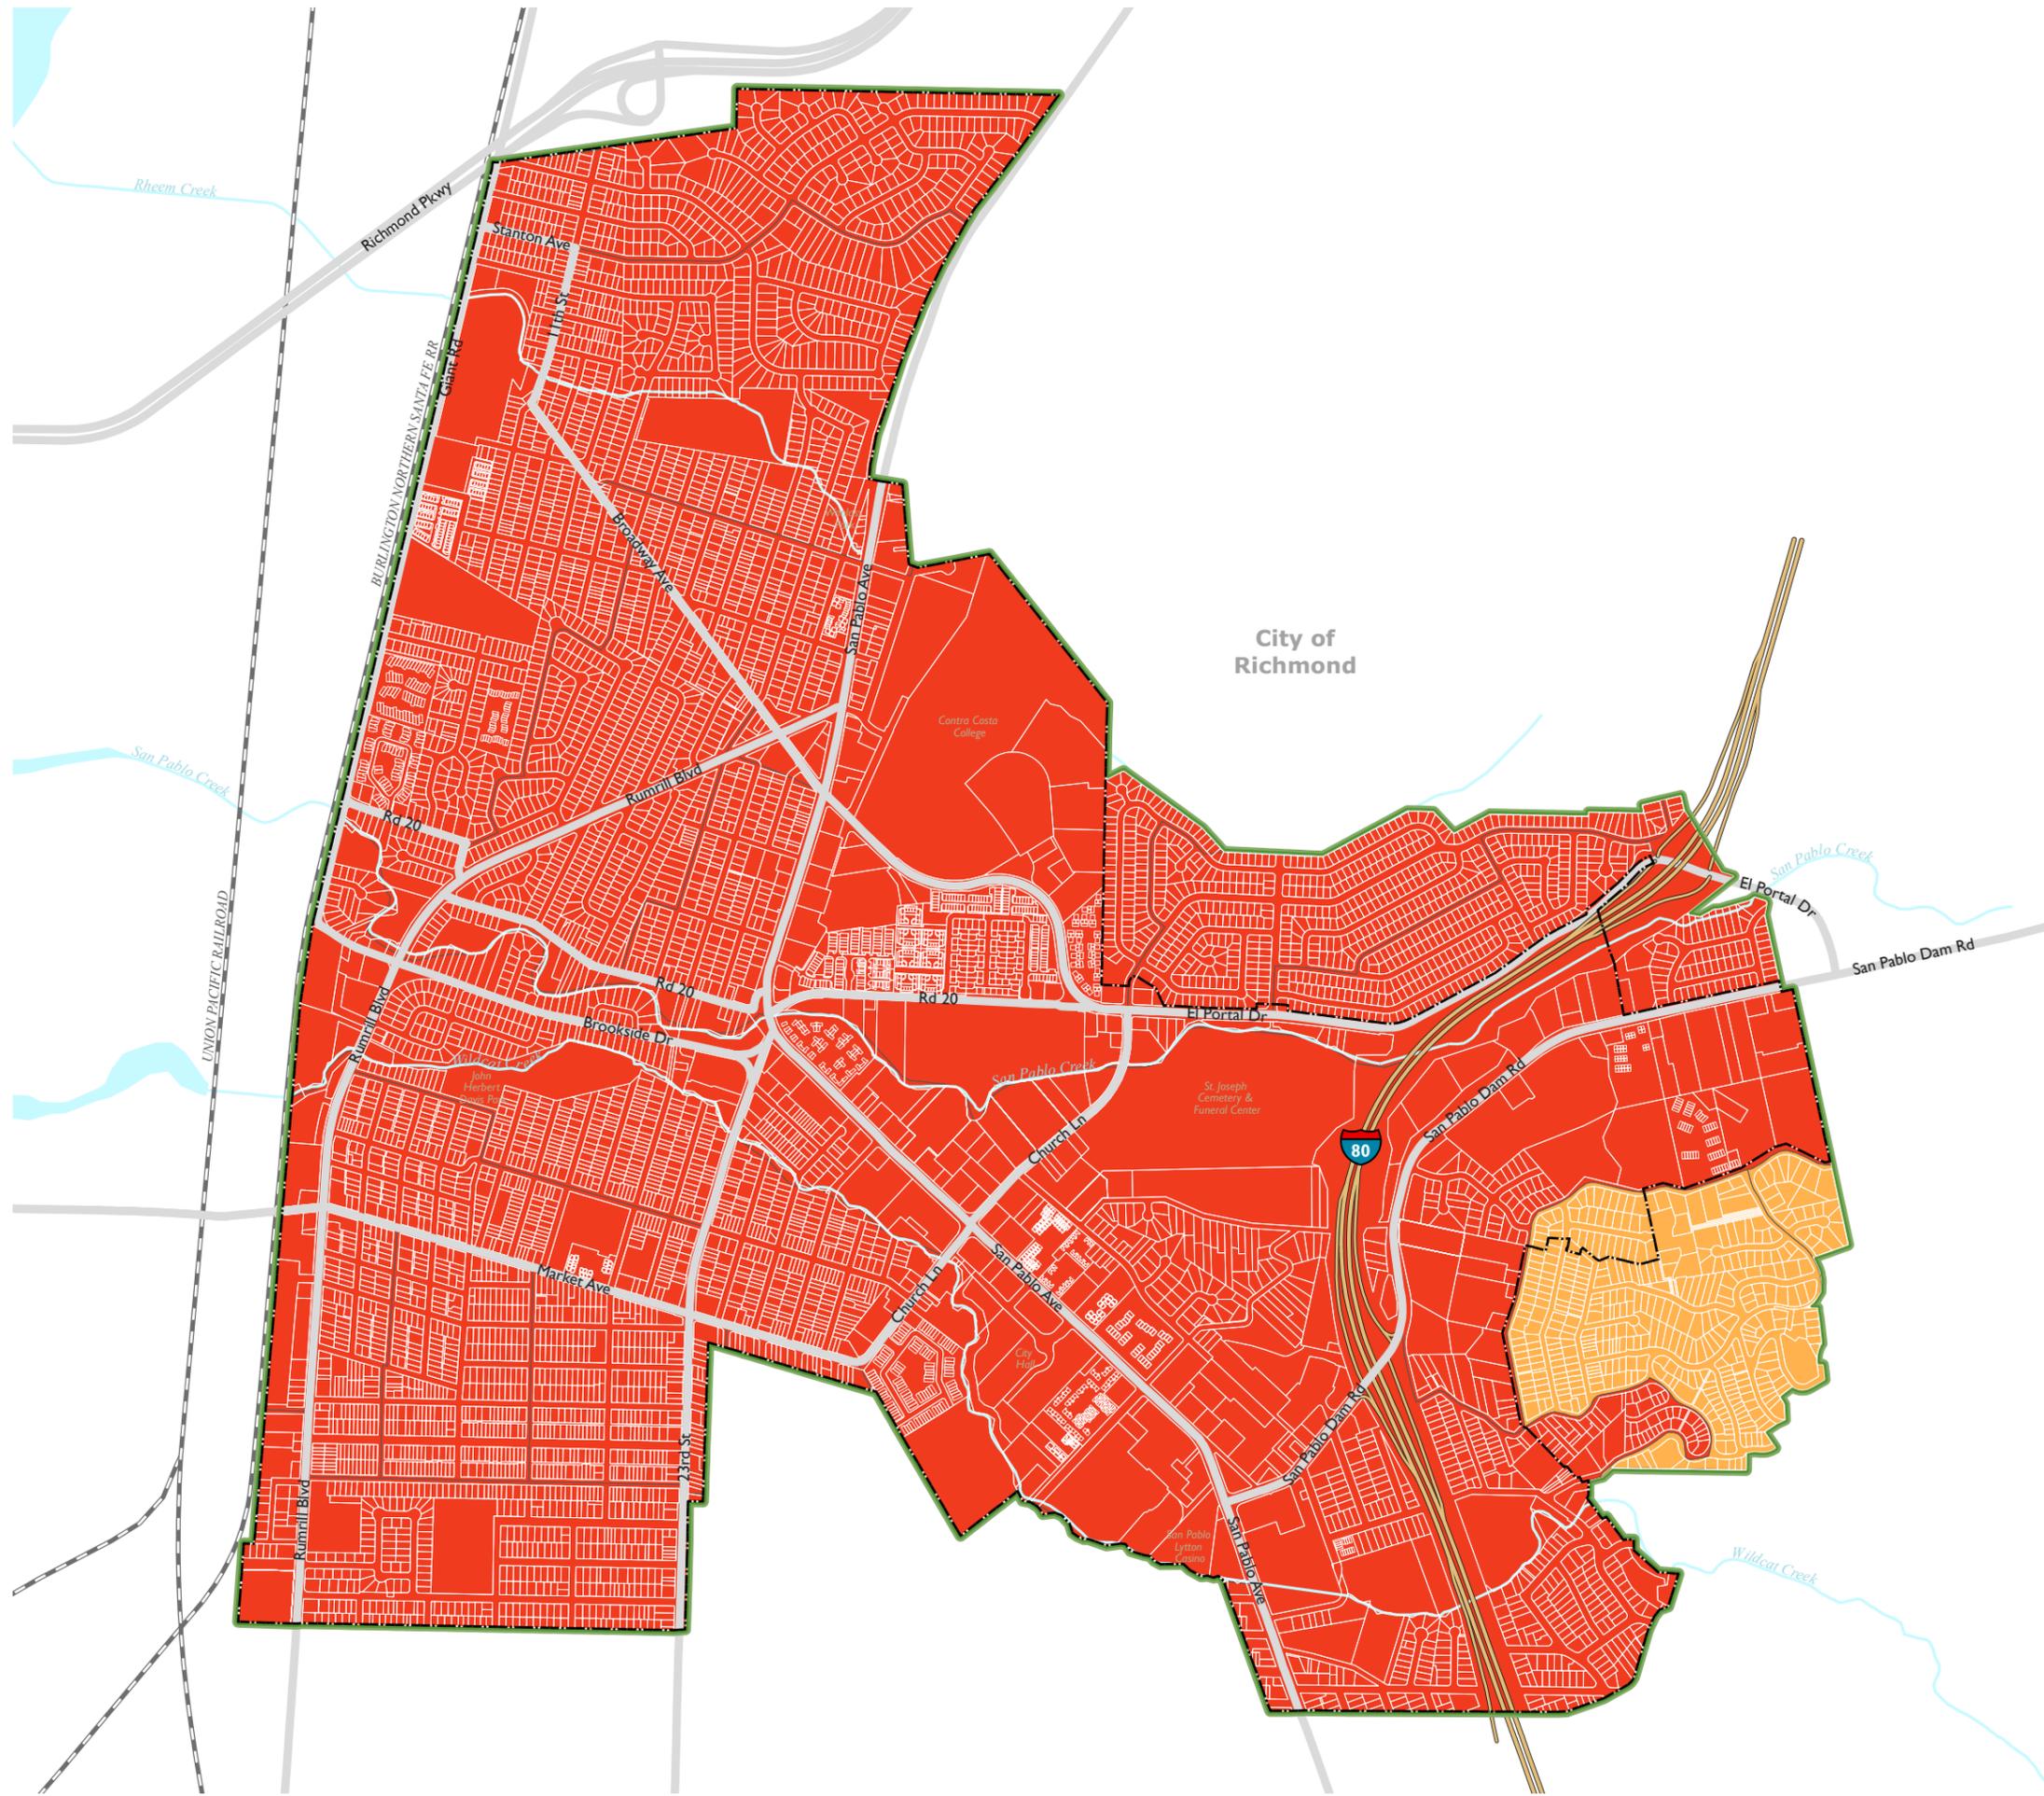

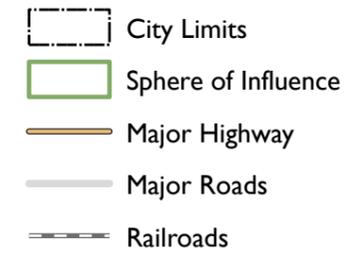

Source: U.S. Census Bureau, 2019 ACS Five-Year Estimates (Table S1701)

Despite relatively high levels of poverty in the city, overall rates have decreased between 2014 and 2019. As is shown in Figures 3-8 and 3-9, the poverty rate has decreased in the western and northern portions of the city, although it has remained relatively stable in the central portion of the city along San Pablo Avenue. In both years, no tract has consisted of higher than 30 percent of its population living below the poverty line. In 2019, most tracts saw between 10 and 20 percent of their population living below the poverty line while some areas saw between 20 and 30 percent.

D.3 Racially/Ethnically Concentrated Areas of Poverty and Affluence

To assist communities in identifying racially or ethnically concentrated areas of poverty (R/ECAPs), HUD has developed a census tract-based definition: R/ECAPs must have a non-white population of 50 percent or more, and the poverty rate must exceed 40 percent or be three or more times the average tract poverty rate for the metropolitan/micropolitan area, whichever threshold is lower. According to HUD estimates provided by HCD, during the 2009-2013 period there were no R/ECAPs in San Pablo. Further, based on 2019 ACS estimates there were still no R/ECAPs in the city. However, as seen in Figure 3-10, as of 2019 there are a few R/ECAPs in the region surrounding the city, including in East Bay cities like Albany and Berkeley.

While there is no standard definition for Racially/Ethnically Concentrated Areas of Affluence (RCAAs) provided by either HUD or HCD, they are generally considered to be areas with high concentrations of wealthy, non-Hispanic white residents. An article by Edward G. Goetz, et al. published in HUD's *Cityscape* journal defines an RCAA as a "census tract in which 80 percent or more of the population is White and has a median income of at least \$125,000."⁴ Figure 3-10 displays the locations of RCAAs under this definition; while there are no RCAAs in the city, there are a number located across the San Francisco Bay in Marin County, including along the Tiburon Peninsula.

While there are no R/ECAPs under the official definition in San Pablo, all of West County could be considered one in context of the region. As noted previously, 76.2 percent of West Contra Costa CCD is comprised of a population considered something other than non-Hispanic white. According to 2019 ACS estimates, about 11.6 percent of the population of this area lives under the poverty line. This is the second highest rate among CCDs in the county—only exceeded by the 15.6 percent seen in the Antioch-Pittsburg CCD—while the entire county experiences an 8.7 percent poverty rate. West County poverty rates are also higher than the average Bay Area poverty rate, which was about 8.5 percent in 2019 for the nine-county region according to ACS estimates.

As a result of West County's unique status in the Bay Area region, the City has developed several economic development programs to alleviate poverty. The City works in collaboration with the San Pablo Economic Development Corporation (SPEDC), whose mission to develop, diversify, and stabilize the local economy through workforce and business education and training. SPEDC offers workshops, trainings, and classes for businesses, entrepreneurs, and individuals. It also acts as a resource center for new businesses with owners located in San Pablo and provides ongoing support to existing businesses. SPEDC offers the Nano Revolving Loan Fund, which is designed to stimulate economic growth in west Contra Cost County through lending small businesses the capital they need. In addition to support for small businesses, SPEDC also provides workforce development services. They provide grant funding for qualified city residents to enroll in career training for construction and carpentry, information technology, barbering, and commercial driver's licensing. In partnership with Contra Costa College, SPEDC awards financial aid covering 50 percent of enrollment fees, books, and

⁴ Edward G. Goetz, et al. "Racially Concentrated Areas of Affluence: A Preliminary Investigation" (*Cityscape*, Vol. 21 No. 1, 2019), pp. 99-123.

supplies, along with childcare funding, for San Pablo residents enrolled in “Career Technical Education” programs at the College. SPEDC also administers the Removing Barriers Job Readiness program, which is a comprehensive support service aiming to prepare the workforce for careers that pay a progressive wage and benefits. Services under the Removing Barriers program include subsidized childcare, job readiness and financial literacy workshops, free professional clothing, and low-cost tattoo removal. Further, SPEDC offers support for utilizing the Workforce Initiative Subsidy for Homeownership (WISH) program, offered through the Federal Home Loan Bank of San Francisco. Over the course of the COVID-19 pandemic, SPEDC pivoted to include food and housing security, as well as ensuring personal protective equipment and meals reached first responders and essential workers. They also expanded their training to include COVID-19 awareness through the Teamster’s Trust.

D.4 Disparities in Access to Opportunity

To help quantify access to opportunity within a jurisdiction, HCD and TCAC convened in the California Fair Housing Task Force to “provide research, evidence-based policy recommendations, and other strategic recommendations to HCD and other related state agencies/departments to further the fair housing goals (as defined by HCD).” The Task Force developed a series of Opportunity Maps to determine areas with the highest and lowest resources by census tract. Highest resource tracts are the top 20 percent of census tracts with the highest index scores relative to the region, while high resource tracts are the next 20 percent. The remaining tracts are then evenly divided into the low resource and moderate resource categories. Index scores are compiled by domain, as outlined in Table 3-6 below. The economic, environmental and education domains were further aggregated to create a composite index, which determines each tract’s resource level.

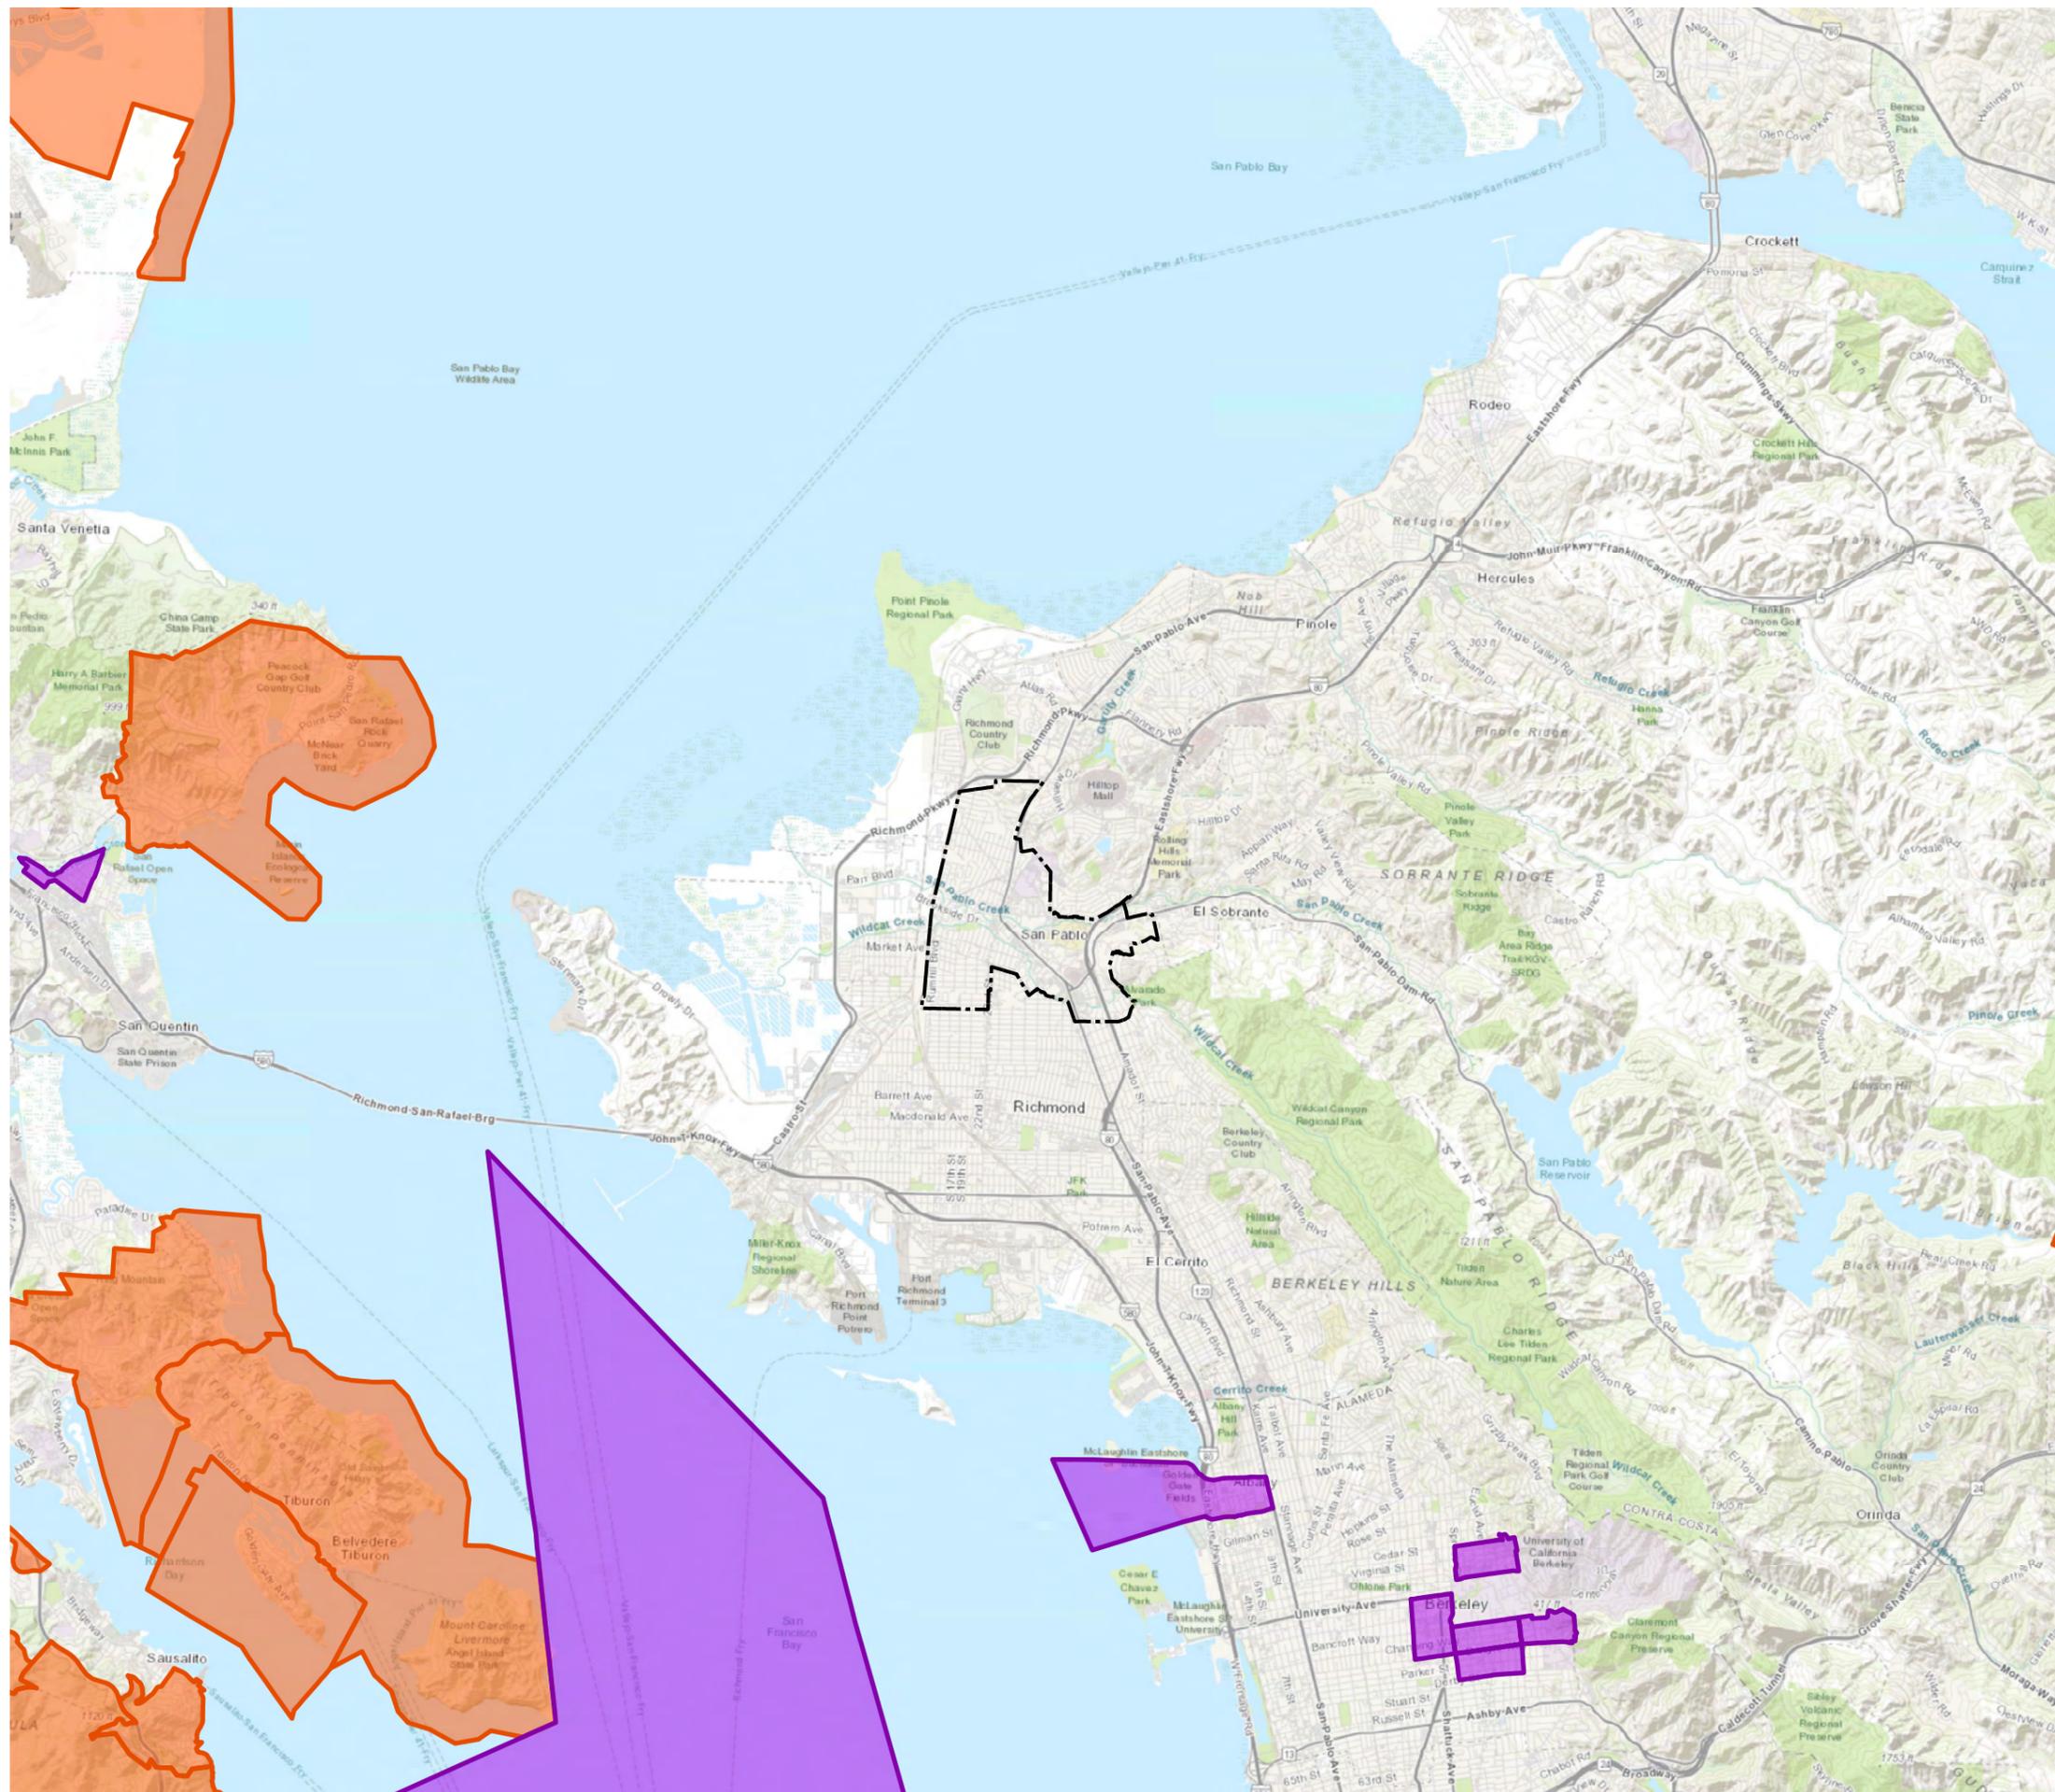

Table 3-6: Domain and Indicators for HCD/TCAC Opportunity Maps

<i>Domain</i>	<i>Indicator</i>
Economic	Poverty Adult Education Employment Job Proximity Median Home Value
Environmental	CalEnviroScreen 3.0 indicators
Education	Math Proficiency Reading Proficiency High School Graduation Rates Student Poverty Rate
Filter	Poverty and Racial Segregation

Source: California Fair Housing Task Force, Methodology for the 2021 TCAC/HCD Opportunity Map, December 2020

Understanding disparities in access to opportunity within a community requires an assessment of the regional as well as the local context. The following section provides a summary of regional opportunity and opportunity in San Pablo. Citywide opportunity is broken down into the distinct categories of educational, economic, and environmental opportunity based on metrics provided by HCD.

SAN PABLO GENERAL PLAN UPDATE
Figure 3-10: Locations of Racially/Ethnically Concentrated Areas of Poverty (R/ECAPs) and Racially Concentrated Areas of Affluence (RCAAs), 2019

- Racially/Ethnically Concentrated Areas of Poverty (R/ECAP)

City Limits

SOURCE: HCD AFFH Data and Mapping Resources - ACS, 2015-2019; City of San Pablo, 2021; Contra Costa County GIS, 2021; Dyett & Bhatia, 2021

REGIONAL CONTEXT

The 2020-2025 AI explores the distribution of five types of opportunity: educational, employment, transportation, access to low poverty neighborhoods, and access to environmentally healthy neighborhoods. Analysis is based on indices provided by the HUD AFFH tool. The higher the index score, the better an area's access to opportunity. The indices are defined as follows:

- Environmental Health — Summarizes potential exposure to harmful toxins at a neighborhood level.
- Jobs Proximity — Quantifies the accessibility of a given residential neighborhood as a function of its distance to all job locations within a Core Based Statistical Area (CBSA).
- Labor Market — Provides a summary description of the relative intensity of labor market engagement and human capital in a neighborhood.
- Low Poverty — A measure of the degree of poverty in a neighborhood, at the Census tract level.
- Low Transportation Cost — Estimates of transportation costs for a family that meets the following description: a 3-person single-parent family with income at 50% of the median income for renters for the region.
- School Proficiency — School-level data on the performance of 4th grade students on state exams to describe which neighborhoods have high-performing elementary schools nearby and which are near lower performing schools.
- Transit — Trips taken by a family that meets the following description: a 3-person single-parent family with income at 50% of the median income for renters.

Chart 3-4 below shows index scores based on the July 2020 HUD data release. In Contra Costa County access to opportunity is generally highest for non-Hispanic white residents. Residents who identify as Hispanic or non-Hispanic Black, on the other hand, have the lowest access to opportunity while non-Hispanic Asians and Pacific Islanders as well as non-Hispanic Native Americans live in a wider variety of neighborhoods. The major exception to this is the relatively low transit index scores of non-Hispanic white residents. This trend is like that seen in the wider San Francisco-Oakland-Hayward metropolitan area, although the county typically experiences lower index values. Similar patterns are evident for the total population and those that live below the poverty line, as shown in Chart 3-5.

The indices are a useful tool to gauge opportunity at regional scale, but they do not identify opportunity by geographic distribution. Based on the 2021 TCAC Opportunity Areas composite score, as shown in Figure 3-11, access to opportunity is lowest in West County and northeastern sections of the county—including the cities of San Pablo, Richmond, Pittsburg, and Antioch—and highest in the central section of the county—including cities like Walnut Creek and Lafayette. San Pablo is situated within a sub-regional low resource zone of an otherwise moderate to high resource county.

SOURCE: HCD AFFH Data and Mapping Resources - HCD & TCAC Opportunity Areas Mapping Analysis, 2021; City of San Pablo, 2021; Contra Costa County GIS, 2021; Dyett & Bhatia, 2021

LOCAL CONTEXT

According to the 2021 TCAC Opportunity Areas composite score (see Figure 3-12), all tracts in San Pablo are classified as low resource. As seen in Figure 3-11, this is typical of cities in West County, including the neighboring cities of Richmond, El Sobrante, and Pinole. Higher resource areas are located to the east of San Pablo in central and east county, as well as to the south in El Cerrito and the East Bay cities of Albany and Berkeley.

Economic Opportunity

The 2021 TCAC Opportunity Areas economic score, presented in Figure 3-13, summarizes access to economic opportunity in San Pablo. Like the composite score, the city experiences lower economic outcomes than other Bay Area communities, although there is a small portion outside of the City limit but within the City's sphere of influence with slightly more positive economic outcomes. Low access to economic opportunity is present in other cities that border San Pablo in West County, although some portions of Richmond in the south have slightly more positive outcomes.

San Pablo is a geographically small city with somewhat limited employment options. While most residents travel outside of the city for work, about 1,018 jobs were added in the city between 2010 and 2019 (20.5 percent increase), according to the U.S. Census Bureau Longitudinal Employer-Household Dynamics program. Economic development is a priority for the City, and there are a number of local strengths to build on. This includes the San Pablo Lytton Casino as well as Contra Costa College. Further, despite the closure of Doctor's Medical Center in 2015—which was previously the city's top employer—San Pablo remains strong in the healthcare and social services industry. While Casino and hospitality-related jobs are typically low paying and relatively low-skilled, they provide an important source of local employment. Employment with the College and health care sector tends to be better paid with relatively high-skilled jobs. Additionally, the city is well located within the Bay Area, with good connections to the regional road network and relatively easy access to the Richmond Bay Area Rapid Transit (BART) station and Richmond Ferry Terminal.

The City of San Pablo Economic Development Department works with other City departments, Local Successor Agency staff, economic development consultants, the SPEDC, the San Pablo Merchants Association, the San Pablo Chamber of Commerce, and other agencies and non-profits to develop partnerships and leverage resources to the benefit of San Pablo residents. Ongoing economic development efforts are discussed in detail above in the *Racially/Ethnically Concentrated Areas of Poverty and Affluence* section. Further, existing Priority Development Areas (PDAs) in the city provide a springboard for future economic development and grant access to additional resources for the city. This includes the San Pablo Avenue and 23rd Street corridors, as well as Rumrill Boulevard. Future development in these PDAs will greatly increase access to economic opportunity in San Pablo.

Educational Opportunity

The 2021 TCAC Opportunity Areas education score, which quantifies access to educational opportunity, is provided Figure 3-14. Like at the composite score and economic opportunity index, San Pablo experiences lower levels of educational opportunity throughout the city, as compared to other portions of the Bay Area. This reflects patterns seen in neighboring jurisdictions—less positive educational outcomes in Richmond and other West County cities and more positive educational

outcomes in central and eastern Contra Costa County as well as in El Cerrito and the East Bay cities of Albany and Berkeley.

The West Contra Costa Unified School District (WCCUSD) provides public elementary, middle, and high school education to San Pablo residents. The WCCUSD is currently in the process of updating its Long-Range Facilities Master Plan, last approved in 2016. The updated Master Plan is expected to address changes in teaching and learning, District operations, and the implications of COVID-19 for future learning needs. Most San Pablo schools are currently running under capacity. Table 3-7 summarizes test score results from the 2018-2019 Smarter Balanced assessments of math and English language arts (ELA), which forms part of the State's California Assessment of Student Performance and Progress (CAASPP). The proportion of students who meet or exceed standards in ELA or math is lower in WCCUSD than in the county or State. However, there is no geographic discrepancy within San Pablo, and WCCUSD is implementing programs such as the Expanded Learning Program, the Parent Efficacy Trainer of Trainer (ToT) Model, and English learner programs to improve student performance.

Table 3-7: CAASPP Smarter Balanced Test Results, 2018-2019

<i>District/Region</i>	<i>Percent Met or Exceeded Standard</i>	
	<i>English Language Arts</i>	<i>Mathematics</i>
State of California	51.10%	39.73%
Contra Costa County	54.64%	44.32%
West Contra Costa Unified School District	35.16%	23.94%

Source: California Department of Education, CAASPP, Smarter Balanced Summative Assessments, 2018-2019

Located east of San Pablo Avenue in the northern portion of San Pablo, Contra Costa College provides college-level education and attracts students from all over the county. The campus encompasses 23 buildings on 83 acres of land. In fall 2018, the College enrolled 7,263 students, an increase of 338 students from fall 2014. The College does not have dormitory facilities, and all students arrange their own housing. However, a 1.5-acre site located on a triangle of land surrounded by Rumrill Boulevard, Broadway Avenue, and San Pablo Avenue has been proposed as a mixed-use project with upper floors dedicated to housing for international students at the College. However, no entity currently has a proposal for the development of this site. Recent expansions and upgrades to the College include the opening of a new College Center building in 2016, renovations to the Applied Arts Building in 2018, and the rebuilding of the campus Safety Center in 2018. Currently under construction are a new science building and a remodeled physical education and athletic facilities.

Compared to Richmond and Contra Costa County, San Pablo has a smaller share of residents with high levels of educational attainment. According to 2019 ACS estimates, 13.1 percent of San Pablo residents over 25 have a bachelor's degree or higher (i.e. graduate or professional degree), compared to 28.2 percent of Richmond residents and 42.4 percent of county residents.

Environmental Opportunity

Environmental opportunity quantifies the extent of environmental quality in a neighborhood, which can have a major impact on community health and quality of life. Figure 3-15 visualizes access to environmental opportunity in San Pablo based on indicators from CalEnviroScreen 3.0 as compiled by TCAC. Contrary to the trends apparent in other opportunity metrics, San Pablo experiences more positive environmental outcomes. The most positive outcomes are seen in the southern and central portions of the city. In the local areas bordering the city, more positive environmental outcomes are generally located along the borders of East Bay regional parks and protected space, like the Wildcat Canyon Regional Park. In Richmond and other East Bay cities adjacent to the San Francisco Bay, less positive environmental outcomes are evident in tracts located along the waterfront.

D.5 Disproportionate Housing Needs & Displacement Risk

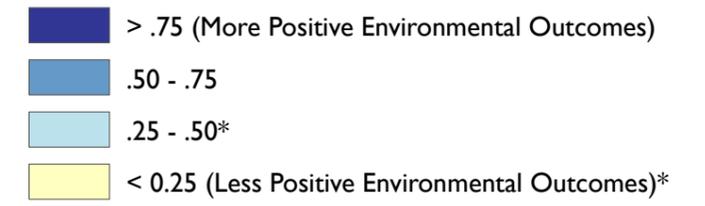

According to HCD’s AFFH Guidance Memo, disproportionate housing need “generally refers to a condition in which there are significant disparities in the proportion of members of a protected class experiencing a category of housing need when compared to the proportion of members of any other relevant groups, or the total population experiencing that category of housing need in the applicable geographic area.” Consistent with HCD guidance, this analysis evaluates disproportionate housing need in San Pablo through the assessment of cost burden, overcrowding, and displacement risk.

At the regional level, according to the 2020-2025 AI, a significant percentage of residents throughout the county experience some form of housing need. This includes relatively high levels of cost burden, overcrowding, and incomplete kitchen or plumbing facilities. Based on that analysis, Hispanic and Black residents are particularly prone to experience severe housing problems, including in San Pablo, Richmond, North Richmond, Hercules, Concord, Pittsburg, Antioch, and Oakley.

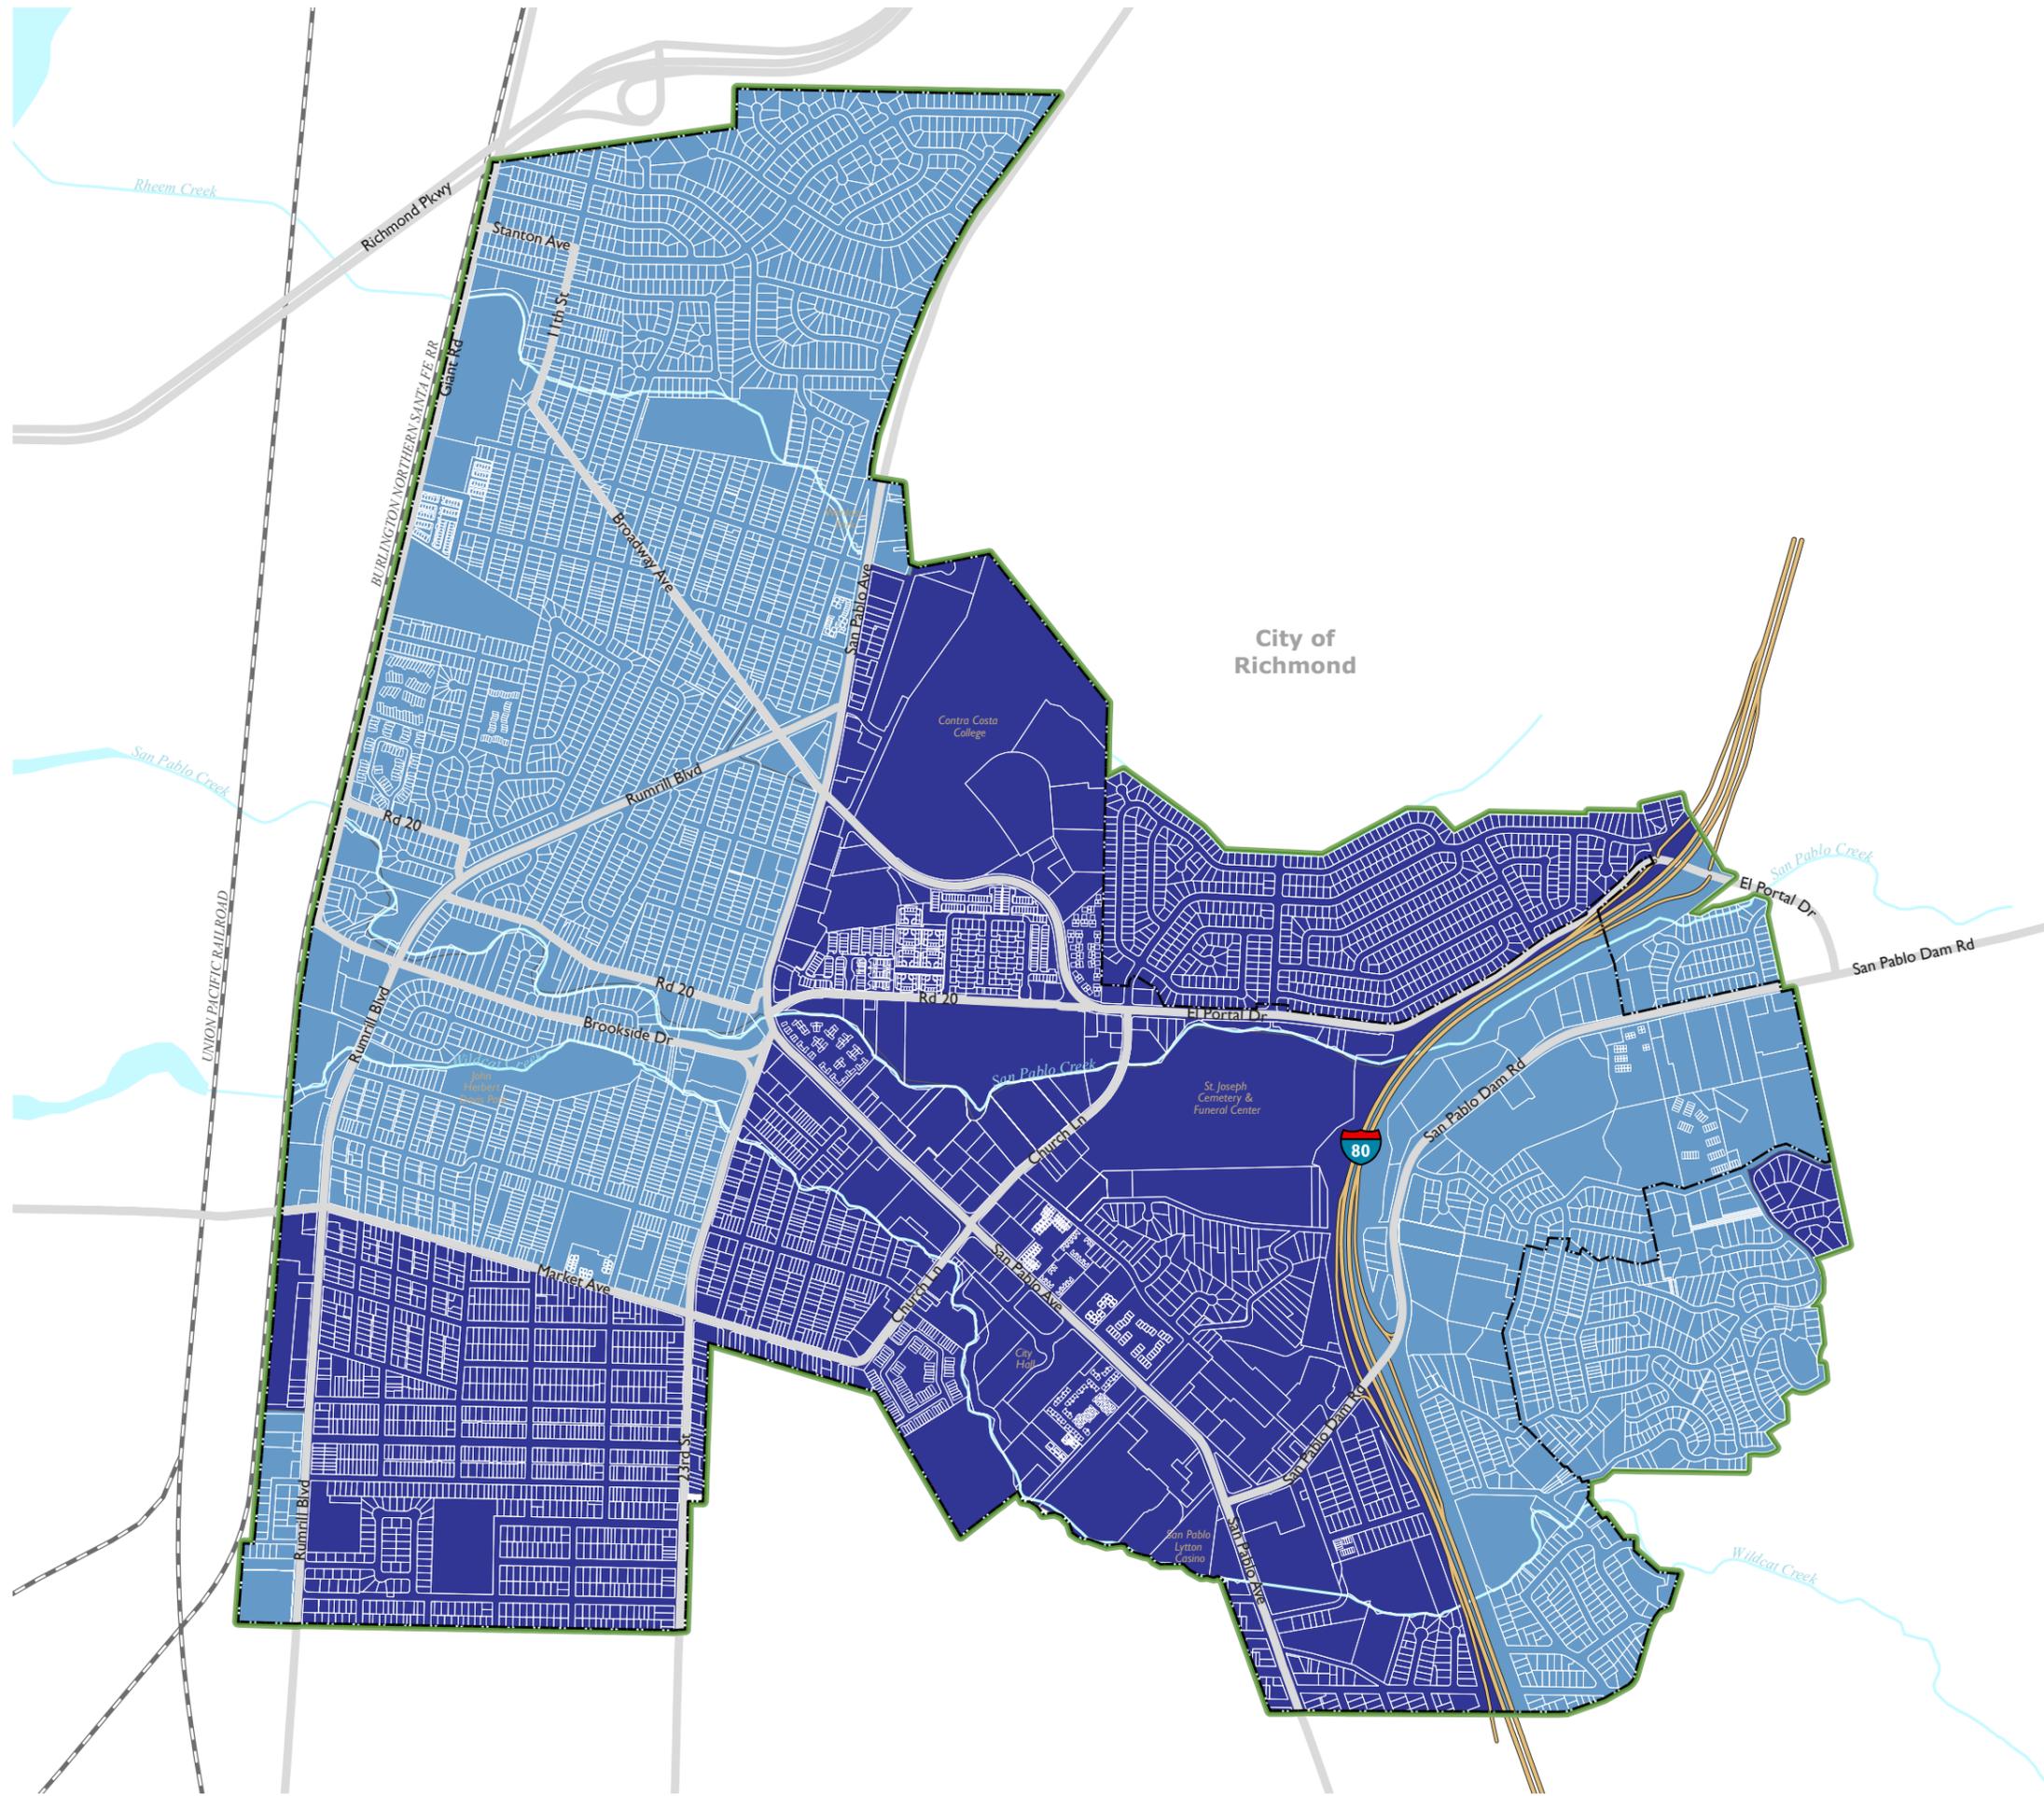

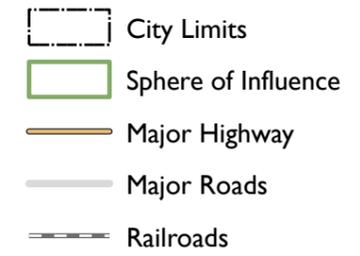

COST BURDEN

High rates of cost burden, as discussed in the Housing Needs Assessment Appendix, are prevalent in San Pablo. Nearly half of all households experience some level of cost burden, while lower-income households and renter-occupied households constitute the majority of all households experiencing cost burden. As Chart 3-6 demonstrates, rates of cost burden are also unevenly distributed by race and ethnicity. Most non-Hispanic Asian/Asian Pacific Islander (API), non-Hispanic white and Hispanic or Latinx households do not experience cost burden, while most non-Hispanic Black or African American, non-Hispanic AIAN, and non-Hispanic other or multiple race households do experience cost burden. Non-Hispanic AIAN households face particularly high levels of cost burden (77.3 percent), and non-Hispanic Black or African American households face the highest levels of severe cost burden (30.1 percent).

SAN PABLO GENERAL PLAN UPDATE
 Figure 3-15: TCAC Opportunity Areas –
 Environmental Score

SOURCE: HCD AFFH Data and Mapping Resources - HCD & TCAC Opportunity Areas Mapping Analysis, 2021; City of San Pablo, 2021; Contra Costa County GIS, 2021; Dyett & Bhatia, 2021

In addition to racial/ethnic disparities, cost burden is unevenly distributed by geographic location in the city. Figure 3-16 displays the concentration of homeowner cost burden – the highest share of cost burdened owner-occupied households is in the southwestern portion of the city. The area west of San Pablo Avenue, south of Broadway Avenue, and along Rumrill Boulevard also has a relatively high concentration of cost burden. In most of the city, however, the share of cost burdened homeowners is between 20 percent and 40 percent. Figure 3-17 shows slightly different patterns for renter cost burden. While the southwestern portion of the city also has higher proportions of cost burdened renters, the central portion of the city also maintains a relatively high share. In both areas, between 60 percent and 80 percent of renters experience cost burden. The lowest shares of renter cost burden are found east of the Interstate 80 (I-80) freeway.

Chart 3-6: Cost Burden by Race/Ethnicity in San Pablo

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release)

OVERCROWDING

Rates of overcrowding are much higher in the city than in the county or region, are discussed in the Housing Needs Assessment Appendix. While about 17.0 percent of housing units in San Pablo are considered overcrowded, only 5.0 percent of the county’s units and 6.9 percent of the Bay Area’s units are. Groups that experience relatively high rates of overcrowding include renters, both lower-income households and some higher-income households, Hispanic or Latinx households, and other race or multiple race households. Through the AFFH Data and Mapping Resources tool, HCD has also provided geographic overcrowding data compiled by the California Health and Human Services Agency (CHHS). Figure 3-18 shows that tracts with an overconcentration of overcrowded housing are located in the area north of Market Avenue and west of 23rd Street, as well as the southwestern corner of the city along Rumrill Boulevard. There is high opportunity for additional housing development in the Rumrill Boulevard and San Pablo Avenue areas, which may help to reduce overcrowding.

The lowest rates of overcrowding are apparent in the area east of the I-80 and the area surrounding Contra Costa College. Further, according to the online survey conducted for the AHS, about 34.0 percent of San Pablo residents either strongly disagreed or disagreed with the statement “My home provides sufficient living space for me and the members of my household.”

DISPLACEMENT RISK

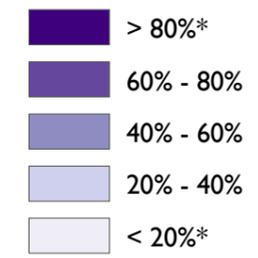

Gentrification pressures, including increased risk of displacement, are a central component of the Bay Area housing market. As the 2020-2025 AI notes, the displacement of residents is a major contributing factor to patterns of segregation both in Contra Costa County and in the broader Bay Area. Lower-income people of color displaced from other sectors of the Bay Area, like San Francisco and Oakland, are increasingly concentrating in East County communities like Antioch. Despite rising housing costs, much of the county remains relatively affordable and may be less prone to the displacement pressures faced elsewhere in the Bay Area region. West County cities like San Pablo are not experiencing as much of this outmigration but do continue to provide relatively affordable housing for a population that tends to be lower-income and proportionately less non-Hispanic white than elsewhere in the Bay Area.

However, in San Pablo—as discussed in the Housing Needs Assessment Appendix—an affordability gap exists for lower-income homeowners as well as extremely low-income renters. Although housing costs are comparatively low in the city, they have increased tremendously over the past several years. As housing costs increase, this gap may expand and subject lower-income households to displacement pressures that have otherwise been absent or relatively low in the city. Communities of color may be particularly impacted by this dynamic. UDP has provided “sensitive communities” typologies to quantify the risk of displacement within a community. Sensitive communities are those with populations vulnerable to displacement in the event of increased redevelopment and drastic shifts in housing cost. As is evidenced in Figure 3-19, every tract in the city is considered a sensitive community. The same is true for many of the census tracts in the neighboring city of Richmond.

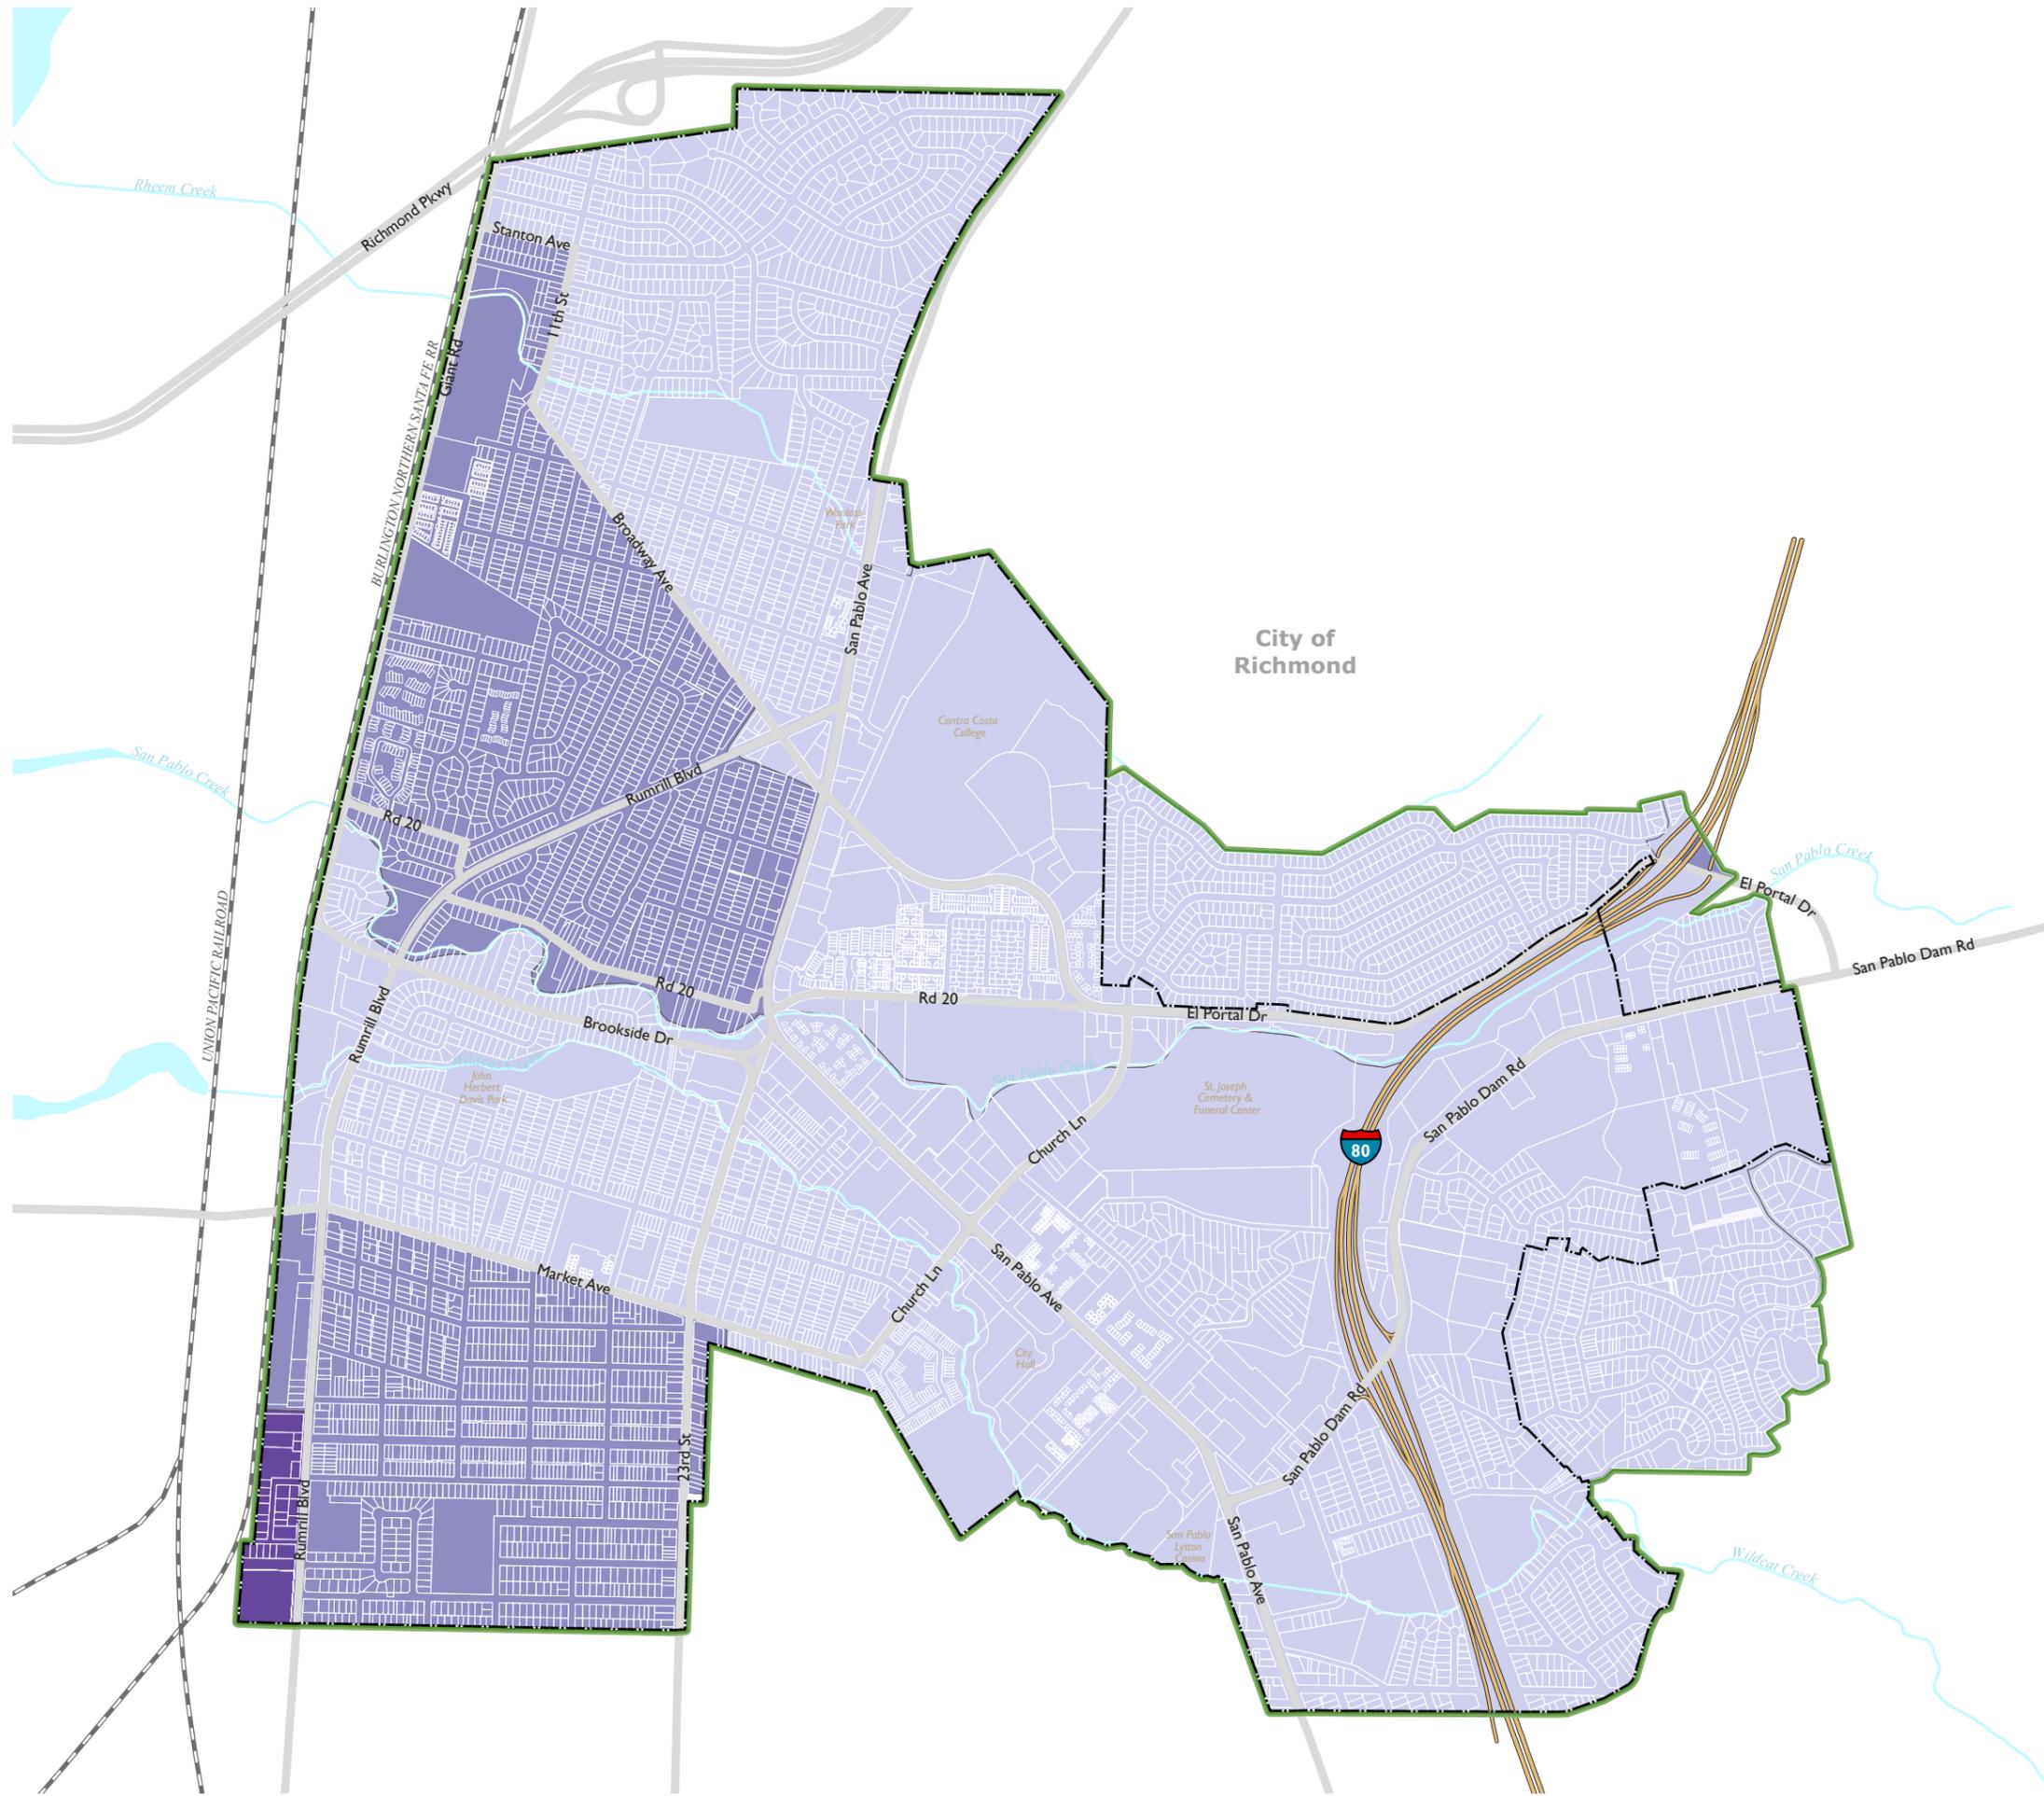

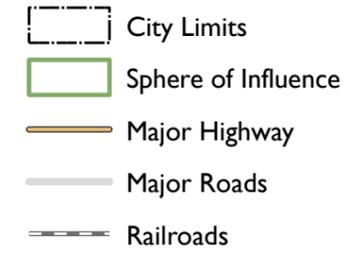

While the entire city may be considered a sensitive community, this can obscure the specific pressures that may be experienced across different neighborhoods in San Pablo. In addition to the sensitive communities typology, UDP has also produced displacement typologies that more precisely describe the risk of displacement based on 2018 ACS data. As shown in Figure 3-20, the area south of Market Avenue and between Rumrill Boulevard and 23rd Street is considered at risk of gentrification, as is the area along San Pablo Avenue from 23rd Street to the I-80. East of the I-80, this area is considered low-income/susceptible to displacement. Much of the northern portion of the city is not classified. None of the city is experiencing ongoing displacement or any of the more advanced forms of gentrification, both of which are consistently seen in other Bay Area cities like Oakland and San Francisco. Table 3-8 below provides the complete range of typologies and their defining criteria.

Further, all multifamily units in San Pablo are protected by the State’s Tenant Protections Act of 2019 (AB 1482), which includes an annual rent cap and just-cause protections. The City does not have any additional local rent stabilization or just-cause eviction policies in place. Counseling and legal tenant services are offered by nonprofit organizations such as Bay Area Legal Aid, which has an office in Richmond.

D.6 Summary and Conclusions

State law requires that jurisdictions identify fair housing issues as well as contributing factors and priority levels for each factor. Further, a jurisdiction must identify specific goals and actions it will take to reduce the severity of fair housing issues within that jurisdiction. This section fulfills these requirements based on the assessment provided above, as well as relevant information from the 202-2025 AI. Goals and actions related to AFFH are incorporated into the broader Housing Action Plan contained within Chapter 4 of this Housing Element.

San Pablo is a majority-minority community with a high degree of racial diversity across census tracts. While the city experiences relatively high rates of poverty, this has been steadily declining in recent years. Further, workforce development programs, offered through the SPEDC, have likely contributed to the city's significant job increase between 2010 and 2019. San Pablo home sales prices and rents are relatively affordable compared to other communities in the Bay Area; however, housing prices have increased significantly in recent years and the fair housing issues in the community relate to housing cost burden and risk of displacement. While there are no R/ECAPs in the city, San Pablo itself and West County can be considered one in the context of the wider region. There is also some evidence of racial/ethnic discrimination in lending services, as well as geographic concentrations based on familial status, income, and race/ethnicity.

Based on the findings of this assessment and relevant portions of the 2020-2025 AI, Table 3-9 presents a summary of existing fair issues and their contributing factors, as well as a description for each. Issues that are primarily related to environmental justice or economic development and do not have a direct bearing on fair housing will be addressed in the respective element of the General Plan update. Priority levels were assigned as follows:

- **High** – Designates contributing factors that limit or deny fair housing choice (i.e., has the potential to violate the Fair Housing Act).
- **Medium** – Designates contributing factors which should be addressed in the near term. These issues do not violate the Fair Housing Act but may increase fair housing issues in the city. These factors may be beyond the City's immediate capabilities to address.
- **Low** – Designates contributing factors that either do not need to be or cannot be addressed immediately by the City, but should be addressed later on during the eight-year planning period.

Table 3-9: Fair Housing Issues and Contributing Factors

<i>Fair Housing Issue</i>	<i>Description</i>	<i>Contributing Factor(s)</i>	<i>Priority Level</i>
Enforcement/Outreach	ECHO Housing does not have sufficient resources or capacity to meet fair housing needs in the county or the city.	<ul style="list-style-type: none"> Lack of fair housing resources and capacity 	HIGH
	A disproportionate share (67%) of all housing discrimination complaints in San Pablo are filed on the basis of disability.	<ul style="list-style-type: none"> Discriminatory real estate/rental practices Lack of public knowledge about State and federal fair housing law Lack of fair housing resources and capacity 	HIGH
	Lack of awareness of housing services among resident population.	<ul style="list-style-type: none"> Lack of fair housing resources and capacity Lack of public knowledge about affordable housing programs 	HIGH
	Higher than average rates of home loan denial for all people of color.	<ul style="list-style-type: none"> Lack of fair housing resources and capacity Discriminatory lending patterns 	HIGH
Overcrowding	Higher rates of overcrowding for renters (20.8%) and homeowners (11.0%) in San Pablo than county or Bay Area average. City policies to reduce overcrowding, especially for renters, are necessary.	<ul style="list-style-type: none"> Lack of housing units suitable for large families Income levels Cost burden 	MEDIUM
	Rates of overcrowding are also unevenly distributed by race/ethnicity, are particularly high in census tracts with concentrations of Latino populations.	<ul style="list-style-type: none"> Lack of housing units suitable for large families Income levels Cost burden 	MEDIUM

Table 3-9: Fair Housing Issues and Contributing Factors

<i>Fair Housing Issue</i>	<i>Description</i>	<i>Contributing Factor(s)</i>	<i>Priority Level</i>
Displacement Risk	Citywide, the community is sensitive to displacement pressures as rents rapidly rise and 57.4% of renter households are cost burdened. American Indian (77.3%) and African American (58.4%) households experience noticeably higher rates of cost burden than other groups and therefore higher risk of displacement. Lower-income households may be especially vulnerable to displacement pressures due to the housing affordability gap. However, displacement is not yet ongoing.	<ul style="list-style-type: none"> • Cost burden • Poverty/education levels • Preponderance of single-family housing • Affordability gap for lower-income households • Higher costs associated with property management companies • Lack of available HCVs 	MEDIUM
	Residents of the Rumrill Boulevard and 23rd Street areas are at risk of displacement, although displacement is not yet ongoing.	<ul style="list-style-type: none"> • Poverty levels • Cost burden • Likelihood of redevelopment 	MEDIUM
Concentration of Poverty	Poverty rates, although declining, remain relatively high in the city. There is an uneven distribution of poverty by race/ethnicity. At the regional scale, poverty is concentrated in San Pablo and neighboring West County communities. As there are no areas of privilege in the city, there is little the City can do to promote a better mix of incomes throughout the community. Therefore, this is primarily an environmental justice and economic development issue and will be addressed in the General Plan update.	<ul style="list-style-type: none"> • Aftereffects of the foreclosure crisis • Poverty/education levels • Preponderance of single-family housing 	MEDIUM
Segregation/Integration	While San Pablo is classified as a Higher Diversity community and general levels of racial/ethnic segregation remain low within the city, the city itself exists in a segregated sub-region of the county. This is primarily an environmental justice and economic development issue and will be addressed in the General Plan update.	<ul style="list-style-type: none"> • Some concentration of Latino residents in southwestern portion of the city • High rates of poverty • Discriminatory lending patterns 	MEDIUM

Table 3-9: Fair Housing Issues and Contributing Factors

<i>Fair Housing Issue</i>	<i>Description</i>	<i>Contributing Factor(s)</i>	<i>Priority Level</i>
	<p>Poverty rates are distributed unevenly between racial/ethnic groups. This includes higher rates of poverty for Black (14.6%) and Latino (61.3%) households than would be indicated by their share of the population, 10.8% and 60.8% respectively. This is primarily an environmental justice and economic development issue and will be addressed in the General Plan update.</p>	<ul style="list-style-type: none"> • High rates of poverty 	<p>MEDIUM</p>
	<p>Relative to the county, high concentrations of female-headed family households with children are apparent in San Pablo.</p>	<ul style="list-style-type: none"> • Regional concentration of female-headed households with children 	<p>MEDIUM</p>
	<p>A relatively high number of lower-income households are located in San Pablo when compared to the county.</p>	<ul style="list-style-type: none"> • Regional concentration of lower-income households • High rates of poverty 	<p>LOW</p>
<p>Access to Opportunity</p>	<p>Access to opportunity remains low throughout the city, which is similar to neighboring jurisdictions, although environmental opportunity remains high. This is primarily an environmental justice and economic development issue and will be addressed in the General Plan update.</p>	<ul style="list-style-type: none"> • Poverty/education levels 	<p>LOW</p>

Appendix E

Fifth Cycle Accomplishments

Housing Programs Progress Report This table describes progress of all programs in the City of San Pablo Fifth Cycle Housing Element, including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	2	3	4
Name of Program	Objective	Timeframe in H.E	Status of Program Implementation
Program H-1.1.1-Establish City Staff Work Priorities for Implementing Housing Element Programs	Identification of annual work priorities for housing	Annually; 2020-2021	Ongoing- Housing Element reviewed annually. The City of San Pablo initiated its efforts in securing funding and putting together a team to begin the General Plan and Housing Element update in the next year.
Program H-1.1.2-Review the Housing Element Annually	Review and monitor Housing Element implementation: submit Annual Report to HCD.	Annually	Ongoing - Submit APR to HCD and OPR. The SB 341 Annual Report regarding Successor Funds has been posted in the City's website.
Program H-1.2.1-Adopt Priority Procedures for Providing Water and Sewer Service to Affordable Housing Developments	Comply with Government Code Section 65589.7.	2015	Complying with Government Code Section 65589.7
Program H-1.2.2-Housing Coordination with Contra Costa County	Maximize annual subsidies available to San Pablo residents.	Ongoing	Ongoing - Staff coordinates with Contra Costa County Housing to review available funding opportunities, and monitors programs.
Program H-1.2.3-Work with Housing Developers (Non-Profit and For-Profit) on Housing	Outreach and involvement of non-profit and for-profit housing developers	Ongoing	The City works with both non-profit and for-profit developers about development opportunities to create more housing units
Program H.1.2.4-Lobby for Changes to State Law Requirements and Housing Funding	Work with other Contra Costa County jurisdictions and lobby for modifications to State law.	2020 and as needed	Ongoing.
Program H-1.3.1-Publicize and Provide Information on Housing Programs	Distribute educational materials at public locations and make public services announcements through different media at least two times a year.	2020 and update as needed	Ongoing. Information on available programs through the County is currently provided in City offices and on the City's website. The San Pablo Economic Development Corporation is promoting WISH - Workforce Initiative Subsidy Homeownership - a program to assist qualified first-time homebuyers make the transition from renting to owning. A second similar program SPLASH was adopted by City Council on November 16, 2020.
Program H-1.3.2-Undertake Community Outreach When Implementing Housing Element Programs	Conduct community outreach and distribute materials	Consistent with program timeframes	Ongoing. Information provided upon implementing programs.
Program H-1.3.3-Conduct Neighborhood Meetings	Early community involvement and discussion when housing developments are proposed.	Ongoing	Ongoing. As developments are proposed.
Program H-2.1.1-Provide Low Interest Loans for Housing Rehabilitation through the Contra Costa County Neighborhood Preservation Program.	Rehabilitation of 27 lower income units by 2023.	2015-2023	Ongoing. Information of the program provided to participants in the City's Residential Health and Safety program and at the City's public counters and website.

Housing Programs Progress Report This table describes progress of all programs in the City of San Pablo Fifth Cycle Housing Element, including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	2	3	4
Name of Program	Objective	Timeframe in H.E	Status of Program Implementation
Program H-2.1.2-Allow for Deferred Loans for Property Improvements	Provision of 10 deferred loans for property improvements.	2015-2023	Ongoing. Information on programs through Contra Costa County is provided to the public and through the City's Residential Health and Safety program as available
Program H-2.1.3-Provide Technical Assistance and Counseling for Rehabilitation Loans	Provision of technical assistance and referrals	Ongoing	Ongoing. Information on programs through Contra Costa County is provided to the public and through the City's Residential Health and Safety program as available.
Program H-2.2.1-Implement the Neighborhood Clean-Up Program	Reduce trash and improve the appearance of neighborhoods.	Annually	Ongoing. The City provides a dump voucher program, available to all residents, which reduces the cost of dump fees. Additionally, the City provides free dumpsters 6-8 days in the calendar year for use by San Pablo residents.
Program H-2.2.2-Implement the Motor Vehicle Abatement Program	650 abandoned vehicles tagged per year.	Ongoing	Ongoing. The City's Code Enforcement and Police Department implements the program consistently. For 2021, 436 abandoned vehicles were tagged. The number is lower for 2021 due to the safety measures taken during the COVID-19 pandemic.
Program H-2.2.3-Monitor Housing Conditions	Tracking of housing and neighborhood conditions to assist in identifying potential locations for neighborhood improvements.	2016, 2018, 2020, and 2022	Biannually. Program for 2021 and beyond. The Building Department and Code Enforcement Division continue to track and monitor housing that is in need of improvements.
Program H-2.2.4-Assist Contra Costa County with Implementing the Neighborhood Stabilization Program	Assistance for 5 lower income housing units.	2015-2023	Ongoing. Assistance provided to Contra Costa County as needed.
Program H-2.2.5-Assist CESC with Healthy Homes Program Implementation	Healthy Homes improvements for 5 lower income units.	2015-2023	Ongoing. Assistance provided as needed.
Program H-2.2.6-Assist Contra Costa County with Implementing Home Repair Programs	Repairs to 20 lower income homes.	2015-2023	Ongoing. Assistance provided to Contra Costa County as needed.
Program H-2.3.1-Inventory Potential Historically Significant Buildings	Mitigate potential impacts on historically significant buildings.	Ongoing	Inventory listed in the City's General Plan and updated as needed. Potential impacts monitored.
Program H-2.3.2-Preserve Archaeologically Significant Sites	Preservation of significant archaeological sites.	Ongoing	Ongoing.

Housing Programs Progress Report This table describes progress of all programs in the City of San Pablo Fifth Cycle Housing Element, including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	2	3	4
Name of Program	Objective	Timeframe in H.E	Status of Program Implementation
Program H-2.4.1-Inspect Rental Housing Units.	Inspect about 750 rental units per year.	2015-2023	Inspections are ongoing through the City's Residential Health and Safety Program. For 2021, the program was placed in a temporary suspension due to the COVID-19 pandemic. Safety measures were implemented and only absolute necessary inspections were performed. The program is up an running for the 2022 calendar year.
Program H-2.4.2-Inspect Owner-Occupied Housing	Inspect about 400 single-family, townhome, and condominium units per year.	2015-2023	Inspections are ongoing through the City's Building Division. For 2021, there were 1,966 individual inspections.
Program H-2.5.1-Coordinate Building Plans with the Police Department	Police Department review of development proposals.	Ongoing	Major development plans and landuse applications are routed to the Police Department for review and comment.
Program H-3.1.1-Provide Density Bonuses and Incentives for Affordable and Special Needs Housing.	Incentives for affordable housing to be built.	2015 and Ongoing	Ongoing. The City provides Density Bonuses per state regulations and the City's adopted ordinance.
Program H-3.1.2-Preserve At Risk Affordable Rental Units	Preserve all at-risk units.	Annual Monitoring	The City monitors threats to affordable rental units, and has adopted a multi-family overlay district to assist in maintaining potential at-risk rental units.
Program H-3.1.3-Promote Contra Costa County's Mortgage Credit Certificate Program	Subsidy for 10 first-time homebuyers.	2015-2023	Ongoing support of the program.
Program H-3.1.4-Strive to Replace Housing	Replacement of affordable housing units.	2015-2023	Ongoing.
Program H-3.1.5-Enact Inclusionary Housing Requirements	Construction of affordable housing units as part of new development	In 2020	The City began working with Developers for potential affordable housing projects that will be in construction in the next couple of years. An affordable housing project of 54 units was entitled during this reporting period and a future affordable housing projects will be the redevelopment of the old City Hall site with 100+ units.
Program H-3.1.6-Facilitate Affordable Rental and Cooperative Family Housing Opportunities	Provision of affordable housing with support services.	Ongoing	Ongoing.
Program H-3.1.7-Provide Information and Promote Rental Assistance Programs	Continued availability of rental housing vouchers for San Pablo residents	Anually	Ongoing

<p align="center">Housing Programs Progress Report</p> <p align="center">This table describes progress of all programs in the City of San Pablo Fifth Cycle Housing Element, including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.</p>			
1	2	3	4
Name of Program	Objective	Timeframe in H.E	Status of Program Implementation
Program H-3.2.1-Update the Zoning Ordinance to Implement Land-Use Designations	Consistency of the Zoning Ordinance with the San Pablo General Plan 2030.	In 2015	An updated Zoning Ordinance was updated and adopted May 18, 2015. Additionally, staff began working on the General Plan and Housing Element updates and secured SB2 funding and LEAP funding to assist with these efforts.
Program H-3.2.2-Promote Mixed Commercial/Residential Development	Development of mixed commercial/residential sites in the Mixed Use Center, Commercial Mixed Use and Residential Mixed Use areas.	In 2016	The City continues to promote mixed use development through the various mixed use zoning ordinances and specific plans.
Program H-3.2.3-Maintain an Inventory of Available Sites for Housing.	Listing of potential sites for housing.	Ongoing	The City continues to maintain an inventory of available sites for housing as identified in Appendix A of the 2015-2023 City of San Pablo Housing Element.
Program H-3.2.4-Facilitate Lot Consolidation	Creation of lot consolidation opportunities and increased housing development in support of the General Plan 2030.	Ongoing	Ongoing. The City continues to investigate opportunities to consolidate lots to increase housing development.
Program H-3.2.5-Reduce Parking Requirements Along San Pablo Avenue Near Transit	Parking incentives for new residential development in support of the General Plan 2030.	Ongoing	Reduced parking requirements are adopted as part of the Plaza San Pablo mixed use regulating code and have been applied throughout the development. No parking is required for new accessory dwelling units within 1/2 half mile of a bus stop pursuant to recently adopted state law on accessory dwelling units.
Program H-3.2.6-Reduce Parking Standards for Multi-Family and Mixed-Use Housing	Parking incentives for new residential development in support of the General Plan 2030	In 2015	Ongoing.
Program H-3.3.1-Promote Second Units	20 new secondary dwelling units by 2023 (about 2 per year; 10 extremely low income, 5 very low income, and 5 low income).	2015-2023	The City continues to support construction of secondary residential units and adopted a new Accessory Dwelling Unit Ordinance consistent with State legislation. Building permits were issued for 14 units 2021.
Program H-3.3.2-Promote the Development of Single Room Occupancy and Efficiency Units.	10 new SRO extremely low-income units by 2023.	In 2017	Research for future projects. Single-Room Occupancy are regulated by Zoning Ordinance Section 17.60.090.
